Introduction

By
Karl V. Krombein,
Paul D. Hurd, Jr.,
and
David R. Smith

This catalog, which is an outgrowth of the highly successful Hymenoptera of America North of Mexico Synoptic Catalog (1951), including the first and second supplements (1958, 1967), provides simultaneously, by use of computer technology (Krombein, Mello and Crockett, 1974, Ent. Soc. Amer., Ann. 20:24-29), a printed version as well as a computer-queriable data base of the basic systematic, biological, and morphological information on the order Hymenoptera as it occurs in America north of Mexico. While the format of the present catalog closely parallels that of the original catalog, every effort has been made to increase the information content to fulfill better the needs of the biological community. This has been accomplished chiefly by the introduction of textbook prose at most higher category levels, by the presentation of explanatory or descriptive comments as appropriate, and by the inclusion of more complete listings of citations to taxonomic, biological, and morphological literature at all hierarchical levels together with parenthetical annotations concerning the content for many of these citations. Similarly, the data about hosts, parasites, prey, predators, and pollen sources are covered more fully than in the original catalog. Since these data have been reported in various ways and under differing names in the primary literature, an attempt has been made to organize this information and present it, usually, alphabetically even though sometimes such data have been recorded in the literature with scientific or vernacular names or both. Although many of these names have been checked for accuracy, no consistent attempt has been made to verify that the names agree with current usage or status. While those authors of zoological names are usually abbreviated in the citation of hosts, parasites, and the like, the authors of the scientific botanical names are not included. Elsewhere in the catalog, the last name of an author is cited in full, but without initials. Since the technology employed in the preparation of this catalog precluded the use of diacritical marks, these have been omitted and consequently. as in the case of the umlaut, a variant spelling has been substituted as appropriate.

The International Code of Zoological Nomenclature (1961) including the intent and preamble of the Code and of any pertinent opinions usually has been followed. Thus a name in current usage as deterimned by the code is employed, but mention is made, as appropriate, that an application is pending before the International Commission of Zoological Nomenclature.

An attempt has been made to record all the recent taxa, with their synonyms, described

from, or known to occur in, the political divisions of the conterminous United States, Canada, Alaska, and Greenland. Insofar as known, all species introduced from other countries and liberated in America north of Mexico for biological control purposes have been listed. Some of these have never been recovered and, apparently, were unsuccessful in establishing themselves. For each such species a statement has been included, following the distribution, that the species was liberated but did not become established.

As in the original catalog, the arrangement is systematic for species-groups and higher categories insofar as our present knowledge and the limitations of a linear arrangement permit. The generic and subgeneric concepts represented in this arrangement are based upon what are believed to be the correct typespecies. In each instance the type-species is cited together with the authority for the selection. Where designations of type-species have been found to be invalid under the International Code of Zoological Nomenclature, new type-species designations, believed to be valid, are given in the catalog. Generic synonymy is included under the generic headings except where subgenera are recognized, in which cases such synonymy is given under the subgeneric names, and references to revisional or other papers are listed under the appropriate higher category.

The arrangement of species within genera, subgenera, and species groups is alphabetical. Where subspecies are recognized, the subspecific names are placed in alphabetical order under the species to which they belong; and varieties are listed under the particular species or subspecies in which they were described. In each case the specific, subspecific, or infrasubspecific, name is followed by an indication of the known distribution, and by brief statements, as appropriate, of preferred habitats or the like, hosts, parasites, prey, predators, or pollen sources. Much of

this information on synonymy, distribution, ecology, hosts, parasites, prey, and so forth has not been published previously. The type localities are usually recorded for those forms that are known only from the localities where the type specimens were obtained. Otherwise the distribution is usually shown by states and provinces, or by other means such as life zones.

Since unquestionably a catalog is indispensable in the support of systematic and other biological research, no effort has been spared toward making this catalog as useful as possible to all of the scientific community interested in these fascinating insects.

LITERATURE COVERAGE

All authors have attempted to include all pertinent references to synonyms, revisions, taxonomy, biology, and morphology beginning with 1758, the publication date of the 10th edition of "Systema Naturae" by Linnaeus. The cut-off dates vary for the several sections of the catalog and are as follows: Symphyta through 1974;

Ichneumonoidea through 1976;

Chalcidoidea—Torymidae (except Agaoninae) and Encyrtidae through 1976; other families and Agaoninae through 1972;

Cynipoidea through 1972;

Evanioidea through 1976;

Pelecinoidea, Proctotrupoidea, and Ceraphronoidea through 1972:

Trigonaloidea through 1976;

Bethyloidea and Scolioidea through 1975;

Formicoidea through mid-1975;

Vespoidea, Pompiloidea, and Sphecoidea through 1975; and

Apoidea through 1976.

All authors have included some references subsequent to the dates listed above.

Abbreviations and Symbols

LITERATURE CITATIONS

The source for journal abbreviations is Whitlock, C., 1939, Abbreviations used in the Department of Agriculture for titles of publications, United States Department of Agriculture Miscellaneous Publication No. 337, 278 pages. Abbreviations for other titles and journals not found in Whitlock essentially follow the same format and abbreviations that she recommends, Book titles are usually shortened to omit irrelevant adjectives and include abbreviations, e.g.: Wheeler and Wheeler, 1963, The Ants of North Dakota, p. —, is cited as Wheeler and Wheeler, 1963. Ants of N. Dak., p. -. Certain lengthy nonserial titles are also abbreviated, e.g.: Say, 1824. In Keating, Narr. Long's 2nd Exped., v. 2 (App.), p. —, rather than Say, 1824, In Keating, Narrative of an Expedition to the Source of St. Peter's River, Lake Winnepeek etc. The titles are intended to be uniform throughout the catalog, but, in a work of this magnitude, there will naturally be some deviations. The abbreviations should be adequate to find the cited publication.

SYMBOLS AND ABBREVIATIONS

Certain symbols and abbreviations are frequently used in this catalog. Though there may be slight variations in some, they are generally as follows:

- (!)—lapsus or misspelling of a scientific name.
- " \circ " = \circ or " \circ " = \circ —incorrect sex determination.
- § (8 misdet.) or 8 (9 misdet.)—only one
 of the sexes described belongs to the species cataloged.
- ♀—female.
- ∂ —male.
- ♥ -worker.
- 4 -soldier.
- ab.—aberration.
- app.—appendix.
- cent.—central.

- changed status—used after a species-group name to indicate a rank different from that previously accorded to it; not necessarily the same as new status.
- desig.—designated; e.g., in type-species designation, "Desig. by Rohwer, 1911."
- e., east.—east, eastern.
- emend.-emendation.
- fasc.—fascicle.
- fig., figs.-figure, figures.
- h.—heft.
- n. comb.—new combination; used after a species-group name to indicate a new generic assignment.
- n. name—new name; used after a genusgroup or species-group name to indicate a substitute name for a homonym.
- N. name—New name; used after a bibliographic citation to indicate a previously proposed name.
- Nom. nud.-Nomen nudum.
- n. s.—new series.
- n. status—new status; used where a taxon is here accorded a rank different from that which it had previously.
- N. syn.—New synonymy; used to indicate a synonym newly proposed in this catalog.
- n., no., north.—north, northern.
- n.e., northeast.—northeast, northeastern.
- n.w., northwest.—northwest, northwestern.orig. desig.—original designation; used to indicate type-species designation.
- p., pp.—page, pages.
- pl., pls.--plate, plates.
- preocc.—preoccupied; used after a genusgroup or species-group name to indicate a homonym.
- pt.-part.
- revised status—revised status; used to denote a taxon that has been removed from synonymy.
- ser.—series.
- s., so., south .- south, southern.
- s.e., southeast.—southeast, southeastern.
- s.w., southwest.—southwest, southwestern.
- sp., spp.—species.
- ssp., sspp.—subspecies.

subg.-subgenus.

transcont.-transcontinental.

v., vol.—volume. var.—variety.

w., west.-west, western.

TAXONOMIC AND NOMENCLATURAL CHANGES

The catalog contains one undiagnosed new species in the Ichneumonidae, *Pterocormus clasma* Carlson, p. 521, proposed for the taxon misidentified as *Ichneumon canadensis* Cresson by Heinrich (1961).

The catalog contains one undiagnosed new

genus also in the Ichneumonidae, Woldstedtius Carlson, type-species Bassus biguttatus Gravenhorst, p. 719, proposed for Syrphoctonus Foerster seusu Dasch (1964).

The following new names are proposed to replace preoccupied names:

Tenthredinidae

Pachynematus gamus Smith for Pachynematus graminis Marlatt (1896)p. 58
Nematus attus Smith for Amauronematus dyari Marlatt (1896)p. 68
Amauronematus peralus Smith for Nematus pectoralis Cresson (1880)p. 80
Ichneumonidae
Oedomopsis davisi Carlson for Trophon? nasutus Cresson (1868)p. 366
Gelis cushmani Carlson for Hemiteles apantelis Cushman (1927)p. 405
Oresbius shumaginensis Carlson for Stiboscopus ferrugineus Ashmead (1902)p. 438
Pterocormus dionymus Carlson for Ichneumon anonymus Heinrich (1961)p. 522
Casinaria affinisima Carlson for Casinaria affinis Walley (1947)p. 635
Pteromalidae
Mesopolobus fuscipedes Burks for Platyterma fuscipes Ashmead (1896)p. 816
Eurytomidae
Harmolita ovatella Burks for Harmolita ovata Phillips and Emery (1919)p. 840
Eulophidae
Syntomosphyrum orgyiazele Burks for Tetrastichomyia orgyiae Girault (1916)p.1005
Diapriidae
Trichopria kiefferi Muesebeck for Diapria montana Kieffer (1906)p.1147
Scelionidae
Trimorus contractus Muesebeck for Gryon flavipes Ashmead (1893) p.1162
Ceraphronidae
Aphanogmus harringtoni Muesebeck for Aphanogmus salicicola Harrington (1899) p.1190
Megaspilidae
Deudrocerus obscurellus Muesebeck for Atritomus californicus Kieffer (1906)p.1194
Masaridae
Euparagia richardsi Bohart for Psiloglossa simplicipes Rohwer (1909)p.1470
Philanthidae
Cerceris bolingeriana Krombein for Cerceris bolingeri Scullen (1972)p.1730
Anthophoridae
Triepeolus mitchelli Hurd for Triepeolus sublunatus Mitchell (1962) p.2094

There are a number of other nomenclatural and taxonomic changes. These are considered of lesser bibliographic importance than the new names, so tabulations of them are deferred to Volume 3 which will also contain the indexes and a table of the number of

valid genera and species for each family and higher category. These nomenclatural and taxonomic changes are as follows:

A number of generic transfers are made. They are usually cited in the text as xantianum (Saussure), n. comb. The authority responsible for the transfer is the author of that section unless the name of another specialist is included.

There are also a number of instances where a taxon formerly considered to be a species is treated here as a subspecies of another taxon, or where a taxon formerly considered to be a subspecies is now raised to specific rank. The authority responsible for the change is the author of that section unless the name of another specialist is included. These are usually cited in the text as clavatum johannis (Richards), n. status or alba Rohwer, n. status.

The words—changed status—occasionally follow the author of a species-group name. This indicates that the taxon has a rank

different from that accorded it elsewhere. It is not the same as new status for it reflects a change which has already been published.

In a few taxa, the words—revised status—follow the author of a species-group name. This denotes a taxon which has been removed from synonymy.

There are a few new synonyms at the genus-group level and numerous new synonyms at the species-group level. These are indicated by the abbreviation N. syn. following the bibliographic citation of the new synonym. As noted above, the synonymy is to be attributed to the author of the section unless the name of another specialist appears in parentheses following the abbreviation N. syn.

Volume 3

It is intended that Volume 3 will contain separate indexes to the taxa of Hymenoptera, and to their hosts, parasites, prey, predators, and pollen and nectar sources. Preparation of the indexes has already begun, and we anticipate that the tapes for Linotron production will be sent to the Government Printing Office

during 1978. We will also include in Volume 3 a tabulation of the number of valid genera and species for each family and higher category, and lists of the nomenclatural and taxonomic changes other than the new names which are listed above.

Acknowledgments

Preparation of the catalog and funding for its publication have had the enthusiastic support of Porter M. Kier, Director, National Museum of Natural History (NMNH), Smithsonian Institution (SI) and of Lloyd V. Knutson, Chairman, Insect Identification and Beneficial Insect Introduction Institute, U.S. Depart-

ment of Agriculture. The catalog in its printed form could not have been achieved without their help, and we are most grateful that their assistance was available whenever we required it.

We are indebted to a host of cooperating hymenopterists for generous assistance which has greatly enhanced the content and quality of the catalog. The aid furnished has involved such diverse activities as reviewing preliminary drafts of various sections, and providing new information on taxonomy, synonymy, distribution, and biology.

In the Symphyta, H. E. Milliron, formerly of the Biosystematics Research Institute (BRI). Agriculture Canada, Ottawa, reviewed parts of the manuscript and provided information, as did H. R. Wong, Northern Forest Research Centre, Edmonton, Alberta, for *Pristiphora* Latr. H. Greenbaum, University of Florida, Gainesville, furnished data on Florida sawfies.

The accuracy of host names in the Parasitica was checked by the following specialists: Smithsonian Institution-J. F. G. Clarke, D. R. Davis, W. D. Duckworth, T. L. Erwin, W. D. Field, and R. C. Froeschner; Systematic Entomology Laboratory (SEL), U. S. Department of Agriculture-D. C. Ferguson, R. J. Gagné, R. D. Gordon, A. B. Gurney, J. L. Herring, R. W. Hodges, J. M. Kingsolver, J. P. Kramer, A. S. Menke, D. M. Miller, L. M. Russell, C. W. Sabrosky, D. R. Smith, T. J. Spilman, M. B. Stoetzel, E. L. Todd, R. E. Warner, and R. E. White, D. M. Weisman (SEL) identified the remains of some lepidopterous larvae which served as hosts.

Specialists who were helpful in the Ichneumonoidea were: L. E. Caltagirone, University of California, Albany, and C. C. Loan (BRI). who reviewed parts of the manuscript on Braconidae; C. van Achterberg, Waarder, The Netherlands, W. R. M. Mason (BRI), R. D. Shenefelt, University of Wisconsin, Madison, and R. Wharton, University of California, Berkeley, who provided advice and information on Braconidae; H. K. and M. C. Townes, American Entomological Institute, Ann Arbor, Michigan, who provided information and advice on Ichneumonidae; and P. M. Marsh (SEL), who proofed the first-phase computer printouts for Mesochorinae, Diplazontinae, Oxytorinae and Orthocentrinae, and the thirdphase edit for Ichneumoninae.

Z. Boucek, Commonwealth Institute of Entomology, London, and M. Graham, Oxford University, provided much information on Chalcidoidea, and D. P. Annecke. Plant Protection Research Institute, Pretoria, South Africa, advised on the placement of some species assigned erroneously to Aphycus Mayr. A special debt of gratitude is due C. F. W. Muesebeck who painstakingly proofed all edit phases of the computer printouts for Encyrtidae and Torymidae and all but the first-phase edits of all other families of Chalcidoidea.

D. B. Krombein provided welcome assistance by helping to proof the manuscripts and printouts for all superfamilies of aculeate wasps. F. D. Parker, Bee Biology and Systematics Laboratory, Utah State University, Logan, furnished biological data for a number of Utah wasps.

We are grateful to R. M. Bohart, University of California, Davis, for reviewing the manuscript on Chrysididae and for considerable other assistance which included information on new synonyms and distribution in the Elampinae and Chrysididinae, and the assignment of taxa to species groups in *Chrysis* L. H. E. Evans, Colorado State University, Fort Collins, reviewed the section on Bethylidae.

In the Scolioidea, the late J. C. Bradley, Cornell University, Ithaca, New York, and J. G. Betrem, Deventer, The Netherlands, reviewed the manuscript on Scoliidae, and H. W. Allen, Moorestown, New Jersey, that on Tiphiinae. W. E. Ferguson, San Jose State University, California, and C. E. Mickel, University of Arizona, Tucson, furnished information on synonymy and taxonomy of some Mutillidae.

R. R. Snelling, Los Angeles County Museum, California, and M. R. Smith, Arlington, Virginia, reviewed the section on Formicoidea. J. F. Watkins II, Baylor University, Waco, Texas, reviewed the section on Dorylinae, and A. C. Cole, University of Tennessee, Knoxville, that on Pogonomyrmex Mayr. A. Francoeur, University of Québec, Chicoutimi, provided information on the fusca group of Formica L.

O. W. Richards, British Museum (Natural History), London, and R. M. Bohart reviewed the entire manuscript for Vespoidea. J. van der Vecht, Putten, The Netherlands, recommended the systematic sequence adopted in the Eumenidae and reviewed the manuscript. M. J. West-Eberhard, Universidad del Valle, Cali, Colombia, and R. R. Snelling reviewed the manuscript on Vespidae and supplied data on taxonomy and biology. J. E. Gillaspy, Texas A & I University, Kingsville, provided information on *Polistes* Latr.

H. E. Evans reviewed the manuscript on Pompilidae, and F. E. Kurczewski, University of Syracuse, N. Y., contributed some prey records.

R. M. Bohart and A. S. Menke generously made available a copy of their manuscript, "Sphecid Wasps of the World," which was most helpful in assembling the section on Sphecoidea; Menke, in addition, reviewed the catalog manuscript for this superfamily. Other specialists contributed data on the groups mentioned after their names: R. E. Coville, University of California, Berkeley (taxonomy and distribution of Trypoxyloninae); J. E. Gillaspy (Bembicinae); F. E. Kurczewski (biology of Larridae and Crabronidae); R. C. Miller, Cornell University (taxonomy, distribution, and biology of Crabronidae); W. J. Pulawski, Wroclaw, Poland (taxonomy and distribution of Tachysphex Kohl); and D. Vincent, University of Maryland, College Park (taxonomy and distribution of Passaloecus Shuck.).

E. G. Linsley, University of California, Berkeley, reviewed the entire manuscript on Apoidea and offered valuable suggestions. C. D. Michener, University of Kansas, Lawrence, discussed with the author of that section the biology and systematics of bees; many of his suggestions have been incorporated in the classification adopted. The following specialists have cooperated by contributing data on the groups specified after their names: G. E. Bohart, Bee Biology and Systematics Laboratory, Utah State University, Logan (taxonomy and biology of Apoidea); W. E. LaBerge, Illinois Natural History Survey, Urbana (taxonomy of Andrenidae and Anthophoridae); U. N. Lanham, University of Colorado, Boulder (taxonomy of Apoidea); M. A. Lieftinck, Rhenen, The Netherlands (taxonomy of Anthophoridae); A. Løken, University of Bergen, Norway (taxonomy of Apidae); T. B. Mitchell, North Carolina State University, Raleigh (taxonomy of Apoidea); J. S. Moure, Universidade Federal do Paraná, Curitiba, Brazil (taxonomy of Apoidea); F. D. Parker (taxonomy and biology of Apoidea); J. G. Rozen, Jr., American Museum of Natural History, New York, New York (taxonomy and biology of Apoidea); R. R. Snelling (taxonomy of Hylaeus F.); R. W. Thorp, University of California, Davis (taxonomy and biology of Apidae); P. H. Timberlake, University of California, Riverside (taxonomy of Apoidea); and T. J. Zavortink, University of San Francisco, California (taxonomy of Anthophoridae).

C. W. Sabrosky (SEL) has been helpful to all of us in the discussion of abstruse nomenclatural problems. J. F. Gates Clarke (SI) participated patiently in philosophical discussions of a wide variety of subjects pertaining to the catalog. G. C. Steyskal (SEL) was the resource person for the grammar of scientific names and other linguistic matters.

Computerization of the catalog and its production by the computer-driven Linotron required the highly skilled technical expertise of specialists in computer storage and applications. James F. Mello, formerly Chief of the Data Processing (ADP) Program at NMNH, carefully analyzed the 1951 Hymenoptera Catalog and developed the data analysis matrix which governed entry of information into the computer. R. Creighton, Manager, Information Retrieval and Indexing Division, Office of Computer Services (OCS), SI, devised the programs for editing, arranging, querying, and displaying data from the manuscripts. J. J. Crockett, Manager, Software Systems and Program Maintenance (OCS), developed the program for conversion of the computerized data to special magnetic tapes capable of driving the Photo Typesetting Unit, the Mergenthaler Linotron 1010, in the Government Printing Office. T. G. Gautier, Chief (ADP), and D. Bridge, Operations Manager (ADP), maintained daily collaboration with the Editorial Board in assignment of clerical assistance, and production of the edit phases, merge files, and SELGPO printouts.

Finally, we are most grateful for the careful, accurate typing of the manuscripts for computer entry by the corps of dedicated clerk typists, R. M. Garlick served with the

program as principal typist from its inception until his reassignment in mid-1976 as a computer technician; he also trained the other assigned typists. P. R. Brown is currently the only typist assigned full time. Other typists who worked for varying lengths of time during the six years of manuscript production and computer entry were: L. E. Back, L. M. Bybell, R. Cloyed, L. E. Hatton, M. Monahan, L. G. Oliver, J. Peabody, P. A. Sunkel, and M. F. Ward.

Order HYMENOPTERA

By Karl V. Krombein and Paul D. Hurd, Jr.

The Hymenoptera is one of the largest orders of insects with more than 20,000 species in America north of Mexico, most of which are beneficial and many of which are of considerable economic importance to agriculture and forestry either as parasites or predators of pests or as pollinators of more than 100 commercially grown crops. Among the relatively few injurious Hymenoptera are the sawflies, some of which are serious defoliators or stem-borers of trees or crops.

Suborder SYMPHYTA

By DAVID R. SMITH

The suborder Symphyta, commonly known as sawflies and horntails, has also been recorded in the early literature under the names Chalastogastra, Sessiliventria, or Phyllophaga and Xylophaga. The suborder includes about 10,000 world species grouped into about 1,000 genera and 12 families. Representatives are found on all continents except for Antarctica, and they are also absent on many of the more isolated islands of the world such as Hawaii and many other Pacific islands. The most northern record is that for Pachynematus parvilabris (Thomson) on Ward Hunt Island in Canada, 83° 05′ N., and several species are found as far south as Tierra del Fuego. The North American fauna consists of around 1,000 species in 10 families. The two families that have no living representatives in North America are the Megalodontidae and Blasticotomidae, both of which are Palearctic, though the Blasticotomidae is represented in North America by the fossil species Paremphytus ostentus Brues from the Miocene of Florissant, Colorado. The Blasticotomidae contains only several species, very secretive and rarely found, the larvae of which bore in the stems of ferns. Living forms may yet be discovered on this con tinent. Other than the families discussed here, a number of fossil families have been described, most all from the Old World. These are Anaxyelidae, Gigasiricidae, Karatavitidae, Myrmiciidae, Parapamphiliidae, Pararchexyelidae, Paroryssidae, Pseudosiricidae, Sepulcidae, Xyelotomidae, and Xyelydidae.

The common name sawfly, applied to members of most families, is derived from their flylike appearance and the sawlike female ovipositor which is used to cut open plant tissue for insertion of eggs. The name horntail is usually applied to members of the family Siricidae, the females of which have a long slender ovipositor. Adults of the suborder may be distinguished from other Hymenoptera by the abdomen which is broadly joined to the thorax, the trochanters which are always two-segmented and the hindwing which usually has three closed basal cells. The larvae of most sawflies are entirely different from other Hymenoptera larvae and are most often confused with those of Lepidoptera, though sawfly larvae lack crochets on the prolegs, have only one pair of ocelli, and normally have more than five pairs of prolegs. Some larvae, especially those modified for an internal existence, resemble the grublike larvae of other Hymenoptera but normally have a projection at the apex of the abdomen and vestiges of thoracic legs.

The higher classification of the Symphyta in most universal use at present is that proposed by Ross (1937) and Benson (1938). The suborder is divided into two major series, the Orthandria and Strophandria basically separated by the male genitalia which remains normal in the former but is turned 180° prior to eclosion in the latter. The Strophandria is expressed as the superfamily Tenthredinoidea. The Orthandria have been further divided on the basis of characters of the mesosternum and head capsule into three superfamilies, the Megalodontoidea, Siricoidea, and Cephoidea. Some authors have recognized the superfamily Xyeloidea including only the family Xyeloidea including only the family Xyeloidea. This has some merit, as both positions of male genitalia are found, the orthan-

drous in the Macroxyelinae and strophandrous in the Xyelinae.

All members of this suborder are phytophagous except for the family Orussidae which is parasitic on other wood-boring insects. Host plants and habits are various. Many larvae are external feeders on the foliage of the host, but others are leaf miners, gall formers on twigs, petioles, leaves, or buds, leaf-edge rollers, stem borers, wood borers, or petiole miners. Because of their plant feeding habits, many sawflies are pests of ornamental plants, agricultural crops, or forest stands. Their occurrence is normally local, but outbreaks in forests may be extensive, covering many thousands of acres and resulting in considerable growth loss or death of trees. Appearance in epidemic proportions is commonly sporadic, suddenly appearing for a year or more then practically disappearing for several years, probably being kept under control by their natural parasite-predator-disease complex. Some of the most destructive species are aliens which were accidentally introduced from abroad and found a vacuum for development without natural enemies. Many parasites have been introduced to help combat these pests. Some of the more important sawflies are those that feed on timber species, roses, apples, pears, peaches, and wheat and other grain crops. On the other hand, a few sawflies have been used beneficially, or at least have been attempted for use in the biological control of weeds. One species, Ucona acaenae Smith (=Antholcus varinervis of authors), was introduced into New Zealand from Chile in the early 1930's to help control the spread of Acaena. This attempt was only partially successful. Another species, Priophorus morio (Lepeletier), was released in Hawaii from the western United States to help control the spread of Rubus on the islands, but this attempt failed.

The life cycle of many sawflies follows a similar pattern, though with many variations. Adults of most species fly in spring and early summer and are very short-lived. It is difficult to keep individual adults alive in captivity for much more than a few days although the actual flight of a species may extend over several weeks or months. Some adults may not feed but some may feed on moisture, nectar and pollen of flowers, leaf pubescence, or other insects. The most productive areas for collecting are in vegetation on edges of rivers or streams, marshes, open and scrubby woodland, or undisturbed meadows. The catkins of willows and alders are especially productive for many groups. Oviposition is in the foliage, stems, twigs, or wood, and the eggs are most always inserted in the plant tissue though some Pamphiliidae may glue their eggs to the leaf surface. Larval feeding time varies, but usually lasts about two weeks. Many larvae, especially Diprionidae, feed gregariously at first but later disperse to other parts of the host. After feeding is completed the larva molts into a non-feeding stage called the prepupa or resting stage. The prepupa normally leaves the host in search of a site for pupation. This may be in a cell in the ground or litter, in a papery cocoon in the ground, in some other substance such as wood, stems of the host or nearby plants, or fruits of other plants. The prepupal stage differs morphologically from the feeding stages, especially in the shape of the mandibles and sometimes color pattern. Some larvae with spines loose these in the final molt. If there is a single generation, the prepupa will remain in its cocoon or cell the rest of the summer and pupate the following spring. However, depending on the species, latitude, or diapause requirements, there may be several generations a year, or it may take several years to complete the cycle.

The following references are to general articles on the Symphyta. Some, such as Maxwell, 1955, in morphology, pertain to many species and the reference is not repeated under each species. Under some species, such as *Pristiphora erichsonii* (Hartig), a listing of all biological references would take many more pages, and the references are selected or pertain to some recent synopsis which contains a good bibliography. Some of the new distribution records, hosts, and taxonomic changes are taken from unpublished notes. Only those taxonomic changes cited as

being new have not before appeared in the literature.

I am indebted to several colleagues for reviewing parts of this section and or providing some of the information contained herein: H. E. Milliron, formerly with the Biosystematics Research Institute, Agriculture Canada, Ottawa and other authorities of the Institute for allowing study of their sawfly collection; H. R. Wong, Northern Forest Research Centre, Canadian Forestry Service Edmonton, Alberta, Canada; and H. Greenbaum, Department of Entomology, University of Arkansas Fayetteville.

Superfamily MEGALODONTOIDEA

Family XYELIDAE

A small family of primitive sawflies better represented in North America than in other parts of the northern hemisphere. Most of the family is associated with conifers; only members of the tribe Macroxyelini are associated with deciduous trees.

Revision: Ross, 1932. Ent. Soc. Amer., Ann. 25: 153-169 (Nearctic).

TRIBE PLERONEURINI

Genus PLERONEURA Konow

Pleroneura Konow, 1897. Ent. Nachr. 23: 56.

Type-species: Xyela dahli Hartig. Desig. by Rohwer, 1911.

Pleuroneura Ashmead, 1898. Psyche 8: 214. Emend.

Manoxyela Ashmead, 1898. Psyche 8: 214.

Type-species: Manoxyela californica Ashmead. Orig. desig.

Larvae of this genus live in the developing shoots and buds of Abies.

Revision: Rohwer, 1910. Canad. Ent. 42: 88-93. —Ross, 1932. Ent. Soc. Amer., Ann. 25: 156-159.

Taxonomy: Smith, 1967. Ent. Soc. Amer., Ann. 60: 382-383 (larvae). —Smith, 1967. Ent. Soc. Wash., Proc. 69: 182-183 (species synonymy).

aldrichi Ross, Idaho, Oreg., Nev., Calif. Host: Abies.

Pleroneura aldrichi Ross, 1932. Ent. Soc. Amer., Ann. 25: 158-159. 9, 8.

brunneicornis Rohwer. N. S., N. B., Maine, Que., Ont., N. Y., Minn. Host: Abies balsamea, A. concolor.

Pleroneura bruneicornis(!) Rohwer, 1910. Canad. Ent. 42: 89. 9.

Pleroneura brunneicornis Rohwer, 1910. Canad. Ent. 42: 220.

Pleroneura borealis Felt, 1917. Canad. Ent. 49: 220. ♀, ♂.

Biology: Webb and Forbes, 1951. Canad. Ent. 83: 181-183.

californica (Ashmead). Wyo., Alta., Utah, B. C., Oreg., Calif. Host: Abies spp.

Manoxyela californica Ashmead, 1898. Psyche 8: 214. d.

Pleroneura fulvicornis Rohwer, 1910. Canad. Ent. 42: 89. &. Pleroneura schwarzi Rohwer, 1910. Canad. Ent. 42: 220. 9.

koebelei Rohwer. Idaho, Oreg., Calif. Host: Abies spp.

Pleroneura koebelei Rohwer, 1910. Canad. Ent. 42: 90. d.

lutea Rohwer, Idaho, Oreg., Nev., Calif.

Pleroneura lutea Rohwer, 1910. Canad. Ent. 42: 90. 3.

SUBFAMILY MACROXYELINAE

TRIBE XYELECHNI

Genus XYELECIA Ross

Xyelecia Ross, 1932. Ent. Soc. Amer., Ann. 25: 159.

Type-species: Xyelecia nearctica Ross. Orig. desig.

nearctica Ross. "Mont. and Colo.", Idaho, Oreg., Calif. Ecology: Larvae live in shoots. Host:

Abies spp.

Xyelecia nearctica Ross, 1932. Ent. Soc. Amer., Ann. 25: 160. 9.

Taxonomy: Smith, 1964. Pan-Pacific Ent. 40: 54-56 (male). —Smith, 1967. Ent. Soc. Amer., Ann. 60: 381-382 (larva).

TRIBE MACROXYELINI

Genus MACROXYELA Kirby

Macroxyela Kirby, 1882. List Hym. Brit. Mus. v. 1, p. 351.

Type-species: Xyela ferruginea Say. Orig. desig.

Protoxyela MacGillivray, 1912. Canad. Ent. 44: 295.

Type-species: Xyela aenia(!) Norton. Orig. desig.

Larvae of this genus feed on the leaves of deciduous trees.

Revision: Ross, 1932. Ent. Soc. Amer., Ann. 25: 164-166.

aenea (Norton). La., Mo., Tex.

Xyela aenea Norton, 1872. Amer. Ent. Soc., Trans. 4: 86. d.

bicolor MacGillivray. Ohio, Ill.

Macroxyela bicolor MacGillivray, 1912. Canad. Ent. 44: 294. S.

Macroxyela bicolor var. harti Ross, 1932. Ent. Soc. Amer., Ann. 25: 166. d.

ferruginea (Say). Ont. and Mass. s. to Va. w. to Nebr., Kans. and Okla.; one record from Moscow. Idaho. Host: Ulmus.

Xuela ferruginea Say, 1824, In Keating, Narr. Long's 2nd Exped. v.2, (App.), p. 310. \(\Sigma. \)

Xyela infuscata Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 224. d.

Macroxyela obsoleta MacGillivray, 1912. Canad. Ent. 44: 294. ♀.

Macroxyela distincta MacGillivray, 1912. Canad. Ent. 44: 295. 9.

Taxonomy: Smith, 1967. Ent. Soc. Amer., Ann. 60: 379-380 (larva). Biology: Garlick, 1923. Canad. Ent. 55: 256-257.

Genus MEGAXYELA Ashmead

Megaxyela Ashmead, 1898. Psyche 8: 214.

Type-species: Xyela major Cresson. Orig. desig.

Odontophyes Konow, 1899. Wien. Ent. Ztg. 18: 42. Type-species: Pleroneura aviingrata Dyar. Monotypic.

Paraxyela MacGillivray, 1912. Canad. Ent. 44: 294.

Type-species: Xyela tricolor Norton. Orig. desig.

Larvae of this genus feed on the leaves of deciduous trees.

Revision: Ross, 1932. Ent. Soc. Amer., Ann. 25: 161-164.

bicoloripes (Rohwer). Pa., Va., Miss.

Odontophyes bicoloripes Rohwer, 1924. Ent. Soc. Wash., Proc. 26: 215. \(\sigma \).

major (Cresson). N. Y. to Fla. w. to Kans., Okla., Tex. Host: Carya illinoiensis.

Xyela major Cresson, 1880. Amer. Ent. Soc., Trans. 8: 34. 9, 8.

Odontophyes ferruginea Bridwell, 1906. Ent. News 17: 94. $\,$ 9. Megaxyela langstoni Ross, 1936. Ent. News 47: 131. $\,$ 9, $\,$ 5. N. syn.

Taxonomy: Smith, 1967. Ent. Soc. Amer., Ann. 60: 380-381 (larva).

tricolor (Norton). N. Y., Ill., Kans. Host: Carya, Juglans cinerea. Xyela tricolor Norton, 1862. Ent. Soc. Phila., Proc. 1: 114. d.

Pleroneura aviingrata Dyar, 1898. Psyche 8: 213. 9, larva. N. syn.

Taxonomy: Smith, 1967. Ent. Soc. Amer., Ann. 60: 381 (larva).

Family PAMPHILIIDAE

Commonly called webspinning sawflies, the larvae live solitarily or socially in a web or in a rolled leaf held by silk. The subfamily Cephalciinae is associated with conifers, and the subfamily Pamphiliinae is associated with deciduous trees or shrubs. Adults of most species are large, dorsoventrally flattened insects, and are sometimes common around the flowers of their host plants in the spring.

Taxonomy: Klima, 1937. In Hedicke, Hym. Cat., pt. 3, 84 pp. (catalog). —Benson, 1945. Roy. Ent. Soc. London, Proc. Ser. B: Taxonomy 14: 25-33 (generic classification, world).

SUBFAMILY CEPHALCHNAE

Members of this subfamily are associated with conifers. There are two tribes and one, the Cephalciini, occurs in North America; the other, Caenolydini, is Palaearctic.

TRIBE CEPHALCIINI

Genus CEPHALCIA Panzer

Cephalcia Jurine, 1801. Intell. Blatt Litt.-Ztg. Erlangen 1: 163. Suppressed, Internatl. Comm. Zool. Nomencl. Op. 135, 1939.

Cephalcia Panzer, 1805. Faunae Ins. German. heft 86, pls. 8, 9.

Type-species: Cephalcia arvensis Panzer. Desig. by Rohwer, 1911.

Cephaleia Jurine, 1807. Nouv. Meth. Class. Hym. Dipt. 67, t. 2, f. 7.

Liolyda Ashmead, 1898. Canad. Ent. 30: 209.

Type-species: Lyda frontalis Westwood. Orig. desig.

Revision: Middlekauff, 1958. Calif. Univ., Pubs., Ent. 14: 132-149. — Eidt, 1969. Canad. Ent. Soc., Mem. No. 59, 56 pp. (taxonomy, morphology, larval descriptions, life histories for most of North American species).

distincta (MacGillivray). Newfoundland to N. Y., w. to Ont. and Mich. Host: Abies balsamea,
Tanga canadensis.

Cephaleia distincta MacGillivray, 1912. Canad. Ent. 44: 296. 8.

Cephalcia rossi Middlekauff, 1958. Calif. Univ., Pubs., Ent. 14: 147. 9.

fascipennis (Cresson). Que., N. S., Maine, N. H. w. to B. C. Host: Picea engelmanni, P. glauca, P. mariana, P. pungens, P. rubens.

Lyda fascipennis Cresson, 1880. Amer. Ent. Soc., Trans. 8: 31. 9.

TRIBE PAMPHILIINI

Genus PAMPHILIUS Latreille

Pamphilius Latreille, 1802. Hist. Nat. Crust. Ins., v. 8, p. 303.

Type-species: Tenthredo sylvatica Linnaeus. Monotypic.

Lyda Fabricius, 1804. Systema Piezatorum, p. 43.

Type-species: Tenthredo sylvatica Linnaeus. Desig. by Curtis, 1831.

Anoplolyda Costa, 1894. Prosp. Imen. Ital., v. 3, p. 233.

Type-species: Lyda alternans Costa. Desig. by Rohwer, 1910.

Kelidoptera Konow, 1897. K. K. Naturhist. Hofmus., Ann. 12: 20. Type-species: Lyda maculipennis Stein. Monotypic.

Bactroceros Konow, 1897. K. K. Naturhist. Hofmus., Ann. 12: 21.

Type-species: Tenthredo vafer Linnaeus. Desig. by Rohwer, 1910.

Pseudocephaleia Zirngiebl, 1937. Embrik Strand 60. Geburtst. Festschr. (Riga) 3: 339.

Type-species: Pseudocephalcia brachycerus Zirngiebl. Monotypic.

Pamphilius subg. Onycholyda Takeuchi, 1938. Tenthredo 2: 218.
Type-species: Pamphilius sulphureipes Kirby. Orig. desig.

Since this section was completed, Benes (1972) defined the genera of the Pamphilini. He recognized four genera: Pseudocephaleia Zirngiebl, Kelidoptera Konow, Pamphilius Latreille, and Onycholyda Takeuchi. The latter two genera are found in North America, and, of the species listed below in Pamphilius, the following would belong in Onycholyda: amplectus, excavatus, luteicornis, multisignatus, nigritibialis, quebecensis, rufofasciatus, and sitkensis. These species that belong in Onycholyda are the ones that are found in couplets 2 to 9 and 24 to 31 in Middlekauff's (1964) key.

Revision: Middlekauff, 1964. Calif. Univ., Pubs., Ent. 38: 1-80.

Taxonomy: Benes, 1972. Acta Ent. Bohem. 69: 378-395 (generic classification of the Pamphiliin). Benes, et al., 1973. Bul. Zool. Nomencl. 30: 95-96 (request for designation of Pamphilius viriditibialis Takeuchi as type-species of Onycholyda Takeuchi).

amplectus (Fabricius). Maine to Fla. w. to Ill. and Tex. Host: Rubus.

UNPLACED TAXA OF PAMPHILIDAE

Lyda canadensis Norton, 1869. Amer. Ent. Soc., Trans. 2: 336. J. No locality given. Tarpa scripta Say, 1824. In Keating, Narr. Long's 2nd Exped., v. 2, (App.), p. 312. N. W. T. and Ark.

Superfamily TENTHREDINOIDEA

Family PERGIDAE

This is a highly diversified and large family in the Neotropical and Australian regions. Only one genus is found for certain in North America north of Mexico.

Taxonomy: Benson, 1938. Roy. Ent. Soc. London, Trans. 87: 376-382 (key to subfamilies of world).

SUBFAMILY ACORDULECERINAE

Genus ACORDULECERA Say

Acordulecera Say, 1836. Boston Jour. Nat. Hist. 1: 209.
Type-species: Acordulecera dorsalis Say. Monotypic.
Thulea Say, 1836. Boston Jour. Nat. Hist. 1: 213.
Type-species: Thulea nigra Say. Monotypic.
Perantherix Westwood, 1874. Thesaurus Ent. Oxon., p. 109.
Type-species: Perantherix pumilio Westwood. Monotypic.
Acorduleceros Konow, 1898. Ent. Nachr. 24: 250.

This genus is confined to the New World where the largest number of species are found in South America. In the United States and Canada, species of this genus are most abundant in the eastern deciduous forests though several species are found as far west as Arizona. These western forms have not been identified and are not listed below. The adults are small with short, six-segmented antennae, and the larvae feed externally on the foliage of the host plants.

dorsalis Say. Que. to Fla. w. to Iowa, Okla., Tex. Host: Quercus, Carya, Juglans, Castanea.

SUBFAMILY LOBOCERATINAE

Genus SKELOSYZYGONIA Malaise

Skelosyzygonia Malaise, 1935. Ent. Tidskr. 56: 161.

Type-species: Skelosyzygonia spinipes Malaise. Orig. desig.

The single species in this genus was recorded from Texas; this is a dubious record for this Brazilian form.

spinipes Malaise, "Tex.": Brazil (Rio de Janeiro).

Skelosuzugonia spinipes Malaise 1935. Ent. Tidskr. 56: 161. d.

Taxonomy: Conde, 1939 Deut. Ent. Gesell., Mitt. 9: 49 ("Tex." record).

Family ARGIDAE

This family is cosmopolitan. It is the second largest sawfly family, with over 800 species. The tropical regions of the world contain the largest number of species, over 100 species of Arge alone having been described from tropical Africa. Over 300 species of the family have been described from the Neotropical Region, even though the fauna there is virtually unexplored. In America north of Mexico, the greater number of species is found in the southwestern United States. Hosts and habits are various, but most species feed externally on the foliage of the host plant in the larval stage. Only one North American species is known to be a leafminer, Schizocerella pilicornis (Holmgren) in purslane.

Taxonomy: Benson, 1938. Roy. Ent. Soc. London, Trans. 87: 371-375 (key to subfamilies, world). —Malaise, 1941. Ent. Tidskr. 62: 131-140 (key to world genera). —Wong, 1951. Ont. Ent. Soc., 82nd Ann. Rpt., p. 53 (cocoons). —Benson, 1963. Ann. and Mag. Nat. Hist. (13) 5: 631 (tribes of Arginae and genera of Scobini). —Smith, 1969. Amer. Ent. Soc., Trans. 95: 439-457 (Nearctic genera). —Smith, 1972. Amer. Ent. Soc., Trans. 98: 163-184 (N. Amer. larvae).

SUBFAMILY ARGINAE

Genus ARGE Schrank

Cryptus Jurine, 1801. Intell. Blatt. Litt.-Ztg. Erlangen, v. 1, p. 163. Suppressed by Internatl. Comm. Zool. Nomencl., Op. 135, 1936.

coccinea (Fabricius). Conn. to Fla. w. to Tex. Host: Rhus spp.

Hylotoma coccinea Fabricius, 1804. Systema Piezatorum, p. 24.

Tenthredo rubiginosa Beauvois, 1805. Ins. Afr. Amer., v. 2, p. 98. 9. N. syn.

Hylotoma miniata Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 6: 298. d.

Hylotoma rubra Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 6: 299. ♀.

Hylotoma erythrosoma Leach, 1817. Zool. Misc., v. 3, p. 124. ♀. N. syn.

Hylotoma scutellata Lepeletier, 1823. Monog. Tenthred., p. 47.

Hylotoma sphinx Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 68. d. N. syn.

humeralis (Beauvois). Maine to Fla. w. to Minn., Kans., Tex. Host: Poison-ivy.

Tenthredo humeralis Beauvois, 1805. Ins. Afr. Amer., v. 2, p. 99. 9.

Hylotoma sanguinea Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 6: 299. 9.

Hylotoma scutellata Say, 1836. Boston Jour. Nat. Hist. 1: 211. ♀. N. syn.

Hylotoma grandis Rohwer, 1909. Canad. Ent. 41: 14. d. N. syn.

ochropa (Gmelin). Ont.; Europe to Siberia, Middle East. Introduced (?) into N. Amer. Host: Rosa.

Tenthredo ochropus Gmelin, 1790. In Linnaeus, Syst. Nat., Ed. 13, v. 1, pt. 5, p. 2657.

Taxonomy: Malaise and Benson, 1934. Archiv for Zool. 26A: 7-8, 13 (=rosae of authors, nec Linnaeus).

pectoralis (Leach). Maine to Fla. w. to Ont., Sask., Mich., Ill., Mo., Tex. Host: Alnus, Betula, Corylus, Crataegus, Salix. Birch sawfly. Probably a species complex.

Hylotoma pectoralis Leach, 1817. Zool. Misc., v. 3, p. 124. 9.

Hylotoma dulciaria Say, 1824. In Keating, Narr. Long's 2nd Exped., (App.). p. 314. Ω. Arge salicis Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 206. Ω, δ.

Biology: Schwarz, 1909. Ent. Soc. Wash., Proc. 11: 106-108. —Wong, 1954. Canad. Ent. 86: 154. —Smirnoff, 1971. Ent. Soc. Quebec, Ann. 16: 86-88 (protozoan parasite).

scapularis (Klug). Maine to Fla. w. to Ont., Minn., Mo., Tex. Host: Alnus, Betula, Quercus, Ulmus. Probably a species complex.

Hulotoma scapularis Klug, 1814, Mag. Gesell, Naturf, Freunde Berlin 6: 299, &.

Hylotoma xanthothorax Leach, 1817. Zool. Misc., v. 3, p. 124. 9.

Hylotoma calcanea Say, 1836. Boston Jour. Nat. Hist. 1: 211.

Biology: Jack, 1891. Psyche 6: 11.

spiculata (MacGillivray). Ariz.; Mexico.

Hylotoma spiculata MacGillivray, 1907. Canad. Ent. 39: 308. 9.

SUBFAMILY ATOMACERINAE

Genus ATOMACERA Sav

Atomacera Say, 1836. Boston Jour. Nat. Hist. 1: 212.

Type-species: Atomacera debilis Say. Desig. by Malaise, 1937.

Micrarge Ashmead, 1898. Canad. Ent. 30: 213.

Type-species: Atomacera ruficollis Norton. Orig. desig.

Braunsiola Konow, 1899. Ent. Nachr. 25: 312.

Type-species: Braunsiola truculenta Konow. Monotypic.

Spegazziniella Jorgensen, 1913. Buenos Aires Mus. Nac. de Hist. Nat., An. 25: 260.

Type-species: Spegazziniella ovata Jorgensen. Monotypic.

Argina Forsius, 1925. Arkiv for Zool. 17A: 2. Preocc.

Type-species: Argina nubilipennis Forsius. Monotypic.

Arginella Forsius, 1926. Notulae Ent. 5: 207. N. name for Argina.

A genus distributed throughout most of the New World but more highly developed in the tropics. Larvae feed on the foliage of the host plant.

Revision: Malaise, 1942. Ent. Tidskr. 63: 107-110 (Neotropical species). —Smith, 1969. Amer. Ent. Soc., Trans. 95: 440-446 (Nearctic species).

debilis Say. Ont., Mass. to Fla. w. to Minn., Kans., Ark. Host: Desmodium canadense, D.

glutinosum, and probably other species; Lespedeza.

Atomacera debilis Say, 1836. Boston Jour. Nat. Hist. 1: 212. 3. Atomacera ruficollis Norton, 1864. Ent. Soc. Phila., Proc. 3: 6. 9.

Atomacera desmodii Dyar, 1900. N. Y. Ent. Soc., Jour. 8: 26. 9, 8. Larva.

Taxonomy: Smith, 1972. Amer. Ent. Soc., Trans. 98: 167 (larva).

Biology: Dyar, 1900. N. Y. Ent. Soc., Jour. 8: 26. —Weiss and Lott, 1923. Ent. News 34: 167. —Lindquist and Trinnell, 1965. Canad. Ent. 97: 181-184.

decepta Rohwer. Conn. to Fla. w. to Mo., Tex. Host: Hibiscus militaris, H. moscheutos hybrid.

Atomacera decepta Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 382. ♀.

Taxonomy: Smith, 1972. Amer. Ent. Soc., Trans. 98: 167 (larva).

Biology: Dyar, 1900. N. Y. Ent. Soc., Jour. 8: 26 (raficollis, nec Norton). —Tippins, 1965. Jour. Econ. Ent. 58: 161.

ebena Smith, S. Ariz,

Atomacera ebena Smith, 1969. Amer. Ent. Soc., Trans. 95: 445. 9.

Subfamily STERICTIPHORINAE

Genus STERICTIPHORA Billberg

Sterictiphora Billberg, 1820, Enum. Ins. Mus. Billberg, p. 99.

Type-species: Hylotoma furcata Fabricius. Monotypic.

Schizocerus Berthold, 1827. Nat. Fam. Thierr., p. 441.

Type-species: *Hylotoma furcata* Villers. Desig. by Westwood, 1840. *Cyphona* Dahlbom, 1835. Conspectus Tenthred., Siricid., Oryssin. Scan., p. 8.

Type-species: Hylotoma furcata Villers. Desig. by Rohwer, 1911.

A small Holarctic genus. Larvae feed on the foliage of the host plants most of which appear to be species of Prunus.

Revision: Smith, 1969. Amer. Ent. Soc., Trans. 95: 446-455.

cruenta Smith. Maine to N. C. w. to Mich. Host: Prunus pennsylvanicus. Sterictiphora cruenta Smith, 1969. Amer. Ent. Soc., Trans. 95: 450. Q.

maura (Cresson). Utah, Nev., Oreg., Calif. Host: Prunus

Schizocera maura Cresson, 1880. Amer. Ent. Soc., Trans. 8: 3. d.

prunivora (Dyar). Maine s. to N. Y., Pa. Host: Prunns, Amelanchier.

Schizocerus prunivorus Dyar, 1897. N. Y. Ent. Soc., Jour. 5: 23. larva.

sericea (Norton). Maine to N. J., Pa. w. to Ill.

Schizocerus sericens Norton, 1867. Amer. Ent. Soc., Trans. 1: 55. 9.

serotina Smith. Maine to Va. Host: Prunus serotina.

Sterictiphora serotina Smith, 1969. Amer. Ent. Soc., Trans. 95: 452. 9, 8.

Taxonomy: Smith, 1972. Amer. Ent. Soc., Trans. 98: 169 (larva).

transversa Smith. Md., Alta., Alaska.

Sterictiphora transversa Smith, 1969. Amer. Ent. Soc., Trans. 95: 454. 9.

Genus APROSTHEMA Konow

Aprosthema Konow, 1899. Ent. Nachr. 25: 149.

Type-species: Hylotoma brevicornis Fallen. Desig. by Rohwer, 1911.

Lurola Ross, 1937. Ill. Biol. Monog. 15(2): 55.

Type-species: Schizocera brunniventris Cresson. Orig. desig.

A small Holarctic genus with two Nearctic representatives, both of which are found in western North America.

Revision: Smith, 1971. Amer. Ent. Soc., Trans. 97: 546-549.

breviantennatum Smith. Oreg., Calif.

Aprosthema breviantennatum Smith, 1971. Amer. Ent. Soc., Trans. 97: 546. 9, d.

brunniventre (Cresson). Wash., Oreg., Nev., Calif. Host: Hosackia.

Schizocera brunniventris Cresson, 1880. Amer. Ent. Soc., Trans. 8: 2. 9, 8.

Schizocera tristis Cresson, 1880. Amer. Ent. Soc., Trans. 8: 52. 9, 8.

Schizocera tristis var. fumipennis Dyar, 1893. Canad. Ent. 25: 195. 9, 8, larva.

Taxonomy: Smith, 1972. Amer. Ent. Soc., Trans. 98: 170 (larva).

Biology: Dvar. 1893. Canad. Ent. 25: 195.

Genus NEOPTILIA Ashmead

Neoptilia Ashmead, 1898. Canad. Ent. 30: 213.

Type-species: Neoptilia mexicana Ashmead. Orig. desig.

Pseudocyphona Ashmead, 1898. Canad. Ent. 30: 211.

Type-species: Pseudocyphona mexicana Ashmead. Orig. desig.

Rhagonyx Konow, 1903. Ztschr. System. Hym. Dipt. 3: 108.

Type-species: Rhagonyx lituratus Konow. Monotypic.

A small genus known only from southwestern United States south to Ecuador.

Revision: Smith, 1971. Amer. Ent. Soc., Trans. 97: 537-543.

malvacearum (Cockerell). Tex., N. Mex., Ariz.; Mexico. Host: Althaea rosea, Malvastrum, Malva, Sphaeralcea.

Nematoneura malvacearum Cockerell, 1894. U. S. Dept. Agr., Insect Life 7: 253. 9, 8.

Taxonomy: Smith, 1972. Amer. Ent. Soc., Trans. 98: 179 (larva).

Biology: Cockerell, 1894. U. S. Dept. Agr., Insect Life 7: 251-253. tora Smith. S. Tex.

Neoptilia tora Smith, 1971. Amer. Ent. Soc., Trans. 97: 540. 9, 8.

Genus PTENUS Kirby

Ptenos Norton, 1872. Amer. Ent. Soc., Trans. 4: 77. Preocc. by Gray, 1843.

Type-species: Ptenos niger Norton. Desig. by Rohwer, 1911.

Ptenus Kirby, 1882. List Hym. Brit. 1985, v. 1, p. 51. N. name.

Ptenellus Malaise, 1937. Ent. Tidskr. 58: 56.

Type-species: Ptenos nigripectus(!) Norton. Orig. desig.

This genus is found only in the New World and is distributed from southwestern United States to northern South America.

Revision: Smith, 1970. Amer. Ent. Soc., Trans. 96: 79-101.

apulatus Greenbaum. Ariz.

Ptenus apulatus Greenbaum, 1975 (1974). Pan-Pacific Ent. 50: 423-425. Q.

bicolor Smith. Tex.; Mexico. Host: Acacia farnesiana.

Ptenus bicolor Smith, 1970. Amer. Ent. Soc., Trans. 96: 83. 9, 8.

Taxonomy: Smith, 1972. Amer. Ent. Soc., Trans. 98: 176 (larva).

imus Smith. Tex.; Mexico.

Ptenus imus Smith, 1970. Amer. Ent. Soc., Trans. 96: 84. 9.

jocus Smith. Ariz. (Patagonia Mts.).

Ptenus jocus Smith, 1970. Amer. Ent. Soc., Trans. 96: 86. 9.

magnus Smith. W. Tex., N. Mex., Ariz.

Ptenus magnus Smith, 1970. Amer. Ent. Soc., Trans. 96: 86. 9, 3.

modestius Smith. Tex., Ariz., s. Calif. Host: Adults collected from mesquite.

Ptenus modestius Smith, 1970. Amer. Ent. Soc., Trans. 96: 88. 2, 3. nigropectus (Norton). Miss., La., Tex. Host: Acacia angustissima, Desmanthus(?).

Ptenos nigropectus Norton, 1872. Amer. Ent. Soc., Trans. 4: 77. 3.

parvus Smith. W. Tex., Ariz. Host: Adults collected from Acacia.

Ptenus parvus Smith, 1970. Amer. Ent. Soc., Trans. 96: 92. 9, 8.

patulus Smith. Ariz.

Ptenus patulus Smith, 1970. Amer. Ent. Soc., Trans. 96: 94. 9, 8.

texanus (Norton). Tex.; Mexico.

Ptilia texana Norton, 1869. Amer. Ent. Soc., Trans. 2: 367. d. Ptenos niger Norton, 1872. Amer. Ent. Soc., Trans. 4: 77. d.

torridus Smith. Ariz.

Ptenus torridus Smith, 1970. Amer. Ent. Soc., Trans. 96: 96. 9.

vanus Smith. N. Mex., Ariz.; Mexico.

Ptenus vanus Smith, 1970. Amer. Ent. Soc., Trans. 96: 96. 9, 8.

vargus Smith, Tex.: Mexico.

Ptenus vargus Smith, 1970. Amer. Ent. Soc., Trans. 96: 98. 9.

Genus SCHIZOCERELLA Forsius

Schizocerella Forsius, 1927. Notulae Ent. 7: 19.

Type-species: Schizocerella axillaris Forsius. Orig. desig.

Sofus Malaise, 1937. Ent. Tidskr. 58: 137.

Type-species: Schizocera pilicornis Holmgren. Orig. desig.

Sterictiphora subg. Leston Ross, 1937. Ill. Biol. Monog. 15(2): 54.

Type-species: Schizocerus zabriskei Webster and Malley. Orig. desig.

Taxonomy: Benson, 1963. Ann. and Mag. Nat. Hist. (13) 5: 631. —Smith, 1971. An Soc., Trans. 97: 543-546.

pilicornis (Holmgren). N. Y. and Ont. to Fla. w. to Wash., Oreg., Calif. and to Argentina.

Ecology: Leafminer. A larva of this species may mine a Portulaca leaf, leave it, and then mine a succession of leaves before becoming full grown. The mature larva pupates

in the soil. Host: Portulaca. Introduced into Australia.

Schizocera pilicornis Holmgren, 1868. Eug. Resa I, Zool. I, Ins. p. 391. 9, 8.

Schizoceros lateralis Konow, 1899. Buenos Aires Mus. Nac. de Hist. Nat., An. 6: 404. 9.

Shizocerus zabriskei Webster and Malley, 1900. Canad. Ent. 32: 51.

Schizocerus sericeiformis Rohwer, 1908. N. Y. Ent. Soc., Jour. 16: 112. S.

Schizocerus lineatus Rohwer, 1909. Canad. Ent. 41: 12. 9.

Schizocerus collaris Rohwer, 1909. Canad. Ent. 41: 13. ♀.

Schizocerus johnsoni MacGillivray, 1909. Canad. Ent. 41: 403. 2.

Schizocerella axillaris Forsius, 1927. Notulae Ent. 7: 19.

Schizocerella scapularis Forsius, 1927. Notulae Ent. 7: 19. $\, ^{\circ}\!\! \cdot \,$

Taxonomy: Smith, 1972. Amer. Ent. Soc., Trans. 98: 171 (larva).

Biology: Webster and Malley, 1900. Canad. Ent. 32: 51-54. — Garlick, 1922. Canad. Ent. 54: 240. — Force, 1965. Calif. Dept. Agr. Bul., v. 54, pp. 157-160.

Genus SPHACOPHILUS Provancher

This genus is found only in the New World, where most of its representatives are found from southwestern United States to South America. A few species extend north through the central plains region to central I Canada.

Revision: Smith, 1971. Amer. Ent. Soc., Trans. 97: 549-580.

Genus SPHACOPHILUS Subgenus SPHACOPHILUS Provancher

Sphacophilus Provancher, 1889. Addit. Corr. Faune Ent. Canada Hym., Sup., p. 427.
Type-species: Sphacophilus crawii Provancher. Monotypic.

crawii Provancher. Idaho, Oreg. s. to N. Mex., Ariz., Calif.

Sphacophilus crawii Provancher, 1889. Addit. Corr. Faune Ent. Canada Hym., Sup., p. 427.

invitus (Cresson). Wash. s. to Colo., Ariz., Calif.

Schizocera invita Cresson, 1880. Amer. Ent. Soc., Trans. 8: 3. 9.

Genus SPHACOPHILUS Subgenus LITOCOLUS Smith

Sphacophilus subg. Litocolus Smith, 1971. Amer. Ent. Soc., Trans. 97: 556. Type-species: Atomacera cellularis Say. Orig. desig.

Known hosts for this subgenus are members of the plant family Convolvulaceae.

aniculus Smith, S. Ariz.

Sphacophilus (Litocolus) apiculus Smith, 1971. Amer. Ent. Soc., Trans. 97: 556. 2.

cellularis (Say). Conn. to Fla. w. to Ont., Minn., Nebr., Ark. Host: Ipomoea, Convolvulus.

Atomacera cellularis Say, 1836. Boston Jour. Nat. Hist. 1: 213. 9. Schizocerus ebenus Norton, 1867. Amer. Ent. Soc., Trans. 1: 55. 3.

Schizocerus privatus Norton, 1867. Amer. Ent. Soc., Trans. 1: 56. 9.

Family CIMBICIDAE

These are large, robust sawflies, and the larvae are all external leaf feeders. The family is found in most of the world except for the Ethiopian and Australian regions and contains about 130 species.

Taxonomy: Benson, 1938. Roy. Ent. Soc. London, Trans. 87: 369-372 (key to world subfamilies). —Townes, 1962. U. S. Natl. Mus., Bul. 216, p. 67 (Clavellariidae).

SUBFAMILY ABIINAE

Genus ZARAEA Leach

Zaraea Leach, 1817. Zool. Misc., v. 3, p. 113.

Type-species: Tenthredo fasciata Linnaeus. Monotypic.

Members of this Holarctic genus are associated with the plant family Caprifoliaceae.

americana Cresson. Quebec to Alaska s. to Pa., Nebr., N. Mex., Calif. Ecology: Widespread. Host: Symphoricarpos, Lonicera.

Zaraea americana Cresson, 1880. Amer. Ent. Soc., Trans. 8: 1. 9.

Biology: Britton, 1925. Conn. Agr. Expt. Sta., Bul. 265: 341. — Kieffer, 1933. Jour. Econ. Ent. 26: 293. — Middlekauff. 1956. Jour. Econ. Ent. 49: 701.

inflata Norton. Mass. to Pa. w. to Nebr., Colo. Host: Lonicera. Honeysuckle sawfly.

Zaraea inflatus Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 151. \circ . Abia caprifolium Norton, 1867. Amer. Ent. Soc., Trans. 1: 46. \circ .

lonicerae (Linnaeus). N. Y. to Md. w. to Ohio; Europe. Introduced into N. Amer. Host: Lonicera, Symphoricarpos.

Tenthredo lonicerae Linnaeus, 1758. Syst. Nat., Ed. 10, p. 559. Abia nigricornis Leach, 1817. Zool. Misc., v. 3, p. 113. 9, 8.

Taxonomy: Benson, 1946. Ent. Monthly Mag. 82: 101-102.

SUBFAMILY CIMBICINAE

Genus TRICHIOSOMA Leach

Trichiosoma Leach, 1817. Zool. Misc., v. 3, p. 108.

Type-species: Tenthredo lucorum Linnaeus. Desig. by Curtis, 1825.

A Holarctic genus with about 20 species. Adults are large and densely hairy sawflies and may girdle twigs of their host plant with their powerful mandibles. This genus is in need of study. Adults show extreme variation in color and external structure and a thorough study will be necessary to determine the correct status of the segregates listed below.

aleutianum Cresson. Alaska (Aleutian Islands).

Genus CIMBEX Olivier

Crabro Geoffroy, 1762. Hist. Abregee des Insectes, v. 2, p. 261. Suppressed by Internatl. Comm. Zool. Nomencl., Op. 144, 1936. Publication unavailable for nomenclatorial purposes, Internatl. Comm. Zool. Nomencl., Op. 228, 1954.

Type-species: Crabro humeralis Fourcroy. Desig. by Bradley, 1919.

Clavellarius Olivier, 1789. Encycl. Meth., Dict. Ins., v. 4, p. 22. Suppressed by Internatl. Comm. Zool. Nomencl., Op. 216, 1954.

Type-species: Tenthredo lutea Linnaeus. Desig. by Latreille, 1810.

Cimbex Olivier, 1790. Encycl. Meth., Dict. Ins., v. 5, p. 762. N. name for Clavellarius Olivier.

Clavellaria Lamarck, 1801. Systeme Anim. Sans Vert., p. 264. Emend.

A Holarctic genus with about 17 species whose members are the largest of sawflies. Adults have large, powerful mandibles with which they may sometimes girdle the twigs of their host. Members of this genus show considerable variation in color and structure, and an intensive study is required to determine the validity of the segregates listed below.

Taxonomy: Ross and Burke (!), 1947. Bul. Zool. Nomencl., pp. 201-202 (status of the name Clavellarius Olivier, 1789).

americana Leach. Newfoundland to Alaska s. to N. C., Colo., Oreg. Ecology: Widespread.

Family DIPRIONIDAE

A small family found in the coniferous forests of the Northern Hemisphere with about 91 world species in 11 genera. Though more common in the cool northern regions, representatives are found as far south as north Africa, Pakistan, north India, Thailand, El Salvador, and Cuba. Hosts are restricted to conifers; consequently, they are commonly called conifer sawflies. Larvae defoliate the host, and sporadic outbreaks may occur in forest stands resulting in loss of growth and sometimes tree mortality. Many are also a nuisance in plantations, nurseries, and ornamental plantings. All larvae feed on the needles except for those of Augomonoctenus libocedrii Rohwer which feeds in the developing cones of incense cedar. In addition to the foliage, some may also feed on the tender bark of new twigs. Most larvae are gregarious at first but later disperse on the tree in search of new food. Overwintering is either as an egg in the needles or as a prepupa in a cocoon in the forest litter. Adults are short-lived and are most easily obtained by rearing. Depending on the species and sometimes the latitude, there may be from one to five generations a year; however, sometimes it takes more than one year to complete a life cycle. Diapause is common in many species.

Because this is an economically important group, literature references are numerous. The literature cited here for many species is not complete and would take many more pages. Some early literature, expecially prior to 1943, is not reliable because the taxonomy has changed to such an extent that it is impossible to tell to which species the articles refer. The taxonomy of

some groups, Neodiprion in particular, is still flexuous.

Taxonomy: Benson, 1939. Bul. Ent. Res. 30: 339-342 (genera of world). — Benson, 1945. Bul. Ent. Res. 36: 163-164 (world classification). —Gussakovskii, 1947. Faune de L'URSS, Ins. SUBFAMILY DIPRIONINAE

Larvae of this subfamily feed on Pinaceae.

Genus ZADIPRION Rohwer

Neodiprion subg. Zadiprion Rohwer, 1918. Ent. Soc. Wash., Proc. 20: 83.
Type-species: Diprion grandis Rohwer. Orig. desig.

A small genus of four or five species, two of which are found in the United States, the others in Mexico.

Revision: Middleton, 1931. Ent. Soc. Wash., Proc. 33: 165-170. —Smith, 1971. Ent. Soc. Wash., Proc. 73: 187-197.

Taxonomy: Smith, 1974. Ent. Soc. Wash., Proc. 76: 415 (key to spp.).

rohweri (Middleton). Colo., N. Mex., Utah, Nev., Calif. Host: Pinus monophylla, P. edulis. Neodiprion (Zadiprion) rohweri Middleton, 1931. Ent. Soc. Wash., Proc. 33: 166. 9, 3.

townsendi (Cockerell). S. Dak, Nebr., Colo., N. Mex., Ariz. Host: Pinus ponderosa. Lophyrus townsendi Cockerell, 1898. Ann. and Mag. Nat. Hist. (ser. 7) 2: 457. 9. Diprion grandis Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 208. 9, d.

Biology: Swenk, 1911. Nebr. Agr. Expt. Sta., Ann. Rpt. 24, pp. 1-33 ("bull pine sawfly").

Genus NEODIPRION Rohwer

Neodiprion Rohwer, 1918. Ent. Soc. Wash., Proc. 20: 83. Type-species: Lophyrus lecontei Fitch. Orig. desig.

All species of Neodiprion are found in North America. The only Palaearctic species, N. sertifer, was accidentally introduced. In North America, representatives of this genus are found as far south as El Salvador. Neodiprion contains most of the destructive species of Diprionidae in North America. Damage is caused by larval defoliation of valuable timber species in forest stands, plantations, and ornamental plantings. Outbreaks occur sporadically, sometimes over extensive areas and result in loss of growth and occasionally tree mortality. Life cycles differ between species. In general, oviposition is in the needles of the host and the larvae feed gregariously at first but later spread out in search of new food. Feeding may be on the new or old growth, or both. Mature larvae go into the ground and spin a tough, papery cocoon in which they pupate. Overwintering is either as an egg in the foliage or in a cocoon in the ground, and there may be from one to five generations per year depending on the species and climate.

The taxonomy of this genus is based on female genitalia, though in many cases it is necessary to have larvae and accompanying biological data for correct determination. Determination of a single stage is sometimes not possible. Characters have not been found for separation of males. A number of confusing species complexes remain to be studied, and the listing below is not so clear-cut as it appears. Some complexes may represent a single species with a number of geographic or food plant races or may represent a number of separate species units. Complications arise when apparently similar larvae produce different adults and different larvae produce similar adults. Further taxonomic work on Neodiprion will have to involve studies of all stages and biologies of each form from different parts of their ranges. Those who encounter Neodiprion in the field are urged to rear adults, keep associated larvae of each instar, and take notes on their life cycles.

UNPLACED TAXA OF NEODIPRION ROHWER

Two of the following species were described from males. Because the taxonomy of *Neodiprion* is based primarily on females, they cannot be placed.

abdominalis (Say), n. comb. "North-west Territory."

Lophyrus abdominalis Say, 1824. In Keating, Narr. Long's 2nd Exped., v. 2 (App.), p. 315.

edwardsii (Norton). Calif.

Lophyrus edwardsii Norton, 1869. Amer. Ent. Soc., Trans. 2: 330. d.

hypomelas (Rohwer). Colo.

Lophyrus hypomelas Rohwer, 1908. N. Y. Ent. Soc., Jour. 16: 113. d.

Genus DIPRION Schrank

Pteronus Jurine, 1801. Intell. Blatt. Litt-Ztg. Erlangen, v. 1, p. 163. Suppressed by Internatl. Comm. Zool. Nomencl., Op. 157, 1936.

Diprion Schrank, 1802. Fauna Bioca, v. 2, p. 209.

Type-species: Tenthredo pini Linnaeus. Desig. by Rohwer, 1910.

Lophyrus Latreille, 1802. Hist. Nat. Crust. Ins., v. 3, p. 302. Preocc. by Poli, 1791.

Type-species: Tenthredo pini Linnaeus. Monotypic.

Anachoreta Gistel, 1848. Naturgesch. Thierr. f. hoh. Schul., p. 9. N. name for Lophyrus Latreille.

Cristiger Gistel, 1848. Naturgesch. Thierr. f. hoh. Schul., p. 144.

Type-species: Tenthredo pini Linnaeus. Monotypic.

A Palaearctic genus of five or six species, one of which has been introduced into North America.

similis (Hartig). Que., Maine, Ont. to Va. w. to Minn., Ind.; Europe. Introduced, first recorded in Conn. in 1914, probably entering on imported nursery stock. Host: Pinus banksiana, P. cembra, P. divaricata, P. flexilis, P. montana, P. monticola, P. mugho, P. resinosa, P. rigida, P. strobus, P. sylvestris, P. taeda, P. virginiana, and many other pines in Europe. Introduced pine sawfly.

Lophyrus similis Hartig, 1834. Forstl. Convers.-Lex., p. 987 b.

Lophyrus eremita Thomson, 1871. Hym. Scand., v. 1, p. 62.

Genus GILPINIA Benson

Gilpinia Benson, 1939. Bul. Ent. Res. 30: 341. Type-species: Lophyrus polytomus Hartig. Orig. desig.

A Palaearctic genus of about 24 species, two of which have been introduced into North America. In Asia, representatives of this genus are found as far south as Pakistan, northern India, and Thailand. In many references, the species below have been assigned to the genus Diprion.

frutetorum (Fabricius). Que., Maine, Ont. s. to N. J., Pa.; Europe to Siberia. Accidentally introduced, first found in Mass. and R. I. in 1932. Host: Pinus sylvestris, P. resinosa are favored, but also found on Pinus banksiana, P. strobus, P. mugho, P. nigra, and P. cembra in North America, and other pines in Eurasia.
Tenthredo frutetorum Fabricius, 1793. Ent. System., v. 2, p. 111.

hercyniae (Hartig). Newfoundland, Que., Ont. to Pa. w. to Man.; Europe. Accidentally introduced, first found in Ont. in 1922 and in N. H. in 1929; first serious infestation was at Gaspe, Que. in 1930. Host: Picea glauca, P. rubens, P. mariana, P. abies, P. excelsa, P. pungens, P. sitchensis, and other species of spruce in infested areas here and in Europe. European spruce sawfly. Prior to 1941, the species found in North America was referred to under the name polytomum (Hartig).

Morphology: Reeks, 1937. Canad. Ent. 69: 257-264 (adult).

Family TENTHREDINIDAE

This is the largest sawfly family with over 5,000 world species. Representatives of the Tenthredinidae are found in all regions of the world, but it is a dominant family only in the Northern Hemisphere where their predominance increases northwards. Most members of this family are cylindrical, wasplike insects ranging in size from 2.5 mm. to about 15 mm. in length. Most have nine-segmented antennae though some have fewer and some more. Habits and host plants are diverse. Most larvae feed externally on the foliage of the host plant, but some are leafminers, gallformers, or shootborers. Most larvae are caterpillarlike.

The division of the family into subfamilies has always been controversial, and there are nearly as many different arrangements as authors. There are current differences between North American and European workers. Eight subfamilies are utilized in this catalog, most of the units being the same as those previously recognized in the North American literature. Most are readi-

ly separated on the basis of wing venational differences.

For general references to this family, see those listed under Suborder Symphyta.

SUBFAMILY SELANDRIINAE

Members of this subfamily are associated with ferns, grasses, and sedges. The Selandriinae are poorly represented in the northern regions of the world, but it is one of the dominant groups in the tropics; for example, nearly 200 species have been described from the Americas south of the United States.

Revision: Smith, 1969. U. S. Dept. Agr. Tech. Bul. 1398, 48 pp. (Nearctic species).

Type-species: Selandria flavens Klug. Orig. desig.

Selandridea Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 388.

Type-species: Selandridea vanduzeei Rohwer, Orig. desig. Pseudoselandria MacGillivray, 1914. Canad. Ent. 46: 103.

Type-species: Pseudoselandria oxalata MacGillivray Orig. desig.

A small holarctic genus closely related to the Palaearctic Selandria Leach. Larvae of this genus feed on sedges.

flavens (Klug). Labrador to Alaska s. to N. Y., Wis., Colo.; Europe to Siberia. Host: Carex. Tenthredo (Allantus) flavens Klug, 1818. Mag. Gesell. Naturf. Freunde Berlin 8: 48. 9, d. Tenthredo (Coryna) scapularis Lepeletier and Serville, 1825. Encycl. Meth. Ins., v. 10, p.

Phyllotoma puella Fallen, 1829. Monog. Tenthred. Suec., p. 30. 9, d.

Brachythops seminigra Haliday, 1839. In Curtis, Brit. Ent., v. 16, p. 764. Selandria flavescens Thomson, 1870. Opusc. Ent., 2nd Fasc., p. 291.

Selandria decolorata Cresson, 1880. Amer. Ent. Soc., Trans. 8: 15. d.

Selandridea vanduzeei Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 388. 9, 8. Selandria flavens var. flavior Enslin, 1913. Deut. Ent. Ztschr., Beih., p. 144.

Pseudoselandria oxalata MacGillivray, 1914. Canad. Ent. 46: 103. 9.

wuestneii (Konow). Que., N. W. T., Man., Alta., Yukon, Alaska; Europe. Host: Carex. Selandria wustneii Konow, 1885. Wien. Ent. Ztg. 4: 122. 9, 8.

TRIBE ADELESTINI

Genus ADELESTA Ross

Adelesta Ross, 1937. Ill. Biol. Monog. 15(2): 68. Type-species: Selandria nova Norton, Orig. desig.

The single species in this genus is found in North America only.

nova (Norton). N. S., N. B., Que., Maine.

Selandria nova Norton, 1867. Amer. Ent. Soc., Trans. 1: 254. 9.

TRIBE HEPTAMELINI

Genus HEPTAMELUS Haliday

Melicerta Stephens, 1835. Illus. Brit. Ent., v. 7, p. 94. Preocc. by Schrank, 1803. Type-species: Melicerta ochroleuca Stephens. Monotypic.

Heptamelus Haliday, 1855. Nat. Hist. Rev., v. 2, p. 60.

Type-species: Melicerta ochroleuca Stephens. Monotypic.

Caenoneura Thomson, 1870. Opusc. Ent., 2nd Fasc., p. 270. Type-species: Caenoneura dahlbomi Thomson. Monotypic.

Most species of this genus are found in Asia.

ochroleucus (Stephens). B. C. (Squamish, Diamond Head Trail); Europe, Japan. Ecology:

Larva bores downward in stems of ferns. Host: Athyrium, Polypodium, and Blechnum. These hosts were recorded in Europe.

Melicerta ochroleuca Stephens, 1835. Illus. Brit. Ent., v. 7, p. 95.

Caenoneura dahlbomi Thomson, 1870. Opusc. Ent., 2nd Fasc., p. 271. 9.

SUBFAMILY DOLERINAE

The two genera in this subfamily are both widespread throughout the subarctic and temperate regions of the Northern Hemisphere; one species is known from Uganda. Dolerus contains about 125 and Loderus about 16 world species. Larvae feed on horsetails, grasses, sedges, and rushes. A few species may be of importance when feeding in cultivated crops. Adults fly early in the spring and are found in their host-plant communities, on nearby flowers such as those of Cratagous and Prunus, or on willow catkins, Some may feed on the sap of sugar maple. There is normally a single generation a year, and mature larvae overwinter in an earthen cell in the ground. Species of this subfamily can be collected in large numbers. The time of emergence of the adults can be accurately predicted, yet, very little biological work has been done. Larvae for so few species have been associated that it is impossible to identify them beyond genus.

Revision: Ross, 1931. Ill. Biol. Monog. 12(3): 1-116.

Taxonomy: Ross, 1935. Ent. Soc. Wash., Proc. 37: 88-93. - Benson, 1956. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 25: 55-63. —Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 388-389 (holarctic species).

Genus DOLERUS Panzer

Dolerus Jurine, 1801 (May). Intell. Blatt. Litt.-Ztg. Erlangen, v. 1, p. 163. Suppressed by Internatl. Comm. Zool. Nomencl. Op. 135, 1939.

Type-species: Tenthredo gonager Fabricius. Desig. by Latreille, 1810.

Dolerus Panzer, 1801 (September), Faunae Ins. German., heft 82, pl. 11.

Type-species: Dolerus pedestris Panzer. Monotypic.

Dosytheus Leach, 1817. Zool. Misc., v. 3, p. 127.

Type-species: Tenthredo eglanteriae Fabricius. Desig. by Brulle, 1846.

SPECIES GROUP UNICOLOR

asper Zaddach. Mass., Conn., Mich., Ind., S. Dak., Alaska; Europe, Siberia. Host: Cyperaceae and Gramineae.

SUBFAMILY SUSANINAE

Revision: Smith, 1969. Ent. Soc. Wash., Proc. 71: 13-23.

Genus SUSANA Rohwer and Middleton

Susana Rohwer and Middleton, 1932. Ent. Soc. Wash., Proc. 34: 93.

Type-species: Susana cupressi Rohwer and Middleton. Orig. desig.

Members of this exclusively North American genus feed on plants of the family Cupressaceae.

annulata Smith. Calif. (San Mateo Co., Marin Co.). Ecology: Adults collected from Cupressus macrocarpa.

Susana annulata Smith, 1969, Ent. Soc. Wash., Proc. 71: 22, 9, 8.

cupressi Rohwer and Middleton, S. Calif. Host: Cupressus.

Susana cupressi Rohwer and Middleton, 1932. Ent. Soc. Wash., Proc. 34: 94. 9, 8.

fuscala Wong and Milliron. B. C. Host: Juniperus scopulorum.

Susana fuscala Wong and Milliron, 1972. Canad. Ent. 104: 1025-1026. 9, larva.

juniperi (Rohwer). N. Mex. (Las Vegas Hot Springs). Host: Juniperus.

Platycampus juniperi Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 386. 9.

oregonensis Smith. Idaho, Nev., Oreg. Host: Juniperus.

Susana oregonensis Smith, 1969. Ent. Soc. Wash., Proc. 71: 21. 9.

punctata Smith. Calif. (Inyo Co.). Ecology: Adult collected from Juniperus.

rufa Smith. N. Mex., Ariz. (Chiricahua Mts.). Susana rufa Smith, 1969, Ent. Soc. Wash., Proc. 71: 21. 9.

SUBFAMILY NEMATINAE

The Nematinae are a large and diverse group, especially in habits and host plants. It is the dominant sawfly group in the arctic and subarctic regions of the world where they comprise nearly the entire sawfly fauna. Their abundance decreases rapidly southward and only a few species extend into Mexico. Only two species, both *Pristiphora*, are known from South America.

Larval habits range from free leaf feeders to gall formers, others are leaf edge rollers, leaf miners, and some live and feed inside the fruits of rosaceous plants. The taxonomy of many groups is imperfectly known and few have been recently studied. Because of their abundance in the arctic region, many represent holarctic species, and a worker is met with the major obstacle of having to become familiar with the innumerable forms described from Eurasia. Variation is another factor since the extreme arctic climate may influence major morphological and color differences within species. For example, females of Amauronematus abnormis (Holmgren) are normally brachypterous, but females with normal wings also exist. Some of the gall forming groups apparently contain species complexes where there are practically no adequate morphological characters for species separation and where identity may have to be based on specific host records and accompanying biological information. Extensive field work and knowledge of the world fauna will be essential to the study of most groups, and such facilities are not available to most taxonomists.

TRIBE NEMATINI

Genus HOPLOCAMPA Hartig

Hoplocampa Hartig, 1837. Fam. Blattwespen und Holzwespen, nebst Einleitung Naturgesch. Hym., p. 276.

Type-species: Tenthredo (Allantus) brevis Klug. Desig. by Rohwer, 1911.

Macgillivraya Ashmead, 1898. Canad. Ent. 30: 257. Preocc. by Forbes, 1852.

Type-species: Macgillivraya oregonensis Ashmead. Orig. desig.

Macgillivrayella Ashmead, 1899. In Smith, Ins. of N. J., p. 606. N. name for Macgillivraya.

Larvae of this holarctic genus live and feed inside the fruits of Rosaceae. Species that attack cultivated crops such as cherries, pears, and apples may be serious pests. Adults emerge in the spring when their host plant is in bloom and the females oviposit in the ovaries. Sometimes adults can be collected in large numbers from their host blossoms. The larvae feed in the developing fruit of the host, the fruit usually falling off when the larvae mature. The larvae enter the ground where they overwinter. All species are single brooded.

Revision: Rohwer, 1911. U. S. Dept. Agr. Bur. Ent. Tech. Ser. 20(4): 139-148. —Ross, 1943. Amer. Ent. Soc., Trans. 69: 61-92 (as *Holocampa* (!)).

Hemichroa albidovariata Norton, 1872. Amer. Ent. Soc., Trans. 4: 81. 9. Hemichroa phytophagica Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 125. 9, larva. Craterocercus floridanus Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 238. 9, 8.

Genus PLATYCAMPUS Schiodte

Leptopus Hartig, 1837. Fam. Blattwespen und Holzwespen, nebst Einleitung Naturgesch. Hym., p. 184. Preocc. by Mayer, 1835.

Type-species: Nematus (Leptopus) hypogastricus Hartig. Monotypic.

Platycampus Schiodte, 1839. Mag. Zool. (ser. 2) 1: 20, footnote; pl. 6-10. N. name for Leptopus Hartig.

Erasminus Gistel, 1848. Naturgesch. Thierr. f. hoh Schul., p. 9. N. name for Leptopus Hartig.

Camponiscus Newman, 1869. Entomologist 4: 215.

Type-species: Camponiscus healaei Newman. Monotypic.

A small holarctic genus with two North American representatives.

albostigmus (Rohwer). N. S., Maine to Alaska s. to N. Y., Mich., Minn., Colo., Nev., Wash. Ecology: Widespread.

Camponiscus albostigmus Rohwer, 1908. N. Y. Ent. Soc., Jour. 16: 105. 9.

americanus (Marlatt). Que., Maine to Alaska s. to Pa., N. Mex., Idaho. Ecology: Widespread. Host: Populus.

Camponiscus americanus Marlatt, 1896. Canad. Ent. 28: 251. 9, 3. Camponiscus smithi Rohwer, 1908. N. Y. Ent. Soc., Jour. 16: 105. 9.

Platycampus vierecki MacGillivray, 1920. Canad. Ent. 52: 60. 9.

Genus ANOPLONYX Marlatt

Anoplonyx Marlatt, 1896. U. S. Dept. Agr. Div. Ent. Tech. Ser. 3: 18.

Type-species: Nematus pectoralis Lepeletier. Desig. by Rohwer, 1911.

Marlattia Ashmead, 1898. Canad. Ent. 30: 287.

Type-species: Hemichroa laricis Marlatt. Orig. desig.

Larvae of this holarctic genus feed on Larix.

Taxonomy: Wong, 1955. Canad. Ent. 87: 224-227 (larvae). —Woods, 1962. Ent. Soc. Brit. Columbia, Proc. 59: 17 (species in B. C.).

canadensis Harrington. Newfoundland to Maine w. to Yukon, n. B. C., Sask., Minn. Host:

Larix laricina.

Anoplonyx canadensis Harrington, 1902. Canad. Ent. 34: 94. 9.

Platycampus (Anoplonyx) itascus Rohwer and Middleton, 1932. Ent. Soc. Wash., Proc. 34: 96. d.

laricivorus (Rohwer and Middleton). Mont., B. C., Idaho. Host: Larix occidentalis.

Platycampus (Anoplonyx) laricivorus Rohwer and Middleton, 1932. Ent. Soc. Wash., Proc. 32: 95, 9, 8.

luteipes (Cresson). Newfoundland to Maine, N. H. w. to Yukon, n. B. C., Minn., Ill. Host: Larix laricina.

Dineura luteipes Cresson, 1880. Amer. Ent. Soc., Trans. 8:11. d.

Hemichroa laricis Marlatt, 1896. Canad. Ent. 28: 257. 9.

Biology: Reeks and Smith, 1945. Acad. Nat. 2:11.

Morphology: Bracken, 1961. Canad. Ent. 93: 573-593.

occidens Ross, Mont., B. C., Idaho, Oreg. Host: Larix occidentalis.

Platycampus (Anoplonyx) laricis Rohwer and Middleton, 1932. Ent. Soc. Wash., Proc. 34: 95. 9. 6. Preoce, by Marlatt, 1896.

Anoplonyx occidens Ross, 1937. Ill. Biol. Monog. 15(2): 82. N. name.

Genus ADELOMOS Ross

Adelomos Ross, 1935, Canad. Ent. 67: 201.

Type-species: Adelomos cleone Ross. Orig. desig.

cleone Ross. Ky., Ill.

Adelomos cleone Ross, 1935. Canad. Ent. 67: 202. 9.

Genus NEOPAREOPHORA MacGillivray

Neopareophora MacGillivray, 1908. Canad. Ent. 40: 289.

Type-species: Neopareophora martini MacGillivray. Orig. desig.

Dineuridea Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 240.

Type-species: Marlattia erythrothorax Rohwer. Orig. desig.

A small Nearctic genus with several unidentified species in addition to those listed below.

Revision: Ross, 1935. Canad. Ent. 67: 204-205.

erythrothorax (Rohwer). Fla. (Jacksonville).

Marlattia erythrothorax Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 385. 9.

litura (Klug). N. B., Que. to Va. w. to Ill. Ecology: First instar larvae feed inside the buds, subsequent instars feed on the leaves. Host: Vaccinium, especially low-bush blueberry.

Dineura litura Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 83. 9.

Dineura linitus Norton, 1867. Amer. Ent. Soc., Trans. 1: 240. 9.

Dineura lateralis Norton, 1867. Amer. Ent. Soc., Trans. 1: 240. 9.

Neopareophora martini MacGillivray, 1908. Canad. Ent. 40: 289. 9.

Biology: Maxwell, 1953. Canad. Ins. Pest Rev. 31(1): 100. — Neilson, 1955. Canad. Ent. 87: 356-357. — Neilson, 1958. Canad. Ent. 90: 229-234.

Genus NEMATINUS Rohwer

Nematinus Rohwer, 1911. U. S. Dept. Agr., Bur. Ent. Tech. Ser. 20: 99. Type-species: Tenthredo abdominalis Panzer, Orig. desig.

A holarctic genus which is found in North America from N. S. to Alaska south to N. Y., Mich., S. Dak., Colo., and Calif. This genus has not been studied, and the following is merely a list of the described species with their type localities.

ochreatus (Rohwer), N. B. (St. John).

Pteronus ochreatus Rohwer, 1910. U. S. Natl. Mus., Proc. 38: 198. 9.

oronus (Kincaid), Alaska (Yukatat Bay).

Pachynematus oronus Kincaid, 1900. Wash. Acad. Sci., Proc. 2: 347. 9.

pontanioides (Marlatt), Oreg. (Mt. Hood).

Nematus pontanioides Marlatt, 1896. U. S. Dept. Agr., Div. Ent. Tech. Ser. 3: 89. 9.

unicolor (Dyar), N. Y. (Keene Valley). Host: Betula alba.

Nematus unicolor Dyar, 1895. Amer. Ent. Soc., Trans. 22: 308. Larva. Dyar's description precedes that of Marlatt, 1896; previous listings give Marlatt as author.

Genus PACHYNEMATUS Konow

Pachunematus Konow, 1890, Deut. Ent. Ztschr., pp. 233, 238, 246. Type-species: Nematus capreae Panzer. Desig. by Rohwer, 1911.

Known hosts for this genus in North America are grasses, sedges, and dock. Some species in Europe also feed on Salicaceae and Coniferae. Several species reared from wheat and other grain crops may be of economic importance. So far as is known, the grass feeding species are single brooded with the flight and feeding activities occurring early in the spring. Some of the species on sedges apparently have several generations a year. Very little biological work has been done. The taxonomy of this genus is almost entirely based on males. Females of a number of species cannot be separated; consequently, the lists of unplaced taxa below. Larvae are commonly collected, but so few have been associated with the adults that it is impossible to identify them except to genus.

Taxonomy: Ross, 1945, Ent. Soc. Wash., Proc. 47: 105-120 (key to N. Amer. species). -Benson, 1948. Ent. Monthly Mag. 84: 58-65 (British species). - Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 405-406 (holarctic species). —Benson, 1963. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 32: 162-164 (Rumicis group).

SPECIES GROUP CLITELLATUS

anolita Ross. Kans., Tex., Mont., Colo. Host: Wheat.

Pachynematus apicalis Marlatt, 1896. U. S. Dept. Agr., Div. Ent. Tech. Ser. 3: 107. S. Preocc. in Pachynematus by apicalis Hartig.

Pachynematus anolita Ross, 1951. In Muesebeck et. al., U. S. Dept. Agr., Agr. Monog. 2: 39. N. name for apicalis Marlatt.

auratus Marlatt. N. Y., Ohio, Ind., Ill., Iowa, Kans., Mont.

Pachynematus auratus Marlatt, 1896. U. S. Dept. Agr., Div. Ent. Tech. Ser. 3: 99. 9, 8.

clibrichellus (Cameron). N. H. to Alaska; arctic Eurasia. Host: Carex.

Nematus clibrichellus Cameron, 1878. Fauna Scotland, v. 1, p. 32. 8.

Nematus Thomsoni Cameron, 1882. Ent. Soc. London, Trans., p. 540. 9, 8.

Genus EITELIUS Kontuniemi

Eitelius Kontuniemi, 1966. Ann. Ent. Fenn. 31: 46.

Type-species: Pachynematus dentatus Lindqvist. Orig. desig.

Prior to 1967, the species below was placed in the genus *Micronematus* Konow which is now a synonym of *Pristiphora*.

Taxonomy: Wong, 1967. Canad. Ent. 99: 1101-1104.

gregarius (Marlatt). N. S., Mass., Conn., N. J. Host; Salix.

Pachynematus gregarius Marlatt, 1896. Canad. Ent. 28: 256. 9, 8.

Pachynematus rarus MacGillivray, 1921. N. Y. Ent. Soc., Jour. 29: 30. Q. Pontania decrepita MacGillivray, 1921. N. Y. Ent. Soc., Jour. 29: 33. Q.

Genus PRISTIPHORA Latreille

Pristiphora Latreille, 1810. Consid. Generales Crust. Arachn. Ins., p. 294.

Type-species: Pteronus testaceus Jurine. Orig. desig.

Diphadnus Hartig, 1837. Fam. Blattwespen und Holzwespen, nebst Einleitung Naturgesch. Hym., p. 225.

Type-species: Nematus fuscicornis Hartig. Desig. by Rohwer, 1911.

Lygaeonematus Konow, 1890. Deut. Ent. Ztschr., pp. 233, 238, 247.

Type-species: Nematus pini Retzius. Desig. by Rohwer, 1911. Micronematus Konow. 1890. Deut. Ent. Ztschr., pp. 233, 239, 248.

Type-species: Nematus pullus Foerster. Desig. by Rohwer, 1911.

Gymnonychus Marlatt, 1896. U. S. Dept. Agr., Div. Ent. Tech. Ser. 3: 122.

Type-species: Gymnonychus californicus Marlatt. Orig. desig.

Neotomostethus MacGillivray, 1908. Canad. Ent. 40: 290.

Type-species: Neotomostethus hyalinus MacGillivray. Orig. desig.

Pristiphora subg. Sala Ross, 1937. Ill. Biol. Monog. 15(2): 85. Preocc. by Walker, 1867.

Type-species: Nematus chloreus Norton. Orig. desig.

Lygaeonematus subg. Lygaeotus Lindqvist, 1952. Notulae Ent. 32: 82. Invalid, type-species not designated.

Lygaeonematus subg. Lygaeophora Lindqvist, 1952. Notulae Ent. 32: 82. Invalid, type-species not designated.

A large, nearly cosmopolitan genus with diverse host plants. Two species from southern Brazil are the only known South American Nematinae. Several phyletic lines are evident in this genus which will eventually allow separation into more convenient species groupings.

Revision: Marlatt, 1896. U. S. Dept. Agr. Div. Ent. Tech. Ser. 3: 113-125.

Taxonomy: Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 394-396 (holarctic species).

abbreviata (Hartig). Ont., Conn. to Va. w. to Wis., Kans., Colo., Utah; B. C., Wash., Oreg., Calif.; Europe. Ecology: A pest of pear trees. Larva feeds on foliage. Introduced. Host:

Pyrus communis. California pearslug.

Genus CROESUS Leach

Croesus Leach, 1817. Zool. Misc., v. 3, p. 129.

Type-species: Tenthredo septentrionalis Linnaeus. Monotypic.

A small holarctic genus characterized by the enlarged, flattened hind basitarsus. Larvae feed externally on the foliage of the host plant.

Revision: Benson, 1963. Ent. Tidskr. 84: 25 (world species groups). —Smith, 1972. Ent. Soc. Wash., Proc. 74: 169-180 (Nearctic species, adults and larvae).

castaneae Rohwer. N. Y., Pa., Md., Va., Ky. Host: Castanea dentata.

Croesus castaneae Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 213. 9, 8.

66

Taxonomy: Middleton, 1922. U. S. Natl. Mus., Proc. 61: 14 (larva).

curvarius Smith. Conn. Host: Corulus.

Croesus curvarius Smith, 1972. Ent. Soc. Wash., Proc. 74: 175. 9, larva.

latitarsus Norton. Que. to Fla. w. to Alaska, B. C., Utah. Host: Betula. Dusky birch sawfly. Craesus(!) latitarsus Norton, 1862. Ent. Soc. Phila., Proc. 1: 199. 9.

Biology: Jack, 1888, Psyche 5: 41. - Brown, 1940, Canad, Dept. Agr., Forest Ins. Survey 4th Ann. Rpt., p. 16. - Wong, 1954, Canad. Ent. 86: 154.

varus (Villaret), Que. (Montreal); Europe, Introduced (?), Host; Alnus, Nematus varus Villaret, 1832. Soc. Ent. France, Ann. 1: 306. &.

Taxonomy: Buckle, 1930. Canad. Ent. 62: 21 (record of only known specimen taken in N. Amer.).

Genus NEMATUS Panzer

Nematus Panzer, 1801. Faune Ins. German., heft 82, pl. 10.

Type-species: Tenthredo (Nematus) lucida Panzer, Monotypic,

Hypolaepus Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 324.

Type-species: Hypolaepus abbotii Kirby, Monotypic, Holcocneme Konow, 1890. Deut. Ent. Ztschr., pp. 233, 238, 246.

Type-species: Tenthredo crassa Fallen. Desig. by Rohwer, 1911.

Pteronidea Rohwer, 1911. U. S. Dept. Agr. Bur. Ent. Tech. Ser. 20: 98.

Type-species: Nematus ventralis Say, Orig. desig.

A large holarctic genus associated with various trees and shrubs. The larvae are external leaf feeders.

Revision: Marlatt, 1896. U. S. Dept. Agr., Div. Ent. Tech. Ser. 3: 44-75, 87-90.

Taxonomy: Benson, 1962, Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 404-405 (holarctic species).

SPECIES GROUP ABBOTIL

abbotii (Kirby). Ont. to Ga. w. to Wis., Ill. Host: Robinia.

Hypolaepus abbotii Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 324. ♀.

crassus (Fallen). N. W. T. (Mackenzie River, Reindeer Depot); Eurasia, Host; Betula, Populus,

Salix, Rumex. These hosts recorded in Europe.

Tenthredo crassa Fallen, 1808. Svenska Vetensk. Akad., Handl. 29: 106.

Nematus sulcipes Hartig, 1840. Stettin Ent. Ztg. 1: 23. 9, 8.

Genus PONTANIA Costa

Pontania Costa, 1859. Fauna del Regno di Napoli, Imen., pt. 3, p. 20.
Type-species: Nematus gallicola Stephens. Desig. by Marlatt, 1896.

Larvae of this large, holarctic genus form closed, pea-shaped or bean-shaped galls on the leaves of Salix or Populus. This genus is in need of revision, and the following is primarily a list of the described species and their type localities except for the work by Benson (1960). Though Benson (1960) established species groups, many of the North American forms have not been studied adequately to permit such an arrangement.

Revision: Marlatt, 1896. U. S. Dept. Agr., Div. Ent. Tech. Ser. 3: 20-43.

Taxonomy: Benson, 1960. Brit. Mus. (Nat. Hist.) Ent., Bul. 8: 369-384. —Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 403-404 (holarctic species).

Genus EUURA Newman

Two subgenera have been proposed, Euwa for those species whose larvae form stem, twig, or petiole galls on Salix, and Gemmua for those species whose larvae form bud galls on Salix. This genus is in need of study. The following is primarily a list of described species with their type localities without regard to possible synonymy. According to Smith (1968) conventional use of morphological characters for species separation is impossible in this group and identification may have to be based on specific host data and biological information; therefore, the exact identity of many of the described species may never be known.

Revision: Rohwer, 1909, N. Y. Ent. Soc., Jour. 17: 7-25.

Taxonomy: Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 402-403 (holarctic species).

Genus DECANEMATUS Malaise

Decanematus Malaise, 1931, Arkiv for Zool, 23A: 31.

Type-species: Decanematus longiserra Malaise. Orig. desig.

A small genus found in northern Canada and northern Europe.

Revision: Wong, 1968. Canad. Ent. 100: 84-86.

dulichus Wong. N. W. T. (Reindeer Depot, MacKenzie Delta).

Decanematus dulichus Wong, 1968. Canad. Ent. 100: 84. 9.

TRIBE PSEUDODINEURINI

Genus PSEUDODINEURA Konow

Dolerus subg, Pelmatopus Hartig, 1837. Fam. Blattwespen und Holzwespen, nebst Einleitung Naturgesch. Hym., p. 244. Preoce. by Fischer de Waldheim, 1824. Type-species: Dolerus (Pelmatopus) minutus Hartig, Monotypic.

Pseudodineura Konow, 1885, Wien, Ent. Ztg. 4: 297.

Type-species: Tenthredo (Allantus) parvula Klug. Desig. by Rohwer, 1911.
Phullopais Hering, 1934. Internatl. Ent. Ztschr. 28: 353. N. name for Pelmatopus Hartig.

Several unidentified species are known from western United States.

parva (Norton). Maine to Pa. w. to Ill. Ecology: Leafminer. Host: Hepatica. Dineura parvus Norton, 1867. Amer. Ent. Soc., Trans. 1: 241. 3.

Genus KERITA Ross

Kerita Ross, 1937. Ill. Biol. Monog. 15 (2): 80.
Type-species: Kerita fidala Ross, Orig. desig.

An unidentified species is also known from the western United States.

fidala Ross. Ill. Ecology: A leafminer. Host: Mertensia. Kerita fidala Ross, 1937. Ill. Biol. Monog. 15 (2): 80. ♀.

TRIBE PRISTOLINI

Revision: Wong, 1968, Canad. Ent. 100: 1049-1057.

Genus PRISTOLA Ross

Pristola Ross, 1945. Pan-Pacific Ent. 21: 153.

Type-species: Pristola macnabi Ross. Orig. desig.

clarki Wong. Colo. (Echo Lake, Mt. Evans, 10,600 ft.).

Pristola clarki Wong, 1968. Canad. Ent. 100: 1050. 9, d.

macnabi Ross. Newfoundland, N. H., Man., Alta., B. C., Idaho, Oreg. Ecology: Larva lives in berries. Host: Vaccinium membranaceum.

Pristola macnabi Ross. 1945. Pan-Pacific Ent. 21: 154. 9, 3.

Genus MELASTOLA Wong

Melastola Wong, 1968. Canad. Ent. 100: 1053.

Type-species: Gymnonychus resinicolor Marlatt. Orig. desig.

ferruginosa Wong. Alaska, B. C., Wash.

Melastola ferruginosa Wong, 1968. Canad. Ent. 100: 1054. 9, 8.

resinicolor (Marlatt), Alaska,

Gymnonychus resinicolor Marlatt, 1896. U. S. Dept. Agr., Div. Ent. Tech. Ser. 3: 125. ♀. Pachynematus sahlbergi Konow, 1908. Ztschr. System. Hym. Dipt. 8: 83. ♀.

UNPLACED TAXA OF NEMATINAE

The following species are of questionable generic assignment due to inadequate descriptions and inaccessibility, loss, or poor condition of type material. Three species described by Cameron from northern Mexico are included; though not strictly within the scope of this Catalog, they undoubtedly represent southern extensions of northern species.

Hoplocampa! atriceps Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 168. Ga.

Nematus calais Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 144. Q. Arctic America, MacKenzie River.

SUBFAMILY HETERARTHRINAE

Most of these sawflies are small black insects, among the smallest of the Tenthredinidae. Larvae of the Caliroini feed externally, skeletonizing the foliage of the host, and larvae of the Heterarthrini and Fenusini are all leafminers.

Revision: Smith, 1971. U. S. Dept. Agr., Tech. Bul. 1420, 84 pp. (adults and larvae of Nearctic species). —Smith, 1973. Ent. Soc. Wash., Proc. 75: 337-345 (Neotropical species).

Taxonomy: Smith, 1967. Ent. Soc. Wash., Proc. 69: 277-284 (review of subfamily in N. Amer.).

TRIBE CALIROINI

Genus ENDELOMYIA Ashmead

Endelomyia Ashmead, 1898. Canad. Ent. 30: 256.

Type-species: Selandria rosae Harris. Orig. desig.

aethiops (Fabricius). Que., Conn. to Va. w. to B. C., Oreg.; Europe. Ecology: Widespread; a common pest of cultivated roses. Host: Rosa. Rose-slug.

Tenthredo aethiops Fabricius, 1781. Species Insectorum, v. 1, p. 416.

Tenthredo (Selandria) atratula Dahlbom, 1835. Conspectus Tenthred., Sircid., Oryssin. Scand., p. 10.

Genus CALIROA Costa

Caliroa Costa, 1859. Fauna del Regno di Napoli, Imen., pt. 3, p. 59.

Type-species: Caliroa sebetia Costa, Monotypic.

Eriocampoides Konow, 1890, Deut, Ent. Ztschr., p. 239.

Type-species: Tenthredo limacina Retzius. Desig. by MacGillivray, 1909.

Periclistoptera Ashmead, 1898. Canad. Ent. 30: 255.

Type-species: Monostegia alba Norton. Orig. desig.

Larvae of this genus are sluglike in appearance and feed on the underside of the foliage of the host. Host records not listed below are Acer, Ceanothus, and Cotoneaster, all from larvae that cannot be identified. Larvae have not been associated with adults for many species and are all very similar; therefore, adults are needed in most cases for species determination.

annulipes (Klug), Ont.: Europe, Host: Betula papyrifera,

Tenthredo (Allantus) annulipes Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 70.

cerasi (Linnaeus). Que., Ont. to Fla. w. to B. C., Wash., Oreg., Calif., N. Mex.; Eurasia; Africa; Argentina, Chile, Uruguay; Australia, Tasmania, New Zealand; China. Ecology:

Widespread; most commonly a pest of pear trees. Probably native to Europe and introduced to other parts of the world, including N. Amer., by commerce. Host: Purus,

Prunus, Crataegus, Sorbus, and probably many other Rosaceae. Pear-slug.

Polybates slossonae MacGillivrav, 1909, Ent. Soc. Amer., Ann. 2: 265, 9.

Polybates secundus Rohwer, 1910. U. S. Natl. Mus., Proc. 38: 202. 9.

rohweri MacGillivray, N. S., Maine to Fla. w. to Ont., Wis., Ill., Mo. Ecology: A leafminer. Host: Rubus.

Metallus rubi Forbes, 1885. State Ent. Ill. Rpt. 14: 87. J. Preocc. by Boie, 1848.

Metallus rohweri MacGillivray, 1909, Ent. Soc. Amer., Ann. 2: 267, 9.

Metallus bethunei MacGillivrav, 1914. Canad. Ent. 46: 366. 9. 8.

Biology: Houghton, 1908. Ent. News 19: 212-216 (capitalis, not Norton). - Houghton, 1910. Del. Col. Agr. Expt. Sta., Bul. 87: 3-15 (capitalis, not Norton). - Daniel, 1928. N. Y. State Agr. Expt. Sta., Tech. Bul. 133: 3-38.

Genus MESSA Leach

Messa Leach, 1817, Zool, Misc., v. 3, p. 126,

Type-species: Tenthredo hortulana Klug. Monotypic.

Fenusella Enslin, 1914. Deut. Ent. Ztschr., Beih., p. 270.

Type-species: Fenusa Wustneii Konow. Orig. desig. Melanobates MacGillivray, 1916. Conn. State Geol. and Nat. Hist. Survey, Bul. 22: 158.

Type-species: Parabates leucostomus Rohwer, Monotypic.

hortulana (Klug). Mass.; Europe. Ecology: A leafminer. Introduced (?). Host: Populus. Tenthredo (Emphytus) hortulana Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 276.

Phaenusa doederleinii Destefani, 1883, Nat. Sicil. 3: 12. 9. 3.

Phaenusa ticinensis Magretti, 1886. Soc. Ent. Ital., Bul. 18: 25. 9.

leucostoma (Rohwer). N. B., Minn., Iowa, Colo., Alta., Wash., Oreg., Calif. Ecology: Adults collected from Populus.

Parabates leucostoma Rohwer, 1910. U. S. Natl. Mus., Proc. 38: 202. 9.

Blennocampa amara MacGillivray, 1923. Canad. Ent. 55: 161. 9.

nana (Klug). Maine, Mass., N. Y., Ont.; Europe. Ecology: A leafminer. Introduced, first recorded from Maine in 1967. Host: Betula.

Tenthredo (Allantus) nana Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 72.

Tenthredo intercus Zetterstedt, 1838. Ins. Lapp., v. 1, p. 340. Fenusa quercus Cameron, 1885. Monog. Brit. Phytophagous Hym., v. 2, p. 222.

Biology: Lindquist and Thomson, 1970. Canad. Ent. 102: 108-111.

populifoliella (Townsend). N. B. to Conn. w. to Man., S. Dak., Colo., N. Mex., Ariz., Calif. Ecology: A leafminer. Host: Populus.

Blennocampa populifoliella Townsend, 1893. Canad. Ent. 25: 304.

Scolioneura populi Marlatt, 1895. Ent. Soc. Wash., Proc. 3: 235. 9, 8.

Scolioneura luteopicta Rohwer, 1911. U. S. Natl. Mus., Proc. 3: 235. 9, 6.

87

Biology: Townsend, 1892. U. S. Dept. Agr., Insect Life 4: 26-27 (Cottonwood leafminer). —Townsend, 1892. Zoe 3: 234-236 (Tineidae? larvae). —Underwood and Titus, 1968. Canad. Ent. 100: 407-411. —Brown and Eads, 1969. Jour. Econ. Ent. 62: 672-674.

wuestneii (Konow). Que. to Alaska s. to Colo., Calif.; Europe. Ecology: A leafminer. Host:

Fenusa wustneii Konow, 1894. Wien. Ent. Ztg. 13: 91. 9, 8.

Fenusa alaskana Kincaid, 1900. Wash. Acad. Sci., Proc. 2: 345. d.

Genus SETABARA Ross

Parabates MacGillivray, 1909. Ent. Soc. Amer., Ann. 2: 262. Preoce.
Type-species: Parabates histrionicus MacGillivray. Orig. desig.
Setabara Ross. 1951. In Muesebeck, et al., U. S. Dept. Agr., Agr., Monog. 2: 31. N. name.

A monotypic genus found only in western North America.

histrionica (MacGillivray). Colo., Idaho, Nev., Wash., Oreg., Calif. Ecology: Adults collected from Prunus.

Parabates histrionicus MacGillivray, 1909. Ent. Soc. Amer., Ann. 2: 263. 9.

Genus BIDIGITUS Smith

Bidigitus Smith, 1967. Ent. Soc. Wash., Proc. 69: 280. Type-species: Profenusa platani Burks. Orig. desig.

platani (Burks). Calif. Ecology: A leafminer. Host: Platanus racemosa.

Profenusa platanae(!) Burks, 1957. Ent. News 68: 207. 9, 3.

Biology: Brown and Eads, 1965, Calif. Agr. Expt. Sta., Bul. 818: 14, 22-32.

Genus PROFENUSA MacGillivray

Profenusa MacGillivray, 1914. Canad. Ent. 46: 364.

Type-species: Profenusa collaris MacGillivray. Monotypic.

Gunnea Malaise, 1964. Ent. Tidskr. 85: 33.

Type-species: Tenthredo pygmaea Klug. Orig. desig.

alumna (MacGillivray). Maine to Va. w. to Wis., Ill. Ecology: A leafminer. Host: Quercus rubra and probably other oaks. References to alumna as a leafminer of Betula are actually thomsoni (Konow).

Messa alumna MacGillivray, 1923. Ill. Univ. Bul. 20(50): 23. 9.

Messa amica MacGillivray, 1923. Ill. Univ. Bul. 20(50): 23. 8.

Messa appota MacGillivray, 1923. Ill. Univ. Bul. 20(50): 24. d.

Profenusa mainensis Smith, 1966. Ent. Soc. Amer., Ann. 59: 720. 9, larva.

canadensis (Marlatt). Que., Ont. to D. C. w. to Iowa, Mo., Ark. Ecology: A leafminer. Host: Crataegus, to a lesser extent Prunus.

Scolioneura canadensis Marlatt, 1895. Ent. Soc. Wash., Proc. 3: 235. 9.

Profenusa collaris MacGillivrav, 1914. Canad. Ent. 46: 364. 9, 3.

Biology: Parrott and Fulton, 1915. N. Y. Agr. Expt. Sta., Bul. 411; 551-580. —Parrott and
 Fulton, 1915. Jour. Agr. Res. 5: 519-528. —Hamilton, 1943. N. Y. Agr. Expt. Sta., Bul. 703:
 59-61. —Hamilton, 1950. Jour. Econ. Ent. 43: 694-696.

inspirata (MacGillivray). Oreg., Nev., Calif. Ecology: A leafminer. Host: Quercus.

Parabates inspiratus MacGillivray, 1909. Ent. Soc. Amer., Ann. 2: 264. ♀.

lucifex (Ross). Maine, Ont., N. Y., Ill. Ecology: Leafminer. Host: Quercus alba, Q. macrocarpa. Fenusa lucifex Ross, 1936. Ill. State Acad. Sci., Trans. 29: 266. ♀.

Biology: Lindquist and Jackson, 1965. Canad. Dept. Forestry, Bimonthly Prog. Rpt. 21(4): 1.

thomsoni (Konow). Que., Maine, Vt., Conn., Ont., Man.; Ecology: A leafminer. Introduced. Host: Betula.

Fenusa thomsoni Konow, 1886. Wien. Ent. Ztg. 5: 270. 9.

Biology: Lindquist, 1959, Canad. Ent. 91; 625-627 (alumna, not MacGilliyray). - Watson. 1959. Canad. Ent. 91; 618-625 (alumna not MacGillivray). - Martin. 1960. Canad. Ent. 92; 376-384.

Genus NEFUSA Ross

Nefusa Ross, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2, p. 31. Type-species: Nefusa anita MacGillivray, Orig. desig.

The single species in this genus is known only from North America.

ambigua (Norton), Que., Maine to Tenn. w. to Wis, Ecology: A leafminer, Host: Viola, Fenusa ambiguus Norton, 1867. Amer. Ent. Soc., Trans. 1: 225. d.

Messa anita MacGillivray, 1923. Ill. Univ. Bul. 20(50): 23. ♀.

Biology: Shaw, 1940, Jour. Econ. Ent. 33: 951 (Fenusa sp.).

Genus PROLATUS Smith

Prolatus Smith, 1967, Ent. Soc. Wash., Proc. 69: 282, Type-species: Prolatus artus Smith, Orig. desig.

A monotypic genus known only from western North America.

artus Smith, Oreg.

Prolatus artus Smith, 1967, Ent. Soc. Wash., Proc. 69: 283, 9, 8 (?).

Genus FENUSA Leach

Fenusa Leach, 1817. Zool. Misc., v. 3, p. 126.

Type-species: Tenthredo (Emphytus) pumila Klug. Monotypic.

Kaliosysphinga Tischbein, 1846. Stettin Ent. Ztg. 7: 79.

Type-species: Kaliosysphinga dohrnii Tischbein. Monotypic.

Aphadnurus Costa, 1859. Fauna del Regno di Napoli, Imen., pt. 3, p. 40.

Type-species: Aphadnurus tantillus Costa. Monotypic.

Caliosysphinga Konow, 1905, In Wytsmann, Gen. Ins., v. 29, p. 89. Emend.

Kaliofenusa Viereck, 1910, N. J. State Mus., Ann. Rpt. 1909, p. 591.

Type-species: Fenusa ulmi Sundevall, Monotypic,

A genus of several species most of which are holarctic though two of them were probably introduced into this continent.

dohrnii (Tischbein). Newfoundland to Pa. w. to B. C., Oreg., Utah., N. Mex.; Europe; Japan; S. Africa. Ecology: A widespread leafminer. Host: Alnus. European alder leafminer.

Kaliosysphinga dohrnii Tischbein, 1846. Stettin Ent. Ztg. 7: 80.

Fenusa curtis Norton, 1861, Ent. Soc. Phila., Proc. 1: 199, 9.

Phaenusa melanopoda Cameron, 1876. Glasgow Nat. Hist. Soc., Proc. 3: 6.

Fenusa nigricans Thomson, 1870. Opusc. Ent., 2nd Fasc., p. 271.

Fenella westwoodi Cameron, 1882. Monog. Brit. Phytophagous Hym., v. 1, p. 289.

Biology: Slingerland, 1905, N. Y. (Cornell) Agr. Expt. Sta. Bul. 233; 49-62. —Frankenhuyzen, 1970, Ent. Ber. 30: 49-52 (in Netherlands).

pusilla (Lepeletier), Newfoundland to Md. w. to Ont., Minn., Iowa; Wash., Oreg.; Europe.

Ecology: A leafminer, Introduced, first reported in Conn. in 1925. Host: Betula. Birch leafminer.

Tenthredo (Emphutus) pumila Klug, 1814. Mag. Gesell, Naturf, Freunde Berlin 8: 277.

Dolerus (Fenusa?) pusillus Lepeletier, 1823. Monog. Tenthred., p. 120.

Tenthredo pugmaea Zetterstedt, 1838, Ins. Lapp., v. 1, p. 340, 9, 8.

Aphadnurus tantillus Costa, 1859. Fauna del Regno di Napoli, Imen., pt. 3, p. 41, d.

Fenusa fuliginosa Healy, 1869. Entomologist 4: 225-227.

Fenusa minima Brischke, 1883. Schrift. Naturf. Gesell. Danzig 4: 264. 9.

Biology: Britton, 1925. Conn. (State) Agr. Expt. Sta. Bul. 265: 340. - Friend, 1931. Jour. Econ. Ent. 24: 171-177. — Friend, 1933. Conn. (State) Agr. Expt. Sta. Bul. 348: 291-364. -Cheng and LeRoux, 1965. Ent. Soc. Quebec, Ann. 10: 173-188. -Schread, 1971. Conn. (State) Agr. Expt. Sta. Bul. 693: 5-19. - Cheng and LeRoux, 1970. Canad. Ent. 102: 995-1002 (factors in survival of immature stages).

ulmi Sundevall. Que., Ont., Mass., N. Y., Mich.; Europe. Ecology: A leafminer. Introduced. Host: Ulmus. Elm leafminer.

Fenusa ulmi Sundevall, 1844, Skand, Naturf, Forhandl., p. 249. Fenusa intermedia Thomson, 1871. Hym. Scand., v. 1, p. 186. 9.

Messa alsia MacGillivray, 1923. Ill. Univ. Bul. 20(50): 22. 9.

Biology: Felt, 1898. N. Y. State Mus., Bul. 5(23): 237 (an elm leafminer). - Slingerland, 1905. N. Y. (Cornell) Agr. Expt. Sta. Bul. 233: 49-62.

Genus FENELLA Westwood

Fenella Westwood, 1840, Introduct, Modern Class, Ins., v. II, p. 54.

Type-species: Fenella nigrita Westwood. Monotypic.

Melinia Costa, 1859. Fauna del Regno di Napoli, Imen., pt. 3, p. 41.

Type-species: Melinia minutissima Costa, Desig, by Rohwer, 1911.

Paraphullotoma Forsius, 1930. Notulae Ent. 10: 103.

Type-species: Paraphyllotoma judaica Forsius Orig. desig.

Taxonomy: Benson, 1953, Roy, Ent. Soc. London, Proc., Ser. B: Taxonomy 22: 136-138 (key to European species).

nigrita Westwood. Conn., Ont., Mich.; Europe. Ecology: A leafminer. Introduced (?). Host: Potentilla, Agrimonia. Agrimonia was recorded as a host-plant in Europe. Fenella nigrita Westwood, 1840, Introduct, Modern Class, Ins., v. II, p. 54.

SUBFAMILY BLENNOCAMPINAE

A diverse subfamily with various hosts. Most of these sawflies are small to medium, stout insects. Most larvae are external leaf feeders, and adults fall and feign death when disturbed.

Revision: Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, 179 pp. (adults and larvae of Nearctic species).

TRIBE LYCAOTINI

Revision: Smith, 1973. Pan-Pacific Ent. 49: 93-101 (S. Amer.).

Taxonomy: Benson, 1966. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 35: 75-77 (key to world genera).

Genus BLENNOGENERIS MacGillivray

Blennogeneris MacGillivray, 1923. Ill. Univ. Bul. 20(50): 8.

Type-species: Blennocampa typicella MacGillivray. Monotypic.

Lycaotella Ross, 1932. Canad. Ent. 64: 41.

Type-species: Selandria (Hoplocampa) spissipes Cresson. Orig. desig.

coloradensis (Rohwer). Man., Colo., Idaho, Utah, Wash.

Lucaota coloradensis Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 384.

gittinsi Smith, Idaho, Wash,

Blennogeneris gittinsi Smith, 1969. U. S. Dept. Agr. Tech. Bul. 1397, p. 24. 9.

spissipes (Cresson). Ont., Minn., Colo. w. to B. C., Wash., Oreg., Calif. Ecology: Larva lives in terminal bud gall. Host: Symphoricarpos.

Selandria (Hoplocampa) spissipes Cresson, 1880. Amer. Ent. Soc., Trans. 8: 14. 9.

Selandria (Hoplocampa) lenis Cresson, 1880. Amer. Ent. Soc., Trans. 8: 14. d.

Lycaota bruneri Rohwer, 1908. N. Y. Ent. Soc., Jour. 14: 104. 9. N. syn.

Lycaota spissipes brunneus Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 384. ♀. Blennocampa tupicella MacGillivray, 1923. Ill. Univ. Bul. 20(50): 8. 8.

Biology: Ross, 1932, Canad. Ent. 64: 42-44.

Genus LYCAOTA Konow

Lucanta Konow, 1903, Ztschr. System, Hym. Dipt. 3: 147.

Type-species: Selandria sodalis Cresson. Desig. by Rohwer, 1911.

bouquetensis Smith, S. Calif.

Lycaota bouquetensis Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 29. 9.

 ${\bf janetae} \ {\bf Smith}. \ {\bf Oreg., Calif.} \ {\bf Ecology:} \ {\bf Adult} \ {\bf collected} \ {\bf from} \ {\bf Symphoricarpos}.$

Lycaota janetae Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 29. 9, 8.

sodalis (Cresson). Sask., Colo., Utah w. to B. C., Wash., Oreg.

Selandria sodalis Cresson, 1880. Amer. Ent. Soc., Trans. 8: 14. 9.

Lycaota fusca Rohwer, 1908. Canad. Ent. 40: 180. S.

TRIBE TOMOSTETHINI

Genus TOMOSTETHUS Konow

Tomostethus Konow, 1886. Wien. Ent. Ztg. 5: 184, 214.

Type-species: Tenthredo nigrita Fabricius. Desig. by Rohwer, 1911.

A small holarctic genus.

multicinctus (Rohwer). Mass., Ont. to N. C. w. to S. Dak., Kans., Okla., Tex.; Oreg., Calif. Host: Fraxinus americana, F. oregona. Brown-headed ash sawfly.

Monophadnus multicinctus Rohwer, 1909. Canad. Ent. 41: 90. d.

Biology: Sasseer, 1911. Ent. Soc. Wash., Proc. 13: 107-110. — Langford and McConnell, 1935. Jour. Econ. Ent. 28: 208-210. — MacNay, 1957. Canad. Ins. Pest Rev. 35: 184. — Armitage, 1950. Calif. Dept. Agr., Bul. 39: 183.

Genus TETHIDA Ross

Tethida Ross, 1937. Ill. Biol. Monog. 15(2): 96.

Type-species: Tenthredo cordigera Beauvois. Orig. desig.

This genus contains a single North American species.

cordigera (Beauvois). N. B., Que. to Fla. w. to Sask., Mont., S. Dak., Nebr., Kans., Tex. Host: Fraxinus americana, F. nigra, F. pennsylvanica. Black-headed ash sawfly.

Tenthredo cordigera Beauvois, 1809. Ins. Afr. Amer., p. 97. 9.

Tenthredo (Selandria) barda Harris, 1835. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., p. 583. Nom. nud.

Tenthredo bardus Say, 1836. Boston Jour. Nat. Hist. 1: 218. ♀.

Selandria dubia Cresson, 1865. Ent. Soc. Phila., Proc. 4: 244. 9.

Biology: Osborne, 1884. Canad. Ent. 16: 148-152. —Osborne, 1884. Ont. Ent. Soc., Ann. Rpt. 15: 32-34. —Packard, 1890. U. S. Ent. Comm. Rpt. 4 (Bul. 7, rev.), p. 544.

TRIBE PHYMATOCERINI

Genus PHYMATOCERA Dahlbom

Tenthredo subg. Phymatocera Dahlbom, 1835. Conspectus Tenthred., Siricid., Oryssin. Scand., p. 11.

Type-species: Tenthredo (Allantus) aterrima Klug. Monotypic.

Pectinia Brulle, 1846. In Lepeletier, Hist. Nat. Ins., Hym., p. 664.

Type-species: Tenthredo (Allantus) aterrima Klug. Orig. desig.

1 ype-species: 1 entitredo (Attantas) aterrina King. Orig. desig.

Melanoselandria Ashmead, 1900. In Smith, N. J. State Bd. Agr. Ann. Rpt. 27: 606. Nom.

Hypargyricus MacGillivray, 1908. Canad. Ent. 40: 290.

Type-species: Hypargyricus infuscatus MacGillivray. Orig. desig.

Melanoselandria MacGillivray, 1909. Canad. Ent. 41: 404.

Type-species: Melanoselandria zabriskiei MacGillivray. Monotypic.

Species of this holarctic genus are associated with Liliaceae.

fumipennis (Norton). Que. to Ala. w. to Wis., Ill., Mo. Host: Smilacina.

Selandria fumipennis Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 222. 9, 8.

offensa (MacGillivray). Que., Maine to B. C. s. to Ont., Ill., Colo., Utah, Calif. Host: Smilacina.

Paracharactus offensus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 28. 9.

racemosae Smith. Que. to N. C. w. to Wis., Ill.; B. C. Ecology: Adults collected from Smilacina(?), Polygonatum(?).

Phymatocera racemosae Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 49. 9, 8.

similata (MacGillivray). Ont., N. Y. to B. C. s. to Mich., Ill., Iowa, Nebr., Colo., Utah, Calif. Host: Smilacina.

Rhadinoceraea similata MacGillivray, 1908. Canad. Ent. 40: 290. 9.

Hypargyricus infuscatus MacGillivray, 1908. Canad. Ent. 40: 290. 9. Rhadinoceraea lucida Rohwer. 1912. U. S. Natl. Mus., Proc. 43: 229. 9.

smilacinae Smith. Que. to Va. w. to Wis., Ill. Ecology: Adults collected from Smilacina and

smilacinae Smith. Que. to Va. w. to Wis., Ill. Ecology: Adults collected from Smilacina and Polygonatum.

Phymatocera smilacinae Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 55. 9, 3.

UNPLACED TAXA OF PHYMATOCERA DAHLBOM

rusculla (MacGillivray). Oreg. (Marys Peak).

Monophadnus ruscullus MacGillivray, 1923. Psyche 30: 80. d.

zabriskiei (MacGillivray). No locality.

Melanoselandria zabriskiei MacGillivray, 1909. Canad. Ent. 41: 404.

Genus PARACHARACTUS MacGillivray

Paracharactus MacGillivrav, 1908, Canad. Ent. 40: 292.

Type-species: Paracharactus obscuratus MacGillivray. Orig. desig. Dicrostema Benson, 1952. Handb. Ident. Brit. Ins., v. 6, pt. 2(b), p. 101.

Type-species: Selandria gracilicornis Zaddach, Orig. desig.

A small holarctic genus. Adults are most commonly collected by sweeping grasses and sedges.

montivagus (Cresson). Mont., Idaho, Wash., Oreg., Nev., Calif.

Selandria montivaga Cresson, 1880. Amer. Ent. Soc., Trans. 8: 13. 9. Selandria scelesta Cresson, 1880. Amer. Ent. Soc., Trans. 8: 14. 8.

niger (Harrington). Que., Maine to Md. w. to Minn., Iowa, Kans. Host: Carex.

Phymatocera nigra Harrington, 1889. Canad. Ent. 21: 96. 9.

Monophadnus distinctus MacGillivray, 1908. Canad. Ent. 40: 291. ♀.
Tomostethus nortonii MacGillivray, 1908. Canad. Ent. 40: 291. ♀.

rudis (Norton). Que., Maine to Ga. w. to Sask., S. Dak., Colo.

Selandria rudis Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 221. 9.

Selandria rufula Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 221. d. Paracharactus obscuratus MacGillivray, 1908. Canad. Ent. 40: 293. 9.

Genus RHADINOCERAEA Konow

Species of this holarctic genus are associated with Liliaceae and Iridaceae.

Genus RHADINOCERAEA Subgenus RHADINOCERAEA Konow

Rhadinoceraea Konow, 1886. Wien. Ent. Ztg. 5: 184, 211.

Type-species: Tenthredo (Allantus) micans Klug. Desig. by Rohwer. 1911.

brysonensis Smith. Calif. (Bryson).

Rhadinoceraea (Rhadinoceraea) brysonensis Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 67. $\,^{\circ}$.

ctenidium Smith, Calif. (Mt. Pinos, Kern Co., 8900 ft.).

Rhadinoceraea (Rhadinoceraea) ctenidium Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 67. 9.

nigra (Rohwer), S. Calif. Host: Calochortus venustus.

Paracharactus niger Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 231. 9.

utahensis Smith, N. Utah.

Rhadinoceraea (Rhadinoceraea) utahensis Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 70. 9, 3.

Genus RHADINOCERAEA Subgenus VERATRA Smith

Rhadinoceraea subg. Veratra Smith, 1969. U. S. Dept. Agr. Tech. Bul. 1397, p. 70.
Type-species: Selandria nubilipennis Norton, Orig. desig.

aldrichi (MacGillivray). Alta., Idaho, B. C., Wash., Oreg., Nev., Calif. Host: Veratrum.

Pareophora aldrichi MacGillivray. 1923. Ill. Univ. Bul. 20(50): 28. 9. 8.

insularis (Kincaid). Alaska, B. C., Wash., Oreg., Calif. Host; Veratrum.

Monophadnus insularis Kincaid, 1900, Wash, Acad. Sci., Proc. 2: 346, d.

jacintensis Smith, S. Calif.

Rhadinoceraea (Veratra) jacintensis Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 75.

nubilipennis (Norton). N. B., Que. s. to N. C. Host: Veratrum.

Selandria nubilipennis Norton, 1867. Amer. Ent. Soc., Trans. 1: 252. 9. 8.

Neopareophora scelesta MacGillivray, 1908. Canad. Ent. 40: 289. 9.

Monophadnus planus MacGillivray, 1921. Brooklyn Ent. Soc., Bul. 16: 23. d. Preocc. by Klug, 1814.

Monophadnus vapularis Benson, 1930. Entomologist 63: 107. N. name for planus MacGillivray.

Genus LAGONIS Ross

Lagonis Ross, 1937, Ill. Biol. Monog. 15(2): 99.

Type-species: Selandria nevadensis Cresson, Orig. desig.

A small genus known from western North America and east Asia.

nevadensis (Cresson). Alta., Wyo., Utah w. to B. C., Wash., Oreg., Calif. Host: Sambucus. Selandria nevadensis Cresson, 1880. Amer. Ent. Soc., Trans. 8: 13. 9. Paracharactus leucostomus Rohwer. 1912. U. S. Natl. Mus., Proc. 43: 230. 9.

Genus MONOPHADNUS Hartig

Tenthredo subg. Monophadnus Hartig, 1837. Fam. Blattwespen und Holzwespen, nebst Einleitung Naturgesch. Hym., p. 271.

Type-species: Tenthredo albipes Gmelin. Desig. by Ashmead, 1898.

Monophadnus subg. Doderia Malaise, 1935. Ent. Tidskr. 56: 167.

Type-species: Tenthredo (Allantus) spinolae Klug. Orig. desig.

aequalis MacGillivray. Ont., Maine to Md. w. to Alta., Colo. Host: Ranunculus.

Monophadnus aequalis MacGillivray, 1908. Canad. Ent. 40: 292. 9.

Monophadnus plicatus MacGillivray, 1908. Canad. Ent. 40: 292. 9, 8.

Monophadnus transversus MacGillivray, 1908. Canad. Ent. 40: 292. 9.

Monophadnus truncatus Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 232. ♀.

assaracus MacGillivray. Oreg.

Monophadnus assaracus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 26. d.

bakeri Smith. Md., Va., Ill., Mont., Kans.

Monophadnus bakeri Smith, 1969, U. S. Dept. Agr., Tech. Bul. 1397, p. 86. 9.

californicus (Rohwer), Oreg., Calif. Host: Ranunculus.

Neocharactus californicus Rohwer, 1909. Canad. Ent. 41: 89. 9.

Monophadnoides conductus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 24. ♀.

contortus (MacGillivray). Mont., Idaho, B. C., Oreg., Calif.

Monophadnoides contorta MacGillivray, 1923. Psyche 30: 78. 9.

Monophadnus aeratus MacGillivray, 1923. Psyche 30: 79. d.

Aphanisus obsitus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 7. 9.

Aphanisus occiduus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 7. 9.

lattini Smith. N. H., Mass., Conn., Wis., Man., Minn.

Monophadnus lattini Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 91. 9, 3.

pallescens (Gmelin). Newfoundland to N. Y. w. to Mich.; B. C.; Europe. Introduced (?). Host:

Rannuculus. The host was recorded in Europe.

Tenthredo albipes Gmelin, 1790. In Linnaeus, Syst. Nat., Ed. 13, p. 2667. Preocc. by Geoffroy, 1785.

Tenthredo pallescens Gmelin, 1790. In Linnaeus, Syst. Nat., Ed. 13, p. 2668.

Selandria tiliae Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 221. 9.

Monophadnus bipunctatus MacGillivrav, 1908, Canad. Ent. 40: 292. 9.

Monophadnus furvus Benson, 1930. Entomologist 63: 107. Unnecessary n. name for bipunctata MacGilliyray, but also preoce, by Konow. 1898.

Genus STETHOMOSTUS Benson

Stethomostus Benson, 1939. Ent. Monthly Mag. 75: 111.

Type-species: Tenthredo fuliginosa Schrank. Orig. desig.

fuliginosus (Schrank). N. S., Que. to Md. w. to Mich.; Europe; Japan. Introduced (?). Host: Ranunculus.

Tenthredo fuliginosa Schrank, 1781. Enum. Ins. Austriae, p. 334.

Tenthredo (Selandria) fuscus Lepeletier, 1823. Monog. Tenthred., p. 106. d.

Tenthredo (Selandria) fraxini Lepeletier, 1823. Monog. Tenthred., p. 106. 9, 8.

Monophadnus fukaii Rohwer, 1910. U. S. Natl. Mus., Proc. 39: 108. 9, 8.

Genus EUTOMOSTETHUS Enslin

Tomostethus subg. Eutomostethus Enslin, 1914. Deut. Ent. Ztschr., Beih., p. 286. Type-species: Tenthredo luteiventris Klug. Orig. desig.

Tomostethus subg. Atomostethus Enslin, 1914. Deut. Ent. Ztschr., Beih. p. 287.

Type-species: Tenthredo ephippium Panzer. Orig. desig.

Tomostethopsis Sato, 1928. Insecta Matsumurana 2: 178.

Type-species: Tomostethopsis metallicus Sato. Orig. desig.

Forsia Malaise, 1932. Arkiv for Zool. 23: 29.

Type-species: Forsia tomostethi Malaise. Orig. desig.

Most of the species of this genus are found in Asia.

ephippium (Panzer). Newfoundland, N. S., Que., Ont. s. to Md.; Tex.; B. C., Wash.; Europe, N. Africa, Asia Minor. Introduced (?). Host: Poa and other Gramineae. Hosts recorded in Europe

Tenthredo ephippium Panzer, 1798. Faunae Ins. German., heft 52, pl. 5. 9. Selandria inhabilis Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 220. 9.

luteiventris (Klug). N. S., Que. to Md. w. to Mich.; Alta., B. C., Wash., Oreg.; Europe. Ecology: Larva bores in sterile shoots of Juncus until last instar when it emerges and feeds externally, according to European observations. Introduced (?). Host: Juncus. Tenthredo luteiventris Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 56.

Tenthredo (Selandria) fuscipennis Lepeletier, 1823. Monog. Tenthred. p. 107. 9, 8.

TRIBE BLENNOCAMPINI

Genus ARDIS Konow

Ardis Konow, 1886. Wien. Ent. Ztg. 5: 184, 188.

Type-species: Tenthredo (Allantus) bipunctata Klug. Desig. by Rohwer, 1911.

Valco Ross, 1937, Ill. Biol. Monog. 15(2): 99.

Type-species: Selandria irrogata Cresson. Orig. desig.

A small holarctic genus associated with roses.

atrata (Harrington). B. C., Wash., Oreg., Calif. Ecology: Adults collected from Rosa.

Monophadnus atratus Harrington, 1894. Canad. Ent. 26: 193. d. Monophadnoides circina MacGillivray, 1923. Ill. Univ. Bul. 20(50): 24. d.

Paracharactus obtentus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 28. 9.

brunniventris (Hartig). Maine to N. W. T. s. to N. C., Ill., N. Mex., Calif.; Europe to Siberia, Japan, Ecology; Widespread, Larva bores and feeds in shoots of wild and cultivated roses, Host: Rosa. Previous reports of Ardis sulcata (Cameron) in N. Amer. were based on a misidentification and pertain to this species.

Tenthredo (Allantus) bipunctata Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 215. 2. Preocc. by Muller, 1776.

Tenthredo (Monophadnus) brunniventris Hartig, 1837. Fam. Blattwespen und Holzwespen, nebst Einleitung Naturgesch, Hym., p. 274. 9.

Selandria irrogata Cresson, 1880. Amer. Ent. Soc., Trans. 8: 13. 9.

Aphanisus odoratus MacGillivray, 1908. Canad. Ent. 40: 296. 9.

Aphonisus parollelus MacGillivray, 1923, Ill. Univ. Bul. 20(50); 7, 9.

Taxonomy: Smith, 1965. Pan-Pacific Ent. 41: 9-10 (synonymy). -Smith, 1966. Ent. Soc. Amer., Ann. 59: 1292 (larva separated from related species).

Biology: Eide, 1948. Jour. Econ. Ent. 41: 819-821. - Middlekauff, 1958. Pan-Pacific Ent. 34: 202.

Genus MONARDIS Enslin

Monardis Enslin, 1914. Deut. Ent. Ztschr., Beih., p. 284. Type-species: Tenthredo plana Klug, Monotypic,

pulla Smith. Sask. to Colo., Utah and w. to B. C.

Monardis pulla Smith, 1969, U. S. Dept, Agr., Tech, Bul, 1397, p. 114, 9.

Genus APAREOPHORA Sato

Angreophora Sato, 1928, Insecta Matsumurana 2: 185, Type-species: Apareophora forsythiae Sato Orig. desig.

This small genus is found in east Asia and North America.

dvari (Benson), N. B. to N. Y. and Ont. Host: Spiraea salicifolia.

Blennocampa spiraeae Dvar, 1895, Canad. Ent. 27: 194, 9, 3, larva. Preocc. by Brischke and Zaddach, 1883.

Blennocampa dyari Benson, 1930. Entomologist 63: 107. N. name.

Biology: Dyar, 1895, Canad. Ent. 27: 194.

rossi Smith. Maine w. to Wis., Minn.

Apareophora rossi Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 118. 9, 8.

Genus EUPAREOPHORA Enslin

Eupareophora Enslin, 1914. Deut. Ent. Ztschr., Beih., p. 283. Type-species: Blennocampa exarmata Thomson. Monotypic.

Only two species are known, the type-species from Europe and the species below.

parca (Cresson). N. B. to Md. w. to Sask., N. Dak., Iowa, Kans., Tex.; Oreg., Calif. Host. Fraxinus pennsylvanica, F. nigra, F. americana, F. oregona, Carya illinoensis, Chionanthus(?).

Selandria parca Cresson, 1880. Amer. Ent. Soc., Trans. 8: 13. d. Periclista chionanthi Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 132. 9, larva. Monophadnus minutus MacGillivray, 1908. Canad. Ent. 40: 291. 9.

Pareophora quana MacGillivray, 1923. Ill. Univ. Bul. 20(50): 28. d. Pareophora guara MacGillivrav, 1923, Brooklyn Ent. Soc., Bul. 18: 54. 9.

Biology: Packard, 1890. U. S. Ent. Comm. Rpt. 5 (Bul. 7, rev.), p. 545 (Selandria sp.).

Genus PERICLISTA Konow

Larvae of this genus feed on the foliage of Quercus and Carya. The genus is holarctic as well as being found in Chile and southern Argentina.

Revision: Stannard, 1949. Amer. Ent. Soc., Trans. 75: 7-42.

Genus PERICLISTA Subgenus PERICLISTA Konow

Periclista Konow, 1886, Wien, Ent. Ztg. 5: 184, 186.

Type-species: Tenthredo (Allantus) lineolata Klug. Desig. by Rohwer, 1911. Mogerus MacGillivray, 1895. Canad. Ent. 27: 281. Unnecessary n. name for Periclista Konow.

Isodyctium Ashmead, 1898. In Dyar, N. Y. Ent. Soc., Jour. 6: 127.

Type-species: Mogerus carvicolus Dyar. Orig. desig.

Apericlista Enslin, 1914. Deut. Ent. Ztschr., Beih., p. 265.

Type-species: Tenthredo albipennis Zaddach. Orig. desig.

Neoclista Malaise, 1964. Ent. Tidskr. 85: 22.

Type-species: Periclista andrei Konow. Orig. desig.

Cornaria Malaise, 1964. Ent. Tidskr. 85: 22.

Type-species: Cornaria fumipennis Malaise. Monotypic.

Taxonomy: Benson, 1968, Brit. Mus. (Nat. Hist.) Ent., Bul. 22: 152-153 (key to European species).

SPECIES GROUP LINEOLATA

albicollis (Norton). Maine, Ont. to Va. w. to Man., Iowa, Kans., Okla., Tex. Host: Quercus alba, Q. ilicifolia, Q. macrocarpa, Q. rubra, Q. velutina,

Selandria albicollis Norton, 1872. Amer. Ent. Soc., Trans. 4: 85. d.

Periclista mutabilis Konow, 1904, Ztschr. System. Hym. Dipt. 4: 241. 9, 8.

Periclista quercus Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 232. 9, 8.

linea Stannard. Oreg., Calif. Host: Quercus agrifolia.

Periclista linea Stannard, 1949. Amer. Ent. Soc., Trans. 75: 19. 9. 8.

Biology: Beer, 1955. Kans. Ent. Soc., Jour. 28: 19-26 (also description of larva).

media (Norton). N. H., Mass. to Fla. w. to Man., Wis., Iowa. Host: Quercus alba.

Selandria media Norton, 1864, Ent. Soc. Phila., Proc. 3: 9. 9. 8.

Selandria (Hoplocampa) floridana Cresson, 1880. Amer. Ent. Soc., Trans. 8: 12. 8.

Periclista purpuridorsum Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 129. 9, 8.

Periclista confusa MacGillivray, 1908. Canad. Ent. 40: 291. 9.

Periclista similaris Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 155. 9.

Taxonomy: Middleton, 1922. U. S. Natl. Mus., Proc. 61: 4-6 (larva, similaris).

naranga Stannard. Calif.

Periclista naranga Stannard, 1949. Amer. Ent. Soc., Trans. 75: 20. 9.

spicula Stannard. Calif.

Periclista spicula Stannard, 1949. Amer. Ent. Soc., Trans. 75: 21. d.

SPECIES GROUP MELANOCEPHALA

bipartita (Cresson). Mass. to Fla. w. to Mo., Tex. Host: Quercus coccinea.

Selandria (Blennocampa) bipartita Cresson, 1880. Amer. Ent. Soc., Trans. 8: 12. d.

Mogerus emarginatus MacGillivray, 1895. Canad. Ent. 25: 281. d.

Isodyctium murtfeldtiae Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 135. 9.

diluta (Cresson). Maine, Ont. to Fla. w. to Wis., Kans., Tex. Host: Quercus alba, Q. prinus. Selandria (Monophadnus) diluta Cresson, 1880. Amer. Ent. Soc., Trans. 8: 12. 9. Isodyctium subgregarium Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 134. 9, 8.

Taxonomy: Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 127 (male).

entella MacGillivray. Oreg., Calif. Ecology: Adults collected from Quercus. Periclista entella MacGillivray, 1923. Ill. Univ. Bul. 20(50): 29. d.

Taxonomy: Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 128 (female).

marginicollis (Norton). Conn., Ont. to Fla. w. to Iowa, Kans., Okla., Tex. Host: Carya, Quercus

Tenthredo (Allantus) marginicollis Harris, 1835. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., p. 583. Nom. nud.

Selandria marginicollis Norton, 1861. Boston Soc. Nat. Hist., Proc. 8: 220. 9.

Mogerus caryicolus Dyar, 1897. N. Y. Ent. Soc., Jour. 5: 193. ♀, ♂.

Isidyctium(!) atratum MacGillivray, 1908. Canad. Ent. 40: 290. 9. Periclista hicoriae Rohwer, 1917, U. S. Natl. Mus., Proc. 53: 154, 9. Periclista xanthognatha Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 156. 9. Periclista plesia Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 211. 9. Periclista pecanivora Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 212. 9.

Taxonomy: Middleton, 1922. U. S. Natl. Mus., Proc. 61: 2-4 (larva). - Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 129 (larva).

rileyi (Cresson). Fla., Ill., Mo., Tex.

Selandria (Monophadnus) rilevi Cresson, 1880, Amer. Ent. Soc., Trans. 8: 13. 9. Isodyctium floridense Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 134. 9.

stannardi Smith, Iowa, Tex.

Periclista stannardi Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 130. 9.

sulfurana Stannard. N. Y., Mich., Ill., Iowa. Host: Quercus.

Periclista sulfurana Stannard, 1949, Amer. Ent. Soc., Trans. 75: 28. 9. 8.

SPECIES GROUP CALIFORNICA

californica Rohwer, Calif.

Periclista californica Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 154. 9.

electa MacGillivray. Oreg., Calif. Ecology: Adults collected from Quercus. Periclista electa MacGillivray, 1923. Psyche 30: 80. d.

vergorba Stannard, Calif.

Periclista vergorba Stannard, 1949, Amer. Ent. Soc., Trans. 75: 32. 9.

Genus PERICLISTA Subgenus NEOCHARACTUS MacGillivray

Neocharactus MacGillivray, 1908. Canad. Ent. 40: 293.

Type-species: Neocharactus bakeri MacGillivray, Monotypic, Aphanisus MacGillivray, 1908. Canad. Ent. 40: 295.

Type-species: Aphanisus lobatus MacGillivray, Orig. desig.

bakeri (MacGillivray). Calif. Ecology: Adults collected from Quercus agrifolia.

Neocharactus bakeri MacGillivrav, 1908. Canad. Ent. 40: 293. d. Periclista leucostoma Rohwer, 1909. Canad. Ent. 41: 397. 9, 8.

inaequidens (Norton). N. H. to Md. w. to Wis., Ill., Tex. Host: Quercus alba. Selandria inaequidens Norton, 1872. Amer. Ent. Soc., Trans. 4: 84. 9.

Isodyctium infrequens Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 134. 9.

pallipes (Provancher). Calif. Ecology: Adults collected from Quercus agrifolia, Q. wislizenii.

Monophadnus pallipes Provancher, 1895. Nat. Canad. 22: 80. ♀, ♂. Periclista occidentalis Rohwer, 1909. Canad. Ent. 41: 398. 9, 8.

subtruncata Dyar. N. Y. to Fla. w. to Ill., Tex. Host: Quercus coccinea.

Tenthredo (Allantus) labiata Klug, 1818. Mag. Gesell. Naturf. Freunde Berlin 8: 73. 9. Preocc. by Geoffroy, 1785.

Periclista subtruncata Dyar, 1898. N. Y. Ent. Soc., Jour. 6: 131. 9.

Aphanisus lobatus MacGillivray, 1908. Canad. Ent. 40: 295. ♀.

Aphanisus muricatus MacGillivray, 1908. Canad. Ent. 40: 296. 9.

Genus MONOPHADNOIDES Ashmead

Monophadnoides Ashmead, 1898. Canad. Ent. 30: 253.

Type-species: Monophadnus rubi Harris. Orig. desig.

Claremontia Rohwer, 1909, Canad. Ent. 41: 397.

Type-species: Claremontia typica Rohwer. Orig. desig.

Monophadnus subg. Pseudomonophadnus Malaise, 1935. Ent. Tidskr. 56: 167.

Type-species: Tenthredo geniculata Hartig. Orig. desig.

Monophadnus subg. Pseudoblennocampa Malaise, 1935. Ent. Tidskr. 56: 167. Type-species: Tenthredo (Allantus) tenuicornis Klug. Orig. desig.

A holarctic genus mostly associated with Rosaceae though the host for only one North American species is known.

```
atratus (MacGillivray), N. W. T. (Norman Wells), Alaska s. to Oreg.
    Blennocampa atrata MacGillivray, 1893. Canad. Ent. 25: 239. 9.

Paracharactus nigrisomus Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 231. d. quebecensis Smith. Que. Monophadnoides quebecensis Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 150. ♀. typicus (Rohwer), B. C. to Calif.

Claremontia typica Rohwer, 1909. Canad. Ent. 41: 397. 9.

TRIBE CERATULINI

Genus CERATULUS MacGillivray

Ceratulus MacGillivray, 1908. Canad. Ent. 40: 454.

Type-species: Ceratulus spectabilis MacGillivray. Orig. desig.

Only a single species is known for this genus.

spectabilis MacGillivray, Tex. Host: Cissus incisa.

Ceratulus spectabilis MacGillivray, 1908. Canad. Ent. 40: 454. 9, 3.

TRIBE WALDHEIMIINI

Genus WALDHEIMIA Brulle

Waldheimia Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., p. 665.

Type-species: Tenthredo brasiliensis Lepeletier, Orig. desig. Zarca Cameron, 1878, Ent. Soc. London, Trans. p. 142.

Type-species: Zarca apicalis Cameron, Monotypic,

Parazarca Ashmead, 1898. In Dyar, N. Y. Ent. Soc., Jour. 6: 128. N. syn.

Type-species: Parazarca fumipennis Ashmead. Orig. desig. Calozarca Ashmead, 1898. In Dyar, N. Y. Ent. Soc., Jour. 6: 129. N. syn.

alozarca Ashmead, 1898. In Dyar, N. Y. Ent. Soc., Jour. 6: 129. N. syn. Type-species: Selandria fascipennis Norton. Orig. desig.

A large genus found from southwestern United States to Argentina. Of the more than 70 described species, only one reaches north of Mexico.

Revision: Malaise, 1949. Arkiv for Zool. 42A: 33-58 (key to species).

bedeae Smith. S. Ariz.; Mexico.

Waldheimia bedeae Smith, 1969. U. S. Dept. Agr., Tech. Bul. 1397, p. 156. ♀.

Genus ERYTHRASPIDES Ashmead

Erythraspides Ashmead, 1898. In Dyar, N. Y. Ent. Soc., Jour. 6: 128. Type-species: Tenthredo pygmaea Say. Orig. desig.

A small genus found also in Mexico and Central America.

carbonarius (Cresson), Maine, Ont. to Ga. w. to Sask., Colo., Tex. Host: Oenothera.

Selandria carbonaria Cresson, 1880. Amer. Ent. Soc., Trans. 8: 12. 9.

Selandria parva Cresson, 1880. Amer. Ent. Soc., Trans. 8: 12. d.

Blennocampa abjecta MacGillivray, 1921. Brooklyn Ent. Soc., Bul. 16: 22. 9.

Blennocampa absona MacGillivray, 1921. Brooklyn Ent. Soc., Bul. 16: 22. d.

vitis (Harris), N. H. to Fla. w. to Iowa, Ark., La. Host: Vitis. Grape sawfly.

Tenthredo pygmaea Say, 1824. In Keating, Narr. Long's 2nd Exped. (App.) p. 318. 9, 3. Preocc. by Klug, 1814.

Tenthredo (Selandria) vitis Harris, 1835. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., p. 586. Nom. nud.

Selandria vitis Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., Ed. 1, p. 378.

Selandria caryae Norton, 1869. In Packard, Guide Study Ins., p. 224. Adults only, larvae are Eriocampa juglandis (Fitch).

Biology: Horsfall, 1929. Ent. News 40: 174-177.

Genus HALIDAMIA Benson

Halidamia Benson, 1939. Ent. Monthly Mag. 75: 111. Type-species: Blennocampa affinis (Fallen). Orig. desig.

The single species in this genus was probably introduced into North America.

affinis (Fallen). Conn. to Md. w. to Ont., Wis.; Europe. Probably introduced. Host: Galium. Host recorded in Europe.

Hulotoma affinis Fallen, 1807, Svenska Vetensk, Akad., Handl, 28: 207.

Hylotoma assimilis Fallen, 1807, Svenska Vetensk, Akad., Handl. 28: 204. 9.

Tenthredo (Allantus) hyalina Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 58. 9. Blennocampa formosella Costa, 1882. Rend. Accad. Sci. fis Napoli, p. 198.

SUBFAMILY ALLANTINAE

Members of this subfamily are associated with various plants. Some hosts are strawberries, raspberries, roses, violets, and dogwood. After feeding is completed, larvae of many species bore into fruits, wood, or other suitable substances for pupating or overwintering. The occurrence of larvae in these secondary hosts is sometimes more significant if in cultivated fruits or structural wood, but it is purely incidental depending on their proximity to the true host plant. Adults of this subfamily are medium to large sawflies and may be either rather stout or elongated.

TRIBE ERIOCAMPINI

Genus PSEUDOSIOBLA Ashmead

Pseudosiobla Ashmead, 1898. Canad. Ent. 30: 308.

Type-species: Allantus excavatus Norton. Orig. desig.

cephalanthi Rohwer. Mass., N. Y., Mo. Host: Cephalanthus occidentalis.

Pseudosiobla cephalanthi Rohwer, 1911, U. S. Natl. Mus., Proc. 41: 404. d.

excavata (Norton), Maine to Fla. w. to Ill., Tex. Host: Cephalanthus,

Allantus excavatus Norton, 1862. Ent. Soc. Phila., Proc. 1: 143. 9.

Siobla robusta Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 253. 9.

Taxonus floridanus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 352. d.

Genus ERIOCAMPA Hartig

Eriocampa Hartig, 1837. Fam. Blattwespen und Holzwespen, nebst Einleitung Naturgesch. Hym., p. 279.

Type-species: Tenthredo ovata Linnaeus, Desig, by Rohwer, 1911.

Eriocampa subg. Brachyocampa Zirngiebl, 1956. Munchen Ent. Gesell. Mitt. 46: 326. Type-species: Eriocampa dorpatica Konow. Orig. desig.

juglandis (Fitch), N. B., Que., Ont. to N. C. w. to Minn., Nebr. Host: Juglans.

Tenthredo (Allantus) obesa Harris, 1835, In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., p. 583, Nom. nud.

Selandria? juglandis Fitch, 1857. N. Y. State Agr. Soc., Trans. 16: 467. Larva.

Allantus obesus Norton, 1860. Boston Jour. Nat. Hist. 7: 260. 3.

Sciapteryx rotundus Norton, 1867. Amer. Ent. Soc., Trans. 1: 242. 9.

Eriocampa rotundiformis Rohwer, 1909. Canad. Ent. 41: 16. 3.

ovata (Linnaeus), Que., Mass., N. Y., Ont., B. C., Wash.; Europe, Probably introduced

independently into east and west N. Amer. Host: Alnus rubra. Tenthredo ovata Linnaeus, 1761. Fauna Suecica, Ed. 2, p. 392.

Tenthredo gossypina Retzius, 1783. Genera et Species Insectorum, p. 72.

Tenthredo leucogona Schrank, 1802. Fauna Boica, v. 2, p. 251.

Biology: Bouchard, 1961. Ent. Soc. Quebec, Ann. 6: 69-80. - Borden and Dean, 1971. Ent. Soc. Brit, Columbia, Proc. 68: 26-28 (in B. C.).

Morphology: Hsin, 1935, Ztschr. Angew. Ent. 22: 253-294 (epidermal glands of larva).

Genus DIMORPHOPTERYX Ashmead

Dimorphopteryx Ashmead, 1898. Canad. Ent. 30: 308. Type-species: Allantus pinguis Norton. Orig. desig.

Revision: Rohwer, 1915. U. S. Natl. Mus., Proc. 48: 445-448.

Taxonomy: Middleton, 1915. U. S. Natl. Mus., Proc. 48: 497-501 (larvae).

abnormis Rohwer, Ont., Maine to N. C. w. to Sask., Mont., Ill. Host; Prunus, Purus, Amelanchier, Crataegus.

Dimorphopteryx abnormis Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 406. 9, 3. Dimorphopteryx desidiosus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 10. 9.

Dimorphopterux ithacus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 10. 9. Dimorphopterux salinus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 11. 9.

autumnalis Rohwer, Va., Wis, Host: Quercus,

Dimorphopterux autumnalis Rohwer, 1915, U. S. Natl. Mus., Proc. 48: 447. 9. Dimorphopteryx quercivora Rohwer, 1915. U. S. Natl. Mus., Proc. 48: 448. d.

melanognathus Rohwer. Newfoundland to Va. w. to Ont., Mich. Host: Betula papyrifera.

Dimorphopterux melanognathus Rohwer, 1910, U. S. Natl. Mus., Proc. 38: 205. 9.

Dimorphopteryx enucleatus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 10. 9. Dimorphopteryx scopulosus MacGillivray, 1923. Ill. Univ. Bul. 20(50): 12. 9.

Biology: Dvar. 1895, Amer. Ent. Soc., Trans. 22: 311 (pinguis, not Norton). - Dvar. 1897. N. Y. Ent. Soc., Jour. 8: 199. (pinguis, not Norton).

pinguis (Norton), N. S., P. E. I., N. B., Que, to Va. w. to Sask., Colo. Host: Alnus, Betula.

Allantus pinguis Norton, 1860. Boston Jour. Nat. Hist. 7: 244. 9. Sciapterux punctum Provancher, 1878, Nat. Canad. 10: 72. d.

Dimorphopterux pinguis errans Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 406. 9. 8.

Dimorphopteryx coloradensis Rohwer, 1915, U. S. Natl. Mus., Proc. 49: 206. 9.

Dimorphopteryx oronis MacGillivray, 1923. Ill. Univ. Bul. 20(50): 11. 9.

Dimorphopteryx morsei MacGillivray, 1923. Ill. Univ. Bul. 20(50): 11. 9.

Biology: Wong, 1954. Canad. Ent. 86: 154.

virginicus Rohwer, Pa., Ohio s. to Ga. Host: Castanea dentata.

Dimorphopterux pinguis virginica Rohwer, 1911, U. S. Natl. Mus., Proc. 41: 406. 9, 3. Dimorphopteryx castaneae Rohwer, 1915. U. S. Natl. Mus., Proc. 48: 447. 9, 3.

TRIBE EMPRIINI

Genus EMPRIA Lepeletier

Empria Lepeletier, 1828. Encycl. Meth., Dict. Ins., p. 571.

Type-species: Dolerus (Empria) pallimacula Lepeletier, Desig, by Brulle, 1846. Poecilostoma Dahlbom, 1835, Conspectus Tenthred., Siricid., Oryssin, Scand., p. 13.

Type-species: Tenthredo guttatum Fallen. Desig. by Rohwer, 1911.

Prosecris Gistel, 1848. Naturgesch. Thierr. f. hoh. Schul., p. 10. Unnecessary n. name for Poecilostoma.

Poecilosoma Thomson, 1870, Opusc, Ent. 2: 265, Emend, of Poecilostoma, Preocc. by Huebner, 1819, and four others.

Poecilostomidea Ashmead, 1898. Canad. Ent. 30: 256.

Type-species: Emphytus maculatus Norton, Orig. desig.

Tetratneura Ashmead, 1898. Canad. Ent. 30: 256.

Type-species: Selandria ignotus Norton. Orig. desig.

Tetraneura Konow, 1905. In Wytsman, Gen. Ins., v. 29, pp. 102, 171. Emend. Preocc. by Hartig, 1814.

Parataxonus MacGillivray, 1908. Canad. Ent. 40: 367.

Type-species: Taxonus multicolor Norton. Orig. desig.

Leucempria Enslin, 1913, Deut. Ent. Ztschr., Beih., p. 187. Type-species: Tenthredo candidata Fallen. Orig. desig.

Empria subg. Triempria Enslin, 1914. Deut. Ent. Ztschr., Beih., p. 213.

Type-species: Empria tridens Konow, Orig. desig.

Species of this holarctic genus show considerable color variation; consequently the long list of synonymies under some species. This genus also extends into Mexico.

Revision: Ross, 1936. Pan-Pacific Ent. 12: 172-178.

alpina Benson, N. W. T., B. C.; Europe. Host: Salix spp.

Empria alpina Benson, 1938. Soc. Brit. Ent., Trans. 5: 190, 195. 9, d.

candidata (Fallen), Que., Maine, N. H., N. W. T., Man., Alta., Yukon, B. C. Alaska; Europe to Siberia. Host: Betula.

Tenthredo candidata Fallen, 1807. Svenska Vetensk. Akad., Handl. 28: 105.

Tenthredo (Allantus) repanda Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 77. 9.

Superfamily TENTHREDINOIDEA Taxonomy: Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 390 (distribution). coryli (Dyar). N. H., N. Y. w. to Wis., Iowa, Mo. Host: Corylus. Harpiphorus maculatus var. coruli Dyar, 1897. N. Y. Ent. Soc., Jour. 5: 194. 9, larva. Empria mellipes Rohwer, 1910. Canad. Ent. 42: 175. 9. Empria caetrata MacGillivray, 1911. Canad. Genus MONOSOMA MacGillivrav

Monsoma(!) MacGillivray, 1908. Canad. Ent. 40: 368.

Type-species: Taxonus inferentia Norton. Orig. desig.

Monosoma Viereck, 1910. N. J. State Mus., Ann. Rpt. 1909, p. 583. Emend.

A small genus with two species, one Nearctic the other Palaearctic.

inferentia (Norton). Newfoundland to N. C. w. to Minn., Ill. Host: Alnus.

Poecilostoma inferentia Norton, 1868. Amer. Ent. Soc., Trans. 2: 224. d.

Strongylogaster albosectus Provancher, 1878. Nat. Canad. 10: 168. 9.

Monophadnus lineatus Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 177. ♀. A questionable synonym.

Monosoma inferentia var. andronosa Ross, 1932. Canad. Ent. 64: 249. ♀.

Genus MONOSTEGIA Costa

Monostegia Costa, 1859. Fauna del Regno di Napoli, Imen., pt. 3, p. 60.

Type-species: Tenthredo (Allantus) luteola Klug, Desig, by Ross, 1951.

Poecilosoma subg. Nematoceros Konow, 1896. Wien. Ent. Ztg. 15: 52, 54.

Type-species: Tenthredo (Allantus) luteola Klug. Monotypic.

abdominalis (Fabricius). Que., Ont. to N. J., Pa. w. to Ohio; Europe to Siberia. Probably introduced. Host: Lysimachia nummularia, L. vulgaris, L. terrestris, Anagallis.

Tenthredo abdominalis Fabricius, 1798. Sup. Ent. System., p. 216. 9.

Tenthredo dotominatis Fabricius, 1798. Sup. Enc. System., p. 216. ¥.
Tenthredo (Allantus) luteola Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 48.

Monostegia martini MacGillivray, 1908. Canad. Ent. 40: 366. 9.

Monostegia nearctica Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 209. 9, 8.

Biology: Price, 1970. Canad. Ent. 102: 491-495.

Genus AMETASTEGIA Costa

Ametastegia Costa, 1882. Accad. delle Sci. Fis. e Mat. Napoli, Rend. 21(10): 198.

Type-species: Ametastegia fulvipes Costa. Monotypic.

Aomodyctium Ashmead, 1898. Canad. Ent. 30: 309. No included species.

Type-species: Strongylogaster abnormis Provancher. Desig. by Rohwer, 1911.

Protemphytus Rohwer, 1909. Canad. Ent. 41: 92.

Type-species: Emphytus coloradensis Weldon, Monotypic.

Emphytina Rohwer, 1911, U. S. Natl. Mus., Proc. 41: 399.

Type-species: Emphytina pulchella Rohwer, Orig. desig.

Simplemphytus MacGillivray, 1914. Canad. Ent. 46: 363.

Type-species: Simplemphytus pacificus MacGillivray. Monotypic.

Unitaxonus MacGillivray, 1921. Psyche 28: 32.

Type-species: Unitaxonus repentinus MacGillivray, Orig. desig.

Species of this holarctic genus feed on herbaceous plants. On maturing, larvae bore into soft substances to form a pupal cell. This secondary host may be apples, other fruits, soft wood, or pith of other plants. Such records as hosts for species of this genus do not constitute the true host on which the larvae feed.

Revision: Ross, 1937. Arb. uber Morph. u. Taxonom. Ent. 4: 84-91. aperta (Norton). Newfoundland to N. C. w. to Mich., Colo.

Lagium erythrogastrum Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 214. 9.

Genus RHOGOGASTER Konow

Rhogogaster Konow, 1884. Deut. Ent. Ztschr. 28: 257.

Type-species: Tenthredo viridis Linnaeus. Desig. by Rohwer, 1911.

Rhogogastera Konow, 1885. Wien. Ent. Ztg. 4: 123. Emend.

Primarily a Palaearctic genus with only four species in North America. Three of the six species groups separated by Benson (1965) are represented on this continent.

Revision: Ross, 1943. Pan-Pacific Ent. 19: 129-136.

Taxonomy: Benson, 1965. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 34: 105-112 (world species and species groups).

SPECIES GROUP LATERARIA

addenda (Cresson). Mont. and Colo. w. to B. C., Wash., Oreg., Calif.

Tenthredo addenda Cresson, 1880. Amer. Ent. Soc., Trans. 8: 23. 9.

Tenthredo vittatipes Cresson, 1880. Amer. Ent. Soc., Trans. 8: 24. 8.

Rhogogaster truncatus Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 211. 9.

SPECIES GROUP CALIFORNICA

californica (Norton). Que. to Yukon s. to N. Y., Man., N. Mex., Utah, Calif.; Norway. Host: Populus balsamifera, P. tremuloides.

Tenthredo californicus Norton, 1862. Ent. Soc. Phila., Proc. 1: 198. 9.

Tenthredopsis Evansii Harrington, 1889. Canad. Ent. 21: 98. 9.

Tenthredo ripula MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 109. S.

Rhogogaster polaris Lindqvist, 1964. Notulae Ent. 44: 121. 3.

Taxonomy: Benson, 1965. Roy. Ent. Soc. London, Proc. Ser. B: Taxonomy 34: 108.

SPECIES GROUP VIRIDIS

viridis (Linnaeus). Yukon and Alaska s. to Man., Mont., Calif.; Eurasia, Japan. Host: Salix, Populus, Alnus, Ranunculus, Filipendula, Stellaria, Circaea. These hosts recorded in Eurone.

Tenthredo viridis Linnaeus, 1758. Syst. Nat., Ed. 10, v. 1, p. 557. 9.

Rhogogastera ruga MacGillivrav, 1923, Canad. Ent. 55: 160. 9.

Rhogogastera respectus MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 165. 9.

Rhogogaster similis Lindqvist, 1958. Notulae Ent. 38: 68.

Taxonomy: Benson, 1963, Notulae Ent. 43: 137-138 (wear and damage of saws).

Morphology: Zacwilichowska, 1953. Polski Pismo Ent. 23: 114-128 (innervation and sense organs in wings).

Genus ISCHYROCERAEA Kiger

Ischuroceraea Kiaer, 1898. Tromsoe Mus. Aarsh. 19: 68. Type-species: Ischuroceraea hyperborea Kiaer, Monotypic,

The species below is sometimes given in the genus Eniscia Thomson, 1870. However, the only valid type-species designation of Eniscia is Tenthredo consobrina Klug as designated by Rohwer, 1911. Because of this Eniscia is a synonym of Sciapteryx Stephens, 1835, a Palaearctic genus.

Taxonomy: Smith, 1974. Coop. Econ. Ins. Rpt. 24 (35): 707-710 (first N. Amer. record).

arctica (Thomson). Alaska (Umiat); Siberia, Scandinavia. Eniscia aretica Thomson, 1870. Opusc. Ent. 2: 300.

Ischyroceraea hyperborea Kiaer, 1898. Tromsoe Mus. Aarsh. 19: 68.

Genus TENTHREDO Linnaeus

Tenthredo Linnaeus, 1758. Syst. Nat., Ed. 10, v. 1, p. 343.

Type-species: Tenthredo scrophulariae Linneaus, Desig, by Latreille, 1810.

Labidia Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 21.

Type-species: Labidia columbiana Provancher. Monotypic.

Parastatis Kirby, 1881, Ent. Monthly Mag. 18: 107.

Type-species: Parastatis indica Kirby. Monotypic.

Rethrax Cameron, 1899. Manchester Lit. Phil. Soc., Mem. and Proc. 43: 33.

Type-species: Rethrax carinata Cameron, Monotypic,

Fethalia Cameron, 1902. Bombay Nat. Hist. Soc., Trans. 14: 439.

Type-species: Fethalia nigra Cameron. Monotypic.

Cludostomus Konow, 1908. Ztschr. System. Hym. Dipt. 8: 19.

Type-species: Clydostomus cestatus Konow. Desig. by Rohwer, 1911.

Tenthredella Rohwer, 1910. U. S. Natl. Mus., Proc. 39: 117.

Type-species: Tenthredo atra Linnaeus. Orig. desig.

Zamacrophya Rohwer, 1912, U. S. Natl. Mus., Proc. 39: 221.

Type-species: Zamacrophya nigrilabris Rohwer. Orig. desig.

Probably the largest sawfly genus, with over 700 described world species. Adults are large and many are brightly colored. They are commonly found on flowers of various plants where they feed on nectar and pollen and may also be factors in pollination. Adults are also predaceous on other arthropods. Hosts and biologies are known for very few species. European authors have devised their own species groups within the genus; however, until the North American forms are studied in relation to the world fauna, the species groups below are retained from previous catalogs.

Taxonomy: Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 225-226 (key to species of Labidia [originalis group]). - Smulyan, 1923. Boston Soc. Nat. Hist., Proc. 36: 385-465 (New England species).

SPECIES GROUP ORIGINALIS

anomocera Rohwer. Alta., Wyo., Colo. w. to B. C., Oreg., Calif.

fisheri (Rohwer), N. J., Md., Va., Ill.

Tenthredella fisheri Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 276. 9.

glacialis (Ross), Ill.

Tenthredella glacialis Ross, 1931. Ent. Soc. Amer., Ann. 24: 110. 9. 8.

lobata (Norton). N. Y. to N. C. w. to Wis.

Allantus lobatus Norton, 1860, Boston Jour, Nat. Hist. 7: 253. 9.

mantha Ross, Conn. w. to Wis., Ill.

Tenthredella lobata maculosa Smulyan, 1915. Canad. Ent. 47: 324. 9, 3. Preocc. by Lepeletier, 1823.

Tenthredo mantha Ross, 1951. In Muesebeck, et al., U. S. Dept. Agr., Agr. Monog. 2: 73. N. name.

SPECIES GROUP LEUCOSTOMA

einetitibiis Norton. N. H., N. Y. w. to Alta.

Tenthredo cinctitibiis Norton, 1869. Amer. Ent. Soc., Trans. 2: 239. 9.

Tenthredo decorata Provancher, 1878. Nat. Canad. 10: 200. ♀. A questionable synonym.

erythromera Provancher. Que., S. Dak., Colo. w. to Alaska, B. C., Wash., Oreg., Calif.

Tenthredo erythromera Provancher, 1885. Addit. Corr. Faune Ent. Canada Hym., p. 13. 9. Tenthredo atrocoerulea Provancher, 1885. Addit. Corr. Faune Ent. Canada Hym., p. 13. 9. Tenthredo nigricostada Provancher, 1885. Addit. Corr. Faune Ent. Canada Hym., p. 14. 9.

Tenthredo nigricostata Provancher, 1885. Addit. Corr. Faune Ent. Canada Hym., p. 14. 4. Tenthredo terminalis Provancher, 1885. Addit. Corr. Faune Ent. Canada Hym., p. 14. 3.

Preocc. by Smith, 1878.

Tenthredo nigrisoma Harrington, 1894. Canad. Ent. 26: 195. 9. Preocc.

Tenthredo chaonica Enslin, 1912. Arch. f. Naturgesch. 6: 105. N. name for terminalis Provancher.

Tenthredo regula MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 166. 9.

Tenthredo requieta MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 167. ♀.

fraternalis (Ross). Alta., B. C.

Tenthredella fraternalis Ross, 1931. Ent. Soc. Amer., Ann. 24: 113. 9.

fumipennis Norton, Calif.

Tenthredo fumipennis Norton, 1869. Amer. Ent. Soc., Trans. 2: 236. d.

leucostoma Kirby, N. S. to Pa. w. to Alta., S. Dak., Colo.

Tenthredo rufipes Say, 1824. In Keating, Narr. Long's 2nd Exped. (App.) p. 317. ♀. Preocc. by Linnaeus, 1758.

Tenthredo leucostoma Kirby, 1837. Fauna Bor.-Amer., v. 4, p. 256. Tenthredo rufopedibus Norton, 1864. Ent. Soc. Phila., Proc. 3: 15. 3.

Taxonomy: Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 392 (Possibly a geographical race of *Tenthredo atra* Linnaeus, a widespread species in Eurasia).

mellipes Rohwer, Colo.

Tenthredo mellipes Rohwer, 1909. Canad. Ent. 41: 105. 9.

nigritibialis MacGillivray. Wash.

Tenthredo nigritibialis MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 107. 3.

nimbipennis Cresson, Md., Ill., Ark., Tex.

Tenthredo nimbipennis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 155. 9.

remea MacGillivray. Oreg.

Tenthredo remea MacGillivray, 1923, N. Y. Ent. Soc., Jour. 31: 107. ♀.

Tenthredo remora MacGillivray, 1923. N. Y. Ent. Soc., Jour. 21: 108. S.

ruficollis Harrington, B. C.

Tenthredo ruficollis Harrington, 1894. Canad. Ent. 26: 195. 9.

ruma MacGillivrav. Pa.

Tenthredo ruma MacGillivray, 1923. Ill. Univ. Bul. 20(50): 36. d.

subcoerulea Eschscholtz. Que. to Alaska s. to Fla., Colo., Calif. Ecology: Widespread.

Tenthredo subcoerulea Eschscholtz, 1822. Entomographien, p. 91.

Allantus flavomarginis Norton, 1860. Boston Jour. Nat. Hist. 7: 254. 9.

Tenthredo melanosoma Harrington, 1894, Canad. Ent. 26: 194. 9.

115

Tenthredo pallipunctus MacGillivray, 1895. Canad. Ent. 27: 282. 9. A questionable synonym.

Tenthredo sahlbergii Konow, 1908, Ztschr. System. Hym. Dipt. 8: 91. 9, 3.

SPECIES GROUP OCCIDENTALIS

bella Cresson, Colo.

Tenthredo bella Cresson, 1880. Amer. Ent. Soc., Trans. 8: 21. 9.

occidentalis Cresson. Ont. (?), Wyo., Colo.

Tenthredo occidentalis Cresson, 1880. Amer. Ent. Soc., Trans. 8: 23. 9.

Tenthredo vapida Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 315. $\, \circ \,$, $\, \circ \,$. A questionalbe synonym.

Tenthredo ferrugineipes var. pikei Rohwer, 1909. Canad. Ent. 41: 107. ♀.

Tenthredo varifrons Rohwer, 1909. Canad. Ent. 41: 110. 3. A questionable synonym. subrufescens Kirby. Ont.

Tenthredo subrufescens Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 311. 9.

SPECIES GROUP GRANDIS

colon Klug. Labrador, N. B., N. H. w. to Alaska; Europe, Asia Minor, Siberia. Host: Viburnum, Salix, Rosa, Corylus, Sorbus. These hosts recorded in Europe.

Tenthredo (Allantus) colon Klug, 1814. Mag. Gesell. Naturf. Freunde Berlin 8: 182. 9, 8.

Tenthredo eburneifrons Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 306. 9.

Tenthredo nigricollis Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 308. 9.

Taxonomy: Benson, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 12: 392 (Tenthredo livida of American authors, not Linnaeus).

grandis (Norton). N. B., Que., Ont. s. to N. C.

Allantus grandis Norton, 1860. Boston Jour. Nat. Hist. 7: 239. 9.

Tenthredo antennata Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 308. 9.

Tenthredo dubitatus MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 103. S.

SPECIES GROUP VERTICALIS

borealis Kirby. Ont., N. Y. w. to Alta., Minn.

Tenthredo cingulata Provancher, 1878. Nat. Canad. 10: 196. 9. Preocc.

Tenthredo borealis Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 318. 9.

Tenthredo rutila MacGillivray 1923. Canad. Ent. 55: 160. 9.

verticalis Sav. N. B., Que., Ont. to N. C. w. to Minn.

Tenthredo verticalis Say, 1824. In Keating, Narr. Long's Exped. (App.) p. 317. 9.

Tenthredo causatus MacGillivray, 1900. Canad. Ent. 32: 178. d.

Tenthredo rubripes MacGillivray, 1900, Canad. Ent. 32: 178. 3.

SPECIES GROUP SEMIRUFA

attracta Norton. "English River."

Tenthredo attractus Norton, 1869. Amer. Ent. Soc., Trans. 2: 240. ♀.

concessa Norton. Ont. to Pa. w. to Alta., S. Dak., Mont., Colo. Host: Betula.

Allantus tricolor Norton, 1860. Boston Jour. Nat. Hist. 7: 247. 9. Preocc.

Tenthredo concessus Norton, 1869. Amer. Ent. Soc., Trans. 2: 238. 9.

Tenthredo barnstoni Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 314. ♀, ♂. A questionable synonym.

Tenthredo cressonii Kirby, 1882, List, Hym. Brit. Mus., v. 1, p. 315. 9.

Tenthredo uniformis Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 317. ♀.

Tenthredella rohweri Smulyan, 1915. Canad. Ent. 47: 323. N. name for tricolor Norton.

Tenthredella tricolor var. savanna Ross, 1931. Ent. Soc. Amer., Ann. 24: 116. 9.

Biology: Dyar, 1895. Amer. Ent. Soc., Trans. 12: 312.

eximia Norton, Maine to N. J. w. to Alta., Colo.

Tenthredo eximius Norton, 1869. Amer. Ent. Soc., Trans. 2: 231. 9, 8.

Tenthredo pallicoxa Provancher, 1878. Nat. Canad. 10: 201. Q. A questionable synonym.

Tenthredo nova MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 105. 9.

Tenthredo reliquia MacGillivray, 1923, N. Y. Ent. Soc., Jour. 31: 168, 9.

Tenthredo resticula MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 168. 9.

Biology: Smith and Kido, 1949. Hilgardia 19: 54 (host).

SPECIES GROUP BIGEMINA

bigemina (Dyar). B. C. s. to Nev., Calif.

Allantus annularis Norton, 1867. Amer. Ent. Soc., Trans. 1: 262. 9, 3. Preocc. by Schrank. 1776.

Allantus elegantulus Cresson, 1880. Amer. Ent. Soc., Trans. 8: 17. ♀, ♂. Preocc. by Fallen, 1808.

Labidia opimus var. bigeminus Dvar. 1893. Canad. Ent. 25: 195. 9.

Tenthredo obliquatus MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 105. 9, 8.

Tenthredo elegantula oregona Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 411. 9.

Tenthredo admeta Enslin, 1912. Arch. f. Naturgesch. 6: 103. N. name for annularis Norton.

Tenthredo arethusa Enslin, 1912. Arch. f. Naturgesch. 6: 103. N. name for elegantulus Cresson.

UNPLACED TAXA OF TENTHREDO LINNAEUS

Most of the species in the following list were described from males and belong to groups in which it is impossible to identify this sex with any degree of certainty.

alpestris Rohwer. Colo.

Tenthredo alpestris Rohwer, 1909. Canad. Ent. 41: 146. d.

auraria Konow, Alaska (Ft. Wrangel).

Tenthredo auraria Konow, 1899, Ent. Nachr. 25: 7. 9.

hivittata Kincaid, Alaska,

Tenthredo bivittata Kincaid, 1900. Wash. Acad. Sci., Proc. 2: 364. 9.

cinctitibiis abdominalis (Smulvan), n. comb. N. H.

Tenthredella cinctitibiis abdominalis Smulyan, 1915. Canad. Ent. 47: 324. ♀. Preocc. by Fabricius, 1798.

discrepans Norton, Ont.

Tenthredo discrepans Norton, 1868. Amer. Ent. Soc., Trans. 2: 235. d.

divergens Rohwer, Colo.

Tenthredo divergens Rohwer, 1909. Canad. Ent. 41: 112. S.

diversicens Rohwer, N. B.

Tenthredo diversiceps Rohwer, 1910. U. S. Natl. Mus., Proc. 38: 208. S.

frigida MacGillivray, N. H., Wash.

Tenthredo frigida MacGillivray, 1895. Canad. Ent. 27: 80. d.

hvalina MacGillivrav. N. Y.

Tenthredo hyalina MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 108. d. Preocc.

hypoleuca Rohwer, Colo.

Tenthredo hypoleuca Rohwer, 1909. Canad. Ent. 41: 147. S.

juga Konow. Alaska.

Tenthredo juga Konow, 1908. Ztschr. System. Hym. Dipt. 8: 89. 9.

lovetti Benson, Oreg.

Tenthredo rustica MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 113. d. Preocc. by Linnaeus. 1758.

Tenthredo lovetti Benson, 1930. Entomologist 63: 107. N. name.

magnata MacGillivrav. Wash.

Tenthredo magnatus MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 107. d.

messica MacGillivray, Wash.

Tenthredo messica MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 107. S.

messicaeformis Rohwer, Colo.

Tenthredo messicaeformis Rohwer, 1909. Canad. Ent. 41: 147. 3.

mimula Cresson. Colo.

Tenthredo mimula Cresson, 1880. Amer. Ent. Soc., Trans. 8: 23. S.

morosa Cresson. Colo.

Tenthredo morosa Cresson, 1880. Amer. Ent. Soc., Trans. 8: 23. S.

mutans Norton, Canada.

Tenthredo mutans Norton, 1869. Amer. Ent. Soc., Trans. 2: 236. d.

nigricoxi MacGillivray. Wash.

Tenthredo nigricoxi MacGillivrav, 1900, Canad. Ent. 32: 181. 3.

pallipectis MacGillivray. Wash.

Tenthredo pallipectis MacGillivray, 1897. N. Y. Ent. Soc., Jour. 5: 106. d.

reflua MacGillivray, Oreg.

Tenthredo reflua MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 111. d.

reposita MacGillivray, Oreg.

Tenthredo reposita MacGillivray, 1923, N. Y. Ent. Soc., Jour. 31: 116. 3.

reputina MacGillivray. Oreg.

Tenthredo reputina MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 114. d.

resegmina MacGillivray, Oreg.

Tenthredo resegmina MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 115. d.

restricta MacGillivray, Oreg.

Tenthredo restricta MacGillivray, 1923. N. Y. Ent. Soc., Jour. 31: 110. d.

TRIBE MACROPHYINI

Genus MACROPHYA Dahlbom

Tenthredo subg. Macrophya Dahlbom, 1835. Conspectus Tenthred., Siricid., Oryssin, Scand., p. 11.

Type-species: Tenthredo rusticus Linnaeus Desig, by Westwood, 1840. T. rusticus in sense of authors at that time.

Zalagium Rohwer, 1912. U. S. Natl. Mus., Proc. 43: 216.

Type-species: Zalagium clypeatum Rohwer. Orig. desig.

A large holarctic genus. Little is known of the hosts and biologies for most species.

Taxonomy: Middleton, 1922, U. S. Natl. Mus., Proc. 61: 6-11 (larvae). - Ross, 1931. Ent. Soc. Amer., Ann. 24: 119-128 (species with white apical antennal segments). - Malaise and Benson, 1934. Arkiv for Zool. 26A: 4-5 (Tenthredo rustica L. is Argidae; T. rustica auct., nec Linnaeus= Macrophya montana (Scopoli)).

Suntexis libocedrii Rohwer, 1915. Ent. Soc. Wash., Proc. 17: 115. 9.

Taxonomy: Middlekauff, 1964. Pan-Pacific Ent. 40: 257 (male, host, distribution).
—Middlekauff, 1975 (1974). Pan-Pacific Ent. 50: 288-290 (larva).

Biology: Wickman, 1967. Ent. Soc. Amer., Ann. 60: 1291-1294. — Westcott, 1971. Pan-Pacific Ent. 47: 310 (hosts, distribution).

Family SIRICIDAE

Larvae of this family are wood borers, members of the Siricinae in coniferous trees and those of the Tremicinae in angiosperm trees. The North American species are not known to attack sound trees, only those that have been weakened or recently felled. Fire damaged trees are particularly attractive to adults for oviposition, and large populations may build up in recent burns. The boring of the larvae reduces the quality of lumber and the emergence of the adults may damage buildings where they may bore through plaster walls, carpeting, and hardwood floors to exit. In Europe, Urocerus gigas gigas (L.) has been reported to cut through metal and lead telephone cables. Because of their habits, some species have been spread by commerce to many parts of the world, and it is not uncommon to find them out of their normal range.

The family is cosmopolitan except perhaps for South America. About 85 species in 9 genera are known from the world. The common names horntails or woodwasps are sometimes used for

this family.

Genus ERIOTREMEX Benson

Eriotremex Benson, 1943. Bul. Ent. Res. 34; 42.

Type-species: Tremex smithi Cameron, Orig. desig.

This genus of about 10 species is found in southeast Asia. The single species taken in the United States is undoubtedly an introduction.

Taxonomy: Benson, 1943. Bul. Ent. Res. 34: 42 (key to spp.). —Maa, 1949. Notes d'Ent. Chinoise (Mus. Heude) 13: 127-134, 175-176. —Maa, 1956. Hawaii. Ent. Soc., Proc. 16: 91-92 (key to females).

formosanus (Matsumura). Ala. (Covington Co., Coffee Co.); Formosa; Indochina. Ecology: In Ala., emerged from firewood (water-oak tree) in home. Accidentally introduced.

Tremes formosanus Matsumra. 1912. Thous. Ins. Japan. Sup., v. 4, p. 21, pl. 43, fig. 12. ?.

Family XIPHYDRIIDAE

Larvae of this family are wood borers in dead or dying angiosperm trees. Healthy trees and sound wood are not attacked. Adults sometimes emerge from firewood brought into homes, consequently arousing concern. The family is cosmopolitan with about 82 species in 22 genera; only one genus is found in North America.

Revision: Rohwer, 1918. Ent. News 29: 105-111.

Taxonomy: Hedicke, 1938. Hym. Cat., pt. 7, 17 pp. (world catalog). — Maa, 1949. Notes d'Ent. Chinoise (Mus. Heude) 13: 20-76 (world classification). — Benson, 1954. Roy. Ent. Soc. London, Trans. 105: 151-158. (world classification).

Family ORUSSIDAE

Larvae of this family are believed to be parasites of wood boring insects, particularly beetle larvae. Guiglia schauinslandi (Ashmead) of New Zealand has been documented as a parasite of the siricid, Sirex noctilio (Fabricius). Adults are most commonly collected from standing or downed dead trees on which they have a characteristic upward and downward or back and forth running pattern. The family is cosmopolitan and contains about 66 species in 14 genera with the bulk of the species found in the tropical regions.

Genus OPHRYNOPUS Konow

Ophrynopus Konow, 1897. Termes. Fuzetek 20: 605.

Type-species: Ophrynopus andrei Konow. Desig. by Rohwer, 1911.

Ophrynella Ross, 1937, Ill. Biol. Monog. 15(2): 113.

Type-species: Oryssus nigricans Cameron, Orig. desig.

This genus contains 7 Neotropical species, one of which reaches Texas. An unidentified species has been collected in Arizona.

nigricans (Cameron). Tex.; Guatemala.

Oryssus nigricans Cameron, 1883. Biol. Cent.-Amer., Hym. v. 1, p. 69. 9.

Genus KULCANIA Benson

Kulcania Benson, 1935. Rhodesian Mus., Occ. Papers No. 4, pp. 2, 5.

Type-species: Ophrynopus costaricensis Bischoff, Orig. desig.

An unidentified species belonging to this genus has been collected in Florida.

Superfamily CEPHOIDEA

Family CEPHIDAE

The Cephidae are called stem sawflies because of the habit of the larvae which bore and feed in grass stems, berry canes, or stems or twigs of various shrubs or trees. Those species whose hosts are cultivated grains may be serious pests. The adults are slender, cylindrical, ichneumon-like insects and may be found around the host plant. Adults of Cephini are commonly attracted to yellow flowers in the vicinity of the host. About 13 genera and 100 species are recognized for the world, most of which are Palaearctic.

Revision: Ries, 1937. Amer. Ent. Soc., Trans. 63: 259-324 (Nearctic species). — Middlekauff, 1969. Calif. Ins. Surv., Bul. 11: 1-18 (keys to Nearctic genera and species; emphasis on Calif. species).

Taxonomy: Middleton, 1917. Ent. Soc. Wash., Proc. 19: 174-179 (larvae). —Benson, 1935. Ann. and Mag. Nat. Hist., (10) 16: 535-553 (world genera). —Klima, 1937. In: Hedicke, Hym. Cat., pt. 2, pp. 1-51 (world catalog). —Benson, 1946. Roy. Ent. Soc. London, Trans. 96: 89-108 (world classification; keys to subfamilies, tribes, genera).

SUBFAMILY CEPHINAE

TRIBE HARTIGIINI

Genus CAENOCEPHUS Konow

Caenocephus Konow, 1896. Wien. Ent. Ztg. 15: 151. Type-species: Caenocephus jakowleffi Konow. Monotypic.

The only other species in this genus is found in Siberia.

aldrichi Bradley. B. C., Wash., Idaho, Oreg., Calif. Host: Conium maculatum(?). An adult collection record.

Caenocephus aldrichi Bradley, 1905. Canad. Ent. 37: 363. 9. Caenocephus konowi Bradley, 1905. Canad. Ent. 37: 363. d.

Taxonomy: Middlekauff, 1952. Pan-Pacific Ent. 28: 108 (distribution; possible host).

Genus HARTIGIA Schiodte

Hartigia Schiodte, 1838. In Kroyer, Naturhist. Tidsskr., v. 2, p. 332.
 Type-species: Astatus satyrus Panzer. Desig. by Boie, 1855.
 Cerobractus Costa, 1860. Fauna del Regno di Napoli, Imen., pt. 3, p. 9.
 Type-species: Cerobractus major Costa. Monotypic.
 Macrocephus Schlechtendal, 1878. Ent. Nachr. 4: 153.

Type-species: Macrocephus ulmariae Schlechtendal. Monotypic.

Cephosoma Gradl, 1881. Ent. Nachr. 7: 294.

Type-species: Cephosoma syringae Gradl, Monotypic.

Copiosoma Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 364. Error for Cephosoma Gradl?.

Adirus Konow, 1899. Ent. Nachr. 25: 74.

Type-species: Cephus trimaculatus Say. Monotypic.

Paradirus Dovnar-Zapolskii, 1931. Mus. Zool. Acad. Sci. Leningrad, Ann. 32: 39.

Type-species: Paradirus algiricus Dovnar-Zapolskii. Monotypic.

Larvae of this genus bore in stems of roses and berries. Of 15 species, only 3 are found in North America.

cowichana Ries. B. C., Wash., Oreg. Host: Rosa.

Hartigia cowichana Ries, 1937, Ent. News 48: 82. 9.

cressonii (Kirby). Mont., Nev., Oreg., Calif. Host; Rosa, Rubus.

Cephus abdominalis Cresson, 1880. Amer. Ent. Soc., Trans. 8: 33. 9. Preocc.

Cephus cressonii Kirby, 1882. List Hym. Brit. Mus., v. 1, p. 403. N. name.

Biology: Essig, 1912. Calif. Comm. Hort., Monthly Bul. 1: 889-901. — Essig, 1926. Ins. of West. No. Amer., pp. 775-776. — Middlekauff, 1969. Calif. Ins. Surv., Bul. 11: 5-6.

trimaculata (Say). Que. to Fla. w. to B. C., Wash., Idaho, Utah, La.; Mexico. Host: Rosa, Rubus.

Cephus trimaculatus Say, 1824. In Keating, Narr. Long's 2nd Exped., v. 2, (App.), p. 313.

Cephus mexicanus Guerin, 1845. Iconogr. Regn. Animal. Ins. 3: 403.

Phylloecus bicinctus Provancher, 1875. Nat. Canad. 7: 375. 9.

Cephus bifasciatus Cresson, 1880. Amer. Ent. Soc., Trans. 8: 33. 9.

Cephus fasciatus Cresson, 1880. Amer. Ent. Soc., Trans. 8: 33. 9.

Macrocephus nigripennis Ghigi, 1915. Redia 10: 306. ♀, ♂.

Biology: Britton, 1923. Conn. (State) Agr. Expt. Sta., Bul. 247: 372. — Champlain, 1924. Jour. Econ. Ent. 17: 648.

Genus JANUS Stephens

Janus Stephens, 1835, Illus, Brit, Ent., v. 7, p. 107.

Type-species: Janus connectens Stephens. Desig. by Westwood, 1840.

Phylloecus Newman, 1838. Ent. Mag. 5: 485.

Type-species: Phylloecus faunus Newman. Monotypic.

Ephippionotus Costa, 1860. Fauna del Regno di Napoli, Imen., pt. 3, Cefidei, p. 11.

Type-species: Ephippionotus luteiventris Costa, Monotypic.

Larvae of this genus bore in the stems of bushes and trees. $Janus\ compressus\ (Fabricius)$ of Europe and $Janus\ piri$ Okamoto and Muramatzu of the Far East are pests of pear trees. About 19 world species are known.

abbreviatus (Say). Ont. to Va. w. to Man., Minn., Ill. Host: Populus, Salix. Willow shoot sawfly.

Cephus abbreviatus Say, 1824. In Keating, Narr. Long's 2nd Exped., v. 2, (App.), p. 314. ♀. Xiphydria basalis Say, 1837. Boston Jour. Nat. Hist. 1: 222. ♀.

rufiventris (Cresson). Oreg., Calif.

Cephus rufiventris Cresson, 1880. Amer. Ent. Soc., Trans. 8: 33. 9.

TRIBE CEPHINI

Genus CEPHUS Latreille

Astatus Jurine, 1801. Intell. Blatt. Litt.-Ztg. Erlangen, v. 1, p. 163. Suppressed by Internatl. Comm. Zool. Nomencl., Opinion 135, 1936.

Type-species: Sirex pygmaeus Linnaeus. Monotypic. Cephus Latreille, 1802. Hist. Nat. Crust. Ins., v. 3, p. 303.

Type-species: Sirex pygmaeus Linnaeus. Desig. by Latreille, 1810.

Perinistilus Ghigi, 1904. Ann. Mus. Napoli 1: 26.

Type-species: Cephus politissimus Costa, Monotypic.

Peronistilomorphus Pic, 1916. Echange 33: 381.

Type-species: Peronistilomorphus berutensis Pic. Monotypic.

Cephus subg. Fossulocephus Pic, 1917. Echange 34: 2.

Type-species: Cephus (Fossulocephus) cintriniventris Pic. Monotypic. Pseudocephus Dovnar-Zapolskii, 1931. Mus. Zool. Acad. Sci. Leningrad, Ann. 32: 47.

Type-species: Cephus pulcher Tischbein, Orig. desig.

Of the 25 to 30 world species only 2 are found in North America and one of these is an introduction. Larvae bore in the stems of grasses and may be serious pests in cultivated grain

cinetus Norton. Man., Mich., Ohio, Mo., Ark. w. to Alta., Wash., Oreg., Calif. Ecology: Most serious crop damage is in the wheat growing areas of the north central states and south central provinces. The preferred host is wheat, but to a lesser extent spring rye, barley, and timothy; also native grasses. Host: Triticum aestivum, Secale cereale, Hordeum vulgare, Phleum pratense, Agropyron, Beckmannia, Bromus, Calamagrostis, Calamovilfa, Deschampsia, Elymus, Festuca, Stipa. One or more species in the preceding genera may be suitable hosts. Wheat stem sawfly.

Suborder APOCRITA

By KARL V. KROMBEIN

This suborder includes a vast and diverse assemblage of species-level taxa, and many more genus- and family-level taxa than does the suborder Symphyta. Other names used in the past for the suborder include Petioliventres or Petiolata, Clistogastra and Heterophaga. Common names applied to the major groups of Apocrita include braconid and ichneumonid wasps, chalcid flies or wasps, gall wasps, ants, true wasps and bees. The first three groups are sometimes placed in the Division Parasitica or Terebrantia, and the latter three in the Division Aculeata. More detailed information is included under the divisional headings.

There are several important characters separating the Apocrita from the Symphyta. The apparent thorax is separated from the apparent abdomen by a constriction. What appears to be the thorax actually consists of the true thorax to which is fused the first abdominal segment (propodeum); the apparent thorax is sometimes termed the mesosoma or alitrunk. What appears to be the entire abdomen is termed the gaster or metasoma. The venation, especially that of the hind wing, is reduced in size and has fewer veins and cells than in Symphyta. The larvae are maggot-like and apodous; some have fleshy pseudopods on the thorax or abdomen which assist in very limited locomotion but which are not homologous with the thoracic prolegs found in most sawfiles.

The majority of larval Apocrita, including the most primitive, are entomophagous. However, phytophagy has developed independently in many higher groups such as some Chalcidoidea, most Cynjoidea, a few Vespoidea and the Apoidea.

There are some fifteen times as many Apocrita recorded from North America as Symphyta. However, it is virtually certain that this ratio will be substantially increased in the future when the smaller Parasitica are more thoroughly collected and studied.

Taxonomy: Rasnitsyn, 1975. Akad. Nauk SSSR, Palaeont. Inst., Trans. 147: 1-132, 8 pls. (Mesozoic Apocrita). — Rasnitsyn, 1975. Akad. Nauk SSSR, Zool. Zhur. 54: 848-860, 1 pl. (early evolution).

Biology: Clausen, 1940. Entomophagous Insects, 688 pp., 257 figs.

Division PARASITICA

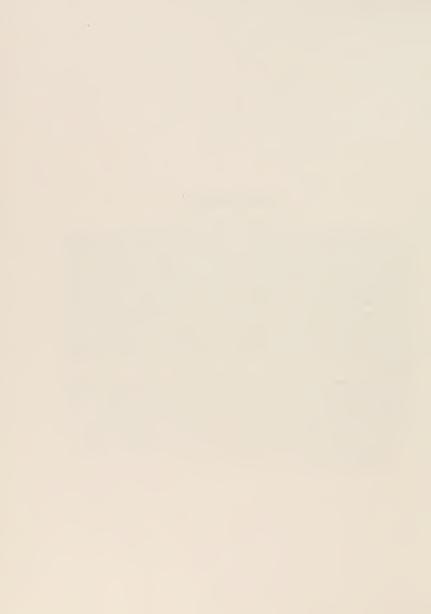

By Paul M. Marsh and Robert W. Carlson

The divisional name applies to those groups of nonsocial Apocrita in which the ovipositor always retains the function of egg placement (i.e. is never modified to be only a stinging organ) and in which the species: (1) are usually ectoparasites or endoparasites of other insects or spiders, and, less frequently, phytophagous; (2) are never provisioners of nests; and (3) are mostly incapable of stinging human beings. The latter fact appears to result largely from the relative smallness of most Parasitica; they generally are not physically capable of piercing the human epidermis with the ovipositor. However, collectors of Ichneumonidae know by experience that a significant proportion of the species above median ichneumonid size are capable of stinging humans. Whether any Parasitica of families other than Ichneumonidae are capable of stinging humans is unknown to us, but it seems likely that a few of the largest Braconidae would have this capability. Probably all or nearly all females of Parasitica, when grasped in ways that do not restrict abdominal movement, make reflexive stinging movements; similar defensive movements are also made by males of at least some species. Some of the ectoparasitic members of this division have stings which paralyze the host permanently, and the stings of ectoparasitic species in general are more venemous than those of endoparasitic species (see Iwata, 1976). However, there are presumably numerous species of both types which do not have venemous stings

The dividing point between the divisions Parasitica and Aculeata is rendered arbitrary by the fact that the latter includes numerous ectoparasitic species (but no endoparasitic ones) as well as by the fact that there are no differences in biology or structure which apply to all the members of either group. Recognition of the two groups is a matter of tradition and convenience.

The habits and life histories of Parasitica are too diverse to be delved into here. Limited discussions will be found in the introductions for some of the genera and supergeneric taxa.

Biology: Clausen, 1940. Entomophagous Insects, p. 3-342. — Doutt, 1959. Ann. Rev. Ent. 4:161-182. — Hagen, 1964. In DeBach, Biol. Control Insect Pests and Weeds, p. 168-246. — Askew, 1971. Parasitic Insects, p. 113-184. — Iwata, 1976. Evol. Instinct, Compar. Ethol. Hym., Eng. ed., p. 1-84.

Superfamily ICHNEUMONOIDEA

By Paul M. Marsh and Robert W. Carlson

Present data on numbers of species ranks the Ichneumonoidea as the largest superfamily of Hymenoptera. It includes the bulk of the larger Parasitica, most ichneumonoids being over 5 mm in length and a few being longer than 50 mm. A greater perentage of Ichneumonoidea than other Parasitica have the ovipositor conspicuously exposed, but, on the other hand, a very significant portion of Ichneumonoidea have ovipositors that protrude scarcely or not at all beyond the median dorsal extremeties of the apical tergites. Townes (1975) discussed the Hymenoptera (mostly Ichneumonoidea) with the longest ovipositors; he cited a species of "Iphiaulax?"

(Braconidae) with an ovipositor 14 times the length of the body.

The distinguishing characters of Ichneumonoidea are: the usual fusion of the costal and sub-costal veins of the fore wing; the long antennae, which are usually more than 14-segmented; and the 2-segmented hind trochanters (the other trochanters usually also being 2-segmented). The characters are for the most part shared by the Braconidae, Aphidiidae, Hybrizontidae, Ichneumonidae, and Stephanidae, the five families here considered to comprise the Ichneumonoidea. In the case of the Stephanidae, however, there is some question about the correctness of placement in the Ichneumonoidea (see Townes, 1969, p. 3). The larval head capsule of stephanids is considerably different from those of other ichneumonoid families (personal commun., J. R. T. Short, 1976), and in stephanids the costa and subcosta are more distinctly separated than in other ichneumonoid families. Nevertheless, we believe it best to leave the Stephanidae in the Ichneumonoidea until further studies are made.

The Aphidiidae and Hybrizontidae are sometimes treated as subfamilies of Braconidae (see van Achterberg, 1976). Some early 19th Century authors referred to the combination of the latter three groups as the "Ichneumonidam adscitorum" ("unauthentic Ichneumonidae) which they distinguished from the "Ichneumonidam genuinorum" (genuine Ichneumonidae). The distinction largely resulted from Jurine's (1807) classification of the veins and cells of hymenopterous fore wings and his provision of terms for some of the veins and cells (e.g. "nervi recurrentes"). Eady (1974) provided an excellent discussion of the way in which the Jurinean system of wing vein and cell nomenclature was modified and expanded by those who adopted Jurine's ideas. He reviewed the systems of wing vein nomenclature which are currently used for Braconidae and compared them with usages for Aphidiidae, Ichneumonidae, and other Hymenoptera. He proposed an "interim method [in order] to overcome the more frequently voiced objections to ... [the Comstock-Needham] system without adding to the confusion or obstructing progress toward uniformity."

It was apparently by mutual agreement that Gravenhorst (1819) and Nees ab Esenbeck (1819) decided to specialize on the Ichneumonidorum genuinorum and Ichneumonidorum adscitorum, respectively. In the papers referred to, they simultaneously outlined their plans for the monographs which are here cited in the sections to which they pertain. Thunberg (1822, 1824) chose to

ignore the revolutionary advances in classification made possible by the work of Jurine and reverted to lumping all of the Ichneumonoidea under the generic name *Ichneumon* (see introduction to Ichneumonidae). Consequently, Thunberg's work was largely ignored prior to

Roman's (1912) study of his type specimens.

The actual number of species in the Ichneumonoidea can only be estimated. The Braconidae contains about 2,000 described species in North America and about 10,000 worldwide; the Ichneumonidae about 3,000 in North America and about 15,000 worldwide. However, the total number of species is estimated to be 60,000 worldwide in the Ichnuemonidae (Townes, 1969, p. 7) and 40,000 in the Braconidae.

Except for Hybrizontidae and Stephanidae, the families of Ichneumonoidea occur in all zoographical regions and in all terrestrial habitats. In the Ichneumonidae the Western Palearctic fauna is best known followed by the Nearctic, whereas the reverse seems to be true for the Braconidae. As in the case of Chalcidoidea, most of our knowledge of the Ichneumonoidea has been derived from species of economic importance to agriculture. For the vast majority of spe-

cies, there is little or no knowledge of biology.

The ichneumonoids are parasitic on nearly all groups of insects as well as on spiders, and all stages of these hosts are attacked. Aphidiidae, many Braconidae, and possibly Hybrizontidae (hosts of latter unknown) attack paurometabolous insects, while no paurometabolous hosts are known for Ichneumonidae or Stephanidae. The only ichneumonoids which attack adults of holometabolous insects are certain euphorine and blacine Braconidae. Aside from the limitations which have been mentioned, large numbers of Ichneumonoidea are polyphagous and the limits of the host range seem to be related more to the host habitat than to the taxonomy of the host.

The only families of Ichneumonoidea which are known to include hyperparasitic species are Ichneumonidae and Braconidae, but only a very few Braconidae could be regarded as hyperparasitic (i.e. a few Euphorinae which attack adult Ichneumonidae). The fact that hyperparasitism is much more prevalent in the Ichneumonidae than in the Braconidae is explained largely (but not in the case of mesochorine and eucerotine Ichneumonidae) by the fact that certain Ichneumonidae have the habit of attacking hosts which are confined within silken coconos (e.g. sawfly prepupae, ichneumonoid prepupae, spider eggs, chrysopid eggs, etc.), while this habit has not developed among Braconidae. Further discussion of host relations is deferred to the introductions to the various taxa.

Family BRACONIDAE

By PAUL M. MARSH

This is a large and important group of mostly primary parasites. They are closely allied with the Ichneumonidae and can be distinguished by the absence of the second recurrent vein in the forewing. The classification used in this catalog departs somewhat from the former catalog but is, nevertheless, a conservative arrangement and is based on studies made by Telenga (1952), Tobias (1967) and Capek (1969, 1970). This arrangement reflects as much as possible relationships among the groups with respect to morphology-larval as well as adult-and biology. The subfamilies Doryctinae, Braconinae, Exothecinae and Rogadinae form a morphologically similar group of unspecialized Braconidae called the Cyclostomi in reference to the circular opening formed by the clypeus and mandibles. The Doryctinae, Braconinae and Exothecinae are ectoparasites of cryptic host larvae, usually permanently paralyzing the host, and are considered to be the most primitive groups. The Rogadinae, which are endoparasites of lepidopterous larvae, represent the transition from external to internal parasitism which is exhibited by the

remainder of the Braconidae, or the Acyclostomi.

The subfamilies are arranged in this catalog essentially in phylogenetic order from the least specialized to the most specialized. However, within each subfamily the genera are arranged in alphabetical order as are the species within each genus. The names used for the hosts are the latest acceptable names which were available at the time the manuscripts were prepared. Where a North American species occurs in other geographical areas, only the North American hosts for that parasite are listed.

SUBFAMILY DORYCTINAE

This subfamily is probably the most primitive group of the Braconidae. Most species are ectoparasites of wood boring beetle larvae, but a few attack lepidopterous larvae and sawfly larvae. Although the subfamily represents a large and rather homogeneous group of genera, it has been divided into several subfamilies and tribes by past workers. It is treated here as defined by Marsh (1965, 1967, 1970) which includes the subfamily Spathiinae of the previous catalog.

Taxonomy: Marsh, 1965. Ent. Soc. Amer., Ann. 58: 668-699 (review of No. Amer. genera).
— Marsh, 1967. Ent. Soc. Wash., Proc. 69: 359-360 (status of tribes). — Marsh, 1970. Ent. Soc. Wash., Proc. 72: 313 (notes on subfamily definition). — Marsh, 1973. Wash. Acad. Sci., Jour. 63: 69-72. — Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1263-1424 (cat. World spp.).

Genus ACROPHASMUS Enderlein

Acrophasmus Enderlein, 1912. Arch. f. Naturgesch. 78(A)(2): 16.
Type-species: Acrophasmus exilis Enderlein. Orig. desig.

Most of the North American species of this Western Hemisphere genus were incorrectly placed in the genus Doryctinus prior to 1968. The meager host records suggest that parasitism is restricted to the powder post beetles of the families Bostrichidae and Lyctidae.

Revision: Marsh, 1968. Ent. Soc. Wash., Proc. 70: 101-107 (No. Amer. spp.).

Taxonomy: Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1372-1373 (cat. World spp.).

rufipes (Provancher). Southern Canada, northern U. S. Host: Agrilus anxius Gory, A. cephalicus Lec., Astylopsis macula (Say), Callidium violaceum L., Xylotrechus quadrimaculatus (Hald.). Phylax rufipes Provancher, 1880. Nat. Canad. 12: 175. 9.

slossonae Marsh. Que., N. H., Man.

Doryctes slossonae Marsh, 1969 (1968). Amer. Ent. Soc., Trans. 94: 400. 9, 8.

Genus DORYCTINUS Roman

Doryctinus Roman, 1910, Ent. Tidskr. 31: 122.

Type-species: Exothecus rugulosus Cresson, Orig. desig.

Taxonomy: Marsh, 1968. Ent. Soc. Wash., Proc. 70: 112.

marshi Greenbaum. Fla.

Doryctinus marshi Greenbaum, 1975. Fla. Ent. 58: 213. 9.

rugulosus (Cresson). Tex.

Exothecus rugulosus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 190. 9. Doryctes texanus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 627. 9.

Genus ECPHYLUS Foerster

Ecphylus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 237. Type-species: Bracon sileseacus Ratzeburg. Orig. desig.

Sactopus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 146. Type-species: Sactopus schwarzii Ashmead. Orig. desig.

Paraecphylus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 147. Type-species: Paraecphylus websteri Ashmead, Orig. desig.

Sycosoter Picard and Lichtenstein, 1917. Soc. Ent. France, Bul. 16: 285.

Type-species: Sycosoter lavagnei Picard and Lichtenstein, Orig. desig.

Revision: Telenga, 1941. Fauna U. S. S. R., v. 5, n. 3, pp. 49-54, 383-384 (some Eur. spp.).
 — Marsh, 1965. Ent. Soc. Amer., Ann. 58: 678-690 (No. Amer. spp.).
 — Hedqvist, 1967. Ent. Tidskr. 88: 66-71 (some Eur. spp.).

Taxonomy: Muesebeck, 1935. Ent. Soc. Wash., Proc. 37: 21-22. —Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1344-1352 (cat. World spp.).

Biology: Russo, 1938. Lab. Ent. Agr. Portici, Bol. 2: 287-307 (Ecphylus sileseacus (Ratz.) in Italy). —Marsh, 1965. Ent. Soc. Amer., Ann. 58: 679-680.

arcuatus Muesebeck. Idaho, Oreg., Calif. Host: Scolytus subscaber Lec., S. ventralis Lec. Ecphylus arcuatus Muesebeck, 1935. Ent. Soc. Wash., Proc. 37: 23. \, \foats, \, \dots.

bicolor Rohwer. Wyo., B. C., Wash., Calif. Host: Pityogenes knechteli Swaine. Ecphylus bicolor Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 540. 9. Ecphylus pityogeni Marsh, 1965. Ent. Soc. Amer., Ann. 58: 690. Nom. nud.

californicus Rohwer. Mont., Idaho, Wash., Oreg., Calif. Host: Phloeosinus cupressi Hopk., P. punctatus Lec., P. sequoiae Hopk., P. setosus Bruck, P. swainei Bruck, P. vandykei Swaine, Pseudohylesinus nebulosus (Lec.), Scolytus sp., S. laricis Blkm., S. unispinosus Lec.

Ecphylus californicus Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 539. 9.

chramesi Marsh. Tex., Ariz. Host: Chramesus sp. The original description states that this species was reared from Chramesus robiniae but this is apparently a manuscript species name.

Ecphylus chramesi Marsh, 1965. Ent. Soc. Amer., Ann. 58: 689. 9, 3.

costaricensis Matthews. Md., D. C.; Costa Rica. Host: Styphlosoma granulatum Blandf. (in Costa Rica).

Ecphylus costaricensis Matthews, 1969. Ga. Ent. Soc., Jour. 4:117. 9, 8.

flavus Marsh. Miss., La. Host: Lyctus sp., Xylobiops basilaris (Say).

Ecphylus flavus Marsh, 1965. Ent. Soc. Amer., Ann. 58:687. S. d. hicoriae Rohwer, N. Y., Pa., N. C. Host: Scolytus quadrispinosus Say.

Ecphylus hicoriae Rohwer, 1919. Canad. Ent. 51:161. 9, 3.

hubbardi Rohwer, Ariz.

Ecphylus hubbardi Rohwer, 1913. U. S. Natl. Mus., Proc. 45:538. 9.

hypothenemi Ashmead. Mass., Ohio, W. Va., Tex., Colo., N. Mex., Ariz., Wash., Calif. Host: Hypothenemus sp., Phytophthorus sp., P. hopkinsi (Blkm.). Echyllus hypothenemi Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 215. 9, 8.

Paraecphylus websteri Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 147. \$\color \text{kansensis Marsh. Kans.}\$

Ecphylus kansensis Marsh, 1965, Ent. Soc. Amer., Ann. 58: 682. 9.

leechi Marsh. Calif. Host: Pseudopityophthorus pubipennis (Lec.). Ecphylus leechi Marsh, 1965. Ent. Soc. Amer., Ann. 58: 681. 9, 3.

leptosulcus Marsh. Ohio, W. Va., N. C. Host: Pityophthorus sp., P. liquidambarus Blkm., Pseudopityophthorus minutissimus (Zimm.), P. pruinosus (Eichh.). Echyllus leptosulcus Marsh. 1965. Ent. Soc. Amer., Ann. 58: 683. 9, 3.

lepturgi Rohwer. N. C., Kans., N. Mex., Nev. Host: Pityophthorus sp., Urgleptes facetus (Say). Ecphylus lepturgi Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 540. ?.

lycti Rohwer. Fla., Tex., Calif. Host: Leperisinus californicus Swaine, Lyctus sp., L. planicollis Lec., Synoxylon sp.

Ecphylus lycti Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 538. 9.

nigriceps Ashmead. W. Va.

Ecphylus nigriceps Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 216. 9.

optilus Marsh. Fla. Host: Pityophthorus sp.

Ecphylus optilus Marsh, 1965, Ent. Soc. Amer., Ann. 58: 683, 9, 8.

pacificus Marsh. S. Dak. s. to Colo., w. to Oreg. and Calif. Host: Cryphalus pubescens Hopk., Pityogenes knechteli Swaine, Pityophthorus sp., P. earmeli Swaine. Ecphylus pacificus Marsh, 1965. Ent. Soc. Amer., Ann. Ss. 686. 9, 3. Biology: Deyrup, 1975. Conif. For. Biome, Ecosystem Anal. Stu., Univ. Wash., Bul. 6, p. 79-80.

pallidus Ashmead. D. C., W. Va., Va., N. C., S. C. Ecology: Associated with Micracis swainei Blkm. in Salix nigra.

Ecphylus pallidus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 215. 9, 8.

rohweri Muesebeck. N. Mex., Ariz., Calif.

Ecphylus schwarzi Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 538. 9. Preocc. by Ashmead, 1900.

Ecphylus rohweri Muesebeck, 1935. Ent. Soc. Wash., Proc. 37: 23. N. name for schwarzi Rohwer.

schwarzii (Ashmead). N. Y. s. to N. C. Host: Dendroctonus frontalis Zimm., Pityophthorus sp. Sactopus schwarzii Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 146. 3. Ecphyllus johnsoni Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 539. 9.

texanus Brues. Tex.

Ecphylus texanus Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 111. 9.

unifasciatus Marsh. Tex.

Ecphylus unifasciatus Marsh, 1965. Ent. Soc. Amer., Ann. 58: 685. 9.

Genus GLYPTOCOLASTES Ashmead

Glyptocolastes Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 142.

Type-species: Glyptocolastes texanus Ashmead. Orig. desig.
Glyptodoryctes Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 144.

Type-species: Heterospilus caryae Ashmead. Orig. desig.

Revision: Marsh, 1968. Ent. Soc. Wash., Proc. 70: 107-110.

caryae (Ashmead). N. Y. s. to Fla., w. to Mich. and Tex. Host: Scobicia bidentata (Horn). Heterospilus caryae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 214. $\, \circ$, $\, \circ$. Hormiopterus claripennis Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 61. $\, \circ$.

texanus Ashmead. Tex., Ariz. Host: Dendrobiella quadrispinosa (Lec.).

Glyptocolastes texanus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 142. 9, 8.

Genus HECABOLUS Curtis

Hecabolus Curtis, 1834. Brit. Ent., v. 11, p. 507.

Type-species: Hecabolus sulcatus Curtis, Orig. desig.

Anisopelma Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 134.

Type-species: Anisopelma belgicum Wesmael. Monotypic.

Taxonomy: Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1354-1357 (cat. World spp.). sulcatus Curtis. Fla., Colo., Ariz., Calif.; Europe. Probably adventive. Host: Acmaeodera sp. Hecabolus sulcatus Curtis, 1834. Brit. Ent., v. 11, p. 507. 9.

Anisopelma belgicum Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 135. 9.

Genus HETEROSPILUS Haliday

Rogas subg. Heterospilus Haliday, 1836. Ent. Mag. 4: 40, 46.

Type-species: Rogas (Heterospilus) quaestor Haliday. Monotypic.

Bracon subg. Synodus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 31. Preocc. by Gronovius, 1763, and Latreille, 1828.

Type-species: Bracon incompletus Ratzeburg, Monotypic.

Caenophanes Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 236. N. name for Synodus Ratzeburg.

Telebolus Marshall, 1888. In Andre, Spec. Hym. Eur. Alg., v. 4, p. 202. Type-species: Telebolus corsicus Marshall. Monotypic.

Kareba Cameron, 1904. Invert. Pac. 1: 50.

Type-species: Kareba flavipes Cameron. Desig. by Viereck, 1914.

Anacatostigma Enderlein, 1920 (1918). Arch. f. Naturgesch. 84(A)(11): 131.

Type-species: Anacatostigma paradoxum Enderlein. Orig. desig.

A predominately Western Hemisphere genus with a large number of species, most of which are undescribed. Most species, where records are available, are parasites of coleopterous larvae, but a few species attack lepidopterous larvae, and one Holarctic species is a parasite of sawfly larvae.

Revision: Fischer, 1960. Polskie Pismo Ent. 30: 33-64 (Eur. spp.).

Taxonomy: Marsh, 1969. Ent. Soc. Wash., Proc. 71: 210-214 (lectotype desig. No. Amer. spp.).
 — Marsh, 1973. Wash. Acad. Sci., Jour. 63: 70. — Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1298-1313 (cat. World spp.).

aciculatus (Provancher), Calif.

Macrocentrus aciculatus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 380.

anobiidivorus Muesebeck, Fla. Host: Falsogastrallus librinocens (Fish.).

Heterospilus anobiidivorus Muesebeck, 1939. Ent. Soc. Wash., Proc. 41: 62. 9.

anthaxiae (Ashmead). Pa. s. to Fla., w. to Wis. and Iowa. Host: Agrilus sp., Anthaxia viridicornis (Say).

Caenophanes anthaxiae Ashmead, 1893, Canad. Ent. 25: 77. 9. 3.

appalachicola (Viereck), Kans.

Diachasma appalachicola Viereck, 1905. Kans. Acad. Sci., Trans. 19: 272. 9.

atratus (Ashmead). Colo., Calif.

Caenophanes atrata Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 16. 9, 8.

atriceps (Ashmead). Md., Va., S. C., Fla., Mo.

Caenophanes atriceps Ashmead, 1893, Canad. Ent. 25: 76. 9.

beaticatus (Provancher). N. Y. s. to Va., w. to Ont. and Minn. Host: Clytus ruricola (Oliv.), Xyletinus peltatus (Harr.).

Syngaster beaticatus Provancher, 1880. Nat. Canad. 12: 162. 9.

bruchi Viereck. Md. s. to Fla., w. to Iowa and Tex. Host: Amblycerus robiniae (F.), Bruchus sp., Gibbobruchus mimus (Say).

Heterospilus bruchi Viereck, 1910 (1909). Ent. Soc. Wash., Proc. 11: 210. 9, 5.

cephi Rohwer, N. Y., Pa., Ont.; Europe, Host: Cephus pygmaeus (L.).

Heterospilus cephi Rohwer, 1925. Wash. Acad. Sci., Jour. 15: 178. 9, d.

Heterospilus basifurcatus Fischer, 1960. Polskie Pismo Ent. 30: 38. 9.

Taxonomy: Marsh, 1973. Wash. Acad. Sci., Jour. 63: 70.

Biology: Hill and Smith, 1931. Jour. Agr. Res. 43: 597-609.

chittendenii (Ashmead). Va.

Caenophanes chittendenii Ashmead, 1893. Canad. Ent. 25: 77. 9, 8.

consimilis (Ashmead), U.S.

Caenophanes consimilis Ashmead, 1893. Canad. Ent. 25: 75. 9.

etiellae Rohwer. Fla.; Puerto Rico. Host: Etiella zinckenella (Treit.), Fundella pellucens Zell. Heterospilus etiellae Rohwer, 1925. Wash. Acad. Sci., Jour. 15: 179. 9, 8.

eurostae Viereck. Conn., Pa. Ecology: Reared from galls of Eurosta solidaginis (Fitch).

Heterospilus eurostae Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22: 238. 9.

flavicollis (Ashmead). D. C., Va.

Caenophanes flavicollis Ashmead, 1893. Canad. Ent. 25: 75. 9.

floridanus (Ashmead), Fla.

Caenophanes floridanus Ashmead, 1893. Canad. Ent. 25: 76. 9.

hylotrupidis (Ashmead). W. Va. Host: Semanotus ligneus (F.).

Caenophanes hylotrupidis Ashmead, 1893. Canad. Ent. 25: 78. 9. 8.

koebelei (Ashmead). Calif. Host: Prodoxus aenescens Riley, P. marginatus Riley, Tegeticula maculata (Riley). All of these hosts are from the stems or pods of Yucca. Caenophanes Koebelei Ashmead, 1893. Canad. Ent. 25: 77. ?, 3.

languriae (Ashmead). Que. s. to Fla., w. to Mich., Colo., and Tex. Host: Languria erythrocephalus Blatch.

Caenophanes languriae Ashmead, 1893. Canad. Ent. 25: 77. 9, 3.

leptostyli Rohwer. Maine, N. Y., Pa., Va., N. C. Host: Amniscus collaris Hald. Heterospilus leptostyli Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 536. ♀, ♂.

liopodis (Brues). Mass., Md. Host: Sternidius alpha (Say).

Coeloides liopodis Brues, 1910. Wis. Nat. Hist. Soc., Bul. 8: 79. 9.

longicaudus (Ashmead). Mass. s. to Fla., Ala., and Miss. Host: Xyletinus peltatus (Harr.). Caenophanes longicaudus Ashmead, 1893. Canad. Ent. 25: 75. 9.

melanocephalus Rohwer. Tex. Host: Olycella junctolineella (Hulst), Pseudoschinia elautalis (Grote).

Heterospilus melanocephalus Rohwer, 1925. Wash. Acad. Sci., Jour. 15: 181. ♀.

melleus (Ashmead). Md., Fla. Host: Eteobalea sernotella (Chamb.), Gnorimoschema gallaeasteriella (Kell.).

Caenophanes melleus Ashmead, 1893. Canad. Ent. 25: 77. 9, 8.

mordellistenae Viereck. Ont., Ohio. Host: Mordellistena andreae ustulata Lec. Heterospilus mordellistenae Viereck, 1911. U. S. Natl. Mus., Proc. 39: 403. 9.

pityophthori (Ashmead). Va., W. Va. Host: Pityophthorus sp.

Rhyssalus pityophthori Ashmead, 1893. Canad. Ent. 25: 69. 9.

Caenophanes pityophthori Ashmead, 1893. Canad. Ent. 25: 78. d.

prodoxi (Riley). N. C., Ky., Mo., La., Kans., Tex., Ariz. Host: Prodoxus quinquepunctellus (Chamb.).

Exothecus prodoxi Riley, 1880. Amer. Ent. 3: 156. 9, 8.

prosopidis Viereck. La., Okla., Tex., Ariz., Wash., Calif.; Mexico. Host: Acanthoscelides daleae Johnson, A. horni (Pic), Algarobius prosopis (Lec.).

Heterospilus prosopidis Viereck, 1910. U. S. Natl. Mus., Proc. 38: 381. 9, 8.

scolyticida (Ashmead). N. Y. s. to N. C. Host: Scolytus quadrispinosus Say.

Lysitermis scolyticida Ashmead, 1893. Canad. Ent. 25: 74. 9.

Heterospilus blackmanni Rohwer, 1919. Canad. Ent. 51: 161. 9, 8.

Taxonomy: Marsh, 1973. Wash. Acad. Sci., Jour. 63: 71.

selandriae (Ashmead). U. S. Host: Caliroa cerasi (L.)(?).

Rhyssalus (?) selandriae Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 629. 9.

shoshonea (Viereck). Wyo.

Doructomorpha shoshonea Viereck, 1907. Amer. Ent. Soc., Trans. 33: 382. 9.

striatus Muesebeck and Walkley. Md., Va., Fla., Iowa.

Caenophanes aciculatus Ashmead, 1893. Canad. Ent. 25: 76. 9, 8. Preocc. by Provancher, 1888.

Heterospilus striatus Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 180, N. name for aciculatus Ashmead.

Genus HISTEROMERUS Wesmael

Histeromerus Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 63.

Type-species: Histeromerus mystacinus Wesmael. Monotypic.

canadensis Ashmead. Que. s. to N. C., w. to Ont. and Minn.; B. C. Host: Anobium punctatus DeG., Hemicoelus carinatus (Say), Lyctus sp.

Histeromerus canadensis Ashmead, 1891. Canad. Ent. 23: 7. 9.

Genus LELUTHIA Cameron

Leluthia Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 392.

Type-species: Leluthia mexicana Cameron. Desig. by Viereck, 1914.

Russellia Muesebeck, 1950. Ent. Soc. Wash., Proc. 52: 78. Preocc. by Vargas, 1943.

Type-species: Heterospilus? astigma Ashmead. Orig. desig.

Russellella Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 178. N. name for Russellia Muesebeck.

Revision: Marsh, 1967. Ent. Soc. Wash., Proc. 69: 359-364 (No. Amer. spp.).

astigma (Ashmead). Que., Pa., Md., W. Va., Va., N. C., Ohio, Iowa, Okla., Tex., Wyo., Utah, Ariz., Calif.; Mexico. Host: Agrilus sp., A. difficilis Gory, A. politus (Say).

Heterospilus ? astigma Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 215. 8.

floridensis Marsh. Fla. Host: Cryptorhynchus fallax Lec.

Leluthia floridensis Marsh, 1967. Ent. Soc. Wash., Proc. 69: 362. 9, d.

mexicana Cameron. Okla., Tex., N. Mex., Ariz., Calif.; Mexico.

Leluthia mexicana Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 392. Q. Russellia prosopidis Muesebeck, 1950. Ent. Soc. Wash., Proc. 52: 78. Q. 6.

Genus LIOBRACON Szepligeti

Liobracon Szepligeti, 1901. Termes, Fuzetek 24: 361.

Type-species: Liobracon singularis Szepligeti. Monotypic.

Parabinarea Brues, 1912. Ent. Soc. Amer., Ann. 5: 210.

Type-species: Parabinarea manni Brues. Monotypic.

Hyboderia Enderlein, 1920 (1918). Arch. f. Naturgesch. 84(A)(11): 134.
Type-species: Hyboderia collare Enderlein. Orig. desig.

Triderodon Enderlein, 1920 (1918). Arch. f. Naturgesch. 84(A)(11): 136.

Type-species: Triderodon hoffmannsi Enderlein. Orig, desig.

Taxonomy: Marsh, 1970. Ent. Soc. Wash., Proc. 72: 313-317. —Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1316-1318 (cat. World spp.).

aquilonius Marsh. Tex.; Mexico, Guatemala.

Liobracon aquilonius Marsh, 1970. Ent. Soc. Wash., Proc. 72: 314. 9, 8.

Genus MONOLEXIS Foerster

Monolexis Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 237.

Type-species: Monolexis fuscicornis Foerster. Orig. desig.

Taxonomy: Marsh, 1965. Ent. Soc. Amer., Ann. 58: 677-678. —Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1358-1360 (cat. World spp.).

fuscicornis Foerster. Cosmopolitan. Host: Lyctus brunneus (Steph.), L. linearis (Goeze), L. planicollis Lec., Trogoxylon parallelopipedum (Melsh.),

Monolexis fuscicornis Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 237.

Anisopelma lycti Cresson, 1880. Amer. Ent. 3: 24. 9, 8.

Anisopelma utilis Cresson, 1880. Amer. Ent. 3: 24. 9. 8.

Anisopelma minima Cresson, 1880. Amer. Ent. 3: 24. 9.

Genus ODONTOBRACON Cameron

Odontobracon Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 384.

Type-species: Odontobracon nigriceps Cameron. Desig. by Viereck, 1914.

Revision: Marsh, 1970. Pan-Pacific Ent. 46: 277-282 (No. Amer. spp.).

Taxonomy: Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1365-1366 (cat. World spp.). californicus Rohwer. Calif.

Odontobracon californicus Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 169. ♀, ♂.

cellulus Marsh. Tex., N. Mex., Ariz., Calif.; Mexico.

Odontobracon cellulus Marsh, 1970. Pan-Pacific Ent. 46: 279. ♀, ♂.

grandis Ashmead, Ariz.; Baja Calif.

Odontobracon grandis Ashmead, 1894, Calif. Acad. Sci., Proc. 4: 122. 9.

montanus Cameron. N. C. s. to Fla., w. to Tex.; Central America.

Odontobracon montanus Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 384. 9. Odontobracon crassiventris Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 384. 9.

nigriceps Cameron. Mass. s. to Fla., w. to Wis., Utah, and Ariz.; Mexico, Guatemala. Host: Elaphidionoides villosum (F.), Oncideres cingulata (Say), O. rhodosticta (Bates).

Odontobracon nigriceps Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 385. 9. Odontobracon elaphidiovorus Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 168. 9, 8.

oemeovorus Rohwer. Pa., Md., Fla., Ala., Mich., Ill., Tex. Host: Oeme rigida (Say).

Odontobracon oemeovorus Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 167. \(\varphi \).

Genus ONTSIRA Cameron

Ontsira Cameron, 1900. Manchester Lit. and Phil. Soc., Mem. and Proc. 44: 89. Type-species: Ontsira reticulata Cameron. Monotypic.

Doryctes subg. Doryctodes Hellen, 1927. Acta Soc. Fauna Flora Fenn. 56: 40. Type-species: Rogas imperator Haliday. Orig. desig.

Revision: Marsh, 1966. Amer. Ent. Soc., Trans. 92: 503-517 (No. Amer. spp. as genus Doryctodes).

Taxonomy: Fahringer, 1930. Opusc. Bracon., v. 3, p. 144. —Telenga, 1941. Fauna U. S. S. R., v. 5, n. 3, p. 85-92, 389-392. — Marsh, 1973. Wash. Acad. Sci., Jour. 63: 71. —Shenefelt and Marsh, 1976. Hym. Cat., part 13, p. 1322-1327 (cat. World spp.).

megophthalmus Shenefelt, Idaho.

Atanycolus megophthalmus Shenefelt, 1943. Wash. State Col., Res. Studies 11: 80. 9, 8. melanophili Shenefelt, Wis. Host: Melanophila fulvoguttata (Harr.).

Atanycolus melanophili Shenefelt, 1943. Wash. State Col., Res. Studies 11: 81. 9, 8. microcellus Shenefelt. Ont.

Atanycolus microcellus Shenefelt, 1943. Wash. State Col., Res. Studies 11: 89. 9, 8.

microstigmatus Shenefelt. Wis.

Atanycolus microstigmatus Shenefelt, 1943. Wash. State Col., Res. Studies 11: 93. 9. montivagus (Cresson). Nebr., Colo., N. Mex.

Bracon montivagus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 229. 9, 3.

nigropyga Shenefelt. N. Y., Va., Minn., Nebr.

Atanycolus nigropyga Shenefelt, 1943. Wash. State Col., Res. Studies 11: 90. 9.

niteofrons Shenefelt, Minn.

Atanycolus niteofrons Shenefelt, 1943. Wash. State Col., Res. Studies 11: 84. 9, 3. obliquus (Provancher). Canada.

Bracon obliquus Provancher, 1880, Nat. Canad. 12: 141. 9.

octocolae Shenefelt. Ariz., Calif. Host: Chrysobothris octocola Lec.

Atanycolus octocolae Shenefelt, 1943. Wash. State Col., Res. Studies 11: 127. 9, 8.

parvacavus Shenefelt. Oreg.

Atanycolus parvacavus Shenefelt, 1943. Wash. State Col., Res. Studies 11: 109. 9.

phaeostethus Shenefelt. Va., Tex.

Atanycolus phaeostethus Shenefelt, 1943. Wash. State Col., Res. Studies 11: 83. d.

pilosiventris Shenefelt. Que., R. I., N. Y., N. C., Ga., Fla., Man.

Atanycolus pilosiventris Shenefelt, 1943. Wash. State Col., Res. Studies 11: 131. 9, d. rugosiventris (Ashmead). Mass. s. to Fla., w. to Minn. and Ariz. Host: Chrusobothris femorata

(Oliv.).

Bracon rugosiventris Ashmead, 1889 (1888). U.S. Natl. Mus., Proc. 11: 131. 9, 3.

Atanycolidea apicalis Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 533. d, "?" = d.

simplex (Cresson). No. Amer. Host: Agrilus bilineatus (Weber), Chrysobothris sp., Phymatodes aereus (Newm.), Rhagium inquisitor (L.), Saperda discoidea F., S. tridentata Oliv, Xylotrechus sp., X. nauticus (Mann.).

Bracon simplex Cresson, 1872. Amer. Ent. Soc., Trans. 4: 184. 9.

tranquebaricae Shenefelt. Fla.; Bahamas. Host: Chrysobothris tranquebarica (Gmel.).

Atanycolus tranquebaricae Shenefelt, 1943. Wash. State Col., Res. Studies 11: 134. 9, 3.

triangulifera (Viereck), Ariz.

Iphiaulax triangulifera Viereck, 1907. Amer. Ent. Soc., Trans. 33: 384. 9.

ulmicola (Viereck). Que, s. to Fla., w. to N. Dak. and Ariz. Host: Saperda discoidea F., S. tridentata Oliv.

Melanobracon ulmicola Viereck, 1906. Amer. Ent. Soc., Trans. 32: 176. ♀, ♂.

Biology: Kaston, 1937. Conn. (State) Agr. Expt. Sta. Bul. 396, p. 355-358.

Genus BRACON Fabricius

Bracon Fabricius 1804. Systema Piezatorum, p. 102.

Type-species; Ichneumon minutator Fabricius. Desig. by Internatl. Comn. Zool. Nomencl., Opinion 162, 1945.

Braco Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 7. Emend.

Microbracon Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 15.

Type-species: Microbracon sulcifrons Ashmead. Monotypic.

Habrobracon Johnson, 1895. Ent. News 6: 324.

Type-species: Bracon gelechiae Ashmead. Desig. by Viereck, 1914.

Amicoplidea Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 118.

Type-species: Phylax palliventris Provancher. Orig. desig.

Macrodyctium Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 138.

Type-species: Bracon euurae Ashmead, Orig. desig.

Type-species: Bracon enurae Ashmead. Orig. desig. Tropidobracon Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 139.

Type-species: Bracon gastroideae Ashmead. Orig. desig.

Most species are external parasites of lepidopterous and coleopterous larvae, but a few species parasitize larvae of flies and sawflies.

Revision: Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 1-85 (No. Amer. spp.).

acrobasidis Muesebeck. N. J., Fla., Ark. Host: Acrobasis caryae Grote, A. caryivorella Rag., A. comptoniella Hulst.

Bracon acrobasidis Muesebeck, 1963. Ent. News 74: 158. 9, 8.

aequalis Provancher, Canada.

Bracon aequalis Provancher, 1880, Nat. Canad, 12: 141, 9.

agathymi Muesebeck. Tex., Ariz. Host: Agathymus mcalpinei (Freem.), A. neumoegini (Edw.).
Bracon agathymi Muesebeck, 1963. Ent. News 74: 157. 9, 3.

americanus (Ashmead). N. S., Que., Iowa, Colo., Idaho, Ariz., Yukon.

Trachyusa americana Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 18. d.

analcidis Ashmead. Ky., Tenn., Iowa, Mo., Ark. Host: Sphenophorus parvulus Gyll., Tyloderma fragariae (Riley).

Bracon analcidis Ashmead, 1889 (1888), U. S. Natl. Mus., Proc. 11: 619. 9.

angelesius Provancher. Calif. Host: Euura sp., Pontania sp. This species is also recorded from a dipterous gall on Mimulus which needs to be confirmed.

Bracon angelesius Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 372. 9.

Bracon cecidomyiae Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 616. 9.

Bracon enurae Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 621. 9.

apicatus Provancher, N. Y., Ga., Ont., Mich.

Bracon apicatus Provancher, 1880. Nat. Canad. 12: 143. 9.

argutator Say. S. C., Ind., Iowa, Mo., Tex. Host: Saluria sp.

Bracon argutator Say, 1836. Boston Jour. Nat. Hist. 1: 253. 9.

atricollis Ashmead. Mass., Conn., N. J., Del., Va., Ga., Fla., Ohio, Mich., Ill., Mo., S. Dak., Wash. Bracon atricollis Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 622. 9.

montowesi (Viereck). Maine, Conn., Pa., N. J., Ont. Host: Anchylopera platanana Clem., Caulocampus acericaulis (MacG.), Paraclemensia acerfoliella (Fitch).

nanus Provancher, Canada, Ind., Iowa, Kans.

Bracon nanus Provancher, 1880. Nat. Canad. 12: 143. 9, 8.

nevadensis Ashmead. Idaho, Ariz., Wash., Oreg., Calif. Host: Chrysobothris deleta Lec., Synanthedon bibionipennis (Bdvl.).

Bracon nevadensis Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 623. 9.

niger (Provancher), Que.

Opius niger Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 381. 9.

nigridorsum Ashmead. Ont., Mich., Iowa, S. Dak.

Bracon nigridorsum Ashmead, 1891. Canad. Ent. 23: 2. 9.

nigropectus Provancher. Canada, Vt., Mass., Ohio, Iowa, Ark.

Bracon nigropectus Provancher. 1880. Nat. Canad. 12: 143. 9.

nitidulus Dalla Torre. Canada. Maine. Idaho. Host: Pissodes sp.

Bracon nitidus Provancher, 1883. Nat. Canad. 14: 16. \(\frac{9}{2}, \tilde{σ}. \) Preocc. by Smith, 1858. Bracon nitidulus Dalla Torre, 1898. Nat. Canad. v. 4, p. 280. N. name for nitidus Provancher.

nuperus Cresson. Ont., U. S. except New England; Mexico. Host: Homoeosoma electellum (Hulst), Isophrictis sp., Orellia ruficauda (F.), Polychrosis rhoifructana Kearf. This species has also been recorded as being reared from Herina frondescentiae (L.), a european species, Neaspilota achilleae Johnson, and Orthoris crotchii Lec., all of which need to be confirmed.

Bracon nuperus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 187. 9.

Bracon minimus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 187. 9, 6.

Bracon politus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 373. d.

oenotherae (Muesebeck). Mass., N. J., Md., Va., Ga., Ohio, Tenn., Ont., Minn., Nebr., Tex., Calif. Host: Mompha eloisella (Clem.).

Microbracon oenotherae Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 62. 9, 8.

palliventris (Provancher). Mass., N. Y., Ohio, Ont., Mich., Oreg. Host: Epiblema strenuanum (Wlkr.).

Phylax palliventris Provancher, 1880. Nat. Canad. 12: 174. 9.

Bracon auripes Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 372. Q. Zele pallidiventris Dalla Torre, 1898. Cat. Hym., v. 4, p. 78. Emend.

papaipemae (Gahan). N. Y., Mich., Minn. Host: Papaipema frigida (Smith).

Microbracon papaipemae Gahan, 1922. U. S. Natl. Mus., Proc. 61: 4. 9.

pascuensis Shenefelt. Mich., Kans., Tex.

Bracon pascuensis Shenefelt, 1944. Kans. Ent. Soc., Jour. 17: 74. 9, 8.

piceiceps Viereck, Kans.

Bracon piceiceps Viereck, 1905. Kans. Acad. Sci., Trans. 19: 268. d.

piger Wesmael. Oreg., Calif.; Europe. Introduced from France. Host: Cnephasia sp., Etiella zinckenella (Treit.).

Bracon piger Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 48. 9.

Biology: Parker, 1951. U. S. Dept. Agr., Tech. Bul. 1036, p. 8-11. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 87.

pini (Muesebeck). N. S., N. B., Que., Maine, Vt., N. H., Mass., Conn., N. Y., Pa., Va., Ont., Mich., Alta, Mont., Colo., Idaho, B. C., Wash., Oreg., Calif. Host: Cylindrocopturus furnissi Buch., C. longulus (Lec.), Pissodes fasciatus Lec., P. strobi (Peck), P. schwarzi Hopk., P. terminalis Hopping, Podapion gallicola Riley.

Microbracon pini Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 52. 9, 3.

Biology: Taylor, 1929. Ent. Amer. 10: 1-12. — Deyrup, 1975. Conif. For. Biome Ecosystem Anal. Stud., Univ. of Wash., Bul. 6, pp. 81-83.

pityophthori (Muesebeck). N. Mex. Host: Pityophthorus sp.

Microbracon pityophthori Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 55. 9.

platynotae (Cushman). Ga., La., Tex., Calif.; Mexico. Host: Heliothis zea (Boddie), Lineodes integra (Zell.), L. interrupta Zell., Pectinophora gossypiella (Saund.), Pilemia periusalis (Wikr.), Platynota stultana Wism.

Habrobracon platynotae Cushman, 1914. Ent. Soc. Wash., Proc. 16: 104. 9, d.

podunkorum (Viereck). Conn., Va., Ohio, Mich., Iowa, Mo. Host: Aristotelia absconditella (Wlkr.).

Microbracon podunkorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 207.

politiventris (Cushman). N. S. s. to Va., w. to B. C. and Calif.; La. Host: Ancylis comptana fragariae (W. and R.), Archips rosanus (L.), Argyrotaenia pinatubana (Kearf.), A. velutinana (Wlkr.), Choristoneura conflictana (Wlkr.), C. fumiferana (Clem.), C. occidentalis Freem, C. parallela (Rob.), C. pinus Freem, C. rosaceana (Harr.), Conotrachelus nenuphar (Hbst.), Dioryctria reniculella (Grote), Grapholitha molesta (Busck), Pandemis lamprosana (Rob.), Paralobesia viteana (Clem.), Rhyacionia buoliana (Schiff.).

Habrobracon politiventris Cushman, 1919. U. S. Natl. Mus., Proc. 55: 517. ♀.

Biology: McKnight, 1971. Ent. Soc. Amer., Ann. 64: 620-624.

psilocorsi (Viereck). Md., Tex. Host: Aragalea cristifasciella (Chamb.).

Microbracon psilocorsi Viereck, 1912. U. S. Natl. Mus., Proc. 42: 143. 9, 8.

punctatus (Muesebeck). N. Y., Pa., Md., N. C., Ga., Fla., Mich., Wis., Ill., Ala., Iowa, Ark., La., Tex. Host: Anthonomus nubitis Lee., Cylas formicarius elegantulus (Sum.), Endalus celatus Burke, Faustinus cubae (Boh.). Also recorded from Listronotus oregonensis Lec. which needs to be confirmed.

Microbracon punctatus Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 24. 9.

pygmaeus Provancher. South. Canada, U. S. Host: Argyrotaenia citrana (Fern.), Coleophora innotabilis Braun, C. laricella Hbn., C. leucochrysella Clem., C. malivorella Riley, C. pruniella Clem., C. serratella (L.), C. volckei Heinr.

Bracon pygmaeus Provancher, 1880. Nat. Canad. 12: 144. 9, 8.

Bracon junci Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 619. 9, 3.

Bracon trifolii Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 622. 8.

Bracon kansensis Viereck, 1905. Kans. Acad. Sci., Trans. 19: 268. 9.

Microbracon coleophorae Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 231. 9, 8.

Microbracon massasoit Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 207.

Biology: Doner, 1934. Ent. Soc. Amer., Ann. 27: 435-442.

pyralidiphagus (Muesebeck). N. J. s. to Fla.; Mich., La., Tex., Colo., Ariz.

Microbracon pyralidiphagus Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 34. 9.

quinnipiacorum (Viereck). Conn., N. J., Pa., Md., Va., Fla., Mich., Ind., Tenn., Iowa, Ark., S. Dak., Tex., Ariz.

Microbracon quinnipiacorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 207.

radicis Shenefelt. Wis. Host: Hylobius radicis Buch.

Bracon radicis Shenefelt, 1960. Canad. Ent. 92: 872. 9, 8.

rhyacioniae (Muesebeck). Que. w. to Sask.; N. Dak., S. Dak., Nebr., Mont., Colo., N. Mex., Ariz., Idaho, Calif. Host: Barbara colfaxiana (Kearf.), Dioryctria auranticella (Grote), Eacosma recissorian Heinr., E. tocullionana Heinr., Laspeyresia youngana (Kearf.), Rhyacionia frustrana (Comst.), R. bushnelli (Busck), R. neomexicana (Dyar). Microbracon rhyacioniae Muesebeck. 1931. U. S. Natl. Mus., Proc. 79 (16): 15. 2. 3.

rhyssomati Ashmead. Ohio, Ill. Host: Rhyssomatus annectans Casey, R. lineaticollis (Say).

Bracon rhyssemati Ashmead. 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 46. 6.

rosaceani Muesebeck. Oreg. Host: Choristoneura rosaceana (Harr.).

Bracon rosaceani Muesebeck, 1963. Ent. News 74: 160. \(\mathcal{Q}\), \(\delta\).

rudbeckiae (Muesebeck). Iowa, Ark., N. Dak., Kans., Tex., N. Mex., Ariz. Host: Anthonomus squamosus Lec.

Microbracon rudbeckiae Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 45. 9, 8.

rufomarginatus Ashmead. W. Va.

Bracon rufomarginatus Ashmead, 1893. Canad. Ent. 25: 68. 9.

sanninoideae (Gahan). Ont. s. to Ga., w. to Wis., Kans., and Ark. Host: Alcathoe caudata (Harr.), Podosesia syringae fraxini Lugg., Synanthedon exitiosa (Say), S. rhododendri (Beul.).

Microbracon sanninoideae Gahan, 1917. U. S. Natl. Mus., Proc. 53: 196. 9. 8.

scanticorum (Viereck), Conn., Ill.

Microbracon scanticorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 207.

sesiae (Muesebeck). Conn., N. Y., Colo. Host: Janus integer (Nort.), Synanthedon tipuliformis (Clerck).

Microbracon sesiae Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 53. 9, 6.

sphenophori (Muesebeck). Mo., Ark. Host: Sphenophorus callosus (Oliv.).

Microbracon sphenophori Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 25. 9, 8.

sulcifrons (Ashmead). Colo.

Microbracon sulcifrons Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 15. d.

tachypteri (Muesebeck). N. Y., W. Va., Wis., Kans., Colo. Host: Tachypterellus consors cerasi List, T. quadrigibbus (Say), T. q. magnas List.

Microbracon tachypteri Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 68. 9.

tenuiceps (Muesebeck). Que. s. to Va. and Tenn., w. to Ont. and Kans.; Tex., Idaho, Nev., Wash. Host: Hypera meles (F.), H. nigrirostris (F.).

Microbracon tenuiceps Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 46. 9.

tenuis Muesebeck and Walkley. Alaska,

Macrodyctium politum Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 252. Q. Preocc. by Provancher, 1888.

Microbracon ashmeadi Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 42. N. name for politum Ashmead; preocc. by Morrison, 1917.

Bracon tenuis Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 168. N. name for ashmeadi Muesebeck.

terebella Wesmael. N. Y., Pa., Ohio; Europe. Host: Cephus cinctus Nort., C. pygmaeus (L.), Trachelus tabidus (F.). This species was also introduced into Ont., N. Dak., and Mont. from Europe but apparently not established.

Braco terebella Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 57. 9.

Biology: Salt, 1931. Bul. Ent. Res. 22: 527-534.

thurberiphagae (Muesebeck). Tex., Ariz.; Mexico, West Indies. Host: Ancylostomia stercorea (Zell.), Anthonomus grandis thurberiae Pierce, Thurberiphaga diffusa (Barnes).
Microbracon thurberiphagae Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 54. 9, 8.

Biology: Bennett, 1960. Bul. Ent. Res. 50: 747-749.

tychii (Muesebeck). Utah, Idaho, Calif. Host: Etiella zinckenella (Treit.), Tychius lineellus Lec., T. semisquamosus Lec.

Microbracon tychii Muesebeck, 1925. U. S. Natl. Mus., Proc. 67 (8): 51. 9, d.

uncas (Viereck). Conn.

Microbracon uncas Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 208.

variabilis (Provancher). Que. s. to Ga., w. to Minn. and Tex.; Idaho. Host: Acrobasis caryae Grote, A. rubrifasciella Pack., Blastodacna sp., Conotrachelus nenuphar (Hbst.), Paralobesia viteana (Clem.), Tachypterellus quadrigibbus (Say), T. q. magnas List. Opius variabilis Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 382. č. Bracon tortricicola Ashmead, 1889 (1888). U. S. Natl. Mus, Proc. 11: 621. 9.

Biology: Nickels, Pierce, and Pinkney, 1950. U. S. Dept. Agr., Tech. Bul. 1011, p. 9-12.

—Balduf, 1968. Ent. Soc. Amer., Ann. 61: 467-468.

wawequa (Viereck). Conn.

Microbracon waweqna Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 206.

xanthonotus Ashmead. N. H., Va., Minn., Colo., N. Mex., Idaho, Utah, Ariz., Wash., Oreg., Calif. Host: Malacosoma californicum californicum (Pack.), M. c. fragile (Stretch), M. c.

pluviale (Dyar), M. c. recenseo Dyar, M. constrictum (Hy. Edw.), M. disstria Hbn., Orgyia leucostigma (Smith), O. pseudotsugata (McD.), O. vetusta (Bdvl.), Sabulodes caberatae (Gn.).

Bracon xanthonotus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 618. \(\frac{9}{\circ}, \delta \). Bracon (Habrobracon) hopkinsi Viereck, 1910. U. S. Natl. Mus., Proc. 38: 380. \(\frac{9}{\circ}, \delta \). Habrobracon mali Viereck, 1913. U. S. Natl. Mus., Proc. 44: 641. \(\frac{9}{\circ}, \delta \).

Biology: McKenzie, 1935. Calif. Agr. Expt. Sta., Bul. 592, p. 20-21.

Genus COELOIDES Wesmael

Coeloides Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 59.

Type-species: Coeloides scolyticida Wesmael. Desig. by Shenefelt, 1943.

Syntomomelus Kokujev, 1902. Rev. Russe d'Ent. 3: 163.

Type-species: Syntomomelus rossicus Kokujew. Monotypic. Habrobraconidea Viereck, 1912. U. S. Natl. Mus., Proc. 43: 578.

Type-species: Habrobraconidea bicoloripes Viereck. Orig. desig.

Coeloidina Viereck, 1921. U. S. Natl. Mus., Proc. 59: 133.

Type-species: Coeloides melanotus Wesmael. Orig. desig.

Cerobracon Viereck, 1926. Canad. Ent. 58 (3): 54.

Type-species: Bracon secundus Dalla Torre. Orig. desig.

Species are external parasites of larvae of wood boring Coleoptera.

brunneri Viereck. Mont. s to N. Mex., w. to Wash. and Calif. Host: Dendroctonus pseudotsugae
Hopk. Other host records need to be confirmed.

Coeloides brunneri Viereck, 1911. U. S. Natl. Mus., Proc. 41: 293. ♀, ♂. Coeloides scolyti Cushman, 1931. Wash. Acad. Sci., Jour. 21: 303. ♀, ♂.

Biology: Ryan, 1962. Ent. Soc. Amer., Ann. 55: 403-409. —Ryan and Rudinsky, 1962. Canad.
Ent. 94: 748-763. —Ryan, 1963. Ent. Soc. Amer., Ann. 56: 639-648. —Richerson and
Borden, 1971. Entomophaga 16: 95-99. —Richerson and Borden, 1972. Canad. Ent. 104: 1235-1250, 1877-1881. —Deyrup, 1975. Conif. For. Biome Ecosystem Anal. Stud., Univ. of
Wash., Bul. 6, p. 87-90.

Morphology: Richerson, Borden, and Hollingdale, 1972. Canad. Jour. Zool. 50: 909-913 (antenna).

crocator (Kirby). No. Amer. ("lat. 65").

Bracon crocator Kirby, 1837. Fauna Bor.-Amer., v. 4, p. 261. 9.

dendroctoni Cushman. Que.; S. Dak. s. to Ariz., w. to B. C. and Calif.; Alaska. Host: Dendroctonus obesus (Mann.), D. ponderosae Hopk., D. rufipennis (Kby.), Ips confusus (Lec.), I. emarginatus (Lec.), I. oregonis (Eichh.), I. perturbatus (Eichh.), I. pilifrons Swaine, Orthothomicus caelatus (Eichh.).

Coeloides dendroctoni Cushman, 1931. Wash. Acad. Sci., Jour. 21: 303. 9, 8.

Biology: De Leon, 1935. Ent. Soc. Amer., Ann. 28: 411-424. — Reid, 1963. Canad. Ent. 95: 233-235. — Deyrup, 1975. Conif. For. Biome Ecosystem Anal. Stud., Univ. of Wash., Bul. 6, p. 90.

Morphology: De Leon, 1934. N. Y. Ent. Soc., Jour. 42: 297-317.

pissodis (Ashmead). N. S. and N. B. s. to Ga., w. to Tex.; Ont., Wis., Minn., Wyo. Host:

Dendroctonus frontalis Zimm., Ips calligraphus (Germar), I. grandicollis (Eichh.),

Pissodes approximatus Hopk., P. nemorensis Germar, P. strobi (Peck).

Bracon pissodis Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 617. 9.

Habrobraconidea bicoloripes Viereck, 1912. U. S. Natl. Mus., Proc. 43: 579. 9.

Biology: Taylor, 1929. Ent. Amer. 10: 22-26.

promontorii (Dalla Torre). Canada, N. H., Pa.

Bracon striatus Provancher, 1880. Nat. Canad. 12: 140. č. Preocc. by Brulle, 1846. Bracon pronontorii Dalla Torre, 1898. Cat. Hym., v. 4, p. 285. N. name for striatus Provancher.

rufovariegatus (Provancher), Canada,

Bracon rufovariegatus Provancher, 1880. Nat. Canad. 12: 142. 9, 8.

scolytivorus (Cresson). Que. s. to N. C.; Mo. Host: Neoclytus acuminatus (F.), Scolytus audrispinosus Sav.

Bracon scolytivorus Cresson, 1873. In Riley, Ins. Mo., Ann. Rpt. 5: 106. 9, 8.

Bracon longicandus Provancher, 1880. Nat. Canad. 12: 142. 9, 3. Preocc. by Brulle, 1846. Bracon canadensis Dalla Torre, 1898. Cat. Hym., v. 4, p. 261. N. name for longicandus Provancher.

seeundus (Dalla Torre). Que., Maine, N. H., N. C., Minn. Host: Pissodes dubius Rand.

Bracon nigripes Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 121. 9, J.

Preocc. by Brulle. 1846.

Bracon secundus Dalla Torre, 1898. Cat. Hym., v. 4, p. 288. N. name for nigripes Provancher.

vancouverensis (Dalla Torre), B. C.

Bracon striatus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 432. d. Preocc. by Brulle, 1846.

Bracon vancouverensis Dalla Torre, 1898. Cat. Hym., v. 4, p. 293. N. name for striatus Provancher.

Genus COMPSOBRACON Ashmead

Compsobracon Ashmead, 1900. U. S. Natl. Mus., Proc. 23; 138.
Type-species: Exothecus magnificus Ashmead. Orig. desig.

Macronura Szepligeti, 1906, Mus. Nat. Hung., Ann. 4: 581.

Type-species: Iphiaulax mirabilis Szepligeti. Desig. by Viereck, 1914.

magnificus (Ashmead). Tex.

Exothecus magnificus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 624. 9.

Genus CYANOPTERUS Haliday

Cyanopterus Haliday, 1835. Ent. Mag. 3: 22.

Type-species: Ichneumon flavator Fabricius, Monotypic,

Bracambus Szepligeti, 1896. Termes. Fuzetek 19: 168.

Type-species: Ichneumon flavator Fabricius. Monotypic.

Coeloidimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 44: 558.

Type-species: Bracon (Melanobracon) webbi Viereck, Orig. desig.

laevis (Provancher). Que., Maine, Pa., Ga., Mich., Miss., Minn., Mont., Calif.

Bracon laevis Provancher, 1880. Nat. Canad. 12: 138. 9.

Bracon (Melanobracon) webbi Viereck, 1909, U. S. Dept. Agr. Bur. Ent., Bul. 58: 54. 9.

Genus IPHIAULAX Foerster

Iphiaulax Foerster, 1862, Naturh. Ver. Rheinlande, Verh. 19: 234.

Type-species: Bracon impostor Scopoli. Orig. desig.

Ipobracon Dalla Torre, 1898. Cat. Hym., v. 4, p. 296.

Type-species: Bracon nigrator Zetterstedt. Desig. by Muesebeck and Walkley, 1951.

Digonogastra Viereck, 1912. U. S. Natl. Mus., Proc. 42: 621. Type-species: Bracon epicus Cresson. Orig. desig.

Monogonogastra Viereck, 1912. U. S. Natl. Mus., Proc. 42: 625.

Type-species: Bracon atripectus Ashmead. Orig. desig. Iphianlacidea Fahringer, 1926. Opusc. Bracon., v. 1, p. 189.

Type-species: Bracon impostor Scopoli. Desig. by Muesebeck and Walkley, 1951.

agrili (Ashmead). Que. and N. B. s. to Ga., w. to N. Dak. and Ariz. Host: Agrilus sp., Oberea praelonga Casey.

Bracon agrili Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 612. 9, 8.

americanus Provancher. Que., N. Y., Pa., Va.

Iphianlax americanus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 371. 9. atripectus (Ashmead). Calif.

Bracon atripectus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 614. 9.

augustus Viereck. Conn.

Iphiaulax (Monogonogastra) augustus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 210. 9.

cinnabarinus Viereck. Tex., N. Mex., Ariz.

Iphiaulax cinnabarinus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 286. 9.

epicus (Cresson), Fla., Mich., Ill., Iowa, Ark., Tex., Ariz.

Bracon epicus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 183. 9.

erythrogaster (Brulle). Pa.

Bracon erythrogaster Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 401. 2.

erythrus (Viereck). Tex., N. Mex., Ariz., Calif.

Vipio erythrus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 284. d.

eurygaster (Brulle). Maine, Conn., N. Y., Pa., N. J., Mich., Ind., S. Dak. Host: Saperda concolor Lec.

Bracon eurygaster Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 400. ♀.

faustus (Cresson). Kans., Tex., Ariz.; Mexico. Host: Ataxia sp., A. hubbardi Fish.

Bracon faustus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 185. 9.

koebelei (Ashmead), Calif.

Bracon koebelei Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 613. d.

manteri Nettleton. Ga., Fla., Ala., Miss. Host: Oiketicus abbottii Grote, Thyridopteryx ephemeraeformis (Haw.).

SUBFAMILY EXOTHECINAE

The genera in this group were included in the Rogadinae in the previous catalog although they were placed in a distinct subfamily by earlier workers. Separation from the Rogadinae appears justified since the Exothecinae are apparently external parasites of lepidopterous, coleopterous, and sawfly larvae, the Rogadinae being internal parasites of lepidopterous larvae. The genera included here are in need of revision and the generic placement of the North American species which follows should be considered only provisional until a thorough study is made of the group.

Taxonomy: Shenefelt, 1975. Hym. Cat., part 12, p. 1115-1163 (cat. World spp.).

TRIBE EXOTHECINI

Genus ACRISIS Foerster

Acrisis Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 236.

Type-species: Diachasma pilosipes Ashmead. Orig. desig.

One undescribed species in North America.

Genus COLASTES Haliday

Colastes Haliday, 1833. Ent. Mag. 1: 266.

Type-species; Colastes braconius Haliday, Monotypic. Exothecus Wesmael, 1838, Nouv. Mem. Acad. Sci. Bruxelles 11: 73.

173

Type-species: Exothecus affinis Wesmael. Desig. by Foerster, 1862.

The synonymy of Exothecus with Colastes needs to be confirmed by examination of the type-species. There is no doubt, however, that many species associated with Colastes at present are not congeneric with the type-species.

Taxonomy: Shenefelt, 1975. Hym. Cat., part 12, p. 1115-1122 (cat. World spp.). alaskensis (Ashmead). Alaska.

Exothecus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 252.

Colastes microrhopalae Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 2: 351.

Genus GNAPTODON Haliday

Opius subg. Gnaptodon Haliday, 1837. Ent. Mag. 4: 220.

Type-species: Bracon pumilio Nees. Monotypic.

Diraphus Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 89.

Type-species: Diraphus pygmaeus Wesmael, Monotypic.

This genus has traditionally been placed in the Opiinae, but Tobias (1967) and Capek (1970) have placed it with the Exothecini, which appears to be correct. Morphologically, the genus resembles other genera in this tribe. Species are internal parasites of leaf mining lepidopterous larvae and are apparently restricted to the family Nepticulidae.

Revision: Fischer, 1965. Polskie Pismo Ent. 35: 168-182 (No. Amer. spp.). —Fischer, 1967. Beitr. z. Ent. 17: 969-973 (No. and So. Amer. spp.).

Arraphis minuta Ashmead, 1892. Psyche 6: 289. d.

Phaenodus caddous Viereck, 1908 (1907). Amer. Ent. Soc., Trans. 33: 403. 9.

SUBFAMILY ROGADINAE

This is a specialized group of cyclostomate genera in which all species are internal parasites of lepidopterous larvae; pupation takes place within the mummified host larva which often retains its original shape.

Taxonomy: Shenefelt, 1975. Hym. Cat., part 12, p. 1162-1262 (cat. World spp.).

Genus ALEIODES Wesmael

Aleiodes Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 94.

Type-species: Aleiodes heterogaster Wesmael. Desig. by Viereck, 1914.

Schizoides Wesmael, 1838. Nov. Mem. Acad. Sci. Bruxelles 11: 94 (footnote).

Type-species: Aleiodes heterogaster Wesmael. Autotypic.

Taxonomy: Shenefelt, 1975. Hym. Cat., part 12, p. 1163-1185 (cat. World spp.).

abdominalis Cresson. Que., N. Y., Pa., D. C., Ohio, Mich., Ill., Iowa, S. Dak. Aleiodes abdominalis Cresson, 1869. Amer. Ent. Soc., Trans. 2: 379. ♀.

Aleiodes lectus Cresson, 1869. Amer. Ent. Soc., Trans. 2: 379. ô.

aciculatus Cresson. N. Y., Pa., Md., D. C., Fla., Ohio, Iowa, Mo., Ark., La., S. Dak., Colo., Utah. Host; Feltia ducens Wlkr., F. subgothica (Haw.), Pseudaletia unipuncta (Haw.).

Aleiodes aciculatus Cresson, 1869. Amer. Ent. Soc., Trans. 2: 381. 9, 8. parasiticus Norton. Que. s. to Md., w. to Ont., S. Dak., and Colo. Host: Sungrapha epigaea

arasiticus Norton. Que. s. to Md., w. to Ont., S. Dak., and Colo. Host: Syngrapha epigaea (Grote).

Aleiodes parasiticus Norton, 1869. Amer. Ent. Soc., Trans. 2: 327. 9.

Genus BUCCULATRIPLEX Viereck

Bucculatriplex Viereck, 1912. U. S. Natl. Mus., Proc. 43: 577. Type-species: Bracon bucculatricis Ashmead. Orig. desig.

There is some evidence that species of this genus depart somewhat from the typical rogadine biology in that pupation apparently takes place within the host pupa. More studies need to be made to confirm this.

bucculatricis (Ashmead), Maine s. to D. C., w. to S. Dak.; Fla., Wash., Oreg. Host: Bucculatrix ainsliella Murt., B. canadensisella (Chamb.), Cameraria hamadragadella (Clem.). Also recorded from Heterarthrus nemoratus (Fall.) which needs to be confirmed.

Bracon bucculatricis Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 618. &. Bacculatriplex secundus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey,

Bul. 22, p. 765. ♀.

Ademon leptogaster Fischer, 1965, Polskie Pismo Ent. 35: 198. 3.

Taxonomy: Marsh, 1974, Ent. Soc. Wash., Proc. 76: 285.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767, p. 65.

Genus CLINOCENTRUS Haliday

Clinocentrus Haliday, 1833. Ent. Mag. 1: 266.

Type-species: Clinocentrus umbratilis Haliday. Monotypic.

Neorhyssalus Baker, 1917. Philippine Jour. Sci. 12: 286.

Type-species: Neorhyssalus compositus Baker. Orig. desig.

Heterogamoides Fullaway, 1919. Straits Br. Roy. Asiatic Soc., Jour. 80: 43.

Type-species: Heterogamoides muirii Fullaway. Orig. desig.

Taxonomy: Shenefelt, 1975. Hym. Cat., part 12, p. 1187-1193 (cat. World spp.). fumiferanae Muesebeck. N. Y., Minn. Host: Choristoneura fumiferana (Clem.).

Genus TETRASPHAEROPYX Ashmead

Tetrasphaeropyx Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 634. Type-species: Rogas pilosus Cresson, Monotypic, pilosus (Cresson). Fla., Tex.; Mexico.

Rogas pilosus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 189. 9.

Genus YELICONES Cameron

Yelicones Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 387.

Type-species: Yelicones violaceipennis Cameron. Desig. by Viereck, 1914. Rhopalotoma Cameron, 1911. Timehri 1: 318.

Type-species: Rhopalotoma crassitarsis Cameron, Monotypic,

Pectenopius Fischer, 1961. Naturhist. Mus. Wien., Ann. 64: 156. Type-species: Pectenopius paradoxus Fischer, Orig. desig.

Taxonomy: Shenefelt, 1975. Hym. Cat., part 12, p.1261-1262 (cat. World spp.).

delicatus (Cresson), N. Y. s. to Fla., w. to Kans, and Tex. Host: Caristanius decoloralis (Wlkr.), Nephopteryx uvinella (Rag.), Psorosina hammondi (Rilev).

Rogas delicatus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 189. 3.

SUBFAMILY METEORIDEINAE

Taxonomy: Capek, 1965 (1964). 12th Internatl. Cong. Ent., Proc., p. 98-99. - Tobias, 1967. Ent. Obozr. 46: 662. —Capek, 1969. Ent. Soc. Wash., Proc. 71: 307.

Genus METEORIDEA Ashmead

Meteoridea Ashmead, 1900, U. S. Natl. Mus., Proc. 23: 129.

Type-species: Meteoridea longiventris Ashmead. Orig. desig.

Benama Nixon, 1946. Bul. Ent. Res. 32: 98.

Type-species: Benama hutsoni Nixon, Orig. desig.

Until 1965, this genus was placed in the tribe Diospilini, subfamily Helconinae. It was placed in its own subfamily by Capek (1965) on the basis of morphology and biology. Species of Meteoridea parasitize larvae of Lepidoptera but pupation takes place within the host pupal case, which is unique among braconid parasites of lepidopterous larvae.

Taxonomy: Shenefelt and Muesebeck, 1957. Ent. Soc. Wash., Proc. 59: 129-130. - Capek, 1965 (1964). 12th Intl. Cong. Ent., Proc., p. 98-99. —Shenefelt, 1970. Hym. Cat., part 5, p. 215-216. (cat. World spp.).

compressiventris Shenefelt and Muesebeck. Wis.

Meteoridea compressiventris Shenefelt and Muesebeck, 1957. Ent. Soc. Wash., Proc. 59: 131. ♀.

longiventris Ashmead, Fla.

Meteoridea longiventris Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 129.

SUBFAMILY HELCONINAE

Host records indicate that species in this group are internal parasites of wood-boring coleopterous larvae.

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 177-220 (cat. World spp.). - Watanabe, 1972. Insecta Matsumurana 35: 11-16 (review World genera).

TRIBE HELCONINI

Revision: Tobias, 1967. Zool. Inst. Acad. Sci. U. S. S. R., Trans. 41: 222-238 (some Eur. spp.). -Watanabe, 1972. Insecta Matsumurana 35: 1-11 (Jap. spp.).

Genus EUMACROCENTRUS Ashmead

Eumacrocentrus Ashmead, 1900, U. S. Natl. Mus., Proc. 23: 120. Type-species: Helcon americanus Cresson. Orig. desig.

americanus (Cresson). Canada, Conn., N. Y., Pa., Md., W. Va., Va., Mich.

Helcon americanus Cresson, 1873. Canad. Ent. 5: 84. ♀.

Petalodes(?) americanus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 631. d.

Genus HELCON Nees

Helcon Nees, 1814 (1812). Mag. Gesell. Naturf. Freunde Berlin 6: 216.

Type-species: Helcon tardator Nees. Desig. by Lepeletier and Serville, 1825. There is a question whether Lepeletier and Serville (1825. In Olivier, Encycl. Method. 10: 42) actually designated Helcon tardator as the type-species. However, Westwood (1839) also designated tardator as the type-species of Helcon.

Gumnoscelus Foerster, 1862, Naturh, Ver. Rheinlande, Verh. 19: 255.

Type-species: Helcon tardator Nees. Orig. desig.

Edyia Cameron, 1905. Straits Branch Roy. Asiat. Soc., Jour. 44: 108. Cameron spelled the generic name Ediya on page 108 and Edyia on page 109 of the above publication, which appeared in July, 1905. In August, 1905 (Ann. and Mag. Nat. Hist. (7) 16: 159) Cameron again described the genus spelling the name Edyia, which is now the accepted spelling. Type-species: Edyia annulicornis Cameron. Monotypic.

Coelostephanus Kieffer, 1911. Soc. Ent. de France, Ann. 80: 232. Type-species: Coelostephanus rufus Kieffer. Monotypic.

Revision: Fahringer, 1933. Ztschr. f. Angew. Ent. 20: 307-323 (Eur. spp.). —Watanabe, 1972. Insecta Matsumurana 35: 2-3 (Jap. spp.)

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 192-196 (cat. World spp.).

fulvipes Cresson. Alta., Mont., Colo., Utah, B. C., Wash., Oreg., Calif. Host: Xylotrechus undulatus (Say).

TRIBE CENOCOELIINI

Genus CENOCOELIUS Westwood

Cenocoelius Westwood, 1840. Introd. Mod. Classif. Ins., v. 2, Gen. Synop., p. 62. Type-species: Cenocoelius flavifrons Westwood, Monotypic,

Capitonius Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 544.

Type-species: Capitonius bifasciatus Brulle, Monotypic,

Laccophrus Foerster, 1862, Naturh, Ver. Rheinlande, Verh. 19: 257.

Type-species: Laccophrys magdalini Foerster. Orig. desig. Aulacodes Cresson, 1865, Ent. Soc. Phila., Proc. 4: 8.

Type-species: Aulacodes nigriventris Cresson. Monotypic.

Lestricus Reinhard, 1865. Berlin, Ent. Ztschr. 9: 265.

Type-species: Alysia rubriceps Ratzeburg. Desig. by Muesebeck and Walkley, 1951. Promachus Cresson, 1887. Amer. Ent. Soc., Trans., Sup. Vol., p. 61.

Type-species: Promachus sanguineiventris Ashmead. Desig. by Viereck, 1914.

Revision: Rohwer, 1914. Canad. Ent. 46: 316-322 (No. Amer. spp. in genus Capitonius).

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 178-185 (cat. World spp.).

ashmeadii Dalla Torre. Que. s. to Fla., w. to Ont., S. Dak. and Tex. Host: Huperplatus aspera (Say), H. maculata Hald., Neoclutus acuminatus (F.), Sternidius alpha alpha (Say), S. a. vicinus (Hald.), S. cinereus (Lec.), S. fascicularis (Harr.), Urgleptes facetus (Say), U. signatus (Lec.).

Capitonius rubriceps Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 135. 9. Preocc. by Ratzeburg, 1844.

Promachus rubriceps Ashmead, 1889 (1888), U. S. Natl. Mus., Proc. 11: 653. J. Preocc. by Ratzeburg, 1844.

Cenocoelius Ashmeadii Dalla Torre, 1898, Cat. Hym., v. 4, p. 72, N. name for rubriceps

Capitonius provancheri Rohwer, 1914. Canad. Ent. 46: 321. N. name for rubriceps Provancher.

carvae (Rohwer), N. J., Pa., N. C., Mo. The original description states that this species is probably parasitic on Synoxylon in hickory. This record needs to be confirmed. Capitonius caryae Rohwer, 1914. Canad. Ent. 46: 318. 9.

erythrogastra (Rohwer). N. Y., Pa., W. Va., N. C. Host: Saperda discoidea F. Capitonius erythrogastra Rohwer, 1914. Canad. Ent. 46: 317. 9.

leptostyli (Rohwer). Pa., Md., Va., N. C., Iowa. Host: Leptostylus sp., Urgleptes signatus (Lec.). Capitonius leptostyli Rohwer, 1914. Canad. Ent. 46: 319. 3.

nigrisoma (Rohwer). N. C., S. C., Ga., Miss., La., Tex. Ecology: Frequently associated with Dendroctonus frontalis Zimm.

Capitonius nigrisoma Rohwer, 1914. Canad. Ent. 46: 320. 9, 3.

sanguineiventris (Ashmead), Ohio, Mich., Wis., Mo. Host: Agrilus horni Kerr., Oberea schaumii Lec.

Promachus sanguineiventris Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 653. 9.

saperdae (Ashmead), Que, s. to Md., w. to S. Dak, and Tex. Host: Saperda candida F., S. discoidea F., S. tridentata Oliv.

Promachus saperdae Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 653. Coenocelius(!) politifrons Viereck, 1905. Kans. Acad. Sci., Trans. 29: 279. 8. tenuicornis (Rohwer), Fla.

Capitonius tenuicornis Rohwer, 1914. Canad. Ent. 46: 321. 9.

TRIBE DIOSPILINI

This group is very much in need of study and many of the North American species are probably wrongly placed in their present genera.

Genus BAEACIS Foerster

Baeacis Foerster, 1878, Naturh, Ver. Rheinlande, Verh. 35: 70.

Type-species: Aspigonus abietis Ratzeburg. Desig. by Viereck, 1914. One undescribed species occurs in North America.

Genus DIOSPILUS Haliday

Diospilus Haliday, 1833. Ent. Mag. 1: 262.

Type-species: Diospilus oleraceus Haliday. Monotypic.

Allochromus Marshall, 1902. Agr. Prat. Pays Chauds 1: 643.

Type-species: Allochromus trimeroderi Marshall, Monotypic.

Type-species. Attockromes trimerodert Marshall. Monogpic.

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 208-214 (cat. World spp.). californicus Rohwer. Calif.

Diospilus californicus Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 164. $\,$ $\,$

curticaudus Gahan. La.; Mex. Host: Altica litigata Fall.

Diospilus curticaudus Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 1. 9.

fomitis Mason. Que., Ont., Man., Sask. Host: Dorcatoma falli White. Diospilus fomitis Mason, 1968. Canad. Ent. 103: 719. ♀, ♂.

neoclyti Rohwer. Colo. Host: Neoclytus caprae (Say).

Diospilus neoclyti Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 165. S.

washingtonensis Rohwer. Wash. Host: Zilora hispida Lec.

Diospilus washingtonensis Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 163. 9.

Genus DYSCOLETES Westwood

Dyscolus Haliday, 1837 (1836). Ent. Mag. 4: 39. Preocc. by Dejean, 1831.

Type-species: Dyscolus lancifer Haliday. Monotypic.

Dyscoletes Westwood, 1840. Introd. Mod. Classif. Ins., v. 2, Gen. synop., p. 62. N. name for Dyscolus Haliday.

Revision: Mason, 1976. Canad. Ent. 108: 855-858.

canadensis Mason. Vt., N. Y., N. C., Ont., Alta., Idaho, B. C., Alaska. Host: Boreus brumalis Fitch.

Dyscoletes canadensis Mason, 1976. Canad. Ent. 108: 856. ♀, ♂.

Genus TAPHAEUS Wesmael

Taphaeus Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 189.

Type-species: Taphaeus irregularis Wesmael. Desig. by Viereck, 1914.

Anostenus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 257.
Type-species: Taphaeus irregularis Wesmael. Orig. desig.

polydrusi (Gahan). N. Y. Host: Polydrusus impressifrons Gyll.

Diospilus polydrusi Gahan, 1916. N. Y. Agr. Expt. Sta. Geneva, Tech. Bul. 56, p. 23. 9.

Taxonomy: Marsh, 1974. Ent. Soc. Wash., Proc. 76: 287.

SUBFAMILY ZELEINAE

This group has been placed in the Macrocentrinae and in the Helconinae by various workers. I have chosen to follow Tobias (1967) in giving it subfamily rank. The genus Zemiotes was recently taken out of synonymy with Meteorus by Mason (1973) and placed as a distinct genus related to Zele. The subfamily name correctly spelled Zelinae is preoccupied in the Hemiptera. The basis for the present spelling, Zeleinae, is a precedent set by Opinion 140 of the International Commission of Zoological Nomenclature, 1943. Species are solitary endoparasites of lepidopterous larvae.

Taxonomy: Tobias, 1967. Ent. Obozr. 46: 661.

Genus ZELE Curtis

Zele Curtis, 1832. Brit. Ent., v. 9, p. 415.

Type-species: Zele testaceator Curtis. Orig. desig.

Phylax Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 159. Preocc. by Dahl, 1823.

Type-species: Rogas annulicornis Nees. Desig. by Westwood, 1840. Homolobus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 256.

Type-species: Phylax discolor Wesmael. Orig. desig.

Phylacter Reinhard, 1863. Berlin. Ent. Ztschr. 7: 248. N. name for Phylax Wesmael.

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 220-227 (cat. World spp.).

mellea (Cresson). No. Amer. Host: Agrotis venerabilis Wlkr., Amathes smithi (Snell.), Feltia subterranea (F.), Spodoptera frugiperda (J. E. Sm.), S. ornithogalli (Guen.). Other records need confirmation.

Phylax melleus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 178. 9.

Zele crassicalcaratus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 259. d.

Taxonomy: Marsh, 1974. Ent. Soc. Wash., Proc. 76: 287. truncator Say. Ind. Type lost; exact placement uncertain.

Bracon truncator Say, 1828. Contrib. Maclur. Lyc. Phila. 1: 78.

Genus ZEMIOTES Foerster

Zemiotes Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 253. Type-species: Perilitus albitarsis Nees. Orig. desig.

Taxonomy: Fischer, 1957. Opusc. Zool., n. 3, p. 1-5 (key to Eur. spp.). —Mason, 1973. Ent. Soc. Wash. Proc. 75: 213-215 (generic reinstatment and transfer).

alaskensis (Ashmead). Canada, N. C., Alaska. Host: Eupithecia sp. Duscoletes alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 247. &.

crassifemur (Muesebeck). Ill., S. Dak., Kans., Tex.

Meteorus crassifemur Muesebeck, 1939. Ent. Soc. Wash., Proc. 41: 84. 9.

levis (Muesebeck). Wyo., N. Mex., Calif.

Meteorus levis Muesebeck, 1923. U. S. Natl. Mus., Proc. 63: 11. 9.

maximus (Muesebeck). Maine s. to Ga., w. to Minn., Colo., and Tex.

Meteorus maximus Muesebeck, 1923. U. S. Natl. Mus., Proc. 63: 13. 9.

niveitarsis (Cresson). N. S. s. to Ga., w. to Ont. and Tenn.; Alaska, Oreg. Host: Acrobasis betulella Hulst, A. comptoniella Hulst, A. ostryella Ely, A. rubrifasciella Pack, A. secundella Ely, A. sylviella Ely, Nephopteryx subcaesiella (Clem.), N. virgatella (Clem.), Rheumaptera hastata (L.).

Perilitus niveitarsis Cresson, 1872. Canad. Ent. 4: 81. 9, 8.

pallitarsis (Cresson). Que. s. to Va.; Ohio, Mich.

Perilitus pallitarsis Cresson, 1872. Canad. Ent. 4: 81. d.

reticulatus (Muesebeck). Newfoundland, Maine, N. H., Idaho, Alaska, B. C., Wash., Calif. Host: Semiothisa granitata (Gn.), S. sexmaculata (Pack.).

Meteorus reticulatus Muesebeck, 1923. U. S. Natl. Mus., Proc. 63: 14. ♀, ♂.

SUBFAMILY MACROCENTRINAE

Genus MACROCENTRUS Curtis

Macrocentrus Curtis, 1833. Ent. Mag. 1: 187.

Type-species: Macrocentrus bicolor Curtis. Monotypic.

Amicroplus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 256.

Type-species: Bracon collaris Spinola. Orig. desig.

Chaonia Cresson, 1865. Ent. Soc. Phila., Proc. 4: 59. Preocc. by Stephens, 1828. N. syn.

Type-species: Chaonia xanthostiama Cresson, Desig. by Viereck, 1914.

Hymenochaonia Dalla Torre, 1898. Wien. Ent. Ztg. 17: 100. N. name for Chaonia Cresson. N. syn.

Fhogra Cameron, 1901. New Zeal. Inst., Trans. 33: 104.

Type-species: Fhogra rubromaculata Cameron. Monotypic.

Leptozele Cameron, 1910. Tijdschr. v. Ent. 53: 52.

Type-species: Leptozele trimaculatus Cameron. Monotypic.

Dolichozele Viereck, 1911. U. S. Natl. Mus., Proc. 40: 182.

Type-species: Dolichozele koebelei Viereck. Monotypic.

Metapleurodon Enderlein, 1920. Arch. f. Naturgesch. 84 (A) (11): 213. Type-species: Macrocentrus ceytonicus Enderlein. Orig. desig. Paniscozele Enderlein, 1920. Arch. f. Naturgesch. 84 (A) (11): 214. Type-species: Paniscozele sumatrana Enderlein. Orig. desig. Pachymerella Enderlein, 1920. Arch. f. Naturgesch. 84 (A) (11): 217. Type-species: Pachymerella maculicora Enderlein. Orig. desig.

All species are endoparasites of lepidopterous larvae, and the gregarious forms are apparently polyembryonic. Species are frequently caught in light traps.

Revision: Muesebeck, 1932. U. S. Natl. Mus., Proc. 80 (23): 1-55 (No. Amer. spp.). — Eady and Clark, 1964. Ent. Gaz. 15: 97-127 (Eur. spp.).

Taxonomy: Shenefelt, 1969. Hym. Cat., part 4, p. 143-174 (cat. World spp.). affinis Muesebeck. N. H., N. Y., Mich., Minn., Utah, Idaho.

Macrocentrus affinis Muesebeck, 1932. U. S. Natl. Mus., Proc. 80 (23): 42. 9.

ancylivorus Rohwer. No. Amer. Host: Acleris oxycoccana (Pack.), Anacampsis sp., Ancylis comptana fragariae (W. and R.), Canarsia sp., Epiblema strenuanum (Wlkr.), Exartema sericoranum Wlsm., Grapholitha molesta (Busck), Halisidota ingens Hy. Edw., Homoeosoma electellum (Hulst), Melissopus latiferranus (Wlsm.), Paralobesia viteana Clem., Phalonia hospes Wlsm., Phthorimaea operculella (Zell.), Rhyacionia frustrana (Comst.), Sparganothis sulphurana (F.), Stegasta bosqueella (Chamb.). This species is one of the more important parasites of the oriental fruit moth (Grapholitha molesta) and the strawberry leafroller (Ancylis comptana fragariae).

NOMINA NUDA IN MACROCENTRUS CURTIS

Macrocentrus atriceps Cresson, 1909. In Tucker, Kans. Acad. Sci., Trans. 22: 293.
Macrocentrus gelechiae Ashmead, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 59.

Macrocentrus solidaginis Ashmead, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 59.

SUBFAMILY AGATHIDINAE

The genera in this subfamily form a rather homogeneous and uniform group. Between 1917 and 1945, this subfamily went under the name Braconinae due to nomenclatural problems with the type-species of Cremnops and Bracon. In 1945, use of the name Agathidinae was made possible by the International Commission in its Opinion 162.

All species are endoparasites of lepidopterous larvae.

Revision: Muesebeck, 1927. U. S. Natl. Mus., Proc. 69 (16): 1-73 (No. Amer. spp., as subfamily Braconinae).

Taxonomy: Gahan, 1917. U. S. Natl. Mus., Proc. 53: 197. — Hincks, 1943. Entomologist 76: 221-222. — Marsh, 1961. Ent. Soc. Amer., Ann. 54: 852 (key No. Amer. genera). — Shenefelt, 1970. Hym. Cat., part 6, p. 307-428 (cat. World spp.).

Genus AENIGMOSTOMUS Ashmead

Aenigmostomus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 128.

Type-species: Microdus longipalpus Cresson. Orig. desig.

imitata (Cresson). Mass., N. Y.

Microdus imitatus Cresson, 1873. Canad. Ent. 5: 51. 9.

immaculata (Gahan). La., Tex. Host: Symmetrischema striatella (Murtf.) ?. Host needs to be confirmed.

Bassus immaculatus Gahan, 1919, U. S. Natl. Mus., Proc. 55: 118, 9.

laticeps (Muesebeck). Mass., D. C., Tex., Ariz.

Bassus laticeps Muesebeck, 1927. U. S. Natl. Mus., Proc. 69 (16): 53. \circ .

malivorellae Shenefelt. Maine, W. Va. Host: Coleophora malivorella Riley.

Bassus brevicauda Muesebeck, 1932. Wash. Acad. Sci., Jour. 22: 332. 9. Preocc. by Reinhard, 1867.

Agathis malivorellae Shenefelt, 1970. Hym. Cat., part 6, p. 342. N. name for brevicauda Muesebeck.

marginatifrons (Muesebeck). Ala.

Bassus marginatifrons Muesebeck, 1927. U. S. Natl. Mus., Proc. 69 (16): 30, 9.

metzneriae Muesebeck. Que., N. H., Mass., Conn., N. Y., Ohio, Mich., N. Dak. Host: Metzneria lappella (L.).

Agathis metzneriae Muesebeck, 1967. In Juhala, Ent. Soc. Amer., Ann. 60: 95. 9, 8.

Biology: Juhala, 1967. Ent. Soc. Amer., Ann. 60: 95-97.

nigricoxa (Provancher). Ont., N. B., N. Y., N. J., Pa., Mich.

Microdus nigricoxus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 138. 2.

nigripes Cresson. Mass., Fla.; N. Dak. s. to Kans. and N. Mex., w. to Alta., Wash., Oreg., and Calif. Host: Phaneta bucephaloides (Wlsm.).

Agathis nigripes Cresson, 1865. Ent. Soc. Phila., Proc. 4: 297. 9.

Agathis nigriceps Provancher, 1895. Nat. Canad. 22: 96. 9.

Agathis wyomingensis Viereck, 1905. Kans. Acad. Sci., Trans. 19: 284. 9.

nigrotrochanterica (Viereck). Ga., Fla., Kans., Ariz.

Microdus nigrotrochantericus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 275. 9.

ninanae (Muesebeck), Ariz., Calif. Host: Laspeyresia ninana (Dyar).

Bassus ninanae Muesebeck, 1927. U. S. Natl. Mus., Proc. 69 (16): 48. 9, 8.

nucicola (Muesebeck). Wash., Oreg., Calif. Host: Melissopus latiferranus (Wlsm.).

Bassus nucicola Muesebeck, 1940. Ent. Soc. Wash., Proc. 42: 91. 9, 3.

Biology: Dohanian, 1942. Jour. Econ. Ent. 35: 386-387.

perforator Provancher. Que. s. to D. C., w. to Alta. and S. Dak.

Agathis perforator Provancher, 1880. Nat. Canad. 12: 177. 9.

Agathis femorator Provancher, 1880. Nat. Canad. 12: 177. 9.

Bracon (Agathis) sassacus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 231. 9, 3.

Bracon (Agathis) bradfordensis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 231. 3.

petiolata (Muesebeck). N. Mex.

Bassus petiolatus Muesebeck, 1932. Wash. Acad. Sci., Jour. 22: 332. 9, 3.

pini (Muesebeck). Maine s. to Va. and Ohio. Host: Evetria sp., Petrova comstockiana (Fern.), P. houseri Miller, Rhyacionia frustrana (Comst.).

Bassus pini Muesebeck, 1940. Ent. Soc. Wash., Proc. 42: 92. 9.

Biology: Miller, 1953. Ohio Jour. Sci. 53: 62.

pumila (Ratzeburg). P. E. I. s. to Pa., w. to Ont. and Wis.; Mont., Idaho.; Europe. Introduced from Europe. Host: Coleophora laricella Hbn.

Microdus pumilus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 57. 9, 8.

Biology: Dowden, 1962. U. S. Dept. Agr., Agr. Handb. 226, p. 47.

quebecensis (Provancher). Que.

Microdus quebecensis Provancher, 1880. Nat. Canad. 12: 178. 9.

reticulata (Muesebeck), Ill., Mo., Kans.

Bassus reticulatus Muesebeck, 1932. Wash. Acad. Sci., Jour. 22: 332. 9, 8.

rubripes Cresson. Mass. s. to Fla., w. to Ont. and La.; Wyo., Idaho, Calif. Host: Coleophora cratipennella Clem., Grapholitha molesta (Busck).

Agathis rubripes Cresson, 1872. Amer. Ent. Soc., Trans. 4: 183. 9.

rufofemorata (Muesebeck). Ohio, Fla., Iowa, Ark., Nebr., Kans.

Bassus rufofemoratus Muesebeck, 1927. U. S. Natl. Mus., Proc. 69 (16): 36. ♀.

rugareolata (Viereck). Conn.

Bassus rugareolatus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 229. 3.

sancta (Say). Mass. s. to Fla., w. to Mich., Nebr., and Tex. Host: Macrobotys pertextalis (Led.).

Bassus sanctus Say, 1836. Boston Jour. Nat. Hist. 1: 249. ♀.

semirubra Brulle. Pa.

Agathis semi-rubra Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 494. d.

simillima (Cresson). Mass. s. to Fla., w. to Ont., S. Dak., and Kans.; Wash. Host: Epiblema carolivana (Wlsm.), E. obfuscanum Dyar, E. otiosanum (Clem.), E. scudderianum (Clem.), E. strenuanum (Wlkr.), Grapholitha tristrigana Clem., Papaipema nebris (Guen.).

Microdus smillimus Cresson, 1873. Canad. Ent. 5: 51. 9, 8.

spiracularis (Muesebeck). U. S.; Mex. Host: Cogia hippalus outis (Skin.), Erynnis zarucco (Luc.), Gesta gesta (H.-S.), Systasea pulverulenta (Feld.).

Bassus spiracularis Muesebeck, 1927. U. S. Natl. Mus., Proc. 69 (16): 38. Q.

stigmatera (Cresson). Fla., La., West Indies, So. Amer. Introduced from Argentina. Host:

Diatraea saccharalis (F.).

Microdus stigmaterus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 65. ♀, ♂.

Microdus diatraeae Turner, 1918. Bul. Ent. Res. 9: 82. 9.

Microdus crossi Brethes, 1927. Rev. Indus. Agr. Tucuman 17: 163. 9.

Alabagrus citreistigma Enderlein, 1920 (1918). Arch. f. Naturgesch. 84: 203. 9.

Biology: Myers, 1932. Roy. Ent. Soc. London, Trans. 80: 125-126. —Jaynes, 1933. U. S. Dept. Agr., Tech. Bul. 363, p. 18-19. —Wilson, 1941. Fla. Ent. 24: 55-57.

tenuiceps (Muesebeck). Ariz.

Bassus tenuiceps Muesebeck, 1927. U. S. Natl. Mus., Proc. 69 (16): 47. 9, 8.

terminata (Cresson). S. Dak., Nebr., Okla., Tex., Colo. Host: Isophrictis sp., Pyroderces rileyi (Wlsm.).

Microdus terminatus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 298. d.

Orgilus terminalis Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 640. d.

Microdus terminator Dalla Torre, 1898. Cat. Hym., v. 4, p. 136. Emend.

texana (Cresson). N. Y. s. to Fla., w. to Kans. and Tex. Host: Microthyris anormalis (Guen.), Pachyzancla thesiusalis Wlkr., Pantographa limata G. and R., Pilema periusalis (Wlkr.), Pilocrocis ramentalis (Led.), P. tripunctata (F.)?, Sylepta silicalis (Gn.), Syngamia haemorrohoidalis (Guen.).

Microdus texanus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 181. d.

Biology: Needham, 1955. Ecology 36: 349-350.

tibiator Provancher. Canada and U. S. except southeast. states.

Agathis tibiator Provancher, 1880. Nat. Canad. 12: 177. 9.

Agathis parvus Viereck, 1903. Amer. Ent. Soc., Trans. 29: 96. 9, 6.

Bracon (Agathis) solidaginis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 231. 3.

unicolor (Schrottky). Calif.; Argentina. Liberated in Calif. but not known to be established.
Introduced from Argentina. Host: Phthorimaea operculella (Zell.).

Orgilus unicolor (Schrottky), 1902. Mus. Nac. Hist. Nat. B. Aires, An. 8: 102. 9.

Agathis unicolorata Shenefelt, 1970. Hym. Cat., part 6, p. 364. Unnecessary n. name for unicolor Schrottky.

usitata (Gahan). Mass. Host: Acrobasis vaccinii Riley.

Bassus usitatus Gahan, 1919. U. S. Natl. Mus., Proc. 55: 119. 9, 8.

verticalis (Cresson), Tex.

Microdus verticalis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 182. 9.

NOMINA NUDA IN AGATHIS LATREILLE

Microdus johnsoni Ashmead, 1900 (1899). In Smith, Ins. of N. J., p. 592. Microdus latiannulines Ashmead, 1902. In Slosson, Ent. News 13: 6.

Genus EARINUS Wesmael

Microdus subg. Earinus Wesmael, 1837. Nouv. Mem. Acad. Sci. Bruxelles 10: 8.

Type-species: Microdus nitidulus Nees. Desig. by Muesebeck and Walkley, 1951.

Diatmetus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 246.

Type-species: Bassus gloriatorius Panzer. Orig. desig.

Taxonomy: Shenefelt, 1970. Hym. Cat., part 6, p. 404-408 (cat. World spp.).

limitaris (Say). Que. and N. S. s. to Va., w. to B. C. and Calif. Host: *Grapholitha* sp., *Xylomyges dolosa* Grote.

Bassus limitaris Say, 1835. Boston Jour. Nat. Hist. 1: 250. 9.

zeirapherae Walley. Newfoundland w. to Alaska and B. C.; Va., Mich., N. Mex., Oreg., Calif. Host: Acleris hudsoniana (Wlkr.), Choristoneura rosaceana (Harr.), Rhyacionia adana Heinr., Zeiraphera griseana (Hbn.), Z. canadensis M. and F.

Earinus zeirapherae Walley, 1935. Canad. Ent. 67: 55. 9, d.

Genus MEGAGATHIS Kriechbaumer

Megagathis Kriechbaumer, 1894. Berlin, Ent. Ztschr. 39: 311. Type-species: Megagathis natalensis Kriechbaumer. Monotypic. Adiathlipsis Enderlein, 1920 (1918), Arch. f. Naturgesch. 84 (A) (11): 194.

Type-species: Adiathlipsis fasciata Enderlein, Orig. desig.

Taxonomy: Shenefelt, 1970. Hym. Cat., part 6, p. 419-422 (cat. World spp.). cressoni (Cameron), Tex.: Mexico, Cent. Amer., West Indies,

Agathis albitarsis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 63. 9, 8. Preocc. in Agathis by Spinola, 1840.

Agathis cressoni Cameron, 1887. Biol. Cent.-Amer., Hym., v. 1, p. 398. N. name for albitarsis Cresson.

Genus ZELOMORPHA Ashmead

Neaphulax Ashmead, 1900, U. S. Natl. Mus., Proc. 23: 119, Preocc. by M'Lachlan, 1871.

Type-species: Neophylax snyderi Ashmead. Orig. desig. Zelomorpha Ashmead, 1900. U. S. Natl. Mus., Proc. 11: 129.

Type-species: Zelomorpha arizonensis Ashmead. Orig. desig.

Ahngeria Kokujev, 1902. Ent. Obozr. 2: 6.

Type-species: Ahngeria transcaspia Kokujev. Monotypic.

Xanthomicrodus Cameron, 1904. Rec. Albany Mus. 1: 157.

Type-species: Xanthomicrodus iridipennis Cameron. Monotypic.

Lisitheria Cameron, 1904, Entomologist 37: 306.

Type-species: Lisitheria nigricornis Cameron. Monotypic.

Spilomicrodus Cameron, 1911. Timehri (3) 1: 323.

Type-species: Spilomicrodus nigriceps Cameron. Monotypic. Caenophylax Schulz, 1911. Zool. Ann. 4: 88. N. name for Neophylax Ashmead. Zelomorpha subg. Zelomorphidea Viereck, 1912. U. S. Natl. Mus., Proc. 42: 630.

Type-species: Zelomorpha (Zelomorphidea) melanota Viereck. Orig. desig.

Taxonomy: Shenefelt, 1970. Hym. Cat., part 6, p. 425-427 (cat. World spp.). arizonensis Ashmead, Tex., N. Mex., Ariz., Calif.; Baja Calif., Mexico. Zelomorpha arizonensis Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 129.

fascipennis (Cresson). Fla.; Cuba. Microdus fascipennis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 65. 9.

SURFAMILY OPHINAE

Most of the recent literature on the Opiinae has been published by Fischer and the arrangement of the subfamily presented here follows that of Fischer (1973). All species are solitary endoparasites of dipterous larvae with pupation occurring in the host puparium. Records of lepidopterous and coleopterous hosts are doubtful and need to be confirmed.

Revision: Gahan, 1915, U. S. Natl. Mus., Proc. 49: 63-95 (No. Amer. spp.). —Fischer, 1964. Polskie Pismo Ent. 34: 197-530 (No. Amer. spp.). - Fischer, 1965. Polskie Pismo Ent. 35: 3-212 (No. Amer. spp.).

Taxonomy: Fischer, 1971. Index World Opiinae, 189 p. (cat. World spp.). - Fischer, 1973. Das Tierreich, lief. 91, p. 55-61 (keys to World tribes and genera).

TRIBE ADEMONINI

Taxonomy: Fischer, 1973. Das Tierreich, lief 91, p. 59-60 (key to genera).

Genus ADEMON Haliday

Ademon Haliday, 1833. Ent. Mag. 1: 266.

Type-species: Ademon descrescens Haliday. Monotypic. Lytacra Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 258.

Type-species: Lytacra stygia Foerster. Orig. desig.

Giardinaia Destefani Perez, 1902. Zool. Jahrb., Abt. f. Syst. 15: 631.

Type-species: Giardinaia urinator Destefani Perez. Monotypic.

Analostania Viereck, 1916. Biol. Soc. Wash., Proc. 29: 165.

Type-species: Analostania tenuipes Viereck. Orig. desig.

Species of this genus are parasites of aquatic leaf mining Diptera and are apparently restricted to the genus Hydrellia.

Revision: Fischer, 1965. Polskie Pismo Ent. 35: 197-208 (No. Amer. spp.).

Taxonomy: Fischer, 1971. Index World Opiinae, p. 18-19 (cat. World spp.).

Genus DORYCTOBRACON Enderlein

Doryctobracon Enderlein, 1920 (1918). Arch. f. Naturgesch. 84 (A) (11): 144.

Type-species: Doryctobracon conjugens Enderlein. Orig. desig.

200

Parachasma Fischer, 1967. Beitr. Neotr. Fauna 5: 7. Type-species: Opius zeteki Muesebeck, Orig. desig.

Taxonomy: Fischer, 1967, Beitr, Neotr, Fauna 5: 7-11 (in Parachasma). - Fischer, 1971. Index World Opiinae, p. 36-38 (cat. World spp., in Parachasma).

anastrephilum (Marsh), n. comb. Fla. Host: Anastrepha interrupta Stone, A. suspensa (Loew), Parachasma anastrephilum Marsh, 1970. Fla. Ent. 53: 31. 9, 8.

cereus (Gahan), n. comb. Fla.; Mexico, Panama, Trinidad, Brazil, Introduced from Trinidad, Host: Anastrepha suspensa (Loew).

Opius cereus Gahan, 1919, Ent. Soc. Wash., Proc. 21: 169. d.

TRIBE OPIINI

Taxonomy: Fischer, 1973. Das Tierreich, lief, 91, p. 60 (key to subtribes and genera).

SUBTRIBE BIOSTERINA

Genus BIOSTERES Foerster

Biosteres Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 259.

Type-species: Bracon carbonarius Nees, Orig. desig.

Zetetes Foerster, 1862, Naturh, Ver. Rheinlande, Verh. 19: 258, Preocc. by Cabanis, 1860. Type-species: Zetetes ultor Foerster. Orig. desig. Chilotrichia Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 258.

Type-species: Opius blandus Haliday, Orig. desig.

Stenospilus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 259.

Type-species: Stenospilus vagator Foerster, Orig. desig.

Rhabdospilus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 259.

Type-species: Opius placidus Haliday, Orig. desig.

Opiellus Ashmead, 1900, Canad. Ent. 32: 368. N. name for Zeiztes Foerster. Celiestella Cameron, 1903, Ztschr. Svst. Hvm. Dipt. 3: 343.

Type-species: Celiestella testaceipes Cameron, Monotypic,

Diachasmimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 44: 641. Type-species: Diachasmimorpha comperei Viereck, Orig. desig.

Revision: Fischer, 1965. Polskie Pismo Ent. 35: 115-155 (N. Amer. spp. as subgenus of Opius).

Taxonomy: Fischer, 1967. Abt. Zool. Bot. Landsmus. Joanneum Graz, Mitt. 26: 159 (resurrection to generic rank). - Fischer, 1971, Index World Opiinae, p. 19-32 (cat. World spp.). - Fischer, 1973. Das Tierreich, lief, 91, p. 485-486 (synonymy, subgenera). aietes Fischer, Oreg.

Biosteres aietes Fischer, 1970. Polskie Pismo Ent. 40: 763. 9.

anthomyiae (Ashmead). Conn., N. Y., N. J., Mich., Ill., Minn., Colo., Idaho. Host: Pegomya bicolor (Wied.), P. hyoscyami hyoscyami (Panz.).

Opius anthomyiae Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 654. 9.

Opius (Desmiostoma) novaeangliae Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 183. ♀.

SUBTRIBE OPIINA

Genus EURYTENES Foerster

Eurytenes Foerster, 1862. Naturh, Ver. Rheinlande, Verh. 19: 259. Type-species: Opius abnormis Wesmael. Orig. desig.

Taxonomy: Fischer, 1965, Polskie Pismo Ent. 35: 165-167.

abnormis (Wesmael). S. C., Ont., Minn., Sask., N. Dak., Mont.; Europe. Opius abnormis Wesmael, 1835, Nouv. Mem. Acad. Sci. Bruxelles 9: 117. 9. 8.

Genus OPIUS Wesmael

Opius Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 115.

Type-species; Opius pallipes Wesmael, Desig, by Muesebeck and Walkley, 1951.

Psyttalia Walker, 1860, Ann. and Mag. Nat. Hist. (3) 5: 311. Type-species: Psyttalia testacea Walker. Monotypic.

Xynobius Foerster, 1862, Naturh, Ver. Rheinlande, Verh. 19: 235.

Type-species: Xynobius pallipes Foerster. Orig. desig.

Holconotus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 259. Preocc. by Agassiz, 1854.

Type-species: Opius comatus Wesmael, Orig. desig.

Apodesmia Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 259.

Type-species: Apodesmia taeniata Foerster. Orig. desig. Allotypus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 259.

Type-species: Opius irregularis Wesmael. Orig. desig.

Phaedrotoma Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260.

Type-species: Phaedrotoma depeculator Foerster, Orig. desig.

Eutrichopsis Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260.

Type-species: Eutrichopsis munda Foerster. Orig. desig.

Therobolus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260. Type-species: Opius ruficeps Wesmael. Orig. desig.

Hypocynodus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260.

Type-species: Opius crassipes Wesmael. Orig. desig. Cryptonastes Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260.

Type-species: Cryptonastes tersus Foerster. Orig. desig.

Hupolabis Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260.

Type-species: Opius pallipes Wesmael. Orig. desig.

Biophthora Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260. Type-species: Opius bajulus Haliday. Orig. desig.

Nosopoea Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 260. Type-species: Opius cinqulatus Wesmael. Orig. desig. Utetes Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 261.

Type-species: Opius testaceus Wesmael. Orig. desig.

Misophthora Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 266. Type-species: Misophthora laevigata Foerster. Orig. desig.

Aclisis Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 267. Type-species: Aclisis isomera Foerster. Orig. desig.

Aulonotus Ashmead, 1900, Canad. Ent. 32: 368. N. name for Holconotus Foerster.

Mesostoma Cameron, 1905, Tijdschr. Ent. 48: 42.

Type-species: Mesostoma testaceipes Cameron. Monotypic. Tolbia Cameron, 1907. Linn. Soc. London, Trans. (2) 12: 84.

Type-species: Tolbia scaevolae Cameron. Monotypic.

Brachycentrus Szepligeti, 1907. Mus. Natl. Hist. Nat. Paris, Bul. 1907: 35. Preocc. by Curtis, 1834.

Type-species: Brachycentrus minutus Szepligeti. Monotypic.

Hexaulax Cameron, 1910. Soc. Ent. 25: 25.

Type-species: Hexaulax ruficeps Cameron. Monotypic.

Baeocentrum Schulz, 1911 (1909). Zool. Ann. 4: 65. N. name for Brachycentrus Szepligeti. Eristernaulax Viereck, 1913. U. S. Natl. Mus., Proc. 46: 362.

Type-species: Eristernaulax leucotaenia Viereck. Orig. desig.

Neopius Gahan, 1917. U. S. Natl. Mus., Proc. 53: 203.

Type-species: Neopius carinaticeps Gahan. Orig. desig.

Fischer (1973) has recently established several subgenera for the genus Opius. However, since this was done only for the Palaearctic groups, I was unable to assign the Nearctic species to their proper subgenera.

Revision: Fischer, 1964. Polskie Pismo Ent. 34: 197-530 (No. Amer. spp.). - Fischer, 1965. Polskie Pismo Ent. 35: 3-212 (No. Amer. spp.).

Taxonomy: Fischer, 1971. Index World Opiinae, p. 38-123 (cat. World spp.). - Fischer, 1973. Das Tierreich, lief. 91, p. 67-71 (subgenera). - Marsh, 1974. Ent. Soc. Wash., Proc. 76: 286 (synonymy).

UNPLACED TAXON OF OPIINAE

Trigonospilus hopkinsi Ashmead, 1901. U. S. Natl. Mus., Proc. 23: 134. Type lost, exact generic placement uncertain.

SUBFAMILY ALYSIINAE

This subfamily, sometimes called the "exodont braconids," is characterized by widely spaced mandibles with teeth that curve outward and do not touch when closed. The hosts are dipterous larvae with pupation taking place within the host puparium. Most North American genera and species are unstudied.

Taxonomy: Griffiths, 1964. Beitr. z. Ent. 14: 830-832. —Shenefelt, 1974. Hym. Cat., part 11, p. 937-1113 (cat. World spp.).

TRIBE DACNUSINI

Griffiths (see references below) has studied the European species but also made extensive revisions of the World genera. Most of the described North American species are placed in the genera below according to his concepts

Hosts are restricted to the dipterous family Agromyzidae.

Taxonomy: Griffiths, 1964. Beitr. z. Ent. 14: 823-913 (includes diagnoses and key to World genera). —Griffiths, 1966. Beitr. z. Ent. 16: 551-605, 775-951. —Griffiths, 1967. Beitr. z. Ent. 17: 654-696. —Griffiths, 1968. Beitr. z. Ent. 18: 5-152.

Biology: Griffiths, 1964. Beitr. z. Ent. 14: 823-913. —Griffiths, 1966. Beitr. z. Ent. 16: 551-605, 775-951. —Griffiths, 1967. Beitr. z. Ent. 17: 654-696. —Griffiths, 1968. Beitr. z. Ent. 18: 5-152.

Genus GLYPHOGASTER Muesebeck and Walkley

Glyphogaster Muesebeck and Walkley, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2, p. 148.

Type-species: Acrobela tachinae Ashmead. Orig. desig.

tachinae (Ashmead), Maine, N. H., Conn.

Acrobela tachinae Ashmead, 1898 (1897). Ent. Soc. Wash., Proc. 4: 170. 9.

Genus HOPLITALYSIA Ashmead

Hoplitalysia Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 105.

Type-species: Hoplitalysia slossonae Ashmead, Orig. desig.

slossonae Ashmead. W. Va., Fla., Tex.

Hoplitalysia slossonae Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 105.

Genus IDIASTA Foerster

Idiasta Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 265.

Type-species: Alysia maritima Haliday. Orig. desig.

Rhacalysia Cameron, 1910. Wien. Ent. Ztg. 29: 9.

Type-species: Rhacalysia rufobalteata Cameron. Monotypic.

Taxonomy: Konigsmann, 1960. Beitr. z. Ent. 10: 624-654. —Shenefelt, 1974. Hym. Cat., part 11, p. 993-995 (cat. World spp.).

longicornis (Provancher). Ont.

Rhopalophorus longicornis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 129. 2.

Alysia completa Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 147. 9.

macrocera Ashmead. N. H., Ont., Mich., Colo., B. C.

Idiasta macrocera Ashmead, 1891. Canad. Ent. 23: 5. 8.

provancheri (Dalla Torre). Que.

Alysia nigriceps Provancher, 1881. Nat. Canad. 12: 203.

Precc. by Cresson, 1865. Alysia provancheri Dalla Torre, 1898. Cat. Hym., v. 4, p. 48. N. name for nigriceps Provancher.

Genus OENONOGASTRA Ashmead

Oenonogastra Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 105.

Type-species: Mesocrina microrhopalae Ashmead. Orig. desig.

microrhopalae (Ashmead). N. Y. s. to Fla., w. to Iowa and Tex. Host: Calycomyza ipomaeae (Frost). The record of Microrhopala xerene (Newn.) (Coleoptera) as a host is undoubtedly an error.

Mesocrina microrhopalae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 217. d.

Taxonomy: Fischer, 1967. Naturhist. Mus. Wien, Ann. 70: 128-130 (redescr.).

Genus ORTHOSTIGMA Ratzeburg

Orthostigma Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 53.

Type-species: Aphidius flavipes Ratzeburg. Monotypic. Ischnocarpa Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 268.

Type-species: Alysia pumila Nees. Orig. desig.

Delocarpa Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 268.

arpa Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 26 Type-species: Delocarpa praedo Foerster. Orig. desig.

Revision: Fischer, 1969. Acta Ent. Mus. Natl. Pragae 38: 82-90 (No. Amer. spp.).

Taxonomy: Shenefelt, 1974. Hym. Cat., part 11, p. 997-1001 (cat. World spp.).

crassinervis (Fischer), n. comb. Mo.

Aspilota crassinervis Fischer, 1969. Acta Ent. Mus. Natl. Pragae 38: 94. d. dvari Fischer. B. C.

SUBFAMILY SIGALPHINAE

This is a small group of genera that have been previously included in the subfamily Cheloninae because of the first three abdominal terga which form a solid carapace. However, the articulation between the first two abdominal terga is movable in the Sigalphinae. The biology is not known in detail but hosts are apparently lepidopterous larvae.

Taxonomy: De Saeger, 1948. Explor. Parc Natl. Albert, Mission G. F. de Witte, fasc. 53, p. 63-64 (key to genera). — Tobias, 1967, Ent. Obozr, 46: 659, — Shenefelt, 1973, Hym. Cat., part 10, p. 931-935 (cat. World spp.).

Genus SIGALPHUS Latreille

Sigalphus Latreille, 1802. Hist. Nat. Crust. Ins., v. 3, p. 327.

Type-species: Ichneumon irrorator Fabricius, Desig, by Viereck, 1914.

Sphaeropyx Illiger, 1807. Mag. Insektenk. 6: 192.

Type-species: Ichneumon irrorator Fabricius. Monotypic.

Type-species: Ichneumon irrorator Fabricius. Desig. by Westwood. 1839.

Rhytidogaster Agassiz, 1846. Nomencl. Zool. Index Univ., p. 327. Emend.

bicolor (Cresson), Que, s. to Fla., w. to Man., Okla., and Miss. Host: Acronicta sp., A. clarescens Gn.

Rhytigaster bicolor Cresson, 1880. Amer. Ent. Soc., Trans. 8: Proc. p. xvii. 9, 8.

Biology: Cushman, 1913. Ent. Soc. Wash., Proc. 15: 157-160.

SUBFAMILY CHELONINAE

This is a distinctive group of braconids characterized by the rigid abdominal carapace formed by the fusion of the first three terga. The Triaspidinae have been associated with the Cheloninae on the basis of their similar abdominal structure, but their biologies, larval morphology and wing venation are all very different.

Species of the Cheloninae are typical egg-larval parasites of Lepidoptera, the adult ovipositing in the host egg but the parasite larva completing its development in the host larva.

Taxonomy: Tobias, 1967. Ent. Obozr. 46: 657. —Capek, 1970. Canad. Ent. 102: 859. —Shenefelt, 1973. Hym. Cat., part 10, p. 813-931 (cat. World spp.).

Genus ASCOGASTER Wesmael

Ascogaster Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 226. Type-species: Ascogaster instabilis Wesmael. Desig. by Foerster, 1862. Cascogaster Baker, 1926. Phil. Jour. Sci. 31: 487.

Type-species: Cascogaster fullawayi Baker, Orig. desig.

Taxonomy: Shenefelt, 1973. Hym. Cat., part 10, p. 814-838 (cat. World spp.).

Chelonus (Microchelonus) walkleyae McComb, 1968 (1967). Md. Agr. Expt. Sta., Bul. A-149, p. 124. 9, 8.

NOMINA NUDA IN CHELONUS PANZER

Chelonus biannularis Ashmead, 1900 (1899). In Smith, Ins. of N. J., p. 591. Chelonus corrugatus Harris, 1862. In Cresson, Ent. Soc. Phila., Proc. 1: 211. Chelonus dislocatus Harris, 1862. In Cresson, Ent. Soc. Phila., Proc. 1: 211.

Genus PHANEROTOMA Wesmael

Phanerotoma Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 165.

Type-species: Chelonus dentatus Panzer. Desig. by Westwood, 1839.
Phanerogaster Wesmael, 1838. Nouv. Mem. Acad. Sci. Bruxelles 11: 165. Emend.
Phaenotoma Ashmead, 1894. Linn. Soc. London, Jour., Zool. 25: 123. Misspelling.
Sulydus du Buysson, 1897. Soc. Ent. France, Ann. 66: 354.

Type-species: Sulydus marshalli du Buysson. Monotypic. Neophanerotoma Szepligeti, 1908. Notes Leyden Mus. 29: 227.

Type-species: Phanerotoma orientalis Szepligeti. Desig. by Viereck, 1914.

Phanerotomina Shestakov, 1930. Ent. Obozr. 24: 100.

Type-species: Phanerotomina gussakovskii Shestakov. Orig. desig.

Taxonomy: Shenefelt, 1973. Hym. Cat., part 10, p. 909-928 (cat. World spp.).

erythrocephala Rohwer. Ga., Wis., Mont., Colo., N. Mex., Calif. Host: Hedulia injectiva Heinr., Laspeyresia piperana (Kearf.), L. toreuta (Grote).

Phanerotoma erythrocephala Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 166. Q, d. fasciata Provancher. Newfoundland, Ont. s. to Fla. and Tex., w. to N. W. T., B. C. and Oreg. Host: Acrobasis caryae Grote, Grapholitha interstinctana (Clem.), G. molesta (Busck),

G. packardi (Zell.), L'aspeyresia an'aranjada Miller, L. caryana (Fitch), L. ingens Heinr., L. nigricana (Steph.), L. pomonella (L.), Melissopus latiferreanus (Wlsm.). Prior to 1951, this species was frequently misidentified as tibialis (Haldeman).

Phanerotoma fasciata Provancher, 1881. Nat. Canad. 12: 200. 9.

Biology: Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265, p. 40-41.

flavitestacea Fischer. Calif.; Israel, Yugoslovia, North Africa, Spain. Introduced from Israel. Host: Ectomyelois ceratoniae (Zell.), Paramyelois transitella (Wlkr.).

Phanerotoma flavitestacea Fischer, 1959. Acta Mus. Maced. Sci. Nat. 6: 18. 9, 8.

Biology: Biliotti and Daumal, 1971. Zool. Ecol. Anim., Ann. 1: 379-394.

franklini Gahan. N. S. and Que. s. to Fla., w. to Ill. and Tex.; Calif. Host: Acrobasis vaccinii Riley.

Phanerotoma franklini Gahan, 1917. U. S. Natl. Mus., Proc. 53: 200. 9, 8.

grapholithae Muesebeck. Conn., N. Y., N. J., Md., Va.; Japan, Korea, China. Introduced from Japan. Host: Grapholitha molesta (Busck), G. prunivora (Walsh), Laspeyresia pomonella (L.).

Phanerotoma grapholithae Muesebeck, 1933. Ent. Soc. Wash., Proc. 35: 50. 9, d.

inopinata Caltagirone. Calif.; Mexico, Baja Calif. Host: Paramyelois transitella (Wlkr.).

Phanerotoma inopinata Caltagirone, 1965. Pan-Pacific Ent. 41: 17. 9, 8.

laspeyresiae Rohwer. Mich., Mont., Idaho., B. C., Oreg., Calif. Host: Hedulia injectiva Heinr., Laspeyresia miscitata Heinr., L. piperana (Kearf.), L. toreuta (Grote). Phonerotoma laspeyresia(!) Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 230. d.

longicauda Walley. N. S. and Que. s. to Fla., w. to Alta. and Tex.; Ariz., Calif.; Baja Calif. Host: Carposina sp.

Phanerotoma longicauda Walley, 1951, Canad. Ent. 83: 306. 9, 8.

planifrons (Nees). Calif.; Europe, North Africa, West and Central Asia, Siberia, Korea, Japan. Introduced from Hungary. Host: Etiella zinckenella (Treit.), Grapholitha molesta (Busck).

Sigalphus planifrons Nees, 1816 (1813). Gesell. Naturf. Freunde Berlin, Mag. 7: 259.

Taxonomy: Watanabe, 1940. Insecta Matsumurana 14: 88-89.

Biology: Parker, 1951. U. S. Dept. Agr., Tech. Bul. 1036, p. 12-16. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 121.

recurvariae Cushman. Conn., Pa., Fla., Ont., Mich., Wis. Host: Recurvaria nanella (Hbn.), Spilonota ocellana (D. and S.).

Phanerotoma recurvariae Cushman, 1914. Ent. Soc. Wash., Proc. 16: 78. 9, 3.

Biology: Sadava and Miller, 1967, Canad. Ent. 99: 436-442.

rhyacioniae Cushman. Md., Va., Ark., La., Miss. Host: Rhyacionia frustrana (Comst.).

Phanerotoma rhyacioniae Cushman, 1927. Jour. Agr. Res. 34: 740. 9, 8.

thapsina Walley. Fla., Tex., Ariz., Calif.; Mexico, Baja Calif.

Phanerotoma thapsina Walley, 1951. Canad. Ent. 83: 305. 9, 8.

tibialis (Haldeman). Que., Maine, Conn., Pa., Del., Fla., Ont., Mich., Tenn., Ala., Wis., Ill., Minn., Ark., Kans., Tex.; Antigua. Host: Acrobasis betulella Hulst, A. caryae Grote, A. caryivorella Rag., A. rubrifasciella Pack., A. sylviella Ely, Tetralopha asperatella (Clem.).

Sigalphus tibialis Haldeman, 1849. Acad. Nat. Sci. Phila., Proc. 4: 203. 9.

Phanerotoma noctivaga Marshall, 1885. Roy. Ent. Soc. London, Trans. 1885: 112. 9, 8.

Biology: Balduf, 1968. Ent. Soc. Amer., Ann. 61: 466-467.

toreutae Caltagirone. Mich., Wis. Host: Laspeyresia toreuta (Grote).

Phanerotoma toreutae Caltagirone, 1967, Pan-Pacific Ent. 43: 126. 9, 8.

Biology: Harbo and Kraft, 1969. Ent. Soc. Amer., Ann. 62: 214-220.

SUBFAMILY ADELIINAE

Genus ADELIUS Haliday

Adelius Haliday, 1833. Ent. Mag. 1: 262.

Type-species: Adelius subfasciatus Haliday. Monotypic.

Acaelius Haliday, 1834. Ent. Mag. 2: 231. Emend.

Acoelius Haliday, 1834. Ent. Mag. 2: 539. Emend.

Pleiomerus Wesmael. 1837. Nouv. Mem. Acad. Sci. Bruxelles 10: 67.
Type-species: Adelius subfasciatus Haliday. Monotypic.

Anomopterus Rohwer, 1914. Psyche 21: 80.

Type-species: Anomopterus fasciipennis Rohwer. Orig. desig.

Myriola Shestakov, 1932. Zool. Anz. 99: 259.

Type-species: Myriola gussakovskii Shestakov. Monotypic.

This group, which is distinctive both morphologically and biologically, has been included in the Microgastrinae in the past. Recent workers (Capek, 1965; Nixon, 1965; Tobias, 1967) have

proposed a separate subfamily for Adelius, and a few related genera, which has affinities with the Cheloninae as well as the Microgastrinae. Hosts are larvae of leaf mining microlepidoptera.

Revision: Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 12-14 (No. Amer. spp.). —Telenga, 1955. Fauna U. S. S. R., v. 5, n. 4, p. 15-19 (some Eur. spp.).

Taxonomy: Capek, 1965. 12th Internatl. Cong. Ent., London, Proc. 1964, p. 98. —Nixon, 1965.
 Brit. Mus. (Nat. Hist.) Ent., Bul., Sup. 2, p. 8-10. —Tobias, 1967. Ent. Obozr. 46: 658.
 —Shenefelt, 1973. Hym. Cat., part 7, p. 670-675 (cat. World spp.).

Adelius coloradensis Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 14. d.

fasciipennis (Rohwer). Va., Wis. Host: Ectoedemia phleophaga Busck.

Anomopterus fasciipennis Rohwer, 1914. Psyche 21: 80. 9, 8.

nigripectus Muesebeck. Ind. Host: Leaf miner in poplar.

Adelius nigripectus Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 13. d.

SUBFAMILY MICROGASTRINAE

All species of this, the largest subfamily of the Braconidae, are internal parasites of lepidopterous larvae. Some of the most important species in biological control belong to this group.

Revision: Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 6-76 (No. Amer. spp.).

Taxonomy: Nixon, 1965. Brit. Mus. (Nat. Hist.) Ent., Bul., Sup. 2, p. 1-13. —Tobias, 1967. Ent. Obozr. 46: 657. —Capek, 1970. Canad. Ent. 102: 856-858.

TRIBE MICROGASTRINI

Revision: Nixon, 1965. Brit. Mus. (Nat. Hist.) Ent., Bul., Sup. 2, p. 6-284 (key World genera).

Genus APANTELES Foerster

Apanteles Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 245.

Type-species: Microgaster obscura Nees. Orig. desig.

Cotesia Cameron, 1891. Manchester Lit. and Phil. Soc., Mem. and Proc. (4) 4: 185.

Type-species: Cotesia flavipes Cameron, Monotypic,

Pseudapanteles Ashmead, 1898 (1897). Ent. Soc. Wash., Proc. 4: 166.

Type-species: Pseudapanteles annulicornis Ashmead. Desig. by Viereck, 1911.

Protapanteles Ashmead, 1898 (1897). Ent. Soc. Wash., Proc. 4: 166.

Type-species: Protapanteles ephyrae Ashmead. Desig. by Viereck, 1914.

Urogaster Ashmead, 1898 (1897), Ent. Soc. Wash., Proc. 4: 166.

Type-species: Urogaster vulgaris Ashmead. Desig. by Viereck, 1914.

Parapanteles Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 131.

Type-species: Apanteles aletiae Riley, Orig. desig.

Glyptapanteles Ashmead, 1904. U. S. Natl. Mus., Proc. 28: 147.

Type-species: Glyptapanteles manilae Ashmead. Monotypic.

Cryptapanteles Viereck, 1910. Ent. Soc. Wash., Proc. 11: 209.

Type-species: Cryptapanteles rileyanus Viereck. Orig. desig. Xestapanteles Cameron, 1910 (1909), Ztschr. f. Naturw. 81: 447.

Type-species: Xestapanteles latiannulatus Cameron. Monotypic.

Apanteles subg. Dolichogenidea Viereck, 1911. U. S. Natl. Mus., Proc. 40: 173.

Type-species: Apanteles (Dolichogenidea) banksi Viereck. Orig. desig.

Stenopleura Viereck, 1911. U. S. Natl. Mus., Proc. 40: 187.

Type-species: Apanteles sesamiae Cameron. Orig. desig.

Allapanteles Brethes, 1915. Buenos Aires Mus. Nac. de Hist. Nat., An. 27: 404.

Type-species: Allapanteles cecidiptae Brethes. Monotypic.

Revision: Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 483-576 (No. Amer. spp.). —Wilkinson, 1928. Bul. Ent. Res. 19: 79-146 (Indo-Austral. spp.). —Wilkinson, 1932. Roy. Ent. Soc. London, Trans. 80: 301-344 (Afr. spp.). —Telenga, 1955. Fauna U. S. S. R., v. 5, n. 4, p. 21-147 (Eur. spp.).

Taxonomy: Nixon, 1965. Brit. Mus. (Nat. Hist.) Ent., Bul., Sup. 2, p. 17-25 (key to spp. groups). —Shenefelt, 1972. Hym. Cat., part 7, p. 429-668 (cat. World spp.).

absonus Muesebeck. Newfoundland, Ont., Maine, Wis., Minn., Man., Alta., Mont., Colo., N. Mex., Idaho, Utah, B. C., Wash., Oreg. Host: Acleris variana (Fern.), Archippus packardianus (Fern.), Argyrotaenia dorsalana (Dyar), Choristoneura fumiferana (Clem.), C. occidentalis Freem., Dioryctria reniculella (Grote), Epinotia nanana (Treits.), Griselda radicana Heinr., Taniva albolineana (Kearf.), Zeiraphera canadensis M. and F., Z. griseana (Hbn.), Z. fortunana (Kearf.), Z. improbana (Wlkr.). Apanteles absonus Muesebeck, 1965. Ent. News 76: 71. 9, 3.

Taxonomy: Mason, 1974. Canad. Ent. 106: 1098-1100.

acaudus (Provancher). Maine, Mass., R. I., Conn., N. Y., Va., Ont., Mich., Wis. Host: Hydria prunivorata (Ferg.), H. undulata (L.).

Microgaster acaudus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 142. 9,

Apanteles hydriae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 561. 9. 8.

aciculatus (Ashmead). Mo., Tex.; West Indies, Cent. Amer.

Urogaster aciculatus Ashmead, 1900. Roy. Ent. Soc. London, Trans. 1900: 289. d.

Pseudapanteles sanctivincenti Ashmead, 1900. Roy. Ent. Soc. London, Trans. 1900: 291. 9, S. Preocc. by Ashmead, 1900: 279.

Apanteles thoracicus Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 534. N. name for sanctivincenti Ashmead, 1900: 291.

acrobasidis Muesebeck. Md., Fla., Miss. Host: Acrobasis caryae Grote (?), Gretchena bolliana (Sling.).

Apanteles acrobasidis Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 509. 9.

acronyctae (Riley). N. H. s. to N. J., w. to Ont. and Mo.; Colo., Calif. Host: Acronicta dactylina (Grote), A. leporina (L.) (?), A. lepusculina Gn., A. oblinita (Smith), Merolonche lupini (Grote), Orgyia leucostigma (Smith) (?).

Microgaster acronyctae Riley, 1870. Ins. Mo., Ann. Rpt. 2: 120.

Apanteles acronyctae Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 312. d.

Apanteles orgyiae Ashmead, 1893. Ohio Expt. Sta., Bul. 1: 159. 9.

agricola Viereck. Conn., N. C.

Apanteles (Protapanteles) agricola Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 192. 9.

alaskensis (Ashmead). Mich., B. C., Calif., Alaska. Host: Gabriola dyari Tay., Oporinia autumnata (Gn.).

Protapanteles alaskensis Ashmead, 1902, Wash, Acad. Sci., Proc. 4: 247, 9, 8.

aletiae Riley. Fla., Ala.; West Indies. Host: Alabama argillacea (Hbn.), Gonodonta nutrix (Cram.).

Apanteles aletiae Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 296, 298, 306. 9, 8.

algonquinorum Viereck. Conn.

Apanteles (Protapanteles) algonquinorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 196.

alticola (Ashmead). N. B., Maine, N. H., Colo., Utah, Idaho, Oreg., Calif., Alaska. Host: Amathes collaris (G. and R.), Diarsia rosaria (Grote), Euxoa ochrogaster (Gn.). Protapauteles alticola Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 248. 3.

alypiae Muesebeck, Conn., N. Y. Host: Alupia octomaculata (F.),

Apanteles alypiae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 18. 9, 8.

americanus (Lepeletier). Fla., Miss., Okla., Tex., Ariz. Host: Erinnyis ello (L.), Manduca sp. Microgaster americanus Lepeletier, 1825. Encycl. Meth. Ins. 10: 42. 9, 3. Microgaster flaviventris Cresson, 1865. Ent. Soc. Phila., Proc. 4: 66. 9. Apanteles mexicanus Ashmead. 1895. Calif. Acad. Sci., Proc. 5: 545. 9. 3.

ammalonis Muesebeck. N. J. Host: Cycnia tenera Hbn.

Apanteles ammalonis Muesebeck, 1926. U. S. Natl. Mus., Proc. 69 (7): 8. 9, 8.

angaleti Muesebeck. La.(?), Tex.(?); India, Sumatra. Liberated in La. and Tex. but not established. Introduced from India. Host: Pectinophora gossypiella (Saund.). Apanteles angaleti Muesebeck, 1954. Lab. Zool. Gen. Agr. Portici, Bol. 33: 61. 9, 5.

anisotae Muesebeck, N. B. s. to Md.; Ont. Host: Anisota senatoria (Smith), A. stigma (F.), A. s. fuscosa Ferg., Dryocampa rubicunda (F.).

Apanteles anisotae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 555. 9.

argynnidis Riley. Mass., N. Y., N. J., D. C., W. Va., Ky., Ill., Tex. Host: Epargyreus clarus (Cram.), Erynnis tristis tatius (Edw.), E. zarucco funeralis (S. and B.), Speyeria cybele (F.).

Apanteles argynnidis Riley, 1889. In Scudder, Butterflies East, U. S., p. 1904. Q.

aristoteliae Viereck. N. B. s. to Pa., w. to Ont., Wash., and Calif.; La., Ariz. Host: Ancylis comptana fragaria (W. and R.), Argyrotaenia citrana (Fern.), Aristotelia fungivorella (Chamb.), Aroga trialbamaculella (Chamb.), Choristoneura funiferana (Clem.), Dioryctria reniculella (Grote), Filatima persicaeella (Murtf.), Gelechia sp. Apanteles (Apanteles) aristoteliae Viereck, 1912. U. S. Natl. Mus., Proc. 42: 613. 3. Apanteles (Apanteles) alechiae Viereck, 1912. U. S. Natl. Mus., Proc. 42: 615. 9.

Biology: Basinger, 1938, Hilgardia 11: 661-663,

atalantae (Packard). Mass., Pa., N. J., W. Va., Ont., Mich., Wis., Iowa, Mo., Minn., N. Dak., Sask., Alta., Colo., Tex. Host: Nymphalis antiopa (L.), N. milberti (Godt.), Polygonia sp., Vanessa atalanta (L.).

Microgaster atalantae Packard, 1881 (1880). Boston Soc. Nat. Hist., Proc. 21: 28. 9, 8.

autographae Muesebeck. Newfoundland, Que., Md., Va., S. C., Ga., Fla., Mich., La., S. Dak., Tex., Colo., Oreg. Host: Autographa sp., Autoplusia egena (Gn.), Pseudaletia unipuncta (Haw.), Pseudoplusia includens (Wlkr.), Rachiplusia ou (Gn.), Spodoptera frugiperda (Sm.), Trichoplusia ni (Hbn.).

Apanteles autographae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 547. 9.

baldufi Muesebeck. N. Y., N. C., Ont., Mich., Minn. Host: Acrobasis betulella Hulst, A. rubrifasciella Pack., A. secundella Ely.

Biology: Balduf, 1968. Ent. Soc. Amer., Ann. 61: 464-465.

banksi Viereck. N. Y., Pa., Md., D. C., Va., Mich., Minn.

Apanteles (Dolichogenidea) banksi Viereck, 1911. U. S. Natl. Mus., Proc. 40: 173. 2.

bedelliae Viereck. Conn. s. to Va., w. to Ont., Kans., and La.; Utah, Ariz., Oreg., Calif. Host:
Anomis erosa Hbn., Bedellia minor Busck, В. somnulentella (Zell.), Coleotechnites
thujaeella Kearf., Cosmopterix sp., Lithocolletis tremuloidiella Braun, Paraleucoptera
albella (Chamb.).

Apanteles (Protapanteles) bedelliae, Viereck. 1911. U. S. Natl. Mus., Proc. 40: 174. 9, 8.

betheli Viereck. Colo. Host: Argyresthia sp.(?).

Apanteles (Apanteles) betheli Viereck, 1910. U. S. Natl. Mus., Proc. 39: 402. 9, 8.

bucculatricis Muesebeck. Calif. Host: Bucculatrix albertiella Busck, B. thurberiella (Busck).

Apanteles bucculatricis Muesebeck, 1921, U. S. Natl. Mus., Proc. 58: 502. 9, 3.

bushnelli Muesebeck. N. Č., Fla., Iowa, S. Dak., Nebr., Mont., Calif. Host: Dioryctria abietella (D. and S.), D. clariorantis (Wlkr.), D. disclusa Heinr., Rhyacionia bushnelli (Busck), R. pasadenana (Kearf.).

Apanteles bushnelli Muesebeck, 1933. Ent. Soc. Wash., Proc. 35: 196. 9, 8.

caberatae Muesebeck, Oreg., Calif. Host; Sabulodes caberata (Gn.).

Apanteles caberatae Muesebeck, 1956. Pan-Pacific Ent. 32: 26. 9, 8.

cacoeciae Riley. U. S., Ont., Que. Host: Acrobasis caryae Grote, Archips argyrospilus (Wlkr.), A. cerasivoranus (Fitch), A. semiferanus (Wlkr.), Epiblema scudderianum (Clem.), Epinotia sp., Exartema valdanum McD., Gnorimoschema gallaesolidaginis (Riley), Grapholitha molesta (Busck), Sciaphila duplex (Wlsm.).

Apanteles cacoeciae Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 305. 9, 8.

Pseudapanteles gallaediploppi Ashmead, 1899. In Smith, Ins. of N. J., p. 593. Nom. nud.

caffreyi Muesebeck. Tex., Ariz.; Mexico, West Indies, Cent. Amer., Colombia.

Apanteles caffreyi Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 540. 9, 8.

californicus Muesebeck, Que., Ont., Alta., B. C., Idaho, Oreg., Calif. Host: Coleotechnites sp., C. gibsonella Kaerf., C. milleri (Busck), Epinotia meritana Heinr., Eucosma bobana Kearf. Apanteles californicus Muesebeck, 1921. U. S. Natl. Mus., Proc. SS, 511. Q. 6.

Biology: Telford, 1961. Jour. Econ. Ent. 54: 347-355. —Stark, 1961. Canad. Jour. Zool. 39: 894. canarsiae Ashmead. Conn. s. to Ga., w. to Ont. and Kans.; Calif. Host: Acrobasis betulella

Hulst, Ancylis comptana (Froel.), Argyrotaenia velutinana (Wikr.), Desmia funeralis (Hbn.), Dioryctria reniculella (Grote), Psorosina hammondi (Riley).

Apanteles canarsiae Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 127. 9, 8.

Apanteles (Apanteles) housatannuckorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 189, 198.

Apanteles (Apanteles) maquinnai Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 190, 199. ♀.

carduicola (Packard). Mass. Host: Cynthia cardui (L.).

Microgaster carduicola Packard, 1881 (1880). Boston Soc. Nat. Hist., Proc. 21: 27. 9, 8.

carpatus (Say). Cosmopolitan. Host: Nititinea fuscipunctella (Haw.), Phercoeca utrella (Wlsm.), Tinea despecta Meyr., T. pellionella (L.), Tineola biselliella (Hum.), Trichophaga tapetzella (L.).

Microgaster carpata Say, 1836. Boston Jour. Nat. Hist. 1: 263. ♀.

Protapanteles hawaiiensis Ashmead, 1901. Fauna Hawaii. 1: 362. 9.

Urogaster solitarius Ashmead, 1901. Ent. Soc. London, Trans. 1900, p. 287. 9. Preocc. by Ratzeburg, 1844.

Apanteles piceoventris Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 515. N. name for solitarius Ashmead.

Apanteles igae Watanabe, 1932. Insecta Matsumurana 7: 97. 9.

Biology: Fallis, 1942. Canad. Jour. Res., Sect. D, Zool. Sci. 20: 13-19. —Key and Common, 1959. Austral, Jour. Zool. 7: 64.

cassianus Riley. Ill., Tex., Colo. Host: Colias eurytheme Bdvl., Eurema nicippe (Cram.). Apanteles cassianus Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 307. $\,^{\circ}$, $\,^{\circ}$.

cerurae Muesebeck. Conn., N. J. Host: Cerura sp., C. scitiscripta Wlkr.

Apanteles cerurae Muesebeck, 1926. U. S. Natl. Mus., Proc. 69 (7): 15. 9, 8.

charadrae Muesebeck. D. C. Host: Charadra deridens (Guen.).

Apanteles charadrae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 567. 9, 8.

choreuti Viereck. N. J., Va., N. C., S. C., Fla., Iowa, Tex. Host: Choreutis carduiella Kearf., Desmia funeralis (Hbn.), Dichomeris sp., Hellula undalis (F.). Apanteles (Pseudapanteles) choreuti Viereck, 1912. U. S. Natl. Mus., Proc. 42: 627. 9, 5.

cinctiformis Viereck. N. Y. s. to Va., w. to Ont. and N. Dak.

Apanteles (Protapanteles) cinctiformis Viereck, 1911. U. S. Natl. Mus., Proc. 40: 176. 9.

cingiliae Muesebeck. N. S., Que., Mass., Ont. Host: Cingilia catenaria (Drury), Enypia griseata Grossb., E. venata (Grote), Eupithecia gibsonata Tay., Nepytia canosaria (Wikr.).

Apanteles cingiliae Muesebeck, 1931. U. S. Natl. Mus., Proc. 79 (16): 6. 9, 8.

clavatus (Provancher). Canada; Maine s. to S. C., w. to Wis. and Ark.; Oreg., Calif. Host: Archips argyrospilus (Wlkr.), Epinotia subviridis Heinr., Etiella zinckenella (Treit.), Grapholitha molesta (Busck).

Microgaster clavatus Provancher, 1881. Nat. Canad. 12: 196. 9, 3.

elisiocampae Ashmead, N. H., Conn., N. Y., N. J. Host: Malacosoma americanum (F.). Apanteles clisiocampae Ashmead, 1903. In Fiske, N. H. Col. Agr. Expt. Sta., Tech. Bul. 6: 229. 9.

Biology: Fiske, 1903. N. H. Col. Agr. Expt. Sta., Tech. Bul. 6: 214-216.

cockerelli Muesebeck. Mich., Iowa, Mo., S. Dak., Nebr., Tex., N. Mex., Idaho, Oreg., Calif. Host: Isophrictus sp.

Apanteles cockerelli Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 524. 9.

compressiventris Muesebeck. Baffin Isl., Que., N. H., N. W. T.; Europe. Host: *Phragmatobia fuliginosa* (L.).

Apanteles compressiventris Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 535. 9, 8. compressus Muesebeck. N. H., R. I., Mass. Host: Hypoprepia sp.

Apanteles compressus Muesebeck, 1919. Canad. Ent. 51: 114. 9, 3.

conanchetorum Viereck. N. S. s. to S. C., w. to Ont., S. Dak., and Kans. Host: Loxostege mancalis (Led.), L. rantalis (Guen.), Pholisora catullus (F.).

Apanteles (Apanteles) conanchetorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22: 199. 9.

congestiformis Viereck. Alaska.

Apanteles (Protapanteles) congestiformis Viereck, 1923. No. Amer. Fauna 46: 230. 9, 8.

congregatus (Say). No. Amer., Cent. Amer., So. Amer., West Indies. Host: Ceratomia catalpae (Bdvl.), Darapsa myron (Cram.), D. versicolor (Harr.), Dolba hylaeus (Drury), Eunorpha achemau (Drury), E. pandorus (Hbn.), Hemaris diffinis (Bdvl.), Lapara bombycoides Wlkr., Manduca quinquemaculata (Haw.), M. sexta (L.), Paratrea plebeja (F.), Sphecodina abbottii (Swains.), Sphiux chersis (Hbn.), S. kalmiae Smith, Trichoplusia ni (Hbn.).

Microgaster congregata Say, 1836, Boston Jour, Nat. Hist. 1: 262, 3.

Microgaster utilis French, 1880. Canad. Ent. 12: 42. 9, 8.

Apanteles (Protapanteles) augustus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22: 187, 194. 9.

Biology: Gilmore, 1938. Jour. Econ. Ent. 31: 712-715. —Worth, 1939. Ent. News 50: 137-141. —Fulton, 1940. Ent. Soc. Amer., Ann. 33: 240. — Lawson, 1959. Ent. Soc. consimilis Viereck. Que. s. to Fla., w. to Man.; Miss., Tex.

Microgaster lateralis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 141. 9. Preocc. by Haliday, 1834.

Apanteles (Pseudapanteles) consimilis Viereck, 1911. U. S. Natl. Mus., Proc. 40: 177. 2. crambi Weed. Md., Ohio, Ky., Tenn., Ill., Mo., Ark., S. Dak. Host: Crambus mutabilis Clem., C. trisectus (Wikr.), C. zeellus Fern.

Apanteles crambi Weed, 1887. Ill. State Lab. Nat. Hist., Bul. 3, p. 8. 9.

crassicornis (Provancher), Que. s. to Md., w. to Ont. and Iowa: Kans., Ariz.

Microgaster crassicomis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 142.

cyaniridis Riley. Que., W. Va., Ill., Minn., Iowa, Utah. Host: Celastrina argiolus pseudargiolus (Bdvl. and Lec.), Incisalia henrici (G. and R.), Philotes battatoides bernardino B. and McD.

Apanteles cyaniridis Riley, 1889. In Scudder, Butterflies East. U. S., p. 1903. \circ .

dakotae Muesebeck. S. Dak., Idaho.

Apanteles dakotae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 525. 9.

delicatus Howard, Conn. N. Y., D. C. Host: Orguia leucostiama (Smith).

Apanteles delicatus Howard. 1897. U. S. Dept. Agr., Bur. Ent. Tech. Ser. 5: 24, 55. "3" = \$\varphi\$.

depressariae Muesebeck. N. S., Maine. Host: Depressaria pastinacella (Dup.).

Apanteles depressariae Muesebeck, 1931. U. S. Natl. Mus., Proc. 79 (16): 3. 9, 8. depressus Viereck. Ind.

Apanteles (Stenopleura) depressus Viereck, 1912. U. S. Natl. Mus., Proc. 43: 582. 9, 8.

diacrisiae Gahan. Del. s. to S. C., w. to Kans. and La. Host: Dasychira basiflava (Pack.), Diacrisia virginica (F.), Estigmene acrea (Drury), Hyphantria cunea (Drury), Orgyia definita (Pack.), O. leucostigma (Sm.).

Apanteles diacrisiae Gahan, 1917. U. S. Natl. Mus., Proc. 53: 198. 9, 8.

diatraeae Muesebeck. Tex., Ariz.; Mexico, Cent. and So. Amer., West Indies. Host: Diatraea grandiosella Dyar, D. lineolata (Wlkr.), D. saccharalis (F.). Apanteles diatraeae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 520.

Biology: Davis, 1944. U. S. Dept. Agr., Tech. Bul. 871, p. 1-19.

dignus Muesebeck. Fla., Calif.; Mexico, West Indies, Hawaii. Host: Keiferia lycopersicella (Wlsm.), Tildenia gudmannella (Wlsm.).

Apanteles dignus Muesebeck, 1938. Ent. Soc. Wash., Proc. 40: 203. 9, 8.

Biology: Cardona and Oatman, 1971. Ent. Soc. Amer., Ann. 64: 996-1007.

disputabilis (Ashmead). Kans., Tex.; West Indies, Brazil.

Urogaster disputabilis Ashmead, 1900. Ent. Soc. London, Trans. 2: 286. 9, 8.

diversus Muesebeck and Walkley. Conn. Host: Acronicta oblinita (Smith).

Apanteles coxalis Muesebeck, 1926. U. S. Natl. Mus., Proc. 69 (7): 13. 9, 8. Preocc. by Szepligeti, 1911.

Apanteles diversus Muesebeck and Walkley, 1951. In Muesebeck, et al., U. S. Dept. Agr., Agr. Monog. 2, p. 127. N. name for coxalis Muesebeck.

dolichocephalus Muesebeck. Va., Mich., Ill.

Apanteles dolichocephalus Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 503. 9.

edwardsii Riley. Conn., Ohio, Mich., Minn., Iowa, Mo., Colo. Host: Vanessa atalanta (L.).

Apanteles edwardsii Riley, 1889. In Scudder, Butterflies East. U. S., p. 1901.

9.

electrae Viereck. B. C. s. to Calif. and Tex. Host: Agapema galbina (Clem.), Automeris io (F.), Coloradia pandora Blake, Dirphia sp., Hemileuca burnsi Wats, H. chinatiensis (Tinkham), H. eglanterina (Bdvl.), H. electra Wright, H. hera (Harr.), H. nevadensis Stretch, H. oliviae Ckll. H. tricolor (Pack.).

Apanteles (Apanteles) pequodorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 198.

militaris (Walsh). No. Amer. Host: Epiglaea apiata (Grote), Euxoa auxiliaris (Grote), Feltia ducens Wlkn., Heliothis zea (Boddie), Leucania latiuscula H.-S., L. phragmatidicola Guen., Peridroma saucia (Hbn.), Pseudaletia unipuncta (Haw.), Spodoptera exigua (Hbn.), S. frugiperda (Smith), S. ornithogalli (Guen.).

Microgaster militaris Walsh, 1861. Ill. State Agr. Soc., Trans. 4: 369. 9.

Biology: Guppy, 1967. Canad. Ent. 99: 100. —Calkins and Sutter, 1976. Environ. Ent. 5: 147-150.

milleri Mason. N. B., Que., Vt., Ont., Mont., B. C., N. W. T. Host: Dioryctria reniculella (Grote), Parapandemis borealis Freem.

Apanteles milleri Mason, 1974. Canad. Ent. 106: 1093. 9, 8.

mimoristae Muesebeck. Fla., Tex. Host: Hymenia perspectalis (Hbn.), Mimorista flavidissimalis (Grote), Olycella junctolineella (Hulst).

Apanteles mimoristae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15); 19. 9. 6.

monticola Ashmead. Colo., N. Mex., Idaho, Calif.

Apanteles monticola Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 17. 8.

morrisi Mason. N. B., Que., Ont., Wis., Man. Host: Choristoneura fumiferana (Clem.), C. pinus Freem.

Apanteles morrisi Mason, 1974. Canad. Ent. 106: 1092. 9, 3.

murtfeldtae Ashmead. Que. s. to N. C.; Ohio, Mo. Host: Ennomos subsignarius (Hbn.), Phigalia titea (Cram.).

Apanteles murtfeldtae Ashmead, 1897. Ent. Soc. Wash., Proc. 4: 159. 9, 8.

nemoriae Ashmead. N. S. s. to Tenn., w. to Sask. Host: Alsophila pometaria (Harr.), Chlorochlamys chloroleucaria (Guen.), Erannis tiliaria (Harr.), Eupithecia filmata Pears., E. gibsonata Tay., E. miserulata Grote, E. palpata Pack., Haematopius grataria (F.), Haploa lecontei (G.-M.), Operophtera brumata (L.), Pleuroprucha insulsaria (Guen.), Semiothisa granitata (Gn.).

Apanteles nemoriae Ashmead, 1897. Ent. Soc. Wash., Proc. 4: 160, 9, 8.

Apanteles (Protapanteles) winkleyi Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 192. 9, 8.

neomexicanus Muesebeck. P. E. I. w. to B. C. and Alaska; Mich., N. Dak. s. to N. Mex., w. to Wash. and Calif.

Apanteles neomexicanus Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 529. Q. Apanteles caudatus Muesebeck, 1922. U. S. Natl. Mus., Proc. 6 (15): 16. Q. &.

nephoptericis (Packard). N. Y., Fla., Ont., Mich., Ind., Ill., Iowa, Colo., Nev., Oreg., Calif. Host:

Anagasta kuehniella (Zell.), Vitula edmandsae edmandsae (Pack.), V. e. serratilineella
Pag.

Microgaster nephoptericis Packard, 1864. Proc. Essex Inst. 4: 122. 3. Apanteles ephestiae Baker, 1895. Ent. News 6: 201. 9. 3.

niger Muesebeck. N. Y., D. C., Va., Mich., Minn., S. Dak., Kans., Idaho.

Apanteles niger Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 532. 9, 3.

nigriceps (Ashmead.). N. C.; West Indies.

Urogaster nigriceps Ashmead, 1900. Roy. Ent. Soc. London, Trans. 1900: 284. 9.

nigricornis Muesebeck, Calif.: Mexico, Host: Ctenucha brunnea Stretch,

Apanteles nigricornis Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 538. 9, 8.

nigrovariatus Muesebeck. Pa., Ga., Fla.

Apanteles nigrovariatus Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 523. 9.

ninigretorum Viereck, Conn.

Apanteles (Apanteles) ninigretorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 200.

nitens Muesebeck. Wyo., Colo., Oreg., Calif. Host: Agrotis aeneipennis Grote, Pseudaletia unipuncta (Haw.).

Apanteles nitens Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 556. 9, 8.

noctuidiphagus Muesebeck. Conn.

Apanteles noctuidiphagus Muesebeck, 1926. U. S. Natl. Mus., Proc. 69 (7): 7. 9, 8.

obscuricornis Viereck. Conn.

Apanteles (Protapanteles) obscuricornis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 192. ♀.

oidaematophori Muesebeck. Wis., Idaho. Host: Oidaematophorus lacteodactylus form kellicottii (Fish).

Apanteles oidematophori(!) Muesebeck, 1929. Ent. Soc. Wash., Proc. 31: 119. 9.

olenidis Muesebeck. B. C. Host: Dasychira vagans (B. and McD.).

Apanteles olenidis Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 18. 9, 3.

ornigis Weed. N. S. and Que. s. to Va., w. to N. Dak. and Ark.; Utah, Oreg. Host: Bucculatrix ainstiella Murtf., Caloptilia burgessiella (Zell.), Lithocolletis blancardella (F.), L. crataegella Clem., L. malimalifoliella Braun, L. mariaeella Chamb., L. propinquinella Braun, L. robiniella Clem., Parornix geminatella (Pack.), Tischeria malifoliella Clem. Apanteles ornigis Weed, 1887. Ill. State Lab. Nat. Hist., Bul. 3: 6. 9, 6.

Protapanteles iortricis Áshmead, 1898 (1897). Ent. Soc. Wash., Proc. 4: 163. 9, 3.
Apanteles (Apanteles) brunnae Viereck, 1912. U. S. Natl. Mus., Proc. 42: 614. 3.
Apanteles (Apanteles) lithocolletidis Viereck, 1912. U. S. Natl. Mus., Proc. 42: 615. 3.

orobenae Forbes. D. C. s. to Fla., w. to Ariz. and Calif.; Ind., Ill., Conn.(?). Host: Evergestis rimosalis (Guen.).

Apanteles orobenae Forbes, 1883 (1882). Noxious Ins. Ill., Rpt. 12: 104. 9, 3.

paleacritae Riley. Canada; N. H. s. to Ga., w. to Mich. and Kans. Host. Alsophila pometaria (Harr.), Bomolocha deceptalis (Wikr.), Cyclophora pendulinaria (Guen.), Ectropis crepuscularia (D. and S.), Enypia packardata Tay., E. venata (Grote), Erannis tiliaria (Harr.), Lambdina fiscellaria (Gn.), Nepytia canosaria (Wikr.), Nyctobia anguilineata (G. and R.), Operophtera brumata (L.), Oporinia autumnata henshawi Swett, Paleacrita vernata (Peck), Phigalia titea (Cram.), Semiothisa granitata (Gn.), S. sexmaculata (Pack.), Zale sp.

Apanteles paleacritae Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 313. 9, 8. Protapanteles ephyrae Ashmead, 1898 (1897). Ent. Soc. Wash., Proc. 4: 163. 8.

papaipemae Muesebeck. Mass., N. Y., Ohio, Iowa, Kans. Host: Bellura obliqua (Wlkr.), Papaipema maritima Bird, P. nebris (Guen.), P. stenoscelis (Dyar.).

Apanteles papaipemae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 526. 9, 8.

paralechiae Muesebeck. N. B. s. to N. J., w. to Ont. and Wis.; Tenn., Utah, Calif. Host: Argyresthia freyella Wism., A. thuiella (Pack.), Coleotechnites thujaeella Kearf., Exotelia pinifoliella (Chamb.).

Apanteles paralechiae Muesebeck, 1931. U. S. Natl. Mus., Proc. 79 (16): 2. 9, 8.

paranthrenidis Muesebeck. N. Y., Pa., Ohio, D. C., Fla., Miss., Tex., Utah, Calif.; Mexico. Host:

Paranthrene asilipennis (Bdvl.), P. dollii (Neum.), P. robiniae (Hy. Edw.), Prionoxystus
sp.

Apanteles paranthrenidis Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 506. 9, 8.

parastichtidis Muesebeck. Canada; Maine, Tenn., Mich. Host: Choristoneura conflictana (Wlkr.)?, Enargia decolor (Wlkr.), Hydriomena divisaria (Wlkr.), H. renunciata (Wlkr.), Sunira bicolorago (Guen.).

Apanteles parastichtidis Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 541. 9.

petrovae Walley. Newfoundland, N. B., Que., S. C., Ont., Wis., Minn., N. Dak., Alta., Mont., B. C., Calif. Host: Barbara colfaziana (Kearf.), Choristoneura fumiferana (Clem.), C. pinus Freem., Dioryctria auranticella (Grote), D. reniculella (Grote), Petrova albicapitana (Busck), P. pallipennis McD., Rhyacionia frustrana (Comst.), Zeiraphera canadensis M. and F.

Apanteles petrovae Walley, 1937. Canad. Ent. 69: 189. 9.

Taxonomy: Mason, 1974. Canad. Ent. 106: 1101-1102.

phigaliae Muesebeck, N. B., Mass., Ont. Host: Phigalia titea Cram. Apanteles phigaliae Muesebeck, 1919. Canad. Ent. 51: 113. 9, 3.

phlyctaeniae Muesebeck. Ohio, Ill. Host: Phlyctaenia coronata tertialis (Guen.)(?).

Apanteles phlyctaeniae Muesebeck, 1929. Ent. Soc. Wash., Proc. 31: 118. 2, 3.

phobetri Rohwer. Newfoundland w. to Alta.; Mass., N. J., Md., Va., N. C., Ky., Ind., Ill., I. Dak., Kans. Host: Acronicta americana Harr., Apantesis sp., Halisidota caryae (Farr.), H. harrisii Walsh, H. tesselaris (Smith), Panthea acronyctoides (Wlkr.), Phobetron pithecium (A. and S.).

Apanteles (Protapanteles) phobetri Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 228. 9.

pholisorae Riley. Md., D. C., S. C., Ill., Mo., Kans., Tex. Host: Pholisora catullus (F.), Staphylus mazans hayhursti (Edw.).

Apanteles pholisoriae Riley, 1889. In Scudder, Butterflies East. U. S., p. 1909. ♀.

phthorimaeae Muesebeck. La. Host: Keiferia inconspicuella (Murtf.).

Apanteles phthorimaeae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 509. 9.

plathypenae Muesebeck. Ont. s. to N. Y. and Ohio, w. to B. C. and Wash. Host: Anagrapha falcifera (Kirby), Autographa californica (Speyer), A. precationis (Gn.), Plathypena scabra (F.), Rachiplusia ou (Gn.), Scotogramma trifolii (Rott.).

Apanteles plathypenae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 546. 9, 8

plesius Viereck. N. J., Mich., Wis. Host: Sparganothis pettitana (Rob.).

Apanteles (Apanteles) plesius Viereck, 1912. U. S. Natl. Mus., Proc. 42: 615. 9.

podunkorum Viereck. Conn., Va., W. Va., Ohio. Host: Ostrinia obumbratalis (Led.), Pyrausta futilalis (Led.).

Apanteles (Stenopleura) podunkorum Viereck, 1912. U. S. Natl. Mus., Proc. 43: 583. 9.

politus Riley. Va., Fla., Ill., Mo. Host: Scolecocampa liburna (Geyer).

Apanteles politus Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 307. 9, 8.

polychrosidis Viereck. N. B. and Que. s. to Fla., w. to Ont., S. Dak., and Kans.; Wash., Oreg., Alaska. Host: Anacampsis innocuella (Zell.), Archips argyrospilus (Wlkr.), A. cerasivoranus (Fitch), A. rosanus (L.), Argyrotaenia citrana (Fern.), A. juglandana (Fern.), Bucculatrix pomifoliella Clem., Caloptilia superbifrontella Clem., Choristoneura conflictana (Wlkr.), C. fumiferana (Clem.), C. pinus Freem., C. rosaceana (Harr.), Grapholitha molesta (Busck), Nephopteryz celtidella (Hulst), N. subcaesiella (Clem.), Paralobesia liriodendrana Kearf., P. viteana (Clem.). Apanteles (Apanteles) polychrosidis Viereck, 1912. U. S. Natl. Mus., Proc. 42: 615. \(\rightarrow, \(\rightarrow\$.

porthetriae Muesebeck. N. H. (?), Mass. (?); Palearctic Region. Liberated in N. H. and Mass. but not established. Introduced from Europe. Host: Lymantria dispar (L.).

Ananteles porthetriae Muesebeck, 1928. Ent. Soc. Wash., Proc. 30: 8. 9, 5.

Biology: Raffa, 1977. Environ. Ent. 6: 57-59 (alternative hosts).

pseudoglossae Muesebeck. Md., Mich., Minn. Host: Epizeuxis lubricalis Geyer.

Apanteles pseudoglossae Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 512. 9, 8.

pterophori Muesebeck. Mass. Host: Oidaematophorus homodactylus (Wlkr.).

Apanteles pterophori Muesebeck, 1926. U. S. Natl. Mus., Proc. 69 (7): 6. 9, 8.

pyralidis Muesebeck. Md., D. C., Va., N. C., Ohio, Tenn., Wis., Iowa, Mo., Ark., S. Dak. Host:

Loxostege rantalis (Guen.), Nomophila nearctica Munroe, Pyrausta futilalis (Led.).

Apanteles pyralidis Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 551. 9, 3.

pyraustae Viereck. Conn., Va., Ont., Mo. Host: Atteva punctella (Cram.), Pyrausta futilalis (Led.).

Apanteles (Protapanteles) pyraustae Viereck, 1912. U. S. Natl. Mus., Proc. 42: 626. 9, 8.

pyrophilae Muesebeck. Mass., R. I., Conn., Ont. Host: Amphipyra pyramidoides Gn. Apanteles pyrophilae Muesebeck, 1926. U. S. Natl. Mus., Proc. 69 (7): 11. 💡 . d.

renaulti Mason. N. B., N. S., Que., Ont., Wis. Host: Coleotechnites gibsonella (Kearf.), C. niceaella (Kearf.).

Apanteles renaulti Mason, 1974. Canad. Ent. 106: 1100. 9, 3.

robiniae (Fitch). N. Y. Host: Since robiniella (Fitch).

Microgaster robiniae Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 836. 9, 8.

rohweri Muesebeck. N. B. s. to Va., w. to Ont. and Minn. Host: Acrobasis rubrifasciella Pack., Argyresthia sp., Lithocolletis tremuloidiella Braun, Neurobatha strigifinitella (Clem.).

A panteles (Pseudapanteles) nigripes Rohwer, 1914 (1913). Ent. Soc. Wash., Proc. 15: 187. "δ" = 9. Preocc. by Ratzeburg, 1844.

Apanteles rohweri Muesebeck, 1921. U. S. Natl. Mus., Proc. 58: 550. N. name for nigripes Rohwer.

rubecula Marshall. Mo., B. C., Calif.; Europe. Host: Pieris protodice Bdvl. and Lec., P. rapae (L.).

Apanteles rubecula Marshall, 1885. Roy. Ent. Soc. London, Trans. 1885: 175. 9.

Biology: Wilkinson, 1966. Jour. Econ. Ent. 59: 1012-1013. — Parker, 1971. Jour. Econ. Ent. 64: 721-735. — Parker, 1972. Environ. Ent. 1: 153-156.

rufocoxalis Riley, N. S. s. to Fla.; Mo., Tenn., La., Tex. Host: Lencania latiuscula H.-S., Nephelodes emmedonia form violans Guen., Pseudaletia unipuncta (Haw.). Apanteles congregatus var. rufocoxalis Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 310.

salalicus Mason. Colo., Oreg., Calif. Host: Caloptilia rhoifoliella (Chamb.), Cnephasia longana (Haw.), Lithocolletis gaultheriella Wlsm.

Apanteles salalicus Mason, 1959. Canad. Ent. 91: 42. 9.

salicifoliellae Mason. Ont. Host: Lithocolletis salicifoliella Chamb.

Apanteles salicifoliellae Mason, 1959. Canad. Ent. 91: 43. 9, 3.

sarrothripae Weed. Maine s. to Va., w. to Ont. and Mo. Host: Ichthyura albosigma (Fitch), I. inclusa Hbn., Nycteola frigidana (Wlkr.).

Apanteles sarrothripae Weed, 1887. Ill. State Lab. Nat. Hist., Bul. 3: 6. 9, 8.

schaffneri Muesebeck. Pa., N. J., Del., Va., Tex. Host: Euclea delphinii Bdvl., Parasa sp.,
Prolimacodes badia (Hbn.).

Apanteles schaffneri Muesebeck, 1931. U. S. Natl. Mus., Proc. 79 (16): 4. 9.

schizurae Ashmead. Canada; N. H. s. to Fla, w. to Wis., Mo., and Miss.; Calif. Host: Heterocampa guttivitta (Wlkr.), Schizura concinna (Smith), S. unicornis (Smith). Apanteles schizurae Ashmead, 1898. Ent. Soc. Wash, Proc. 4: 162. 9, δ.

scitulus Riley. N. H. s. to Fla., w. to Ont., Nebr., and Tex. Host: Acronicta brumosa Guen., A. oblinita (Smith), Anomogyna elimata (Gn.), Dasychira basiflava (Pack.), D. plagiata (Wlkr.), Diacrisia virginica (F.), Pseudoplusia includens (Wlkr.), Simyra henrici (Grote).

Apanteles congregatus var. scitulus Riley, 1881. Acad. Sci. St. Louis, Trans. 4: 310. Apanteles emarginatus Riley, 1889. In Scudder, Butterflies East. U. S., p. 1906. ?, &. Preoce. by Nees, 1834.

UNPLACED TAXON OF APANTELES FOERSTER

Microgaster oleracea Taylor, 1860. American Agriculturist 19: 301. 9. Host: Pontia oleracea Harris (=Pieris). The illustration which accompanies the description is not adequate in identifying this species. However, certain statements in the description and the fact that the author compares the species with glomeratus indicates that this species is probably the same as Apanteles glomeratus (L.)., a parasite of Pieris oleracea Harr.

Genus DIRRHOPE Foerster

Dirrhope Foerster, 1851. Naturh. Ver. Rheinlande, Verh. 8: 79. Type-species: Dirrhope rufa Foerster. Monotypic. Dirrhopa Schulz, 1906. Spolia Hym., p. 138. Emend.

The exact relationships of this genus are not clearly understood and it has been placed with the Microgastrinae by Muesebeck (1936) and Tobias (1967), and with the Adeliinae by Telenga (1955) and Capek (1970).

Taxonomy: Muesebeck, 1936 (1935). Ent. Soc. Wash., Proc. 37: 173-174. —Telenga, 1955. Fauna U. S. S. R., v. 5, n. 4, p. 14. — Tobias, 1967. Ent. Obozr. 46: 657. — Capek, 1969. Ent. Soc. Wash., Proc. 71: 309. - Capek, 1970. Canad. Ent. 102: 870.

americana Muesebeck. Va., Mich., Tex. Host: Ectoedemia phleophaga Busck. Dirrhope americana Muesebeck, 1936 (1935). Ent. Soc. Wash., Proc. 37: 174. 9, 8.

Genus HYPOMICROGASTER Ashmead

Hypomicrogaster Ashmead, 1898 (1897). Ent. Soc. Wash., Proc. 4: 166. No included species. Type-species: Microgaster zonaria Say. Desig. by Ashmead, 1900.

Revision: Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 20-26 (No. Amer. spp. in Microgaster). - Nixon, 1965. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 2, p. 208-229 (World spp.).

Taxonomy: Shenefelt, 1973. Hym. Cat., part 9, p. 687-692 (cat. World spp.).

ecdytolophae (Muesebeck). N. S. s. to Fla., w. to Ont., Nebr., and Tex.; Cent. Amer., West Indies. Host: Arogalea cristifasciella (Chamb.), Caloptilia elongella (L.), Coleotechnites piceaella (Kearf.), Ecdytolopha insiticiana Zell., Grapholitha molesta (Busck), Laspeyresia caryana (Fitch), L. pomonella (L.), Nephopteryx uvinella (Rag.), Ostrinia obumbratalis (Led.), Psorosina hammondi (Riley), Walshia amorphella Clem. Microgaster ecdytolophae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 24. 9, 8.

Taxonomy: Marsh, 1974. Ent. Soc. Wash., Proc. 76: 285.

Biology: Brandhorst, 1962. Ent. Soc. Amer., Ann. 55: 477. - Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265, p. 36.

schizurae (Muesebeck), n. comb. Maine, Mass., Pa., N. J., D. C., Mich., Ohio, Minn., Ark., N. Dak., Kans., B. C. Host: Heterocampa manteo (Dbldy.), Schizura concinna (Smith), S. leptinoides (Grote), S. unicornis (Smith).

Microgaster schizurae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 30. 9, 8.

tiro (Reinhard). Newfoundland, P. E. I.; Europe. Host: Cnephasia virguareana (Treit.). Microgaster tiro Reinhard, 1880. Deut. Ent. Ztschr. 24: 357. 9, 8.

zonaria (Say). Mass. s. to Va., w. to Wis. and Colo.; Fla., La., Canada. Host: Coleotechnites piceaella (Kearf.), C. hujacella Kearf., Laspeyresia pomonella (L.), Neoerastria caduca (Grote), Plathupena scabra (F.).

Microgaster zonaria Say, 1836. Boston Jour. Nat. Hist. 1: 263. 9.

Microgaster cinctus Provancher, 1881. Nat. Canad. 12: 196. 9.

Protapanteles recurvariae Ashmead, 1903. N. Y. Ent. Soc., Jour. 11: 144. 9.

Genus MICROGASTER Latreille

Microgaster Latreille, 1804. Nouv. Dict. Hist. Nat., v. 24, p. 175.

Type-species: Ichneumon deprimator Fabricius. Desig. by Latreille, 1810.

Liganira Walker, 1860. Ann. and Mag. Nat. Hist. (3) 5: 308.

Type-species: Microgaster detractus Walker. Monotypic.

Microgaster subg. Hygroplitis Thomson, 1895. Opusc. Ent., fasc. 20, p. 2238, 2244.
Type-species: Microgaster russata Haliday. Desig. by Viereck, 1914.

Diolcogaster Ashmead, 1900. In Smith, Ins. of N. J., p. 594.

Type-species: Microgaster brevicauda Provancher. Monotypic.

Zadiolcogaster Viereck, 1913. U. S. Natl. Mus., Proc. 46: 366.

Type-species: Zadiolcogaster anomus Viereck. Orig. desig.

Microgaster subg. Lissogaster Bengtsson, 1926. Ent. Tidskr. 47: 64.

Type-species: Microgaster politus Marshall. Desig. by Muesebeck and Walkley, 1951.

Revision: Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 20-43 (No. Amer. spp.). —Nixon, 1968. Brit. Mus. (Nat. Hist.) Ent., Bul. 22: 33-72 (some World spp.).

Taxonomy: Nixon, 1965. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 2, p. 7. —Shenefelt, 1973. Hym. Cat., part 9, p. 692-737 (cat. World spp.).

brevicauda Provancher, Que.

Microgaster brevicaudus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 140. \circ

brittoni Viereck. Mass., Conn., N. Y., Ga., Ohio, Ont., Mich., Wis., Minn., Iowa. Microgaster (Microgaster) brittoni Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 201.

canadensis Muesebeck. N. S. w. to B. C.; Maine, Mass., N. Y., Mich., Colo., Oreg., Calif. Host: Achatodes zeae (Harr), Acleris variana (Fern.), Agonopterix posticella (Wism.), Anacampsis innocuella (Zell.), Ancylis comptana fragariae (W. and R.), Archips argyrospilus (Wikr.), A. rosanus (L.), Choristoneura fumiferana (Clem.), Croesia albicomana (Clem.), Epinotia solicitana (Wikr.), Sciaphila duplex (Wism.), Sparganothis diluticostana (Wism.), Stilpnotia salicis (L.).

Microgaster canadensis Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 38. 9, 8.

congregatiformis Viereck. Mass., Conn., N. Y., N. J., Ont., Mich., Minn., Mont. Host: Endothenia hebesana (Wikr.).

Microgaster (Microgaster) congregatiformis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 202.

diaphaniae Muesebeck. Fla.; Cent. and So. Amer. Host: Diaphania indica (Saund.).

Microgaster diaphaniae Muesebeck, 1958. U. S. Natl. Mus., Proc. 107: 414. 9, 8.

epagoges Gahan. Vt. s. to S. C., w. to Ont. and Mo.; Colo., B. C., Oreg. Host: Acleris chalybeana (Fern.), Anacampsis fragariella Busck, A. rhoifructella (Clem.), Archips argyrospilus (Wlkr.), A. griseus (Rob.), A. rosanus (L.), A. semiferanus (Wlkr.), Argyrotaenia velutinana (Wlkr.), Choristoneura obsoletana (Wlkr.), Platywota flavedana Clem., Ostrinia penitalis (Grote), Rhyacionia frustrana (Comst.), Sparganothis pettitana (Rob.), S. putmanana Freem., S. sulphurana (F.), S. tristriata Kearf

Biology: Schaffner, 1949. U. S. Dept. Agr., Misc. Pub. 767, p. 62.

femoralamericanus Shenefelt. Idaho, Wash., Oreg., Calif.

Microgaster femoralis Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 39. ♀, ♂. Preocc. by Bouche, 1834.

Microgaster femoralamericanus Shenefelt, 1973. Hym. Cat., part 9, p. 706. N. name for femoralis Muesebeck.

gelechiae Riley. Que. s. to Va., w. to Ont., N. Dak., and Mo.; La. Host: Gnorimoschema gallaeasterella (Kell.), G. gallaesolidaginis (Riley).

Microgaster gelechiae Riley, 1869. Ins. Mo., Ann. Rpt. 1: 178. 9, 8.

Biology: Judd. 1962. Amer. Micros. Soc., Trans. 81: 204.

gelechiae trichotaphae Walley. Ont. Host: Trichotaphe levisella Fyles.

Microgaster gelechiae var. trichotaphae Walley, 1932. Canad. Ent. 64: 186. S.

harnedi Muesebeck. Mass., Va., S. C., Mich., Ohio, Ind., Miss., Mo., Wash. Host: Diatraea sp., Macrobotys pertextalis (Led.), Ostrinia obumbratalis (Led.), Pachyzancla thestealis (Wlkr.).

Microgaster harnedi Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 23. 9.

hospes Marshall, Maine, N. Y., N. J., Md., Va., Ont., Ohio, Iowa, Kans., Colo., Utah; Europe. Host: Ancylis comptana (Forel.), A. c. fragariae (W. and R.), Argyresthia calliphanes

Microgaster hospes Marshall, 1885, Roy, Ent. Soc. London, Trans. 1885; 257. 9, &.

Microgaster comptanae Viereck, 1911. U. S. Natl. Mus., Proc. 39: 403. 9.

leechi Walley, Mass., Pa., Md., Fla., Ont., Mich., Ohio, Minn., B. C., Oreg. Host: Macrobotys pertextalis (Led.).

Microgaster leechi Walley, 1935. Canad. Ent. 67: 57. 9.

melligaster Provancher. Que. s. to N. Y.; Ont., Mich., Iowa.

Microgaster melligaster Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 143.

Microgaster rubricoxus Provancher, 1888, Addit. Corr. Faune Ent. Canada Hym., p. 386. " Ω " = δ .

novicius Marshall. Conn., Minn.; Europe. Host: Swammerdamia heroldella Hbn.

Microgaster novicius Marshall, 1885. Roy. Ent. Soc. London, Trans. 1885: 252. 9, 3. Microgaster swammerdamiae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 37. 9, 8.

pantographae Muesebeck. Maine, Mass., N. Y., Va., Ont., Mich., Ohio, Ill., Iowa, Mo. Host: Argyrotaenia velutinana (Wlkr.), Fascista cercerisella (Chamb.), Pantographa limata (G. and R.).

Microgaster pantographae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 34. 9.

peroneae Walley, Canada: Maine, D. C., Ohio, Wash., Alaska, Host; Acleris gloverana (Wlsm.), A. logiana (L.), A. variana (Fern.), Archips argyrospilus (Wlkr.), Sparganothis pettitana

Microgaster peroneae Walley, 1935. Canad. Ent. 67: 56. 9, 3.

phthorimaeae Muesebeck. Wash., Oreg., Calif. Host: Amorbia essigana Busck, Anacampsis fragariella Busck, Aristotelia rhoisella Busck, Ephestiodes gilvescentella Rag., Phthorimaea operculella (Zell.), Platynota stultana (Wlsm.), Udea rubigalis (Gn.). Microgaster phthorimaeae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 40. 9, 8.

Biology: Graf, 1917. U. S. Dept. Agr., Bul. 427, p. 44-45 (as Microgaster sp.).

scopelosomae Muesebeck. Mass. Host: Eupsilia devia (Grote).

Microgaster scopelosomae Muesebeck, 1926. U. S. Natl. Mus., Proc. 69 (7): 17. 9, 8.

tibialis Nees. East. Canada, U. S. (?); Europe. Liberated in Mass., N. Y., Ohio, Mich., and Ont. but not established. Introduced from Europe. Host: Ostrinia nubilalis (Hbn.). Microgaster tibialis Nees, 1834. Hym. Ichn. Affin. Monog., v. 1, p. 168. 9, 8.

Microgaster luctuosus Haliday, 1834. Ent. Mag. 2: 239. 3.

Microgaster messorius Haliday, 1834. Ent. Mag. 2: 239. ♀, ♂. Microgaster pluto Morley, 1936. Entomologist 69: 211. 9.

NOMEN NUDUM IN MICROGASTER LATREILLE

Microgaster xylinoides Ashmead, 1895. In Webster, Canad. Ent. 27: 68.

Genus MICROPLITIS Foerster

Microplitis Foerster, 1862, Naturh. Ver. Rheinlande, Verh. 19: 245.

Type-species: Microgaster sordipes Nees. Orig. desig.
Dapsilotoma Cameron, 1906. Bombay Nat. Hist. Soc., Jour. 17: 101.
Type-species: Dapsilotoma testaceipes Cameron. Monotypic.

Revision: Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 43-72 (No. Amer. spp.). —Nixon, 1970. Brit. Mus. (Nat. Hist.) Ent., Bul. 25: 1-30 (some Eur. spp.).

Taxonomy: Shenefelt, 1973. Hym. Cat., part 9, p. 737-767 (cat. World spp.).

alaskensis Ashmead. Canada, Alaska, north. U. S. s. to N. Y., Mo., and Ariz. Host: Autographa californica (Spey.), A. precationis (Gn.), Darqida procincta (Grote), Plusia sp., Pseudaletia unipuncta (Haw.), Rachiplusia ou (Gn.), Trichoplusia ni (Hbn.). Microplitis alaskensis Ashmead. 1902. Wash. Acad. Sci., Proc. 4: 249. 9.

Biology: Guppy and Miller, 1970. Canad. Ent. 102: 1331.

autographae Muesebeck. Ida., N. Mex., Ariz. Host: Autographa californica (Spey.).
Microplitis autographae Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 54. 9, 3.

bradleyi Muesebeck. Alta., Utah, B. C., Oreg., Calif. Host: Amphipyra tragopoginis (L.), Feralia jocosa (Gn.).

Microplitis bradleyi Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 70. 9.

brassicae Muesebeck. Nebr., Tex., Colo., N. Mex., Ariz., Calif. Host: Autographa californica (Spey.), Trichoplusia ni (Hbn.).

Microplitis brassicae Muesebeck, 1922. U.S. Natl. Mus., Proc. 61 (15): 60. ♀, ♂.

carteri Walley. Alta.

Microplitis carteri Walley, 1932. Canad. Ent. 64: 185. d.

ceratomiae Riley. Que. and N. S. s. to D. C., w. to Oreg. and N. Mex. Host: Ceratomia amyntor (Geyer), Manduca sexta (L.), Paonias excaecata (Smith), S. portius Cram, S. kalmiae Smith.

Microplitis ceratomiae Riley, 1881, Acad. Sci. St. Louis, Trans. 4: 303, 9, 6.

Microplitis waldeni Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 204.

coactus Lundbeck, Greenland, Host: Noctua sp.

Microplitis coactus Lundbeck, 1896. Vid. Medd. Naturh. Foren. Kjobenhavn, p. 243. 9.

coloradensis Muesebeck, Mich., Minn., Colo.

Microplitis coloradensis Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 49. d.

confusus Muesebeck. N. B., N. Y., Md., Ont., Mich., Ind., Minn., N. Dak., Tex. Host: Eucirrhoedia pampina (Gn.).

Microplitis confusus Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 69. 9, 8.

crenulatus (Provancher). Que., Mass., Mich.

Microgaster crenulatus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym. p. 387. " \circ " = \circ .

croceipes (Cresson). N. J. s. to Ga., w. to Utah, and Ariz.; Oreg. Host: Heliothis subflexa (Guen.), H. virescens (F.), H. zea (Boddie).

Microgaster croceipes Cresson, 1872. Amer. Ent. Soc., Trans. 4: 183. 9.

Microplitis nigripennis Ashmead, 1905. In Quaintance and Brues, U. S. Dept. Agr., Bur. Ent. Bul. 50, p. 122.

Biology: Lewis, 1970. Ent. Soc. Amer., Ann. 63: 67-70. —Jones and Lewis, 1971. Jour. Ins. Physiol. 17: 921-927. —Barras, 1972. Comp. Biochem. Physiol. 43B: 941-947. —Vinson and Lewis, 1972. Jour. Genus MIRAX Haliday

Mirax Haliday, 1833. Ent. Mag. 1: 263.

Type-species: Mirax rufilabris Haliday. Monotypic.

Centistidea Rohwer, 1914. Psyche 21: 81.

Type-species: Centistidea ectoedemiae Rohwer. Orig. desig.

The exact relationships of this genus are not clearly understood. Telenga (1955) and Capek (1970) place it with the Adelinae, but Tobias (1967) and Nixon (1965) place it in the Microgastrinae, the latter author suggesting a separate tribal position. Hosts are lepidopterous leaf miners.

Revision: Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 10-12 (No. Amer. spp.).

Taxonomy: Telenga, 1955. Fauna U. S. S. R., v. 5, n. 4, p. 19. - Nixon, 1965. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 2, p. 8. — Tobias, 1967. Ent. Obozr. 46: 657. — Capek, 1969. Ent. Soc. Wash., Proc. 71: 309. —Capek, 1970. Canad. Ent. 102: 870. —Shenefelt, 1973. Hym. Cat., part 9, p. 676-679 (cat. World spp.).

aspidiscae Ashmead. Que., Md., D. C., Fla. Host: Coptodisca splendoriferella (Clem.),

scotica (Marshall), Mich.: Europe.

Microgaster scotica Marshall, 1885. Roy. Ent. Soc. London, Trans. 1885: 251. d.

TRIBE CARDIOCHILINI

This group has, in the past, been placed as a tribe of the Helconinae or as a separate subfamily near the Microgastrinae. Recent workers (Telenga, 1955; Nixon, 1965; Capek, 1970) have placed it as a tribe within the Microgastrinae and I have chosen to follow this arrangement.

Taxonomy: Telenga, 1955. Fauna U. S. S. R., v. 5, n. 4, p. 212. — Nixon, 1965. Brit. Mus. (Nat. Hist.) Ent., Bul. Supl. 2, p. 6. — Capek, 1970. Canad. Ent. 102: 858, 870.

Genus CARDIOCHILES Nees

Cardiochiles Nees, 1818. Nov. Act. Acad. Caes. Leop. Car. 9: 307. No included species. Type-species: Ichneumon sallator Fabricius. Subsequent monotypy. First species included by Nees, 1834. Hym. Ichn. Affin. Monog., v. 1, p. 224. Toxoneuron Sav. 1836. Boston Jour. Nat. Hist. 1: 258.

Type-species: Bracon (Toxoneuron) viator Say. Desig. by Viereck, 1914.

Tenthredoides Cresson, 1865. Ent. Soc. Phila., Proc. 4: 290.

Type-species: Tenthredoides seminiger Cresson. Monotypic.

SUBFAMILY ICHNEUTINAE

TRIBE ICHNEUTINI

Species in this group are solitary endoparasites of sawfly larvae; oviposition takes place in the host egg but the parasite cocoon is formed within the host cocoon.

Taxonomy: Shenefelt, 1973. Hym. Cat., part 9, p. 805-812 (cat. World spp.).

Genus ICHNEUTES Nees

Ichneutes Nees, 1816 (1813). Mag. Gesell. Naturf. Freunde Berlin 7: 275. Type-species: Ichneutes reunitor Nees. Monotypic.

alaskensis Ashmead. Alaska.

Genus PROTEROPS Wesmael

Proterops Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 201.
Type-species: Proterops nigripennis Wesmael. Monotypic.
californicus Cresson. Wyo., Calif.

Proterops californicus Cresson, 1873. Canad. Ent. 5: 69. d.

TRIBE MUESEBECKIINI

The genera in this tribe were previously associated with the Microgastrinae, but Mason (1969) has shown that they are morphologically similar to the Ichneutinae. Host records indicate that species are parasites of leaf mining lepidopterous larvae.

Taxonomy: Mason, 1969. Ent. Soc. Wash., Proc. 71: 263-278 (key to World genera).

Genus MUESEBECKIA Mason

Muesebeckia Mason, 1957. Canad. Ent. 89: 355.

Type-species: Muesebeckia eximius Mason. Orig. desig.

Revision: Mason, 1969. Ent. Soc. Wash., Proc. 71: 265-274.

eximia Mason. Que., Ont., N. C.

Mnesebeckia eximius Mason, 1957. Canad. Ent. 89: 355. 9, 8.

Genus OLIGONEURUS Szepligeti

Oligoneurus Szepligeti, 1902. Termes. Fuzetek 25: 77.

Type-species: Oligoneurus concolor Szepligeti. Monotypic.

One undescribed species occurs in North America.

Genus PAROLIGONEURUS Muesebeck

Paroligoneurus Muesebeck, 1931. U. S. Natl. Mus., Proc. 79 (16): 7. Type-species: Paroligoneurus johnsoni Muesebeck. Orig. desig.

Taxonomy: Shenefelt, 1973, Hym. Cat., part 9, p. 681-682 (cat. World spp.).

johnsoni Muesebeck. Mass., N. J., S. C., Fla. Host: Nepticula sp.

Paroligoneurus johnsoni Muesebeck, 1931. U. S. Natl. Mus., Proc. 79 (16): 8. 9.

SUBFAMILY BLACINAE

The genera included here are in need of considerable study and the arrangement below is a very conservative one. There are distinct differences in morphology and biologies among these genera, some showing affinities with the Helconinae, others with the Agathidinae. Nearly all of the North American genera are unstudied.

TRIBE BLACINI

This tribe constitutes the least homogeneous group of genera in the Blacinae. The biologies of Blacus species are not well established; van Achterberg (1976 (1975)) places this and related genera as a tribe of the Helconinae. Species of Centistes, Pygostolus, and Syrhizus are internal parasites of adult Coleoptera and have been placed in a separate subfamily by Capek (1969).

Revision: van Achterberg, 1976 (1975). Tijdschr. Ent. 118: 159-323.

Genus BLACUS Nees

Genus BLACUS Subgenus BLACUS Nees

thoracica (Curtis). Canada (?), U. S. (?): Europe, Asia, So. Amer., Austr. Liberated in B. C., Pa., N. C., Ont., Idaho, Oreg., and Calif. but not known to be established. Introduced from Europe. Host: Bruchus brachialis Fab., B. pisorum (L.), B. rufimanus Boh. Sigalphus thoracicus Curtis, 1860. Farm Insects, p. 365. 9.

virginiensis (Ashmead). Pa., N. J., Md., D. C., Va., Ohio, Ark. Host: Rhynchaenus pallicornis (Say).

Centistes virginiensis Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 655. 9.

vanthochila Martin, Ont.

Triaspis (Triaspis) xanthochila Martin, 1958. Canad. Ent. 90: 191. 9.

Genus UROSIGALPHUS Ashmead

Revision: Crawford, 1914. Insecutor Inscitiae Menstruus 2: 22-27 (No. Amer. spp.). —Martin, 1956. Canada Dept. Agr. Pub. 965, p. 102-137 (No. Amer. spp.). —Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 85-157 (No. and Cent. Amer. spp.).

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 302-305 (cat. World spp.).

Genus UROSIGALPHUS Subgenus BRUCH1UROSIGALPHUS Gibson

Urosigalphus subg. Bruchiurosigalphus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 94. Type-species: Urosigalphus bruchi Crawford. Orig. desig.

bruchi Crawford. La., Tex., Ariz., Calif.; Hawaii, Mexico. Host: Algarobius prosopis (Lec.), Amblycerus robiniae (F.), Mimosestes sallaei (Sharp).

Urosigalphus bruchi Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 181. 9, 8.

bruchivorus Crawford. Ariz., Calif. Host: Algarobius prosopis (Lec.), Neltumius arizonensis (Sch.).

Urosigalphus bruchivorus Crawford, 1914. Insecutor Inscitiae Menstruus 2: 25. \(\mathbb{S}, \delta \). Urosigalphus arizonensis Crawford, 1914. Insecutor Inscitiae Menstruus 2: 25. \(\mathbb{S}, \delta \). Urosigalphus truncatus Martin, 1956. Canada Dept. Agr. Pub. 965, p. 122. \(\mathbb{S}. \)

ignotus Gibson. Calif.

Urosigalphus (Bruchiurosigalphus) ignotus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 98. $\, \circ$

neobruchi Gibson. Kans., Tex., Ariz.; Mexico. Host: Acanthoscelides quadridentatus (Sch.), Algarobius prosopis (Lec.), Amblycerus robiniae (F.), Merobruchus sp. Urosigalphus (Bruchiurosigalphus) neobruchi Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8:

99. ♀, ♂.

salsola Gibson. Tex., Ariz.

Urosigalphus (Bruchiurosigalphus) salsola Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 100. $\, \circ \,$, $\, \circ \,$.

Genus UROSIGALPHUS Subgenus MICROUROSIGALPHUS Gibson

Urosigalphus subg. Microurosigalphus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 87.
Type-species: Urosigalphus femoratus Crawford. Orig. desig.

acutulus Gibson. Colo., Ariz.

breviovipositorus Gibson. Kans., Tex., Colo., N. Mex., Ariz.; Mexico.

femoratus Crawford. Conn. s. to Ga., w. to S. Dak. and Ariz.; Mexico. Host: Anthonomus grandis Boh., Tyloderma foveolata Say.

Urosigalphus femoratus Crawford, 1914. Insecutor Inscitiae Menstruus 2: 26. ♀, ♂.

Urosigalphus mohawkorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 234. 9.

iowensis Gibson. Ill., Iowa, Nebr., Kans., N. Mex., Utah, Ariz.

Urosigalphus (Microurosigalphus) iowensis Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 92. 9, 3.

neomexicanus Crawford. Iowa, Mo., Ark., Tex., Colo., N. Mex., Ariz.

Urosigalphus neomexicanus Crawford, 1914. Insecutor Inscitiae Menstruus 2: 26. 9, 8.

Genus UROSIGALPHUS Subgenus NEOUROSIGALPHUS Gibson

Urosigalphus subg. Neourosigalphus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 122. Type-species: Urosigalphus robustus Ashmead. Orig. desig. 274

hubbardi Crawford. Ariz., Calif. Host: Cylindrocopturus longulus (Lec.).

Urosigalphus hubbardi Crawford, 1914, Insecutor Inscitiae Menstruus 2: 23. d. Urosigalphus pini Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 26. d.

neopunctifrons Gibson, Ariz; Mexico.

Urosigalphus (Neourosigalphus) neopunctifrons Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 125. ♀, ♂.

nigripes Crawford, Ariz.

Urosigalphus nigripes Crawford, 1914. Insecutor Inscitiae Menstruus 2: 24. 9.

otidocephali Cushman. Pa., N. C. Host: Myrmex myrmex (Hbst.).

Urasigalphus otidocephali Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 25. d.

punctifrons Crawford. N. Mex., Ariz; Mexico.

Urosigalphus punctifrons Crawford, 1914. Insecutor Inscitiae Menstruus 2: 24. d.

robustus Ashmead. Mass., Conn., N. J., Md., D. C., Va., Mich., Wis., Ark. Urosigalphus robustus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 638. ?.

Urosigalphus wampanoagorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey, Bul. 22, p. 234. 9.

Genus UROSIGALPHUS Subgenus PARAUROSIGALPHUS Gibson

Urosigalphus subg. Paraurosigalphus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 128. Type-species: Urosigalphus (Paraurosigalphus) dakotaensis Gibson. Orig. desig. clarus Gibson, N. J., Md.

Urosigalphus (Paraurosigalphus) clarus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 129. 9.8.

dakotaensis Gibson, Iowa, S. Dak., Nebr.

Urosigalphus (Paraurosigalphus) dakotaensis Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 130. ♀, ♂.

novissimus Gibson. Kans.

rugosocorpus Gibson, Ariz.

Urosigalphus (Paraurosigalphus) rugosocorpus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 132. J.

Genus UROSIGALPHUS Subgenus UROSIGALPHUS Ashmead

Urosigalphus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 637.

Type-species: Urosigalphus armatus Ashmead. Orig. desig.

Rhyssosigalphus Cameron, 1904. Amer. Ent. Soc., Trans. 30: 260.

Type-species: Rhyssosigalphus rugosus Cameron. Monotypic.

anthonomi Crawford. Tex.; Mexico. Host: Anthonomus grandis Boh., Chalcodermus aeneus

Urosigalphus anthonomi Crawford, 1907. Canad. Ent. 39: 133. ♀, ♂.

armatus Ashmead. Md., W. Va., Va., Tenn. Host: Curculio caryatrypes (Boh.).

Urosigalphus armatus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 637. 9, 8.

barberi Crawford. Pa. s. to Fla., w. to Wis. and N. Mex. Host: Curculio spp. in acorns, C.

pardalis (Chitt.). Urosigalphus barberi Crawford, 1914. Insecutor Inscitiae Menstruus 2: 23. 9.

confusor Gibson, Tex., Ariz. Urosigalphus (Urosigalphus) confusar Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 106. 9,

crassisculptus Cushman. Pa., Mich., Wis., Ill. Host: Curculio neocorylus Gibson.

Urosigalphus crassisculptus Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 23. d.

curculionis Gibson. Que. s. to N. C., w. to Wis. and Ark. Host: Curculio nasicus (Say), C. strictus (Casey).

Urosigalphus (Urosigalphus) curculionis Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 108. ♀. ♂.

donnae Gibson. Conn. s. to Fla., w. to Wis. and Ark. Host: Curculio proboscideus F.

Urosigalphus (Urosigalphus) donnae Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 110. 9,

floridaensis Gibson, Fla.

Urosigalphus (Urosigalphus) floridaensis Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 111.

forbesi Martin. Que. s. to Ga., w. to Wis. and Tex. Host: Curculio sp., C. sulcatulus (Casey). Urosigalphus forbesi Martin, 1956. Canada Dept. Agr. Pub. 965, p. 118. 9.

muesebecki Gibson. N. J., S. C., Ga., Ky., Tenn., Wis., Iowa, Ill. Host: Curculio longidens Chitt., C. orthorhynchus (Chitt.).

Urosigalphus (Urosigalphus) muesebecki Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 115.

neoarmatus Gibson. Colo.

Urosigalphus (Urosigalphus) neoarmatus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 116.

nigrescens Martin, Ariz.

Urosigalphus nigrescens Martin, 1956. Canada Dept. Agr. Pub. 965, p. 115. d.

pardus Gibson. Calif. Host: Curculio pardus Chitt.

Urosigalphus (Urosigalphus) pardus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 119. \circ , \circ .

rubidus Gibson, W. Va.

Urosigalphus (Urosigalphus) rubidus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 119. 9. rufus Gibson. Ala. Host: Curculio sp.

Urosigalphus (Urosigalphus) rufus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 120. ♀.

subtropicus Gibson. Ga., Fla., Miss., N. Mex. Host: Curculio sulcatulus (Casey).

Urosigalphus (Urosigalphus) subtropicus Gibson, 1972. Ent. Soc. Amer., Misc. Pub. 8: 121.

9, 5.

TRIBE ORGILINI

Species in this group are internal parasites of lepidopterous larvae.

Taxonomy: Muesebeck, 1970. Smithsn. Contrib. Zool., n. 30, p. 1-2 (key to genera of subfamily Orgilinae).

Genus CHARMON Haliday

Charmon Haliday, 1833, Ent. Mag. 1: 262.

Type-species: Charmon cruentatus Haliday. Monotypic.

Provancheria Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 109.

Type-species: Eubadizon gracilis Provancher. Orig. desig.

Taxonomy: Mason, 1974. Ent. Soc. Wash., Proc. 76: 235-245.

extensor (Linnaeus). Holarctic. Host: Ancylis comptana fragariae (W. and R.), Choristoneura murinana (Hbn.), Depressaria pastinacella (Dup.), Epinotia lindana (Fern.), E. nigricana (H.-S.), E. pusillana Peyer, Grapholitha molesta (Busck), Laspeyresia pomonella (L.), Spilonota lariciana Heinemann, Zeiraphera griseana (Hbn.), Z. rufimitrana (H.-S.).

Ichneumon extensor Linnaeus, 1758. Syst. Nat., Ed. 10, p. 564.

Charmon cruentatus Haliday, 1833. Ent. Mag. 1: 262.

Eubadizon pectoralis Nees, 1834. Hym. Ichn. Aff. Monog., v. 1, p. 236. $\,$ $\,$

Eubadizon pleuralis Cresson, 1872. Canad. Ent. 4: 230. 9, 3.

Biology: Capek, 1956. Biologia 11: 602. —Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265, p. 27-29.

gracilis (Provancher). Canada, Maine, N. H., Mass., Wis., Minn., Oreg., Calif. Host: Acteris variana (Fern.), Archips sp., Choristoneura fumiferana (Clem.), Coleotechnites

apicitripunctella (Clem.), C. milleri (Busch), C. piceaella Kearf., C. starki (Freem.), Dioryctria reniculella (Grote), Eucordylea ducharmei Freem. Eubadizon gracilis Provancher, 1880. Nat. Canad. 12, 171. 9.

Genus MICROTYPUS Ratzeburg

Microtypus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 47. Type-species: Microtypus wesmaelii Ratzeburg. Monotypic.

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 264-266 (cat. World spp.). dioryctriae Rohwer. Calif. Host: Dioryctria auranticella (Grote).

Microtypus dioryctriae Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 227. 9, 8.

Genus ORGILUS Haliday

Orgilus Haliday, 1833. Ent. Mag. 1: 262.

Type-species: Microdus obscurator Nees. Monotypic. Ischius Wesmael, 1837. Nouv. Mem. Acad. Sci. Bruxelles 10: 20.

Type-species: Microdus obscurator Nees, Desig, by Muesebeck and Walkley, 1951. Macropalpus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 56.

Type-species: Eubadizon leptocephalus Hartig. Monotypic.

Oresimus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 123.

Type-species: Eubadizon maculiventris Cresson, Monotypic,

Orgilomorpha Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 129. Type-species: Ganychorus gelechiae Ashmead. Monotypic.

Orgilus subg. Ischiolus Hellen, 1958. Soc. Fauna Flora Fennica, Fauna Fennica 4, p. 34. Type-species: Microgaster rugosus Nees. Monotypic.

Species are endoparasites of lepidopterous larvae.

Revision: Muesebeck, 1970. Smithsn. Contrib. Zool., n. 30, 104 p. (No. Amer. spp.).

Taxonomy: Shenefelt, 1970. Hym. Cat., part 5, p. 252-263 (cat. World spp.).

Genus STANTONIA Ashmead

Stantonia Ashmead, 1904. U. S. Natl. Mus., Proc. 28: 146.
Type-species: Stantonia flava Ashmead, Monotypic.

Mimagathis Enderlein, 1905. Zool. Anz. 28: 450.

Type-species: Mimagathis ashmeadi Enderlein. Desig. by Viereck, 1914.

Taxonomy: Muesebeck, 1970. Smithsn. Contrib. Zool., n. 30, p. 1.—Shenefelt, 1970. Hym. Cat., part 5, p. 263-264, 266-268 (cat. World spp.).

carpocapsae Muesebeck. Va., N. C., Ky., Tex. Host: Desmia funeratis (Hbn.), Eustixia pupula Hbn., Harrisina americana (Guer.), Laspeyresia pomonella (L.).

Stantonia carpocapsae Muesebeck, 1938. Ent. Soc. Wash., Proc. 40: 90. 9.

UNPLACED TAXON OF BLACINAE

Blacus(?) longicaudus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 133. 9.

SUBFAMILY NEONEURINAE

Species in this small group are internal parasites of ants and are rarely collected.

Revision: Muesebeck, 1922. U. S. Natl. Mus., Proc. 61 (15): 3-6 (No. Amer. spp.).

Genus ELASMOSOMA Ruthe

Elasmosoma Ruthe, 1858. Berlin. Ent. Ztschr. 2: 7.

Type-species: Elasmosoma berolinensa Ruthe. Monotypic.

Paramirax Ashmead, 1895. Ent. Soc. Wash., Proc. 3: 281.

Type-species: Paramirax schwarzi Ashmead. Monotypic.

Revision: Huddleston, 1976. Mus. Natl. Hung., Ann. Hist.-Nat. 68: 215-225.

bakeri Ashmead. Va., Iowa, Colo., N. Mex., Idaho, Calif.

Elasmosoma bakeri Ashmead, 1895. Ent. Soc. Wash., Proc. 3: 282. d.

pergandei Ashmead. Ont. s. to D. C.; N. Dak., Kans., Colo., Wash.; Mongolia. Host: Camponotus castaneus (Latr.), Formica integra Nyl., F. subsericea Say.

Elasmosoma pergandei Ashmead, 1895. Ent. Soc. Wash., Proc. 3: 283. \cong .

petulans Muesebeck. Md., Ohio, Wyo. Host: Formica rubicunda Emery.

Elasmosoma petulans Muesebeck, 1941. Brooklyn Ent. Soc., Bul. 36: 200. 9.

schwarzi (Ashmead). Pa., Md., D. C., Ga., Ind. Host: Formica schaufussi Mayr, Polyergus lucidus Mayr.

Paramirax schwarzi Ashmead, 1895. Ent. Soc. Wash., Proc. 3: 283. 9.

vigilans Cockerell. Wis., Colo. Host: Formica subpolita Mayr.

Elasmosoma vigilans Cockerell, 1909. Ent. Soc. Wash., Proc. 10: 168. 9.

Genus NEONEURUS Haliday

Neoneurus Haliday, 1838. Ent. Mag. 5: 213. No species included.

Type-species: Neoneurus halidaii Marshall. Subsequent monotypy. First included species by Marshall. 1897. Ent. Mon. Mag. 8: 149.

Ecclites Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 244.

Type-species: Ecclites clypeatus Foerster. Orig. desig.

One undescribed species occurs in North America.

SUBFAMILY EUPHORINAE

This is the most specialized group of the Braconidae. Although the adult and larval morphology is rather homogenous, the subfamily can be divided into two groups from the viewpoint of biology: the Meteorini, most of which are parasites of lepidopterous larvae, and the Euphorini and Cosmophorini, which are parasites of nymphs and adult insects of various orders. Tobias (1965, 1966) has studied this group and included several other subfamilies and genera. However, his arrangement apparently groups together some rather unrelated elements and is, therefore, not followed in this catalog.

Revision: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, 38 p. (World genera, No. Amer. spp.).

Taxonomy: Tobias, 1965. Ent. Obozr. 44: 841-865. — Tobias, 1966. Ent. Obozr. 45: 612-633 (key to World genera). — Shenefelt, 1969. Hym. Cat., part 4, p. 4-137 (cat. World spp.).

TRIBE METEORINI

Genus METEORUS Haliday

Perilitus subg. Meteorus Haliday, 1835. Ent. Mag. 3: 24.

Type-species: Ichneumon pendulator Latreille. Desig. by Westwood, 1839.

Protelus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 253.

Type-species: Bracon chrysophthalmus Nees. Orig. desig. Saprotichus Holmgren, 1868. Eug. Resa I, Zool. I, Ins., p. 430.

Type-species: Saprotichus chinensis Holmgren. Desig. by Viereck, 1914.

Pachuthecus Cameron, 1912, Soc. Ent. 27: 84.

Type-species: Pachythecus ruficeps Cameron. Desig. by Viereck, 1914.

Most species are endoparasites of larvae of Lepidoptera, but a few parasitize larvae of Coleoptera.

Revision: Muesebeck, 1923, U. S. Natl. Mus., Proc. 63: 1-44 (No. Amer. spp.).

Taxonomy: Tobias, 1966. Ent. Obozr. 45: 615-617. —Shenefelt, 1969. Hym. Cat., part 4, p. 48-101 (cat. World spp.).

Meteorus notodoutae Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 57.

TRIBE EUPHORINI

Members of this tribe are chiefly endoparasites of adult insects, but the species of some groups parasitize nymphs of Heteroptera and Psocoptera.

Biology: Muesebeck, 1963. Ent. Soc. Wash., Proc. 65: 306. — Tobias, 1965. Ent. Obozr. 44: 841-865.

Genus ARIDELUS Marshall

Aridelus Marshall, 1887. Ent. Soc. London, Trans., p. 66.

Type-species: Aridelus bucephalus Marshall. Monotypic.

Helorimorpha Schmiedeknecht, 1907. Hym. Mitteleuropas, p. 523.
Type-species: Helorimorpha egregia Schmiedeknecht. Monotypic.

Stictometeorus Cameron, 1909. Soc. Ent. 24: 9.

Type-species: Stictometeorus rufus Cameron. Monotypic.

Erythrometeorus Cameron, 1911. Timehri (Ser. 3) 1: 317.

Type-species: Erythrometeorus reticulatus Cameron. Monotypic. Scipolabia Enderlein, 1920. Arch. f. Naturgesch. 84 (A) (11): 220.

Type-species: Scipolabia reticulata Enderlein. Orig. desig.

Species of this genus are parasites of nymphs and adults of Pentatomidae.

Revision: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 6-8 (No. Amer. spp.). —Papp, 1965. Acta Zool. Hung. 11: 181-201 (World spp.).

Taxonomy: Shenefelt, 1969. Hym. Cat., part 4, p. 11-15 (cat. World spp.).

fisheri (Viereck). Pa. s. to Ga., w. to Kans. and Tex. Host: Euschistus servus euschistoides (Voll.).

Helorimorpha fisheri Viereck, 1909. Ent. News 20: 290. 9, 8.

melanderi (Brues). Mass., N. Y., Pa., Md., Mich., Tenn.

nigrithorax Muesebeck. Conn., Va., S. C., Tenn., Tex.

Aridelus nigrithorax Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 8. 9.

Genus CHRYSOPOPHTHORUS Goidanich

Chrysopophthorus Goidanich, 1948. Ist. Ent. Univ. Bologna, Bol. 17: 83.

Type-species: Chrysopophthorus chrysopimaginis Goidanich. Orig. desig.

Parasitic on adults of Chrysopa.

Revision: Mason, 1964. Canad. Ent. 96: 1005-1017 (World spp.).

Taxonomy: Shenefelt, 1969. Hym. Cat., part 4, p. 29-30 (cat. World spp.).

americanus Mason. Mass., N. Y., Md., Va., Ohio, Mich., Ill., Tenn., Ark., La., Ariz., Calif. Host: Chrysopa carnea Stephans.

Chrysopophthorus americanus Mason, 1964. Canad. Ent. 96: 1012. 9, 8.

Genus CRYPTOXILOS Viereck

Cryptoxilos Viereck, 1911. U. S. Natl. Mus., Proc. 40: 180.

 ${\bf Type\text{-}species:}\ Cryptoxilos\ dichromorphus\ {\bf Viereck.}\ {\bf Orig.}\ {\bf desig.}$

Meager host records indicate species are parasites of adult Scolytidae.

Taxonomy; Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 9-10. —Shenefelt, 1969.

Hym. Čat., part 4, p. 30 (cat. World spp.). convergens Muesebeck. D. C., W. Va., Va., N. C. Host: *Phlocotribus frontalis* (Oliv.).

Euphorus phloeotribi Ashmead, 1893. In Chittenden, U. S. Dept. Agr., Insect Life 5: 249. Nomen nudum.

Cryptoxilos convergens Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 9. 9, 8.

Genus EUPHORIELLA Ashmead

Euphoriella Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 116.
Type-species: Labeo incertus Ashmead. Orig. desig.

Parasites of Psocoptera. In all known examples, the early instar nymph is parasitized and the mature parasite larva emerges from a mature host nymph or adult.

Revision: Loan and New, 1972 (1971). Ent. Soc. Ont., Proc. 102: 92-108 (No. Amer. spp.).

Taxonomy: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 25-27 (some No. Amer. spp.). —Shenefelt, 1969. Hym. Cat., part 4, p. 34-35 (cat. World spp.).

criddlei Loan and New. Ont.

pallidifacia Loan and New. Que.

Euphoriella pallidifacia Loan and New, 1972 (1971). Ent. Soc. Ont., Proc. 102: 104. 9, 3. solidaginis Loan and New. Ont.

Euphoriella solidaginis Loan and New, 1972 (1971). Ent. Soc. Ont., Proc. 102: 100. 9, 8.

sommermanae Muesebeck. Conn. Host: Anomopsocus amabilis (Walsh).

Euphoriella sommermanae Muesebeck, 1956. Ent. Soc. Wash., Proc. 58: 148. 9, 3.

Biology: Sommerman, 1956. Ent. Soc. Wash., Proc. 58: 149-152 (lists numerous species of nymphal and adult psocids from which she reared Hymenoptera, probably braconids, but only the one species listed above was definitely associated with Euphoriella sommermanae.).

Genus HOLDAWAYELLA Loan

Holdawayella Loan, 1967. Ent. Soc. Amer., Ann. 60: 241.
Type-species: Holdawayella tingiphaga Loan. Orig. desig.

Parasitic on nymphs and adults of Tingidae, particularly the genus Corythucha Stal.

Biology: Loan, Gerber, and Reid, 1971. Canad. Ent. 103: 1273-1284.

juglandis Loan. Ont. Host: Corythucha juglandis (Fitch). This parasite is bisexual and apparently restricted to C. juglandis on Juglans sp.

Holdawayella juglandis Loan, 1971, Canad. Ent. 103: 1274. ♀, ♂.

tingiphaga Loan. Ont. Host: Corythucha coryli O. and D., C. heidemanni Drake, C. pruni O. and D., C. ulmi O. and D. This parasite is parthenogenetic and shows an apparent field preference for C. heidemanni.

Holdawayella tingiphaga Loan, 1967. Ent. Soc. Amer., Ann. 60: 241. 9.

Genus LEIOPHRON Nees

Leiophron Nees, 1818. Nova Acta Acad. Leop. Carol. 9: 103. No species included. Type-species: Leiophron apicalis Curtis. Desig. by Viereck, 1914. Desig. from three species first included by Haliday, 1833, Ent. Mag. 1: 263.

Euphorus Nees, 1834. Hym. Ichn. Aff. Monog, v. 2, p. 360.
Type-species: Euphorus pallicornis Nees. Monotypic.

Euphoriana Gahan, 1913. U. S. Natl. Mus., Proc. 46: 433.

Type-species: Euphoriana uniformis Gahan. Orig. desig.

Parasitic on nymphs of Miridae.

Revision: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241: 28-33 (some No. Amer. spp.).

-Richards, 1967. Roy. Ent. Soc. London, Trans. 119: 171-186 (some Eur. spp.).

tuberculatus (Muesebeck), N. H., Ky., Ga., Fla.

Euphorus tuberculatus Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 31. 9, 8.

uniformis (Gahan). Widely distributed in U. S. Host: Lygus elisus Van Duzee, L. hesperus Knight, L. lineolaris (P. de B.), L. pratensis (L.).

Euphoriana uniformis Gahan, 1913. U. S. Natl. Mus., Proc. 46: 433. ♀, ♂.

Biology: Clancy and Pierce, 1966. Jour. Econ. Ent. 59: 853-858.

Genus MICROCTONUS Wesmael

Microctonus Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 54.
Type-species: Perilitus aethiops Nees. Desig. by Foerster, 1862.

Gamosecus Provancher, 1880. Nat. Canad. 12: 167.

Type-species: Gamosecus mellinus Provancher. Desig. by Viereck, 1914.

Parasitic on adult Coleoptera, particularly Chrysomelidae and Curculionidae.

Revision: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241: 14-20 (some No. Amer. spp.).

Taxonomy: Loan, 1969. Ent. Soc. Wash., Proc. 71: 404-416 (key to No. Amer. spp.).
 —Shenefelt, 1969. Hym. Cat., part 4, p. 101-115 (cat. World spp.).
 —Loan, 1975.
 Entomophaga 20: 31-41 (Haliday types).

Biology: Smith, 1953. Ohio Jour. Sci. 53: 173-176 (host list). —Loan, 1969. Ent. Soc. Wash., Proc. 71: 409-410 (host list).

aethiopoides Loan. Maine s. to Va., w. to Ont. and Ohio; Calif.; Europe. Introduced from France. Host: Hypera meles (F.), H. nigrirostris (F.), H. postica (Gyll.), H. rumicis (L.), Sitona crinitus Hbst., S. hispidulus (F.).

Microctonus aethiopoides Loan, 1975. Entomophaga 20: 33. 2, 3. According to Loan (1975), this species has been incorrectly identified as aethiops (Nees); most literature on aethiops in North America apparently refers to aethiopoides Loan.

Taxonomy: Fuester, 1970. Ent. Soc. Amer., Ann. 63: 1777-1778 (larval distinction).

Biology: Loan and Holdaway, 1961. Canad. Ent. 92: 1057-1079. —Coles and Putler, 1963. Jour. Econ. Ent. 56: 609-610. —Brunson and Coles, 1968. U. S. Dept. Agr., Prod. Res. NOMEN NUDUM IN MICROCTONUS WESMAEL

Microctonus dorsalis Ashmead, 1895. In Slosson, Ent. News 6: 317.

Genus MYIOCEPHALUS Marshall

Myiocephalus Marshall, 1897. Iu Andre, Spec. Hym. Eur. Alg., v. 5 bis, p. 218. Type-species: Microctonus boops Wesmael. Monotypic.

Spilomma Morley, 1909. Ent. Monthly Mag. 45: 211.

Type-species: Spilomma falconivibrans Morley. Monotypic.

Hosts for this genus are not known, but one European species was associated with nests of the ant genus Formica.

Taxonomy: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241: 21. —Shenefelt, 1969. Hym. Cat., part 4, p. 115-116 (cat. World spp.).

boops (Wesmael). Holarctic.

Microctonus boops Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 59. 9. Gamosecus laticeps Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 126. 9. Aphidius hedini Fahringer. 1929. Arkiv. fur Zool. 21 (A): 2. 3.

Taxonomy: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 22. —Stary, 1959. Beitr. Ent. 9: 187-188.

Genus PERILITUS Nees

Perilitus Nees, 1818. Nov. Acta Acad. Caes. Leop. Car. 9: 302.

Type-species: Bracon ratilis Nees. Desig. by Westwood, 1840.

Dinocampus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 252.

Type-species: Bracon terminatus Nees. Orig. desig.

Species in this genus are parasitic on adult Coleoptera, particularly Coccinellidae and Chrysomelidae. Tobias (1965) treats Dinocampus as a distinct genus.

Taxonomy: Muesebeck, 1936. U. S. Dept. Agr., Misc. Pub. 241, p. 11-13 (No. Amer. spp.).
—Tobias, 1965. Ent. Obozr. 44: 842 (restored *Dinocampus*). —Shenefelt, 1969. Hym. Cat., part 4, p. 30-33, 117-122 (cat. World spp.).

Biology: Jackson, 1928. Zool. Soc. London, Proc. 1928: 597-630 (biol. of rutilis (Nees) in Europe). —Smith, 1953. Ohio Jour. Sci. 53: 175-176 (host list).

coccinellae (Schrank). Cosmopolitan. Host: Adonia variegata (Goeze), Coccinella californica Mann., C. novemnotata Hbst., C. quinquepunctata L., C. septempunctata L., C. trifascicta juliana Muls., Coleomegilla maculata fuscilabris (Muls.), C. m. maculata (DeGeer), C. m. lengi Timb., Cycloneda sanguinea (L.), Halyzia quattwordecimguttata (L.), Hippodamia convergens Guer.

Ichneumon coccinellae Schrank, 1802. Fauna Boica, v. 2, p. 310. 9.

Bracon terminatus Nees, 1812 (1811). Mag. Gesell. Naturf. Freunde Berlin 5: 26. $\,^{\circ}$, $\,^{\circ}$. Euphorus sculptus Cresson, 1872. Canad. Ent. 4: 227. $\,^{\circ}$.

Centistes americana Riley, 1888. U. S. Dept. Agr., Insect Life 1: 103. 9.

Biology: Cushman, 1913. Ent. Soc. Wash., Proc. 15: 153-155. —Stich, 1929. Ztschr. f. Wiss. Insektenbiol. 24: 91-95. —Ibrahim, 1955. Soc. Ent. d' Egypte, Bul. 39: 414-416. —Hudon, 1959. Canad. Ent. 91: 63-64. —Walker, 1961. Ent. Monthly Mag. 97: 240-244. —Ford, 1971. Ent. Gaz. 22: 2. —Richerson and DeLoach, 1972. Ent. Soc. Amer., Ann. 65: 834-839. —Benton and Crump. 1975. N. Y. Ent. Soc., Jour. 33: 60-63.

pyri (Viereck), Conn., N. J.

TRIBE COSMOPHORINI

Host records indicate that species are solitary endoparasites of adult Coleoptera. This tribe is composed of one Holarctic genus which has been placed in various groups, including its own subfamily. Most authors have placed it in the Euphorinae where it probably represents the most highly specialized group of the Braconidae.

Genus COSMOPHORUS Ratzeburg

Cosmophorus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 71.

Type-species: Cosmophorus klugii Ratzeburg. Monotypic. Cosmophorus subg. Cosmophorinus Viereck, 1925. Canad. Ent. 57: 73.

Type-species: Cosmophorus hopkinsii Ashmead. Desig. by Muesebeck and Walkley, 1951.

Revision: Hedqvist, 1955. Ent. Tidskr. 76: 92-98 (Eur. spp.). —Capek, 1958. Acta Ent. Mus. Natl. Pragae 32: 151-169 (Eur. spp.).

Family APHIDIIDAE

By PAUL M. MARSH

The family Aphidiidae is the only group in the parasitoid Hymenoptera (other than the chalcid Aphelininae genera Aphelinus, Mesidia and Mesidiopsis) which has aphids as its primary hosts. The family is closely related to the subfamily Euphorinae of the Braconidae and, until recently, has been classified as a subfamily of the Braconidae. However, most workers in this group classify the Aphidiidae as a distinct family, and I have chosen to follow this arrangement.

Two catalogs to the species of the World have recently been published: M. Mackauer and P. Stary (1967. Index of Entomophagous Insects; Hym. Ichneumonoidea, World Aphididae. Le Francois, Paris. 195 pp.), and M. Mackauer (1968. In Ferriere and van der Vecht (ed.), Hymenopterorum Catalogus (nova editio), part 3, Aphidiidae. Junk, The Hague. 103 pp.). Except for a few cases, I have followed the systematic arrangement of Mackauer (1968) in preparing the North American catalog which follows. Both catalogs mentioned above contain a complete list of references to taxonomy and biology and a complete list of aphid hosts for each species. In the North American catalog below, I have listed only selected references, and the reader is referred to the above publications for further references. Also, only those aphid hosts which occur in North America have been listed for each parasite species.

Revision: Gahan, 1911. Md. Agr. Expt. Sta., Bul. 152: 147-200 (No. Amer. forms). —Smith, 1944. The Aphidiinae of North America. Ohio State Univ. Contr. Zool. Ent. No. 6, xii + 154 pp. (No. Amer. forms).

Taxonomy: Stary, 1960. Acta Soc. Ent. Cech. 57: 238-252 (genera). — Mackauer, 1961. Beitr. z. Ent. 11: 96-154 (review British Museum types). — Mackauer, 1961. Beitr. z. Ent. 11: 792-803 (subfamilies, tribes, genera). — Mackauer, 1963. Canad. Ent. 95: 921-935 (review Baker types). — Mackauer and Stary, 1967. Index World Aphidiidae, pp. 1-195 (cat. World spp. and hosts). — Mackauer, 1968. Hym. Cat., part 3, pp. 1-103 (cat. World spp. and hosts). — Marsh, 1971. Ent. Soc. Amer. Ann. 64: 484-849 (key to No. Amer. genera).

Biology: Stary, 1966. Aphid Parasites of Czechoslovakia. Junk, The Hague. 242 pp. (particularly chapters VI-XIV, pp. 96-222 for a general summary of aphid parasite biology).

SUBFAMILY EPHEDRINAE

All species of this subfamily are solitary endoparasites of adult and larval aphids. Pupation is inside the mummified host aphid. The subfamily is cosmopolitan in distribution.

Genus EPHEDRUS Haliday

Aphidius subg. Ephedrus Haliday, 1833. Ent. Mag. 1: 261, 485. Type-species: Bracon plagiator Nees. Monotypic. Elassus Wesmael, 1835. Nouv. Mem. Acad. Sci. Bruxelles 9: 85.
Type-species: Aphidius parcicoruis Nees. Monotypic.

SUBFAMILY APHIDIINAE

All species are solitary endoparasites of larval and adult aphids, and pupation is inside the mummified host. The subfamily is cosmopolitan in distribution.

TRIBE APHIDIINI

SUBTRIBE LYSIPHLEBINA

Genus LYSIPHLEBUS Foerster

Genus LYSIPHLEBUS Subgenus LYSIPHLEBUS Foerster

Lysiphlebus Foerster, 1862. Naturh. Ver. Rheinlande, Verh. 19: 248.
Type-species: Bracon dissolutus Nees. Monotypic.

Members of the typical subgenus are not known in North America.

Genus LYSIPHLEBUS Subgenus ADIALYTUS Foerster

Adialytus Foerster, 1863. Naturh. Ver. Rheinlande, Verh. 19: 249. Type-species: Adialytus tenuis Foerster. Orig. desig.

The host range is apparently restricted to aphids in the subfamilies Chaitophorinae and Thelaxinae (Aphididae).

Taxonomy: Stary, 1960. Acta Soc. Ent. Cech. 57: 244 (redescription). —Stary, 1966. Aphid Parasites of Czechoslovakia, pp. 80-92 (Eur. spp., in Lysiphlebus). —Mackauer, 1968. Hym. Cat., part 3, pp. 23-24 (cat. World spp., host list). —Stary, 1975. Annot. Zool. Bot., n. 105, p. 1.9

viburnaphis (Fitch). N. Y. Considered as probably conspecific with testaceipes (Cresson) by Mackauer (1960. Portici Lab. Ent. Agr., Bol. 18: 253). Two syntypes in poor condition are in the U. S. National Museum.

Praon viburnaphis Fitch, 1855 (1854). Agr. Soc. State N. Y., Trans. 14: 841.

SUBTRIBE PROTAPHIDIINA

Genus CHAETOPAUESIA Mackauer

Chaetopauesia Mackauer, 1967. Entomophaga 12: 141.

Type-species: Chaetopauesia talis Mackauer. Orig. desig.

crassicornis (Ashmead). Ont.

Aphidius crassicornis Ashmead, 1891. Canad. Ent. 23: 5. d.

talis Mackauer, Ont.

Aphidius brevicornis Ashmead, 1891. Canad. Ent. 23: 6. 9. Nomen nudum.

Chaetopanesia talis Mackauer, 1967. Entomophaga 12: 142. 9.

Genus PAUESIA Quilis

Panesia Quilis, 1931. Eos 7: 67.

Type-species: Panesia albuferensis Quilis. Orig. desig.

Aphidius subg. Paraphidius Stary, 1958. Acta Faun. Ent. Mus. Natl. Pragae 3: 91. New name for Protaphidius Ashmead of authors, not Ashmead, 1900.

Type-species: Aphidius californicus Ashmead. Orig. desig.

The genus Panesia corresponds to Section II, Pinicolae, of the genus Aphidius Nees as defined by Haliday (1834. Ent. Mag. 2: 95). Prior to 1958, the species in Panesia were included in various genera besides Aphidius: Szepligeti (1904. In Wytsman, Gen. Ins., fasc. 22, p. 185) placed these species in the genus Coelonofus Foerster; Smith (1944. Aphidiinae of North America, pp. 37-49) placed them in Aphidius (Protaphidius) Ashmead; Coelonofus Foerster as used by Thompson (1895. Opusc. Ent. 20: 2334) is a mispelling of Coelonofus Foerster. Hosts are restricted to aphids of the subfamily Lachninae. P. albuferensis Quilis, 1931, type-species of the genus, is now considered to be a synonym of Aphidius unilachni Gahan, 1926.

Revision: Smith, 1944. Aphidiinae of North America, pp. 37-49 (No. Amer. spp.). —Stary, 1960. Acta Faun. Ent. Mus. Natl. Pragae 6: 5-44 (Eur. spp.). —Watanabe and Takada, 1965. Insecta Matsumurana 28: 1-17 (Jap. spp.).

Taxonomy: Fahringer, 1937. Festschr. E. Strand 3: 240-245 (key Eur. spp.). — Mackauer 1961. Beitr. z. Ent. 11: 106-108. — Mackauer, 1968. Hym. Cat., part 3, pp. 31-39 (cat. World spp.).

Biology: Mackauer and Stary, 1967. Index World Aphidiinae, pp. 48-58 (host list).

bicolor (Ashmead). N. J. s. to Fla.; Ohio, Wis. Host: Cinara cronartii T. and P., C. pergandei (Wilson), C. pini (L.), C. strobi (Fitch).

Aphidius bicolor Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 658. 9.

Aphidius (Protaphidius) scorpinicus Smith, 1944. Aphidiinae of North America, p. 45. 9, 8.

californica (Ashmead). Va., Ont., Ohio, S. Dak., Alta., B. C., Calif. Host: Schizolachnus piniradiatae (Davidson), S. parvus (Wilson).

Aphidius californicus Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 660. 9.

gillettei (Gahan). S. C., Ky., La., Ark., Colo. Host: Cinara sp.

Aphidius gillettei Gahan, 1911. Md. Agr. Expt. Sta., Bul. 152: 171. 9.

juniperaphidis (Gahan). Ohio, Colo., Idaho, B. C. Host: Cinara juniperi (DeG.), C. occidentalis (David.), C. pulverulens (G. and P.).

Aphidius juniperaphidis Gahan, 1911. Md. Agr. Expt. Sta., Bul. 152: 174. ♀, ♂.

macrogaster (Ashmead). Ont. Host: Cinara abieticola (Cholod.).

Aphidius macrogaster Ashmead, 1891. Canad. Ent. 23: 5. d.

nigrovaria (Provancher). Calif. Host: Cinara sp.

Aphidius nigrovarius Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 396. 9.

pinaphidis (Ashmead). Fla., La. Host: Cinara australis (Ashmead), C. longispinosa Tissot. Aphidius pinaphidis Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 659. Nomen nudum. Aphidius pinaphidis Ashmead, 1891. Canad. Ent. 23: 6. 9, δ.

ponderosae (Muesebeck). B. C., Calif. Host: Cinara sp.

Aphidius (Protaphidius) ponderosae Muesebeck, 1958. Ent. News 69: 141. 9, 8.

procephali (Ashmead). Pa., D. C., Va., N. C., Ohio, Minn., Nebr., Wash. Host: Cinara pergandei (Wilson). C. abieticola (Cholod.).

Aphidius procephali Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 659. d.

Aphidius (Protahpidius) prociphali Ashmead: Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 93. Unjustified emendation.

salignae (Watanabe). Western U. S. (teste Mackauer, 1968. Hym. Cat., part 3, p. 37). Host: Tuberolachnus salignus (Gmelin).

Aphidius salignae Watanabe, 1939. Insecta Matsumurana 13: 81. 9, 3.

takomaensis (Smith). Md., Va., N. C., Sask., Colo. Host: Cinara hottesi (G. and P.), C. ponderosae (Wms.).

Aphidius (Protaphidius) takomaensis Smith, 1944. Aphidiinae of North America, p. 46. 9,

varigata (Smith). Colo., B. C., Calif. Host: Cinara canatra H. and B., C. fornacula Hottes, C. hottesi (G. and P.).

Aphidius (Protaphidius) varigatus Smith, 1944. Aphidiinae of North America, p. 47. 9.

xanthothera (Smith). East. Canada, N. C., S. C., Ala., Ark., Okla. Host. Cinara carolina Tissot, C. pergandei (Wilson), C. pinea (Mord.), C. strobi (Fitch), C. watsoni Tissot. Apiditis (Protaphidius) xanthotherus Smith, 1944. Aphidiinae of North America, p. 48. ?

Aphidius (Protaphidius) xanthotherus Smith, 1944. Aphidinae of North America, p. 48. 4

Genus XENOSTIGMUS Smith

Aphidius subg. Xenostigmus Smith, 1944. Aphidiinae of North America, p. 36. Type-species: Aphidius bifasciatus Ashmead. Orig. desig.

bifasciatus (Ashmead). Canada, Md., Va., N. C., S. C., Fla., Nebr., Okla., Tex., Utah, Wash., Calif. Host: Cinara australis (Ashm.), C. carolina Tissot, C. hottsei (G. and P.), C. pseudotaxifoliae Palmer, C. taedae Tissot.

Aphidius bifasciatus Ashmead, 1891. Canad. Ent. 23: 6. ♀.

SUBTRIBE APHIDIINA

Genus EUAPHIDIUS Mackaner

Aphidius subg. Euaphidius Mackauer, 1961. Beitr. z. Ent. 11: 110.

Type-species: Aphidius pterocommae Ashmead. Orig. desig.

A small Holarctic genus whose host range is apparently restricted to Chaitophorinae and primitive Aphidinae, mainly *Pterocomma* species.

Taxonomy: Mackauer, 1961. Beitr. z. Ent. 11: 801 (raised to generic status).

cingulatus (Ruthe). Greenland, N. B., Mass., D. C., Mich., Ohio, Iowa, Utah, N. Mex., Calif.; Europe, Iran. Host: Pterocomma bicolor (Oest.), P. populeum (Kalt.), P. populifoliae (Fitch), P. salicis (L.), P. smithiae (Monell).

Aphidius cingulatus Ruthe, 1859. Stettin. Ent. Ztg. 20: 315. 9, 8.

Aphidius gregarius Marshall, 1872. Ent. Monthly Mag. 9: 123. 9, 8.

Aphidius lachni Ashmead, 1889 (1888). U. S. Natl. Mus., Proc. 11: 660. 9, 8.

Aphidius pterocommae Marshall, 1896. In Andre, Spec. Hym. Eur. Alg., v. 5, p. 578. 2.

setiger Mackauer. Canada; Europe. Host: Periphyllus lyropictus (Kessler), P. testudinaceus (Fernie).

Euaphidius setiger Mackauer, 1961. Portici Lab. Ent. Agr., Bol. 19: 273. 9, 3.

Genus APHIDIUS Nees

Incubus Schrank, 1802. Fauna Boica 2: 315. Suppressed by Internatl. Comn. Zool. Nomencl., Opinion 284, 1954.

Type-species: Ichneumon aphidum L. Monotypic.

Aphidius Nees, 1818. Nova Acta Acad. Caes. Leop. Car. 9: 302.

Type-species: Aphidius avenae Haliday. Desig. by Internatl. Comn. Zool. Nomencl., Opinion 284, 1954. Theracmion Holmgren, 1872. Ofvers. K. Vet. Akad., Forh. 29: 99.

Type-species: Theracmion arcticus Holmgren. Monotypic.

A cosmopolitan genus of which many species are of doubtful identity. Host range is wide but mainly in the Aphididae.

montanus Ashmead. Colo.

Aphidius montanus Ashmead, 1890. Colo. Biol. Assn., Bul. 1: 20. 3.

nigripes Ashmead. N. B. s. to N. C., w. to Minn. and Kans.; B. C., Wash., Calif. Host: Acyrthosiphon solani (Kalt.), Amphorophora sp., Aphis nasturtii Kalt., Dactynotus ambrosiae (Thomas), D. erigeronensis (Thomas), Macrosiphum albifrons Essig, M. avenae (F.), M. creelii Davis, M. euphorbiae (Thomas), M. liriodendri (Monell), M. rosae (L.), Myzus persicae (Sulzer). Exact host range not established, but apparently a preference for Macrosiphum spp. Earlier associations of this species under the name pulcher Baker or ervi pulcher as a parasite of the pea aphid apparently all refer to pisivorus Smith. Specimens used by Smith (1941) to describe rosae Haliday in No. Amer. are actually nigripes.

Aphidius nigripes Ashmead, 1901. N. Y. State Mus., Bul. 47: 588. S. Aphidius pulcher Baker, 1909. Pomona Jour. Ent. 1: 24. Q. N. syn.

Genus DIAERETIELLA Stary

Diaeretiella Stary, 1960. Acta Soc. Ent. Cechosl. 57: 242. Type-species: Aphidius rapae M'Intosh. Orig. desig.

Prior to 1960, species in *Diaeretiella* were included mainly in *Aphidius* Nees and *Diaeretus* Foerster. At the present, the genus is composed of one cosmopolitan species.

Taxonomy: Stary, 1960. Acta Soc. Ent. Cechosl. 57: 238-239, 242-243. — Stary, 1961. Acta Ent.
 Mus. Natl. Pragae 34: 383-397. — Mackauer, 1961. Beitr. z. Ent. 11: 801. — Mackauer, 1964.
 Beitr. z. Ent. 14: 53-58.

rapae (M'Intosh). Cosmopolitan. Host: Aphis craccivora Koch, A. fabae Scop, A. gossypii Glover, A. nasturtii Kalt., A. pomi DeG., A. rumicis L., Brachycolus asparagi Mord, Brachycoudus helichrysi (Kalt.), B. rumexicolens (Patch), Brevicoryne brassicae (L.), Capitophorus sp., Dactynotus sp., Diuraphis noxius (Mord.), Hayhurstia atriplicis (L.), Hyadaphis foeniculi (Pass.), Lipaphis erysimi (Kalt.), Macrosiphum euphorbiae (Thomas), Myzus certus (Wlkr.), M. persicae (Sulzer), Protaphis sp., Rhopalosiphum fitchii (Sand.), R. maidis (Fitch), R. padi (L.), Schizaphis graminum (Rond.). This is one of the more important economic species in the Aphididae. Although it has a wide host

range, including most species of Aphididae but with a preference for the

Myzus-Brachycaudus series, it is largely responsible for the natural control of its main host, the cabbage aphid, Brevicoryne brassicae (L.).

Trioxys (Acanthocaudus) tissoti Smith, 1944. Aphidiinae of North America, p. 96. 9, 8.

Family HYBRIZONTIDAE

By Paul M. Marsh

The one genus and two species which comprise this family in North America were placed in the family Braconidae under the subfamily Paxylommatinae in the original catalog. Authors who have published on this group are nearly evenly divided as to whether it should be given family or subfamily status, but I have chosen to treat it as a distinct family.

These wasps are relatively rare and their host relationships have not been satisfactorily established. They are found associated with ants and may be ant parasites; however, one record suggests parasitism of aphids.

Family ICHNEUMONIDAE

By ROBERT W. CARLSON

Most of the members of this large family are parasites of holometabolous insects. A few species or groups of species parasitize spiders (egg sacs, spiderlings, or adults) or egg sacs of pseudoscorpions. No identified Ichneumonidae are known to be primary parasites of paurometabolous insects (cf. Clancy and Pierce, 1966). Further discussion of host relations is deferred to the introductions pertaining to genera or supergeneric categories. General information on the biology, host selection, or ecology of Ichneumonidae can be found in the discussions of Cushman (1926), Clausen (1940), Townes and Townes (1951, p. 184-185), and Townes (1958,1962). Additional biological references were cited by Sachteben (1962c).

According to the estimate of Townes (1968, p. 6) the Nearctic fauna of Ichneumonidae includes slightly more than 8000 species, only 35 percent of which had been described. Of the 27 currently recognized subfamilies, only the Agriotypinae and Collyriinae have no species native to North

America (one species of Collyriinae was introduced from Europe).

I have attempted to include most of the species known to have been released in North America for purposes of biological control. In a few cases, I knew from voucher material or had other reasons to suspect that the identifications which had been published in reference to releases were incorrect. When I lacked the information necessary for correcting the identifications of such species, they were excluded from the catalog. None of the species thus excluded are known to be established.

Lists of species synonymy for species not confined to America north of Mexico are as complete as I could make them. No synonyms were intentionally excluded by virtue of having

been described from areas outside the geographic scope of this catalog.

Distributions given for species are self-explanatory. In the catalog of Townes and Townes (1951) numerous species which are not particularly common in collections, and some which actually are rather scarce, were cited as having distributions such as "transcont. in Transit. and U. Austr. Zones." Except in a very few cases, distributions of the latter type have been replaced by lists of states and provinces or by bracketing distributions such as: Que. w. to s. B. C., s. to n. Fla., N. Mex., and s. Calif.

In giving the geographic distributions of genera or supergeneric categories, and in some other discussions, I have used the terms Nearctic and Neotropic in reference to distributions in America north of Mexico and south of the United States, respectively. No alternatives were feasible.

Lists of hosts are arranged so that names of taxa belonging to the same family are in alphabetical sequence. The names of the families themselves would have been a very worthwhile addition, and their inclusion would not have been incompatible with the process of computerization. It is hoped that inclusion of them will be allowed in future editions of the catalog.

Although he did not refer to them by number (except on p. 49), Townes, (1969, p. 15-18) discussed the manner in which Opinions 157 and 159 of the International Commission on Zoological Nomenclature came to be published by Hemming (1945). I have looked into the various

aspects of these cases and have found that Townes' statements about their history are correct (see Hemming, 1943). I also learned that Opinion 135, which pertains to suppression of the names of Jurine which were validated in 1801 (including Cryptus), has no validity on the same grounds. However, in 1973 I discovered that Opinion 135 is of no consequence with respect to the homonymy of Cryptus Fabricius (1804) because the latter would be preoccupied by Cryptus Panzer (1804) if Cryptus Jurine (1801) had been suppressed. The fact that Panzer's usage of the name Cryptus predates the Fabrician usage is demonstrated by Fabricius' (1804, p. 35) citation of fascicle 88 of Panzer's "Faunae insectorum Germanicae", wherein Panzer (1804) validated the name Cryptus segmentarius, which is the type-species of Cryptus Jurine by subsequent monotypy and which is a synonym of Arge rustica (Linnaeus). After pondering this matter for a considerable time. I decided to use the name Cryptus Fabricius in the present catalog in spite of its homonymy for the following reasons: (1) the name Cryptus Jurine was never applied more than sparingly to sawflies of the genus Arge for a variety of reasons, the principal ones being the obscurity of the publication in which Cryptus Jurine (1801) appeared and the fact that most authors thought the name had been validated only by Jurine (1807) and treated it either as a junior homonym of Cryptus Fabricius or a junior synonym of Hylotomma (itself a junior synonym of Arge); (2) neither Cryptus Jurine nor Cryptus Panzer are likely to be hereafter treated as available names by specialists working on Symphyta; (3) the historic significance of the names Cryptus and Cryptinae for ichneumonology is secondary only to that of Ichneumon and Ichneumonidae.

Fitton and Gauld (1976, p. 249) apparently made independent discovery of the Fabrician citation of Panzer (1804, fasc. 88), and opted in favor of the group name Hemitelinae. I am not certain that the latter will gain wide acceptance among ichneumonid workers, a question which also influenced my decision in favor of Cryptus and Cryptinae. In any event, the paper of Fitton and Gauld did not appear until after the computerization of my manuscript for the Cryptinae, and it is not feasible for me to now alter my decision.

I have applied the names *Ichneumon* and *Pimpla* according to the type-species designations of Curtis (1828 and 1839, respectively). I regard application of the names *Pimpla* Fabricius (1804) and Pimplini to *Coccygomimus* and Echthromorphini, respectively (in accordance with the illegal Opinion 159), as a nomenclatural absurdity of incredible magnitude. Fabricius placed no species of *Coccygomimus* in *Pimpla*; he invariably placed them in *Cryptus* in 1804. Thus *Ichneumon instigator* Fabricius (the type-species of *Pimpla* according to Opinion 159) was not one of the species which Fabricius had included in *Pimpla*.

I regard *Ephialtes* Schrank (1802, p. 316) as an available name. Schrank's partial misidentification of the type-species (see his p. 269-270 description of *Ichneumon compunctor* linnaeus) makes it a case analogous to that of his genus *Paniscus* (see introductory discussion of *Netelia*).

except for the fact that Paniscus is suppressed as a junior synonym of Ophion.

Questions of synonymy of supergeneric names have here been decided in favor of the oldest available supergeneric names having type-genera which are currently valid (i.e. not suppressed as junior objective or subjective synonyms). The resultant usage is largely in agreement with that in the paper by Fitton and Gauld (1976) on the ichneumonid supergeneric names other than those of Ichneumoninae. The most noteworthy differences between their usages and mine pertain to Ephialtini (not used here). Pimplini, and names based upon Cryptus.

The following is a discussion of some of the most important publications on Ichneumonidae pertinent to studies of the Nearctic fauna; to a limited extent, some of the authors are also discussed. Biographical data on these and additional authors who published on Ichneumonidae

were compiled by Sachtleben (1962b, p. 720-726).

The first real specialist to study Ichmeumonidae was Gravenhorst (my reference to him as an ichneumonid specialist should not be misconstrued; he is also well known for his taxonomic work on certain Coleoptera, and he published on subjects other than entomology). In 1815 Gravenhorst published the first sizeable taxonomic paper that dealt strictly with Ichneumonidae. In 1819 he published a conspectus (i.e. outline) of the 1829 work that is the foundation for modern ichneumonology. The appearance of the latter work was preceded by Gravenhorst's (1820) paper on the ichneumonides of the Italian Piedmont and by Thunberg's (1822, 1824) revision of "Ichneumonidea," (Ichneumonidea, Gasteruptiidae, and Aulacidae). Thunberg's revision was based largely upon Fabricius (1804), but the nine generic names which Fabricius had proposed for the species Thunberg treated were suppressed by Thunberg as synonyms of Ichneumon. This resulted in much homonymy, and Thunberg proposed many replacement names. Fortunate-

ly, most of the replacement names are unavailable by virtue of having been proposed to replace senior homonyms.

Gravenhorst (1829), on the other hand, attempted to redefine the Fabrician genera of Ichneumonidae and give them phyletic meaning by excluding all but a few of the originally included species and adding others. With the exception of Gelis Thunberg (1827), Gravenhorst also utilized the generic names which had been proposed by other authors who had preceded him. Although Gravenhorst's generic nomenclature was not altogether sound with respect to present rules (see Townes, 1969, p. 10), many of the nomenclatural problems which surfaced in the early part of the 20th Century were not caused by anything Gravenhorst did (although he is culpable in the cases of Bassus and Xorides), and could not have been avoided by anything he could have foreseen. In the case of Pimpla, Gravenhorst (1819) did not indicate the precise group of species for which he would use the name in his familial (our generic) sense; therefore, Curtis (1828) could not have known that his choice of type-species would not agree with Gravenhorst's (1829) usage.

Townes (1959) described the general condition of the Gravenhorst collection. Additional infor-

mation on the collection and its labeling were published by Townes (1965).

Foerster (1868) was the next person to publish a major work dealing with the entire family. All of the 489 genera newly described in his 1868 paper had no included species. Foerster intended that his generic names would apply to the European fauna, but the first included species, European or otherwise became the only ones eligible for selection as type-species. In many cases the type-species fixation was by subsequent monotypy (Internatl. Code Zool. Nomencl., art. 69 [A] [ii] [2]). Perkins (1962) dealt with the type-species of the Foerster genera, and except for the few cases in which corrections are made here or elsewhere, or in which species have been referred to Foerster genera since 1962, the type-species I have cited are those cited by Perkins.

Holmgren, Cresson, and Provancher were contemporaries who between 1855 and 1890 published many descriptions of new species of Ichneumonidae, and, in the case of Holmgren. many new genera also. The majority of the new species described by Cresson are Nearctic. Cresson's (1887) synopsis of Hymenoptera of America north of Mexico included keys to the subfamilies and genera of Ichneumonidae and a catalog of the species and their synonyms. Cresson (1916) published a list of species he had described, and he indicated which single specimen was to be regarded as the type for each; thus he selected lectotypes for those cases in which he had described a species from more than one specimen. His 1916 paper also included a list of all the papers he had published on Hymenoptera, but there is no published list which excludes those that do not involve Ichneumonidae. Cresson's (1928) paper (published posthumously) on the types of other authors concerns only those to be found in the collection at the Academy of Natural Sciences of Philadelphia. Therefore, in cases where all the type material of a given species was not deposited at the A. N. S. P., Cresson's citations of individual specimens may not constitute lectotype selection. It is apparent, however, that they were accepted as such by Townes (1944, 1945) and in cases where only one syntype (or only one syntype from the locality indicated as the type locality) was deposited at the A. N. S. P., Townes may technically be the lectotype selector.

Provancher dealt mostly with the Fauna of Canada, most particularly with that of Quebec. He published most of his original descriptions in "le Naturaliste canadien," but in 1883 published a compilation of them. Additions and corrections to the ichneumonid parts of this 1883 compilation were published by Provancher (1886, 1888, 1889). Gahan and Rohwer (1917, 1918) selected lectotypes for many of Provancher's Hymenoptera (except bees). Barron (1975) restudied the Ichneumonidae in the Provancher collections. He located some types not found by Gahan and Rohwer and in some cases rejected lectotypes that Gahan and Rohwer had selected. In most cases, Barron's grounds for rejecting particular Gahan and Rohwer lectotypes seem valid, but in a number of the cases there was no proof that the Gahan and Rohwer lectotypes had not been syntypes. In those cases (which I discuss under the species in question) I have regarded the Gahan and Rohwer lectotypes as being valid. Barron discussed Provancher's life, collections., and methodology; he also tabulated Provancher's publications on Ichneumonidae (p. 414).

Holmgren dealt mainly with the fauna of Sweden, but did describe six species from California (Holmgren, 1869a) and seven from Greenland (Holmgren, 1869b, 1872). According to information published by Persson (1971) all of the California species were probably collected in the vicinity of San Francisco.

Thomson published on Ichneumonidae between 1783 and 1897, mostly in his "Opuscula en-

tomologica"; the latter has continuous pagination, but is in most other respects a serial publication, and in this catalog I have bibliographically treated it as such. Thomson was an important adopter of Foerster names. In adopting them, however, he often altered their terminations (see Perkins, 1962, p. 387-390). The Thomson spellings have most recently been treated as emendations (see Walkley, 1958, p. 57; Perkins, 1962, p. 387; Townes, 1969, p. 13-14), and I have cited them as such in this catalog. However, Thomson never cited the original spellings in any of these cases, and although it is obvious in most cases that his spellings were deliberate, they technically should be treated as lapses. Thomson was good at finding characters for distinguishing genera, and also seems to have been very talented at distinguishing closely related species. His ability in the latter respect, at least, seems to have been much greater than that of any of his contemporaries who worked on Ichneumonidae. The weaknesses in Thomson's work stem from the fact that he apparently never traveled to study the collections even of prior Scandinavian workers (e.g. Holmgren, Thunberg, Woldstedt), but instead ignored their names (i.e. in the case of Thunberg) or attempted to identify their species from their descriptions. Many of Thomson's errors in the identification of the species of others are being corrected in current papers.

Ashmead published on Ichneumonidae between 1888 and 1906. His 1900 treatment of the Ichneumonidae was hastily contrived and full of errors. It is based largely upon the generic keys of Foerster and, with respect to Ichneumonidae, is significant mostly for its fixation of some type-species and for the validation of new generic and specific names. Some of the names validated by Ashmead (1900) were discussed by Cushman (1942). Crawford (1900) published a list of Ashmead's entomological papers and an index to the generic names of Ashmead; there is

no published list of only those Ashmead papers which involve Ichneumonidae.

The ichneumonid part (1901-1902) of Dalla Torre's catalog of Hymenoptera is, for the most part, bibliographically accurate and nearly complete. Those inaccuracies which are found in his catalog appear to have resulted from the fact that he either did not have all of the primary literature available to him or did not have time to check it. He connot be faulted on either account, but those who can feasibly check his cataloging of older works probably would be wise in

doing so.

Viereck published a significant number of papers on Ichneumonidae and other Hymenoptera between 1902 and 1928, but is probably best known for his publications on the type-species of Ichneumonoidea (1914, 1921) and the Hymenoptera of Connecticut (1917, with other collaborating authors). His work on the ichneumonid type-species was based largely upon Dalla Torre's catalog; some of his oversights of first inclusions of species in ichneumonid genera of Foerster could have been avoided if he had studied Dalla Torre's catalog more carefully. Viereck was not a careful worker, however, and the characters he used for distinguishing what he called genera and species were poorly chosen. Consequently, his 1917 treatment of the Ichneumonidae in Hymenoptera of Connecticut has served only to befuddle or mislead those who have attempted to use it. Apparently, there is no published list of Viereck's publications.

Roman (Sweden) and Cushman (U. S. A.) were specialists who published numerous papers on Ichneumonidae over periods of time that were largely overlapping (1903-1940 and 1913-1947, respectively). I have cited below the four taxonomic papers of Cushman (1921 [with Gahan], 1922, 1928, 1942) which deal with Ichneumonidae in a more or less general fashion. A complete

listing of Cushman's publications was given by Townes (1957).

Roman (1912, 1932, 1936) published important papers on ichneumonid type specimens of Thunberg and Linnaeus. His papers on the Ichneumonidae of Greenland are some of the most recent ones on the subject; these and other papers on Greenland Ichneumonidae were cited by Sachtleben (1962c, p. 923). Sachtleben (1962a, p. 171-173) listed most of Roman's papers on Ichneumonidae.

The Nearctic catalog of Ichneumonidae by Townes (1944, 1945) differs from the present catalog in showing all the published generic combinations for each species and in citing type localities and type repositories. Those types of Viereck cited in that catalog as being at the Conn. Agr. Expt. Sta. have since been transferred to the U. S. Natl. Museum. Other corrections to the 1944-1945 catalog of Townes were given by Townes (1973, p. 359-369).

The Nearctic catalog of Townes and Townes (1951) did not cite either the nomina nuda which had been cited in synonymy by Townes (1944, 1945) or those he had left unplaced (1945, p. 768-770). The nomina nuda are reinserted here because they have some historic significance, that significance being greatest when they pertain to specimens which subsequently became types of valid names.

Short's (1959, 1970) study of final-instar larvae was more complete and detailed than that of Reirne (1941), and therefore seems to have had a greater impact upon the classification of Ichneumonidae. Although some specialists who work primarily with adults have recently incorporated larval studies into their taxonomic revisions, information about larvae has come chieftly from scientists, like Dr. Short, who are larval specialists. I believe that the information they have published has in some cases been misused by those who specialize in study of adult specimens. The latter sometimes accord as great a significance to structural characters of the head sclerites of final-instar larvae as to the sum total of the adult structural characters which have been studied. For example, Townes (1969, p. 28-29) based his assertion that Ichneumoninae and Cryptinae (=his Gelinae) are unrelated upon differences between the known larvae of the two groups. Townes believed the fact that "these two subfamilies ... resemble each other to a remarkable degree" ... "to be the result of hunting [for] hosts on foot," a habit shared by many members of both groups, but not all the members of either. The Ichneumoninae are internal pupal and larval-pupal parasites of Lepidoptera, while most of the Cryptinae are presumed to be external parasites of a variety of hosts, including Lepidoptera. The known larvae of these two groups differ accordingly. Because internal parasitism must evolve from external parasitism (or vise versa), I believe that it is illogical to regard the known larval differences as evidence indicating that the Ichneumoninae and Cryptinae are unrelated. I hope that this and similar questions are to be addressed in Dr. Short's revised and greatly expanded work on larvae which is nearly ready for publication (personal commun., J. R. T. Short, 1977).

Sachtleben's (1962a) bibliography of of Palearctic Ichneumonidae is an extremely valuable tool for those interested in the taxonomy or biology of Ichneumonidae. Additions and corrections to this bibliography were published by Sachtleben (1962b, p. 726-731), and Sachtleben (1962c) provided a set of subject indices to the bibliography (e.g. indices to papers on morphology, ecology, physiology, parasitization of individually listed hosts, various taxonomic categories, etc.). It seems likely that in compiling this set of papers Sachtleben would not have found time for verifying dates of publication; this seems to be borne out by my observation regarding dates for various papers of Holmgren, for some of which I have established dates (i.e. years) of publications.

tion later than those cited by Sachtleben.

Much new species synonymy was published in the catalogs of Townes, Townes, and Gupta (1961), Townes, Momoi, and Townes (1965) and Townes and Townes (1966, 1973); some improvements in generic and supergeneric classification were also made, particularly in the 1961, 1965, and 1966 catalogs. Many additional changes in classification were made by Townes (1969, 1970a, 1970b, 1971) in his treatment of the genera of the world (except Ichneumoninae). The fact that these works on the genera have been of great importance to the present catalog will be obvious from the fact that I have largely adopted Townes' arrangement of genera and supergeneric categories. However, the arrangement of the taxa in any classification is a superficial matter of secondary importance, and the ultimate value of Townes' volumes on the genera stems from the

great amount of new and old real information that they have brought together.

Townes' (1969) estimate of the number of extant ichneumonid species as slightly fewer than 60,500 is rather frequently cited in publication and conversation. In a recent conversation I was told of an anonymous coleopterist who has estimated the size of the Curculionidae to be "100,000 to 250,000" species, and I have also heard claims that the Noctuidae and Chalcidoidea may exceed the Ichneumonidae in size. The fact that no persons have yet assembled the collections or the knowledge of them to allow them to make size estimates of the Noctuidae, Chalcidoidea, or Curculionidae that they are willing to publish would seem to attest to the ability and dedication of both of the Towneses. Uncertainties about the absolute and relative sizes of the groups mentioned will outlive those presently wondering about them. However, our present speculations serve to remind us that the number of persons working on the various aspects of systematics and biology of the taxa in any large insect group is far fewer than the number which can possibly satisfy the demand for information about those taxa.

Revision: Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 14-79.

Genus SCAMBUS Subgenus ENDROMOPODA Hellen

Endromopoda Hellen, 1939, Notulae Ent. 19: 56.

Type-species: Pimpla melanopyga Gravenhorst. Orig. desig.

detritus (Holmgren). N. B. to s. B. C., s. to Ohio and Calif.; Europe. Host: Cephus cinctus Nort., C. pygmaeus (L.), Trachelus tabidus (F.).

Pimpla detrita Holmgren, 1860. Svenska Vetensk.-Akad. Handl. (ser. 4), 3(10): 23. 3, 9.

Biology: Salt, 1931. Bul. Ent. Res. 22: 519-526. - Holmes, 1953. Canad. Ent. 85: 339.

lithocolletidis (Ashmead). Calif. Host: Lithocolletis sp. This is a new subgeneric placement.
The host was reared from Grindelia robusta Nutt.

Pimpla lithocolletidis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 447. S.

productus Walley. N. S., s. to R. I., w. to Alaska and Calif.

Scambus (Endromopoda) productus Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 23. 3, 9.

rubescens Walley. Western N. Y., w. to Sask., s. to Kans. and Wyo.

Scambus (Endromopoda) rubescens Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 19. 3, 9.

Genus SCAMBUS Subgenus LISSOSCAMBUS Walley

Scambus subg, Lissoscambus Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 25.

Type-species: Scambus (Lissoscambus) arizonensis Walley. Orig. desig.

arizonensis Walley, Colo., Ariz.; Mexico.

Scambus (Lissoscambus) arizonensis Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 25. δ , φ .

Genus SCAMBUS Subgenus ATELEOPHADNUS Cameron

Ateleophadnus Cameron, 1905. Invertebrata Pacifica 1: 127.

Type-species: Ateleophadnus bicarinata Cameron. Monotypic.

deceptor Walley, Que., s. to N. Y., w. to B. C. and Colo.

Scambus (Ateleophadnus) deceptor Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 35. δ , \circ .

granulosus Walley. N. S., s. to S. C., w. to N. W. T. and Calif. Host: Mompha eloisella (Clem.). Scambus (Atelophadnus) granulosus Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 31. d, 9.

pterophori (Ashmead). Northern N. S., s. to S. C., w. to Alaska and Calif. Host: Periploca ceanothiella (Cosens), Gnorimoschema gallaeasteriella (Kell.), G. gallaesolidaginus (Riley), Mompha eloisella (Clem.), Achatodes zeae (Harris), Ancylis comptana (Froel.), Epiblema otiosanum (Clem.), E. seudderianum (Clem.), E. strenuanum (Wik.), Grapholitha molesta (Bsk.), Laspeyresia pomonella (L.), Proteoteras aesculana Riley, Platyptilia carduidactyla (Riley), P. williamsi (Grin.), Ostrinia nubilalis (Hbn.), Mononychus vulpeculus (F.), Ametastegia glabrata (Fallen).
Pimpla pterophori Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 445. 9.

Primpia pieropnori Asiniead, 1890 (1889). U. S. Nati. Mus., Proc. 12: 445. S. Colpomeria litoralis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 367. d. Atelophadnus bicarinata Cameron, 1905. Invertebrata Pacifica 1: 128. S.

Biology: Vinal and Caffrey, 1919. Mass. Agr. Expt. Sta., Bul. 189: 58. —Leiby, 1922. N. Y.
 Ent. Soc., Jour. 30: 93. —Cushman, 1926. Ent. Soc. Wash., Proc. 28: 33. —Wilder, 1927.
 Psyche 34: 227-229. —Balduf, 1929. Ohio Jour. Sci. 29: 224-226.

Genus SCAMBUS Subgenus SCAMBUS Hartig

Scambus Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 267.

Type-species: Scambus sagax Hartig. Desig. by Viereck, 1914.

Tromera Foerster, 1868. Naturh. Ver. Rheinlande, Vehr. 25: 164.

Type-species: Pimpla pomorum Ratzeburg. Monotypically included and desig. by Schmiedeknecht, 1888.

Epiurus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 164. Preocc. by Rafinesque, 1815.

Type-species: Pimpla calobata Gravenhorst. Here desig. from two species included by Woldstedt, 1877 (1876).

Troctocerus Woldstedt, 1877 (1876). Acad. Imp. des Sci. St. Petersburg, Bul. 22: 296.

Type-species: Troctocerus elegans Woldstedt. Monotypic.

Pseudopoemenia Kiss, 1924. Siebenbuerg. Ver. Naturw., Verh. u. Mitt. 72-74: 91.

Type-species: Pseudopoemenia annulata Kiss. Monotypic.

annulatus (Kiss), N. S., Que., N. H., N. W. T., Alaska and B. C.; Europe. Host: Spilonota ocellana (D. and S.). This species had been misidentified as Scambus nucum (Ratzeburg), a synonym of planatus Hartig, which is not known from North America. Pseudopoemenia annulata Kiss, 1924. Siebenbuerg. Ver. Naturw., Verh. u. Mitt. 72-74: 92.

Pimpla lativentris Ulbricht, 1926. Konowia 5: 51. ♂, ♀. Preocc. by Rudow, 1881. Pimpla trilobata Keler, 197. Prace Wydz. Chorob. Roslin Panst. Inst. Nauk. Gosp. Wiejsk. w Bydgoszczy 16: 11. ♂, ♀.

Taxonomy: Oehlke, 1966. Beitr. z. Ent. 16: 189.

aplopappi (Ashmead). Nebr., Colo., N. Mex., Idaho, Ariz., Wash., Calif. Host: Coleotechnites milleri (Bsk.), Etiella zinckenella (Treit.), Rhyacionia frustrana bushnelli (Bsk.), R. neomexicana (Dyar), Stomopteryx nigrella (Cham.).

Pimpla aplopappi Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 446. S. Scambus evetrivorus Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 225. 9.

atrocoxalis (Ashmead). Newfoundland (Labrador), N. W. T., Alta., Yukon, Alaska; Sweden. Epiurus atrocoxalis Ashmead, 1902. Wash. Acad. Sci., Proc. 49: 225. \mathring{c} , \circ .

brevicornis (Gravenhorst). Newfoundland (Labrador) s. to N. J., w. to Alaska and Calif.; Greenland; Europe. Host: Anthophila pariana (Clerck), Choristoneura rosaceana (Harris), Laspeyresia nigricana (Steph.), Laspeyresia sp., Parlobesia viteana (Clem.), Spilonota ocellana (D. and S.).

Pimpla brevicornis Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 211. 8, 9.

Pimpla nigriscaposa Thomson, 1877. Opusc. Ent. 8: 755. &, Q.

Pimpla punctiventris Thomson, 1877. Opusc. Ent. 8: 756. 8, 9.

Pimpla (Epiurus) balearica Kriechbaumer, 1894. Ann. Hist. Nat. Madrid 23: 248. \circ .

Epiurus bicoloripes Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 201. 9.

Phthorimus anomalus Morley, 1905. Ent. Soc. London, Trans. 53: 420. 9. Pimpla euphrantae Schmiedeknecht, 1914. Ztschr. f. Angew. Ent. 1: 452. 8, 9. Pimpla ameformis Keler, 1937. Prace Wydz. Chorob. Roslin Panst. Inst. Nauk. Gosp. Wiejsk. w Bydgoszczy 16: 10. d, 9.

Biology: Stuart, 1957. Bul. Ent. Res. 48: 477-488.

buolianae (Hartig). Europe. Introduced in Ontario in 1956 and 1958, but apparently without becoming established. Host: Rhyacionia buoliana (D. and S.).

Pimpla Buolianae Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 267. 8,

Pimpla flavotrochanterata Pfeffer, 1913. Ver. f. Vaterland. Naturk. in Wuerttemb., Jahresh. 69: 314. ♀.

Biology: Leius, 1960. Canad. Ent. 92: 371. - Leius, 1961. Canad. Ent. 93: 1079. - Leius, 1962. Canad. Ent. 94: 1078. - Leius, 1963. Canad. Ent. 95: 202.

canadensis Walley. Northern Que., s. to N. S. and Maine, w. to Alaska and Calif. Host: Glypta fumiferanae (Vier.), Choristoneura conflictana (Wlk.).

Scambus (Scambus) canadensis Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 38. ♂, ♀.

decorus Walley. N. S. and Que., s. to Mich., w. to Alaska and Wash. Host: Amorbia humerosa (Clem.), Choristoneura fumiferana (Clem.), Coleophora pruniella Clem., C. fuscedinella Zell., Microsetia stipella (Hbn.), Graciliaria sp., Paraclemensia acerifoliella (Clem.), Phalonia rutilana (Hbn.), Spilonota ocellana (D. and S.).

Scambus (Scambus) decorus Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2); 38. ♂, ♀.

dioryctriae Walley. Sask., Alta. Host: Dioryctria reniculella (Grt.).

Scambus (Scambus) dioryctriae Walley, 1960, In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 61. 3, 9.

foliae (Cushman). Austria. Introduced in Maine, apparently without becoming established because of small number of individuals released (50 mated females). Host: Heterarthrus nemoratus (Fallen).

Epiurus foliae Cushman, 1938. Wash. Acad. Sci., Jour. 28: 27. ♂, ♀.

Biology: Dowden, 1941. U. S. Dept. Agr., Tech. Bul. 757: 8, 9, 11, 16-20.

hispae (Harris). N. S. s. to Ala., w. to Alaska and Calif. Host: Acrobasis betulella Hulst, A. comptoniella Hulst, A. rubrifasciella Pack., Anacampis innocuella (Zell.), Dryocampa rubicunda rubicunda (F.), Anthophila pariana (Clerck), Archips rosanus (L.), Choristoneura fumiferana (Clem.), C. pinus Free., Coleophora pruniella Clem., E pisimus argutanus (Clem.), Exartema connectum McD., Hedia variegana (Hbn.), Acleris minuta (Rob.), Grapholitha molesta (Bsk.), Tigrioides bicolor (Grt.), Malacosoma disstria Hbn., Psilocorsis sp., Spilonota ocellana (D. and S.), Tischeria sp., Thyridopteryx ephemeraeformis (Haw.), Rhyacionia buoliana (D. and S.), Heterarthrus nemoratus (Fallen), Metallus rohweri MacG., Anoplitus inaequalis (Weber), A. rosea (Weber), Arthrochlamys bebbianae Brown, Xenochalepus dorsalis (Thun.), Hyposoter fugitivus (Say). Ichneumon Hispae Harris, 1833. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., p. 587.

Nomen nudum.

Ichneumon hispae Harris, 1835. Boston Soc. Nat. Hist., Jour. 1: 149-150. 9.

Pimpla indagatrix Cresson, 1870. Amer. Ent. Soc., Trans. 3: 146. d.

Pimpla minuta Weed, 1887. Ill. State Lab. Nat. Hist., Bul. 3: 41. 3.

Pimpla gossypii Ashmead, 1890 (1889), U. S. Natl. Mus., Proc. 12: 445. 9.

Scambus (Scambus) tecumseh Viereck, 1917. Conn. State Geol. and Nat. Hist. Survey Bul. 22: 320. 9. N. syn. In Walley's revision of Scambus this name is incorrectly applied to a species for which no name is apparently available.

Scambus (Eremochila) indagator (!) Viereck, 1917. Conn. State Geol. and Nat. Hist. Survey Bul. 22: 322.

Biology: Porter and Garman, 1923. Conn. (State) Agr. Expt. Sta., Bul. 246: 260. - Balduf, 1926. Canad. Ent. 58: 140. — Cushman, 1927. Jour. Agr. Res. 34: 616. — McConnell, 1928.

- transgressus (Holmgren). Idaho, s. B. C., Wash., Oreg., Calif. Host: Grapholitha packardi (Zell.), Acteris variana (Fern.), Archips rosanus (L.), Choristoneura occidentalis Free., Anthophila pariana (Clem.), Coleophora laricella (Hon.).
 - Pimpla transgressus Holmgren, 1869 (1868). Eug. Resa, pt. 2 (Zool.), sect. 1 (Ins.), p. 405.
 - Epiurus innominatus Viereck, 1912. U. S. Natl. Mus., Proc. 42: 149. 9.

Genus SCAMBUS Subgenus ERYTHROSCAMBUS Walley

- Scambus subg. Erythroscambus Walley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 77.
- Type-species: Pimpla hirticauda Provancher. Orig. desig.
- hirticauda (Provancher). Ariz., B. C., Wash., Calif. Host: Lithocolletis felinelle Hein.,
 Setiostoma fernaldella Riley, Gracillaria sp.
 - Pimpla hirticauda Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 116. ♀. Provancher erroneously gave the type locality as Ontario, but Walley (1960) established that Victoria, B. C. is the actual type locality.

Genus CALLIEPHIALTES Ashmead

Calliephialtes Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 54.

Type-species; Pimpla xanthothorax Ashmead. Monotypic and orig. desig.

ferrugineus Cushman. Southern Fla.; Puerto Rico, Cuba. Host: Hypsipyla grandella (Zell.), Pectinophora gossypiella (Sdrs.). The specimens upon which these host records are based are from Puerto Rico.

Calliephialtes ferrugineus Cushman, 1940. U. S. Natl. Mus., Proc. 88: 362. 9.

grapholithae (Cresson). Mass., s. to Fla., w. to Mich. and Texas. Host: Acrobasis hebescella Hulst, A. juglandis (LeB.), A. rubrifasciella Pack., Carmenta texana (Hy. Ed.)?, Laspeyresia caryana (Fitch), Meskea dyspteraria Grt., Stagmatophora ceanothiella Cos., Thyridopteryx ephemeraeformis (Haw.), Megalopyge opercularis (J. E. S.). Pimpla grapholithae Cresson, 1890. In Hamilton, Ent. News 1: 50. d, \(\frac{9}{2}. \)

Biology: Hamilton, 1890. Ent. News 1: 49 — Nickels, Pierce, and Pinkney, 1950. U. S. Dept. Agr., Tech. Bul. 1011: 12-14.

Morphology: Peck, 1937. Canad. Jour. Res., Sect. D (Zool. Sci.) 15: 248, 249, 252.

notandus (Cresson). Southern Que., s. to Fla., w. to s. B. C. and Calif. Host: Epiblema desertanum (Zell.), E. scudderianum (Clem.), E. strenuanum (Wlk.), "Gelechia" sp., Gnorimoschema baccharisella Bsk., G. gallaeasteriella (Kell.), G. gallaesolidaginis (Riley), Walshia "amorphella" Clem.

Pimpla notanda Cresson, 1870. Amer. Ent. Soc., Trans. 3: 148. ∂, ♀.

Biology: Riley, 1877. Mo. State Ent., Ann. Rept. 9: 98. —Leiby, 1922. N. Y. Ent. Soc., Jour. 30: 93.

thurberiae Cushman. Southeastern N. Mex., Ariz.; Mexico, Costa Rica. Host: Anthonomus grandis thurberiae Pierce, Disholcaspis sp., Acrobasis nuxvorella Neun., Antron plumbeum (Weld).

Calliephialtes thurberiae Cushman, 1915. Ent. Soc. Wash., Proc. 17: 132. 8, 9.

Genus PIMPLA Fabricius

Pimpla Fabricius, 1804. Systema piezatorum, p. 112.

Type-species: *Ichneumon manifestator* Linnaeus. Desig. by Curtis, 1828. Members of this genus parasitize aculeate Hymenoptera which nest in wood. My reasons for using the name *Pimpla* rather than *E phialtes* for this genus are given in the introductory discussion of the Ichneumonidae.

brevis (Morley). Que., Ont., Man., Sask., Alta.; Europe. Host: Megachile sp., M. inermis Prov., M. nivalis Friese.

Ephialtes brevis Morley, 1914. Rev. Ichn. Brit. Mus., v. 3, p. 23. 9.

decumbens Townes. Iowa, Colo., B. C., Calif.

Pimpla decumbens Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 102. 3. 9.

macra (Cresson). N. Y., Colo., Oreg., Calif. Host: Passaloecus sp. The host record given by Townes and Townes as "N. brevicornis" is a mistake for Dendroctonus brevicomis LeC., the pupal cells of which harbored the true host, Passaloecus sp.

Ephialtes macer Cresson, 1868. Canad. Ent. 1: 35. 9.

spatulata Townes. Que. s. to N. C., w. to B. C. and Calif.; Europe. Host: Euodynerus sp., Ancistrocerus lineativentris Cameron.

Pimpla spatulata Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 106. δ , \circ .

Genus LIOTRYPHON Ashmead

Liogaster Kriechbaumer, 1890. Ent. Nachr. 16: 297. Preocc. by Meyer, 1844.
Type-species: Liogaster longulus Kriechbaumer. Monotypic.

Liotryphon Ashmead, 1900. Canad. Ent. 30: 368. New name for Liogaster Kriechbaumer. Apistes Seyrig, 1927. Eos 3: 221. Preocc. by Fischer, 1823; Cuvier, 1829.

Type-species: Apistes perversus Seyrig. Monotypic. The type-species is regarded as a synonym of Liotryphon ruficollis (Desvignes).

Apistephialtes Sevrig, 1928. Eos 4: 380. N. name for Apistes Seyrig.

327

Neoephialtes Constantineanu and Pisica, 1970. An. Stiintifice Universitatii "Al. I. Cuza" din Iasi, sect. II (Stiinte Nat.) a. Biol. Mong. 2: 18.

Type-species: Neophialtes foveolatus Constantineanu and Pisica. Monotypic and orig. desig.

arcticus (Roman). N. W. T., Alaska; Siberia.

Ephialtes arcticus Roman, 1926 (1914). Acad. Imp. des Sci. St. Petersburg, Mem., ser. 8 (cl. Phys. Math.) 29 (7): 6. ♀.

caudatus (Ratzeburg). Europe. Introduced in California in 1904 and 1905 and in the eastern U. S. A. in 1935 and 1936, apparently without becoming permanently established. Host: Laspeuresia pomonella (L).

Pimpla caudata Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 92. 9.

Ephialtes brevivalvis Hensch, 1929; 1930. Konowia 8: 159; 9: 75, 249. ♂, ♀.

Neoephialtes foveolatus Constantineanu and Pisica, 1970. Stiintifice Universitatii "Al. 1. Cuza" din Iasi, sect. II (Stiinte Nat.) a. Biol. Monog. 2: 19. ♀.

Taxonomy: Perkins, 1939. Bul. Ent. Res. 30: 307-308.

Biology: Whitaker, 1907. Calif. State Comm. Hort., Bien. Rpt. 2; 231-235.

coracinus (Townes), N. Y., N. J., Md., N. C., Tex.

A pistephialtes coracinus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 99. 3, 2.

dentatus (Townes). Colo., Alta., B. C., Oreg., Calif. Host: Enoclerus sphegus (F.), Thanasimus nigriventris (LeC.).

Apistephialtes dentatus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 97. δ , \circ .

 ${\bf laspeyresiae}~(Uchida).~Japan.~Introduced~in~N.~J.~from~1934-1936,~apparently~without~becoming~established.~Host:~Grapholitha~molesta~(Bsk.).$

Ephialtes laspeyresiae Uchida, 1932. Insecta Matsumurana 6: 160. ♂, ♀.

Biology: Allen, Holloway, and Haeussler, 1940. U. S. Dept. Agr. Cir. 561: 48. masoni (Townes). Ont., Man., N. W. T., Alta., Alaska, Yukon.

Apistephialtes masoni Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 93. 9.

nucicola (Cushman). Colo., N. Mex., Ariz., B. C. s. to Calif. Ecology: May parasitize

lepidopterous inquilines in the galls of the Hymenoptera listed as hosts. Host: Andricus sp., Atrusca sp., Disholcaspis eldoradensis (Beut.), Pontania sp., Gnorimoschema baccharisella Bsk., Laspeyresia pomonella (L.), Periploca ceanothiella (Cosens), Proteoteras arizonae Kft., Walshia amorphella Clem., Melissopus latiferreanus (Wlsm.). Calliephialtes nucicola Cushman, 1931. U. S. Natl. Mus., Proc. 79 (14): 5. 3, 9.

petulcus (Cresson). Tex.; Mexico.

Pimpla petulca Cresson, 1872. Amer. Ent. Soc., Trans. 4: 165. 9.

punctulatus (Ratzeburg). Europe. Introduced in Idaho (year unknown), without attempts at recovery; lacking evidence to the contrary, it is here presumed to be unestablished. Host: Laspeyresia pomonella (L.). Other hosts are known, but that listed was the target species for the introduction in Idaho.

Pimpla punctulata Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 90. 9.

Ephialtes extensor Taschenberg, 1863. Ztschr. Gesam. Naturw. Halle 21: 255. 3, 9. This is the name which was applied to the material imported to Idaho.

Ephialtes discolor Brischke, 1880, Naturf. Gesell. Danzig, Schr. (n. s.) 4 (4): 110. 3, 9.

Liogaster longulus Kriechbaumer, 1890. Ent. Nachr. 16: 297. 9.

Biology: Lyngnes, 1960. Norsk Ent. Tidsskr. 11: 122-134.

328

variatipes (Provancher). Que., N. H. s. to Md., W. Va., w. to Minn. Host: Canarsia ulmiarrosorella (Clem.), Laspeyresia pomonella (L.), Grapholitha molesta (Bsk.). Ephialtes variatipes Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 114. 3. Pimpla stultor Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 367. 3. Calliephialtes benefactor Cushman, 1931. U. S. Natl. Mus., Proc. 79 (14): 6. 3, 9.

Genus TOWNESIA Ozols

Townesia Ozols, 1962. Latvijas Ent. 6: 12.

Type-species: Ephialtes tenuiventris Holmgren. Monotypic and orig. desig. tenuiventris (Holmgren). Que. s. to Md., w. to B. C. and Calif.; Eurasia. Ecology: Known to parasitize aculeate Hymenoptera which nest in wood as well as sawflies which occupy abandoned pupal cells of Coleoptera in the bark of trees, particularly Pinus. Host: Trypoxylon figulus (L.), Chelostoma maxillosum (L.), Xiphydria sp., Strongylogaster sp., S. lineata (Christ). Except for Xiphydria sp., the preceding host records are European. The record for Xiphydria sp. needs confirming, and the host record given in the revision of Townes and Townes (1960) as Melanophila consputa LeC. appears to be incorrect according to card file data pertaining to the specimen in question.

Ephialtes tenuiventris Holmgren, 1859. Svenska Vetensk. Akad., Ofvers. af ... Forhandl. 16: 123. Nomen nudum.

Ephialtes tenuiventris Holmgren, 1860. Svenska Vetensk.- Akad., Handl. (ser. 4) 3 (10): 14.

 $E\,phialtes\,geniculatus$ Brischke, 1864. Phys. Oekonom. Gesell. Koenigsberg, Schr. 5: 179. δ . Uncertain syn.

Biology: Welke, 1966. Beitr. z. Ent. 9: 261-263.

Genus ANASTELGIS Townes

Anastelgis Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 109. Type-species: Anastelgis terminalis Townes. Orig. desig.

terminalis Townes. Wash., Calif.

Anastelgis terminalis Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 110. 3, \circ .

Genus DOLICHOMITUS Smith

Closterocerus Hartig, 1847. Naturw. Ver. Harz, Ber., 1846-1847, p. 18. Preocc. by Westwood, 1833.

Type-species: Closterocerus sericeus Hartig. Monotypic. Dolichomitus Smith, 1877. Zool. Soc. London, Proc., p. 411.

Type-species: Dolichomitus longicauda Smith. Monotypic.

Mesoephialtes Schmiedeknecht, 1906. Opusc. Ichn., v.3, p. 1014.

Type-species: Mesoephialtes coracinus Schmiedeknecht. Monotypic. The type-species is regarded as a subspecies of Dolichomitus zonatus (Cresson). Diclosterocerus Viereck, 1914. U. S. Natl. Mus. Bul. 83: 45. New name for Closterocerus Hartig.

Ichneumon subg. Exeristoidea Viereck, 1924. Canad. Ent. 56: 202.

Type-species: Ichneumon (Exeristoidea) watsoni Viereck. Orig. desig.

Tuberculephialtes Ozols, 1962. Latvijas Ent. 6: 19.

Type-species: Ichneumon tuberculatus Geoffroy. Orig. desig.

Members of this genus parasitize woodborers, usually Coleoptera. Ideally, the name Ephialtes would apply to this genus (see introductory discussion of the family).

aciculatus (Hellen). Que., Yukon, B. C.; Europe. Host: Tetropium gabrieli Weise. This is a European host record.

Ephialtes aciculatus Hellen, 1915. Soc. pro Fauna et Flora Fenn., Acta 40: 25. 9. Ephialtes nodosus Gyorfi, 1941. Erdeszeti Kiserletek 43: 237, 247. "δ" = 9.

Morphology: Noskiewicz and Chudoba, 1951. Polski Pismo Ent. 21: 43-46, 57-58.

buccatus Townes, Colo., B. C., Oreg.

Dolichomitus buccatus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 141. 9.

californicus Townes. Colo., N. Mex., Ariz., Idaho, Utah, B. C. s. to Calif. Host: Oeme costata LeC., Semanotus ligneus (F.).

Dolichomitus californicus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 146. 3, 9.

cephalotes (Holmgren). Que., Sask., Alta.; Europe.

Ephialtes cephalotes Holmgren, 1859. Svenska Vetensk-Akad., Ofvers. af ... Forhandl. 16: 123. Nomen nudum.

Genus CLISTOPYGA Gravenhorst

Clistopyga Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 132.

Type-species: Ichneumon incitator Fabricius. Desig. by Westwood, 1840.

Ichneumonoglypta Blanchard, 1941. Soc. Ent. Argentina, Rev. 11: 9.

Type-species: Ichneumonoglypta lopez-richinii Blanchard. Monotypic and orig. desig.

Hymenomacropyga Uchida, 1941. Insecta Matsumurana 15 (3): 116.

Type-species: Hymenomacropyga latifrontalis Uchida. Monotypic and orig. desig.

The systematic position of Clistopyga within the Pimplinae has been unsettled. Meager evidence seems to indicate that Clistopyga spp. are parasitic upon egg sacs of species of spiders which place their egg sacs in crevices. Townes (1960) seems to have given special emphasis to this fact in removing Clistopyga from the Polysphinctini and placing it, along with Tromatobia and Zaglyptus, marginally within the Pimplini.

Biology: Nielsen, 1929. Ent. Meddel. 16: 366-368.

Acradactyla ocellata Townes, 1960. In Townes and Townes, U. S. Natl. Mus., Bul. 216 (pt. 2): 232. 3, 9.

Genus COLPOMERIA Holmgren

Colpomeria Holmgren, 1859. Svenska Vetensk.-Akad., Ofvers af ... Forhandl. 16: 126.

Type-species: Colpomeria laevigata Holmgren. Monotypic. Townes has most recently been treating Colpomeria as a synonym of Acrodactyla, apparently because of the structural intermediacies of one Formosan species, C. orientalis (Cushman). Except in C. orientalis, females of this genus have a prominent tooth on the front femur and a weaker one (sometimes vestigial) on the middle femur. The femoral teeth seem significant enough to warrant recognition of Colpomeria as a distinct genus; it also has secondary distinguishing features found only in a few species of Acrodactula.

quadrisculpta (Gravenhorst). N. S. s. to Ga., w. to Alaska and Calif.; Eurasia. Host: Tetragnatha laboriosa Hentz, T. obtusa C. L. K. In North America quadrisculpta is known to have been reared only from T. laboriosa.

Ichneumon quadrisculptus Gravenhorst, 1820. R. Accad. delle Sci. Torino, Mem. 24: 378.

Ichneumon percontatorius Mueller, 1776. Zool. Danicae Prodromus, p. 154. ? The neotype designated by Aubert (1969) violates every provision in the Code regarding neotype selection and is therefore invalid. Aubert (1972) contended that usage of the name percontatoria by Townes (1960) and Oehlke (1967) violates the principle of first revisor. However, Townes (1960) stated that he applied the name according to the interpretation of Gravenhorst (1829), and certainly there is no logical basis for regarding Schmiedeknecht (1907) as first revisor as did Aubert (1972).

Polysphincta gracilis Holmgren, 1860. Svenska Vetensk.-Akad. Handl. (ser. 4) 3: 32. 3, 9. Polysphincta scutellaris Holmgren, 1860. Svenska Vetensk.-Akad. Handl. (ser. 4) 3: 33. 3. 4. Polysphincta pulchrator Thomson. 1877. Onusc. Ent. 8: 757. 3. The female lectotype

selected by Aubert is invalid, and therefore this synonymy remains uncertain.

TRIBE ECHTHROMORPHINI

In addition to the three nearly worldwide genera which occur in North America, this tribe includes five others, the largest and best known of these being <code>Xanthopimpla</code>, of the Old- and New-World tropics, and <code>Echthromorpha</code>, which is chiefly Indo-Australian. Species of <code>Echthromorphin</code> are usually internal parasites of pupae of <code>Lepidoptera</code>, but species of <code>Itoplectis</code> and, to a lesser extent, <code>Coccygominus</code> sometimes parasitize Symphyta or Ichneumonoidea which spin cocoons in leaf litter or exposed situations.

Pimpla componetus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 367. d.

Apechthis pacificus Cushman, 1920. U. S. Natl. Mus., Proc. 58: 353. 3, \$\circ\$. N. syn. Preocc. in Ephialtes by Harrington, 1894; Cushman, 1920. Townes (1960) treated pacificus as a species distinct from componotus on the basis of male color characteristics (he considered the female of componotus unknown) which do not even work for Cushman's type series of pacificus, which were from a single locality (Portland, Oreg.). Other specimens in the U. S. Natl. Mus. collection further indicate the need for placing pacificus as a synonym of componotus and the need for placing componotus as a subspecies of annulicornis.

ontario (Cresson). Newfoundland (Labrador) s. to N. Y., w. to Alaska and Calif. Host: Choristoneura conflictana (Wlk.), C. fumiferana (Clem.), C. pinus Free., Lambdina fiscellaria (Gn.), Nepytia canosaria (Wlk.).

Coccygomimus varians Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 333. 9. The male of the species was not identified with certainty.

TRIBE THERONIINI

Townes (1969) included the genera Perithous, Delomerista, and Pseudorhyssa in this tribe. Because the placement of these genera in the Theroniini was only provisional and because the name Delomeristini (Hellen, 1915) has priority over the name Theroniini (Cushman and Rohwer, 1920), the aforementioned genera are here placed in the Delomeristini. The genera of Theroniini occurring in North America are Theronia and Neotheronia, the latter being treated by Townes (1969) as a subgenus of Theronia. Because the division between Neotheronia and Theronia is not at all arbitrary, they are here treated as separate genera. The species of Neotheronia and Theronia are usually primary or secondary parasites of the pupae of Lepidoptera.

Genus THERONIA Holmgren

Revision: Gupta, 1962, Pacific Ins. Monogr. 4: 1-142 (Indo-Australian spp.).

Genus THERONIA Subgenus THERONIA Holmgren

Theronia Holmgren, 1859. Svenska Vetensk.-Akad., Ofvers af ... Forhandl. 16: 123.

Type-species: Pimpla flavicans (Fabricius). Monotypic. The type species is regarded as a synonym of Theronia atalantae (Poda).

Pseudacoenites Kriechbaumer, 1892, Ent. Nachr. 18: 219.

Type-species: Pseudacoenites moravicus Kriechbaumer. Monotypic. The type-species is regarded as a synonym of T. hilaris laevigata (Tschek).

atalantae fulvescens (Cresson). N. B. s. to Va., w. to B. C. and Calif. Ecology: Adult females of this subspecies are known to hibernate, but it is not known that the subspecies overwinters exclusively in this way. Host: Choristoneura fumiferana (Clem.), Ennomos subsignarius (Hbm.), Lambdina somniaria (Hulst), Nepytia phantasmaria (Stkr.), Oreta rosea (Wlk.), Malacosoma americanum (F.), M. californicum fragile (Stretch), M. disstria Hbm., Dasychira plagiata (Wlk.), Lymantria dispar (L.), Orgyia leucostigma (J. E. S.), O. pseudotsugata McD., Nygmia phaeorrhea (Don.), Leucoma salicis (L.), Hyalophora eceropia (L.), Nymphalis californica (Bdv.), Neophasia menapia (F. and F.), Enicospilus americanus (Christ), Gambrus extrematis (Cr.), Hyposoter fugitivus (Say), Hoplectis conquisitor (Say). Genus NEOTHERONIA Krieger

Neotheronia Krieger, 1899. Naturf. Gesell. Leipzig, Sitzber. 14-15: 119.

Type-species: Theronia toltecta Cresson. Orig. desig. T. toltecta is regarded as a

subspecies of Neotheronia nigrolineata (Brulle). Epimecoideus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 52.

Type-species: Epimecoideus apicalis Ashmead. Monotypic and orig. desig. Acrocremnus Brethes, 1926. Nunquam Otiosus-V (Buenos Aires), p. 7.

Type-species: Acrocremnus apicipennis Brethes. Monotypic.
bicincta floridana (Townes). Southern Ga., Fla. Host: Tromatobia rufopectus (Cr.).
Neotheronia bicincta bicincta (Cresson) occurs in Cuba, and a third subspecies, N. b.
nubecularia (Dewitz), occurs in Puerto Rico.

Theronia bicincta floridana Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 362. 3. 9.

septemtrionalis Krieger. Md. s. to Fla., w. to Mo., e. Okla, and La. Neotheronia septemtrionalis Krieger, 1905. Ztschr. System. Hym. Dipt. 5: 305. d. Neotheronia winnemannae Viereck, 1913. U. S. Natl. Mus., Proc. 44: 567. 9.

TRIBE DELOMERISTINI

The genera in this tribe may be related to those in the Theroniini, but the evidence is not conclusive. Neither is there conclusive evidence that the genera here placed in the Delomeristini are related to each other.

Genus PERITHOUS Holmgren

The species of Perithous are parasites or hyperparasites of Sphecidae which nest in canes or twigs.

Genus PERITHOUS subgenus PERITHOUS Holmgren

Perithous Holmgren, 1859. Svenska Vetensk.-Akad., Ofvers af ... Forhandl. 16: 123.
Type-species: Ephialtes albicinctus Gravenhorst. Desig. by Viereck, 1914.

divinator (Rossi). Que. s. to Conn. and Pa., w. to Wis.; Europe. Adventive. Host: Pemphredon lethifer (Shuck.), P. lugubris (F.), Passaloecus gracilis (Curl.), Psenulus pallipes (Pxr.), Trypoxylon figulum (L.), Omalus auratus (L.). Except for Pemphredon lethifer, which is recorded as a host in both North America and Europe, these hosts are recorded only in Europe. P. (P.) divinator appears to have entered the northeastern U. S. A. before 1931

lepteces Walkley. Que., Colo., Alaska.

Delomerista lepteces Walkley, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 368. 9.

novita (Cresson). Que. s. to Va., w. to B. C. and Calif. Host: Macremphytus sp., Diprion similis (Htg.), Acrobasis rubrifasciella Pack, Exartema olivaceanum Riley, Eublemma minima (Gn.), Mononychus vulpeculus (F.). Hosts other than sawflies need verification. Pimpla novita Cresson, 1870. Amer. Ent. Soc., Trans. 3: 146. 9.

Morphology: Finlayson, 1967. Canad. Ent. 99: 1247 (larva).

pfankuchi Brauns. U. S. (unknown locality); Europe. The origin of the specimen bearing Hopkins W. Va. No. 5928 is unknown.

Delomerista Pfankuchi Brauns, 1905. Ztschr. System. Hym. Dipt. 5: 131. 9.

Genus PSEUDORHYSSA Merrill

Pseudorhyssa Merrill, 1915. Amer. Ent. Soc., Trans. 41: 150.

Type-species: Pseudorhyssa sternata Merrill. Monotypic and orig. desig.

Revision: Kerrich, 1966. Entomologist 99: 44-46 (European spp.).

maculicoxis (Kriechbaumer). Que. s. to N. C., w. to Alta. and Calif.; Europe. Ecology: In North America the species has been associated with Rhyssa howdenorum Townes and Rhyssa persuasoria (L.) and is presumably cleptoparasitic on them. Kerrich (1966) has shown that Townes (1960) misidentified the holotype of Rhyssa approximator var. ruficoxis Kriechbaumer, and Kerrich palaced ruficoxis as a synonym of alpestris (Holmgren), a species which does not occur in North America.

Rhyssa approximator var. maculicoxis Kriechbaumer, 1889. Ent. Nachr. 15: 318. 9. Kerrich (1966) incorrectly considered the name maculicoxis invalid because it was originally proposed as a varietal name that was "used in an aberrational sense." 350

Pseudorhyssa sternata Merrill, 1915. Amer. Ent. Soc., Trans. 41: 150. $\,^\circ$. Rhyssa praealpina Gyorfi, 1946. Fragm. Faunist. Hung. 9: 33. $\,^\circ$.

Biology: Coutrier, 1949. Soc. Ent. de France, Bul. 54: 62-63. —Spradbury, 1969. Bul. Ent. Res. 59: 291-297.

Morphology: Spradbury, 1970. Roy. Ent. Soc. London, Proc., Ser. A: Biol. 45: 21-23, 24-25. 26, 27.

TRIBE DIACRITINI

This is a very small tribe erected by Townes, Momoi, and Townes (1965) to include only Diacritus, a Holarctic genus including three species. A second monotypic Japanese genus was added by Townes (1969).

Genus DIACRITUS Foerster

Diacritus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 191.

Type-species: Mesoleptus muliebris Cresson. By subsequent monotypy from inclusion by Davis. 1895.

Phidias Snellen van Vollenhoven, 1898. Tijdschr. v. Ent. 21: 164. Preocc. by Rafinesque, 1815.

Type-species: Phidias aciculatus Snellen van Vollenhoven. Monotypic.

Stenolabis Kriechbaumer, 1894. Ent. Nachr. 20: 58.

Type-species: Stenolabis cingulata Kriechbaumer. Monotypic. The type-species is regarded as a synonym of D. aciculatus (Snellen van Vollenhoven).

Taxonomy: Townes, 1957. Ent. Soc. Wash., Proc. 59: 16 (Townes here removed the genus from the Neoxoridini [=Poemeniini Townes] and placed it provisionally in the Oxytorinae [=Plectiscinae auct.], and the genus was also excluded from the Pimplinae in the Revision by Townes and Townes [1960]).

muliebris (Cresson). Que. s. to Va. and apparently w. to northwestern U. S.

Mesoleptus? muliebris Cresson, 1868. Amer. Ent. Soc., Trans. 2: 102. ô.

Mesoleptus variabilis Provancher, 1875. Nat. Canad. 7 (4): 115. d. Barron (1975) rejected the "lectotype" selected by Gahan and Rohwer (1918) and gave data for the specimen he regarded as the holotype.

Mesostenus rufipes Provancher, 1875. Nat. Canad. 7 (8): 249; 7 (9): 263. 9.

Echthrus pediculatus Provancher, 1880. Nat. Canad. 12: 99. 9.

Mesostenus pluricinctus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 76.

Plectiscidea (Aperileptus?) contentionis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 276. ♀.

Taxonomy: Cushman, 1917. Ent. Soc. Wash., Proc. 19: 162-165. —Gahan and Rohwer, 1918. Canad. Ent. 50: 101. —Momoi, 1966. Kontyu 34: 3. —Barron, 1975. Nat. Canad. 102: 528, 534, 552, 580.

TRIBE NEOXORIDINI

The name Neoxoridini Clement (1938) has priority over the names Eugaltini Townes (1949) or Poemeniini Townes (1951).

Revision: Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 444-451 (as part of Xoridini). —Clement, 1938. Festschr. Embrik Strand, v. 4, p. 515-522 (western Palearctic spp.). —Oehlke, 1966 (1965). Beitr. z. Ent. 15: 881-892 (western Palearctic spp.).

Taxonomy: Townes, 1957. Ent. Soc. Wash., Proc. 59: 15-20 (genera of world).

Genus POEMENIA Holmgren

Ophiodes Hartig, 1847. Naturw. Ver. Harz, Ber. 1846-1847, p. 18. Preocc. by Wagler, 1830; Guenee, 1841.

Type-species: $Ophiodes\ montanus\ Hartig.\ Monotypic.$ The type-species is regarded as a synonym of $P.\ hectica$ (Gravenhorst).

Poemenia Holmgren, 1859. Svenska Vetensk.-Akad., Ofvers af ... Forhandl, 16: 130.

Type-species: Poemenia notata Holmgren, Monotypic.

Calliclisis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 169.

Type-species: Ephialtes hecticus Gravenhorst. Desig. by Viereck, 1914 from three species included by Schmiedeknecht. 1888.

Phthinodes Tschek, 1868. Zool.-Bot. Gesell. Wien, Verh. 18: 272.

Type-species: Ephialtes hecticus Gravenhorst. Monotypic. Euxorides Cresson, 1870. Amer. Ent. Soc., Trans. 3: 167.

Type-species: Euxorides americanus Cresson. Monotypic.

Ophiogastra Ashmead, 1900. Canad. Ent. 32: 368. N. name for Ophiodes Hartig. Lissonotopsis Habermehl, 1917. Ztschr. f. Wiss. Insektenbiol. 13: 234, 306.

Type-species: Lissonotopsis rufa Habermehl. Monotypic.

Members of this genus may all be parasites of aculeate Hymenoptera which nest in wood, abandoned plant galls, and similar situations.

Revision: Habeck and Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 376-387.

albipes (Cresson). N. S. s. to S. C. and La., w. to B. C. and Calif. $E\ phialtes\ albipes\ Cresson,\ 1870.\ Amer.\ Ent.\ Soc.,\ Trans.\ 3:\ 143.\ \$

Morphology: Pratt, 1939. Ent. Soc. Amer., Ann. 32: 735.

americana americana (Cresson). N. S. s. to Fla., w. to Great Lakes. Host: Passaloecus cuspidatus Sm.

Euxorides americanus Cresson, 1870. Amer. Ent. Soc., Trans. 3: 167. 9.

americana nebulosa Habeck and Townes. Ont., Colo., Ariz., B. C. s. to Calif. Ecology: This subspecies has been associated with Passaloecus relativus Fox, Osmia sp., Paratimia conicola Fisher, and Laspeyresia piperana (Bsk.) in rearings from cones of Pinus spp. Poemenia americana nebulosa Habeck and Townes, 1960. In Townes and Townes, U. S. Natl. Mus., Bul. 216 (pt. 2): 383. 3, 9.

pacifica Habeck and Townes. Wash. s. to Calif. Ecology: This species has been reared from galls of Disholcaspis truckeensis (Ash.) and also from the galls of another cynipid from which a "chrysid-like bee" also emerged. This species is closely related to Poemenia notata Holmgren.

Poemenia pacifica Habeck and Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 385. 3. 9.

thoracica (Cresson). Sask. s. to Colo., w. to B. C. and Calif. Host: Osmia linguaria propinqua Cr.

Ephialtes thoracicus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 377. 9. Euxorides Vancouveriensis Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 369. 9.

Ephialtes vancouverensis Harrington, 1894. Canad. Ent. 26: 249. 9.

Genus PODOSCHISTUS Townes

Podoschistus Townes, 1960. Ent. Soc. Wash., Proc. 59: 18.

Type-species: Xorides vittifrons Cresson. Orig. desig.

vittifrons (Cresson). Maine s. to Ga., w. to Oreg. and Tex. Ecology: One specimen of this species was reared from Tetropium velutinum in Lariz occidentalis, but otherwise vittifrons has been associated with or reared from borers in hardwoods. Host: Tetropium velutinum LeC., Graphisurus fasciatus (DeG.).

Xorides vittifrons Cresson, 1868. Canad. Ent. 1: 37. 9.

Podoschistus vittifrons schlingeri Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 388. ?. N. syn.. The description of this synonym was based upon a single female from Utah which shows a minor difference in the coloration of the hind tibia, that difference not being found in the single male known to me from Oregon.

Morphology: Pratt, 1939. Ent. Soc. Amer., Ann. 32: 735.

Genus NEOXORIDES Clement

Neoxorides Clement, 1938. Festschr. Embrik Strand, v. 4, p. 517.

Type-species: Xorides nitens Gravenhorst. Orig. desig.

Members of this genus are parasites of wood-boring Coleoptera, and are often collected on trunks of dead trees.

borealis (Cresson). Southern Man. s. to Colo. and Ariz., w. to s. B. C. and Calif. Host:

Melanophila drummondi (kby.), Tetropium velutinum LeC., Hylotrupes bajulus (L.). The holotype of this species is recorded from "Hudson Bay Territory". N. borealis is closely related to the European N. collaris (Gravenhorst), and may prove only to be a subspecies of it.

Xorides borealis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 167. 9.

Xorides occidentalis Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 380. 9.

caryae (Harrington). Que. s. to N. C., w. to Mich. Host: Saperda discoidea F.

Xorides caryae Harrington, 1891. Canad. Ent. 23: 132. 3, 9.

Biology: Harrington, 1891. Canad. Ent. 23: 132. —Blackman and Stage, 1924. N. Y. State Col. Forestry, Syracuse Univ., Tech. Pub. 17: 182.

pilulus Townes. N. B. s. to N. C., w. to n. N. W. T., Yukon, Oreg., and Colo. Ecology: This species appears to be a parasite of wood borers in both hardwoods and conifers. It is anomalous in being the widest ranging, yet least collected, of the Nearctic spp. of Nearcrides

Neoxorides pilulus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 390. δ , \circ .

TRIBE RHYSSINI

The North American members of this tribe are all parasites of Siricoidea.

Revision: Rohwer, 1920. U. S. Natl. MUS., Proc. 57: 418-428.

Genus RHYSSA Gravenhorst

Rhyssa Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 260.

Type-species: Ichneumon persuasorius Linnaeus. Desig. by Westwood, 1840. Cryptocentrum Kirby, 1837. In Richardson, Swainson, and Kirby, Fauna Bor. Amer., v. 4, p. 260.

Type-species: Cryptocentrum lineolatum Kirby. Monotypic.

Pararhyssa Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 109.

Type-species: Rhyssa persuasoria (Linnaeus). Desig. by Viereck, 1914.

alaskensis Ashmead. Alta. s. to N. Mex., w. to s. Alaska and Calif.

Epirhyssa Crevieri Provancher, 1880. Nat. Canad. 12: 17. d.

Rhyssa alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 199. 9.

Rhyssa skinneri Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 87. 9.

crevieri (Provancher). N. S. s. to N. C., w. to Minn. Host: *Urocerus albicornis* (F.). It remains to be proven that *crevieri* is distinct from *lineolata* (Kirby).

hoferi Rohwer. Colo., N. Mex., Ariz. Ecology: It appears that this species occurs in the lower reaches of forests of *Pinus ponderosa* and in the pinyon-juniper forest type. Males which are predominantly black with yellow markings) have been collected since the species was treated in the revision of Townes

markings) have been collected since the species was treated in the revision of Townes and Townes (1960). Presumably, females with predominantly black ground color will also be found.

Rhussa hoferi Rohwer, 1920, U. S. Natl. Mus., Proc. 57: 421. 9.

howdenorum Townes. Md., Va., N. C., Ga., ala., Nebr. Ecology: This species parasitizes siricids boring in Pinus spp. Rhyssa howdenorum Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt.

2): 398. ♂, ♀.

lineolata (Kirby). N. S. s. to Ga., w. to B. C. and Oreg.; New Zealand, Australia. Host:

Urocerus albicornis (F.), U. gigas flavicornis (F.), Sirex cyaneus F., S. edwardsii Brulle,

S. noctilio F., Xeris sp. This species is adventive in New Zealand, there parasitizing Sirex noctilio, which is adventive from Europe. Subsequently, R. lineolata was introduced in Australia for control of S. noctilio.

Cryptocentrum lineolatum Kirby, 1837. In Richardson, Swainson, and Kirby, Fauna Bor.

Rhyssa albomaculata Cresson, 1864. Ent. Soc. Phila., Proc. 3: 318. 9.

Taxonomy: Morley, 1909. Entomologist 42: 133. — Morley, 1910. Entomologist 43: 243. — Zondag and Nuttall, 1961. New Zeal. Ent. 2 (6): 40-44 (identity and origin of New Zealand population).

Biology: Gardiner, 1966. Canad. Ent. 98: 95-97 (oviposition).

Genus MEGARHYSSA Ashmead

Thalessa Holmgren, 1859. Svenska Vetensk.-Akad., Ofvers af ... Forhandl. 16: 122. Preocc. by Adams. 1853.

Type-species: Ichneumon clavator Fabricius. Desig. by Ashmead, 1900. The type-species is regarded as a synonym of M. gigas (Laxmann).

Megarhyssa Ashmead, 1900. Canad. Ent. 32: 368. N. name for Thalessa Holmgren. Megalorhyssa Schulz, 1906. Spolia Hym., p. 115. Emend.

Eurhyssa Derksen, 1941. Ztschr. f. Morph. U. Oekol. der Tiere 37: 721. Name invalid; type-species not designated except subsequently by Townes and Townes, 1951 as Ichneumon superbus Schrank.

In eastern North America the three species of Megarhyssa which are common in hardwood forests-atrata (Linnaeus), macrurus (Linnaeus), and greenei (Viereck)-all show rather marked, more or less clinal, geographic variation in the coloration of the wings, particularly in the females. Specimens from the northern range extremities often have wings which are nearly clear, while the wings of those from the southern range extremities are most deeply or most uniformly infuscate. In macrurus and greenei subspecific distinctions have been made near the southern extremities of the ranges, and in the case of atrata a subspecific distinction has been made near the northern extremity of the range. I do not believe it is meaningful to treat these particular peripheral variants as subspecies.

Revision: Michener, 1939. Pan-Pacific Ent. 15: 126-131.

Biology: Heatwole, Davis, and Wenner, 1962. Ztschr. f. Tierpsychol. 19: 652-664. — Heatwole, Davis, and Wenner, 1964. Amer. Midland Nat. 71: 374-381. — Cameron, 1965.

nortoni (Cresson). Newfoundland (Labrador) s. to n. Ga., w. to Alaska and Calif.; New Zealand, Australia. Ecology: Occurs in coniferous forests. Host: Urocerus albicornis (F.), Xeris morrisoni (Cr.), Sirex sp., S. noctilio F. These host records are North American, except in the case of Sirex noctilio, which was the target species for the successful introductions into New Zealand and Australia. It seems very likely that nortoni will, at best, prove to be only subspecifically distinct from the Eurasian M. gigas (Laxmann). Rhussa nortoni Cresson, 1864. Ent. Soc. Phila, Proc. 3: 317. 9.

Genus EPIRHYSSA Cresson

Epirhyssa Cresson, 1865. Ent. Soc. Phila., Proc. 4: 39.

Type-species: Epirhyssa speciosa Cresson. Desig. by Viereck, 1914.

Rhyssonota Kriechbaumer, 1890. Wien. Mus. der Naturgesch., Ann. 5 (3): 489.
Type-species: Rhyssonota tristis Kriechbaumer. Monotypic. Except for the single species occurring in the southwestern U. S., this genus is Neotropic.

dietrichi Townes. Ariz.

Epirhyssa dietrichi Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 414. 3. 9.

SUBFAMILY LABENINAE

Taxonomy: Townes, 1969. Amer. Ent. Inst., Mem. 11: 194-207 (tribes and genera of world; as Labiinae, = Labeninae).

TRIBE LABENINI

This is a small tribe, including five genera, only one of which has Nearctic species.

Genus LABENA Cresson

Labena Cresson, 1864. Ent. Soc. Phila., Proc. 3: 399.

Type-species: Cryptus grallator Say. Desig. by Viereck, 1914.

Caryoecus Walsh, 1866. Pract, Ent. 1: 30.

Type-species: Mesochorus fuscipennis Brulle. Monotypic.

Microtritus Kriechbaumer, 1889. Ent. Nachr. 15: 307.

Type-species: Microtritus apicalis Kriechbaumer. Monotypic.

Dyseidopus Kriechbaumer, 1890. Wien. Mus. der Naturgesch., Ann. 5: 489.

Type-species: Dyseidopus sericeus Kriechbaumer. Monotypic. Neonotus Parrot, 1955 (1954). Linn. Soc. N. S. Wales, Proc. 79:230.

Type-species: Neonotus chadwickii Parrot. Monotypic and orig. desig.

This is a large Australian, Neotropic, and Nearctic genus.

Revision: Townes and Townes, 1960. U. S. Natl. Mus. Bul. 216 (pt. 2): 531-537.

grallator (Say). Mass. and s.e. Ont. s. to Fla., w. to Wis., Colo., and s.e. Calif.; Mexico? Ecology: Has geen reared from insects infesting Pinus and Taxodium, but is more often reared from borers in various angiosperms (trees, bushes, and vines). Host: Aneflomorpha sp.?

in Lycium belandieri, cerambycid in Baccharis halimifolia, Knulliana cincta (Drury),

Psyrassa unicolor (Rand.), Saperda puncticollis Say, Stenosphenus notatus (Oliv.), Agrilus sp., A. arcuatus (Say), Chrysobothris femorata (Oliv.), C. tranquebarica

(Gmelin), Thrincopyge alacris LeC., Lixus scrobicollis Boh., Pissodes strobi (Peck). The geographic variation of grallator does not seem conducive to the recognition of subspecies.

Cryptus grallator Say, 1836. Boston Jour. Nat. Hist. 1: 236. 9.

tinctipennis Rohwer. Central Ariz., s. B. C., Calif. Host: Dicerca horni Crotch.

Labena tinctipennis Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 409. 9.

TRIBE GROTEINI

The members of this tribe are parasites of bees. Only one of the three genera is represented by North American species.

Genus GROTEA Cresson

Grotea Cresson, 1864. Ent. Soc. Phila., Proc. 3: 397.

Type-species: Grotea anguina Cresson. Monotypic.

This is a small Neotropic and Nearctic genus. The hosts are twig-nesting bees of the genus Ceratina. More than one Ceratina larva is consumed by each Grotea larva, and the pollen loaves in the cells of the consumed Ceratina larvae are also eaten by larvae of Grotea.

Revision: Townes and Townes, 1960. U. S. Natl. Mus. Bul. 216 (pt. 2): 538-541 (Nearctic spp.).
—Slobodchikoff, 1970. Pan-Pacific Ent. 46: 50-60 (Nearctic and Neotropic spp.).

anguina Cresson. Que. w. to Wis. and w. Iowa, s. to n.w. S. C., n. Miss., and s. Tex. Host: Ceratina calcarata Rbtsn., C. dupla Say, C. metallica H. S. S. Grotea anguina Cresson. 1864. Ent. Soc. Phila., Proc. 3: 398. 3. 9.

Biology: Graenicher, 1905. Ent. News 16: 43-49. —Rau, 1922. Acad. Sci. St. Louis, Trans. 24: 43. —Rau, 1928. Ent. Soc. Amer., Ann. 21: 383. —Daly, Stage, and Brown, 1967. Ent. Soc. Amer., Ann. 60: 1275.

californica Cresson. Northern Idaho and s. B. C. s. to s. Calif. Host: Ceratina acantha Prov., C. dallatorreana Friese, C. gigantea H. S. S. C. nanula Ckll., C. pattigena Ckll. Grotea californica Cresson, 1879 (1878). Acad. Nat. Sci. Phila, Proc. 30: 370. 9.

lokii Slobodchikoff. Colo., Ariz.; Mexico. This species was confused with anguina and californica in the revision of Grotea by Townes and Townes (1960).

Grotea lokii Slobodchikoff. 1970. Pan-Pacific Ent. 46: 60. 3. 2.

TRIBE BRACHYCYRTINI

Revision: Walkley, 1956. U. S. Natl. Mus., Proc. 106: 315-329.

Genus BRACHYCYRTUS Kriechbaumer

Brachycyrtus Kriechbaumer, 1880. Zool.-Min. Ver. Regensburg, Corresp. Bl. 34: 161.

Type-species: Brachycyrtus ornatus Kriechbaumer. Monotypic. Proterocryptus Ashmead, 1906. U. S. Natl. Mus., Proc. 30: 174.

Type-species: Proterocryptus nawaii Ashmead. Monotypic.

Xanthocharops Morley, 1912. Linn. Soc. London, Trans. 15: 173.

Type-species: Xanthocharops primus Morley. Monotypic.

Vakau Cheesman, 1928. Ann. and Mag. Nat. Hist. (10) 1: 189.

Type-species: Vakau taitensis Cheesman. Monotypic and orig. desig.

Brachycyrtomorpha Blanchard, 1940. In Kreibom de la Vega, Tucuman Estac. Expt. Agr., Rev. Indus. y Agr. 3: 170. Nomen nudum (figure only).

Brachycyrtomorpha Blanchard, 1942. Soc. Cient. Argentina, An. 134: 105.

Type-species: Brachycyrtomorpha crossi Blanchard. Monotypic and orig. desig.

This is a small genus of worldwide distribution. The hosts are pupae or prepupae of Chrysopidae.

Revision: Townes and Townes, 1960. U. S. Natl. Mus. Bul. 216 (pt. 2): 542-544 (Nearctic spp.). ornatus Kriechbaumer. Pa., Md., Ohio, Mich., Ariz., s. B. C.; Mexico; Eurasia. Host: Chrysopid. Brachycyrtus ornatus Kriechbaumer, 1880. Zool.-Min. Ver. Regensburg, Corresp.-Bl. 34: 163. 9.

Brachycyrtus chrysopae Walley, 1940. Canad. Ent. 72: 86. 9.

pretiosus Cushman. Central and s. Fla. Host: Nodita pavida (Hagen), chrysopid pupae. Brachycyrtus pretiosus Cushman, 1936. U. S. Nat. Mus., Proc. 84: 19. 3, \circ .

SUBFAMILY TRYPHONINAE

Species of this subfamily are external parasites of the larvae of sawflies or Lepidoptera. The eggs of Tryphoninae are equipped with a holdfast which is often borne on a stalk or is derived

from coiling of the stalk; it serves to fasten the eggs within the puncture the female makes in the skin of the host larva. According to Mason (1967), in species which parasitize sawflies, eclosion from the egg does not occur until after the host has spun its cocoon.

Taxonomy: Townes, 1969. Amer. Ent. Inst., Mem. 11: 143-193 (genera of world).

Biology: Mason, 1967. Canad. Ent. 99: 376.

TRIBE PHYTODIETINI

Members of this tribe are parasitic on larvae of Lepidoptera. The stalk of the egg is long, slender, and loosely coiled; in newly deposited eggs the stalk is elastic, but later becomes rigid so that its coiling serves to hold it firmly in the skin of the host.

Townes (1969) preferred to group the numerous species of this tribe into two genera, each with a number of subgenera. His use of more subgeneric than generic names seems to make the classification of this tribe discordant with his classification of the rest of the subfamily.

Genus PHYTODIETUS Gravenhorst

This genus is divided into four subgenera, two of which have North American species. The North American species are currently being revised by Dr. C. C. Loan, and publication of his revision may precede the appearance of this catalog.

Revision: Rohwer, 1920, U. S. Natl. Mus., Proc. 57: 460-468.

Genus PHYTODIETUS subgenus NEUCHORUS Uchida

Neuchorus Uchida, 1931, Insecta Matsumurana 5: 143,

Type-species: Neuchorus longicauda Uchida. Monotypic and orig. desig.
Doratistes Seyrig, 1932. Acad. Malgache, Mem. 11: 27. Described as a subgenus of
Phytodietus but treated nomenclaturally as a genus.

Type-species: Doratistes absyrtinus Seyrig. Orig. desig.

Taxonomy: Krebs, 1969. Canad. Ent. 101: 548-549 (key to Nearctic spp.).

rufipes pulcherrimus (Cresson). Atlantic to Cont. Divide in Transit. and U. Aust. Zones. Host:

Loxostege rantalis (Gn.), L. sticticalis (L.), Ostrinia obliteralis (Wlk.), Phlyctaenia coronata tertialis (Gn.), P. (N.) rufipes rufipes Holmgren is European.

Mesoleptus pulcherrimus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 101. 3.

Genus NETELIA Grav

Until 1939 the generic name Paniscus Schrank (1801) was universally applied to the majority of species now placed in Netelia. The name Paniscus is now uniformly treated as an objective synonym of Ophion, thus reversal of this unfortunate change would cause more confusion than it would eliminate.

Members of this genus are nocturnal or crepuscular and are often attracted to lights. Because of similar habits and general appearance casual observers often confuse them with species of Ophioninae, Netelia females generally sting more painfully than those of Ophioninae, however.

Genus NETELIA Subgenus BESSOBATES Townes

Netelia subg. Bessobates Townes, 1961. In Townes, Townes, and Gupta; Amer. Ent. Inst., Mem. 1: 93.

Type-species: Parabatus deceptor Morley. Orig. desig.

Because of careless bibliographic work, Bradley (1919) managed to find reason for applying the names Parabates Foerster and Parabatus Thomson to separate subgenera, the latter to what is now called Bessobates. It is evident that Bradley would not have wished to find reason for doing so if he had been aware of Enderlein's (1912) designation of Parabatus nigricarpus Thomson as the type-species of Parabates. Ironically, it is also quite obvious that if Viereck (1914) had been aware of the Enderlein designation for parabates, he would also have

designated nigricarpus as the type-species of Parabatus, which would have prevented subsequent authors from applying these names to separate subgenera of Netelia, as did Townes for more than 20 years (1939 to 1961). Apparently recognizing that it was no longer feasible to treat some of the Thomson emendations of Foerster names as having been newly proposed for separate taxa, Townes (1961) abandoned his earlier stance on the issue with the proposal of Bessobates as a "new name for Parabatus as defined by Townes, 1939." Not only does it seem incorrect for Townes to have characterized his proposal of Bessobates in those terms, it is paradoxical for him to have done so without a word calling attention to or explaining his designation of Parabatus deceptor Morley as type-species instead of Ichneumon virgatus Geoffroy. Townes (1969) attributes the name Bessobates to Townes, Townes, and Gupta, but the wording of the proposal (yet alone the 1939 description) is clearly in the unadulterated style of the senior author, and it seems inappropriate for him to place part of the blame for it upon the junior authors.

TRIBE OEDEMOPSINI

This is a small tribe with nine genera, seven of which are represented by species in the Nearctic Region. Most of the species are apparently parasitic upon larvae of Lepidoptera, but *Eclytus* spp. parasitize sawfly larvae.

The names Thymarides (Thomson, 1883) and Eclytini (Townes, 1945) are junior synonyms of

Oedemopsini (Woldstedt, 1877).

Taxonomy: Townes and Townes, 1945. Bol. Ent. Venezolana 4: 41-53 (out of date generic revision with keys for Neotropic species).

Genus THYMARIS Foerster

Thymaris Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 151.

Type-species: Thymaris pulchricornis Brischke. By subsequent monotypy from inclusion by Brischke, 1880. The Brischke types have been destroyed, and the interpretation of pulchricornis is based upon Pfankuch's (1906) placement of it as a synonym of Mesoleptus tener Gravenhorst (1829). Pfankuch later (1925) placed

pulchricornis as a synonym of Hemiteles contaminatus Gravenhorst (1829), and Perkins (1962) treated contaminatus as a junior synonym of tener by virtue of page priority but did not state that he had examined the Gravenhorst types in question.

Thymarus Thomson, 1883. Opusc. Ent. 9: 908. Emend.

Townes (1969) says that there are two Nearctic species, one of them undescribed.

Taxonomy: Pfankuch, 1906. Ztschr. System. Hym. Dipt. 6: 82. —Pfankuch, 1925. Deut. Ent.
 Ztschr. 4: 260. —Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 458. —Townes, 1969.

negligere (Davis). N. J. s. to Ala., w. to Kans.

Eusterinx negligere Davis, 1897. Amer. Ent. Soc., Trans. 24: 246. ?. Callidiotes kansensis Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 55. ?. Thymaris americanus Cushman, 1919. U. S. Natl. Mus., Proc. 56: 381. &, ?.

Genus ZAGRYPHUS Cushman

Zagryphus Cushman, 1919. U. S. Natl. Mus., Proc. 56: 377.
Type-species: Mesoleptus nasutus Cresson. Monotypic and orig desig.

The name Campothreptus Foerster has been erroneously applied to this genus by Townes (e. g. 1969) who has treated Mesoleptus nasutus Cresson as its type-species. Cushman (1919) correctly argued that it was Tryphon nasutus Cresson and not Mesoleptus nasutus that Davis (1897) placed in Campothreptus. Therefore, Campothreptus is a synonym of Oedemopsis (which see).

Taxonomy: Davis, 1897. Amer. Ent. Soc., Trans. 24: 247. — Cushman, 1919. U. S. Natl. Mus., Proc. 56: 376-378. — Townes, 1969. Amer. Ent. Inst., Mem. 11: 159.

nasutus (Cresson). Pa. s. to Fla., w. to Minn. and Kans.; Mexico, Guatemala.

Mesoleptus? nasutus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 103. 6, 9. The variant spelling "nasutus" appears on p. 103, but it is anonymously rejected in the errata (p. 398 [1869]).

Synchnoleter americanus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 196. d.

Genus OEDEMOPSIS Tschek

Oedemopsis Tschek, 1868. Zool.-Bot. Gesell. Wien, Verh. 18: 276.

Type-species: Oedemopsis rogenhoferi Tschek. Monotypic. The type-species is considered to be a synonym of O. scabricularis (Gravenhorst).

Hybophanes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 166.

Type-species: Tryphon scabricularis Gravenhorst. Desig. by Viereck, 1914 from three species included by Schmiedeknecht, 1888.

Campothreptus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 201. N. syn.

Type-species: Tryphon nasulus Cresson. By subsequent monotypy from inclusion by Davis, 1897. Although Davis (1897) treated Tryphon? nasulus Cresson as a synonym of Mesoleptus nasulus Cresson, his description applies only to the former (see discussion under Zagryphus). Davis' error in suppressing Tryphon nasulus as a synonym of Mesoleptus nasulus could only have been inadvertent—i.e. I do not see how it is possible that Davis' error could have been an error of judgement and hence do not believe that it is reasonable to argue that he misidentified Tryphon nasulus as Mesoleptus nasulus nasulus.

Zarhynchus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 59. Preocc. by Oberholser, 1899.
Type-species: Tryphon nasutus Cresson. Monotypic and orig desig.

Rhynchothyreus Ashmead, 1900. Canad. Ent. 32: 368. N. name for Zarhynchus Ashmead. Oedematopsis Morley, 1908. Brit. Ichn. 3: 268. Emend. of Oedemopsis.

Details regarding my resurrection of the name Oedemopsis and its priority over Hybophanes will be given elsewhere.

davisi Carlson, n. name. Conn. s. to Va., w. to B. C., N. Mex.

Tryphon? nasutus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 107. 9. Preocc. by Gravenhorst, 1829.

Genus ATOPOTROPHOS Cushman

Atopognathus Cushman, 1919. Ent. Soc. Wash., Proc. 21: 116. Preocc. by Bigot, 1881. Type-species: Atopognathus collaris Cushman. Monotypic and orig. desig. Atopotrophos Cushman, 1940. U. S. Natl. Mus., Proc. 88: 365. N. name for Atopognathus

Cushman.

There are two Nearctic species, one undescribed.

bucephalus (Cresson). Md., D. C., Va., N. C., Ala.; Mexico.

Mesoleptus? bucephalus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 36. S. Atopognathus collaris Cushman, 1919. Ent. Soc. Wash., Proc. 21: 117. S, \(\varphi \).

TRIBE TRYPHONINI

Nearly all members of this tribe are parasites of sawflies; Grypocentrus basalis Ruthe, a European species, has been reared from an eriocraniid microlepidopteran. Most of the genera are Holarctic.

Revision: Townes and Townes, 1949-1950 (1949). Ent. Soc. Amer., Ann. 42 (3 and 4): 321-396, 337-447 (*Grypocentrus* and *Boethus* excluded). —Kasparyan, 1973. Akad. Nauk, SSSR, Zool. Inst., Fauna SSSR, (n. s.) 106, Hym. v. 3, pt. 1, 320 pp.

Genus GRYPOCENTRUS Ruthe

Grypocentrus Ruthe, 1855. Stettin. Ent. Ztg. 16: 52.

Type-species: Grypocentrus incisulus Ruthe. Desig. by Vierick, 1912.

Apimeles Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 205.

Type-species: Apimeles lusorius Davis. By subsequent monotypy from inclusion by Davis, 1898 (1897).

Cyrtocentrus Provancher, 1883. Nat. Canad. 14: 6.

Type-species: Cyrtocentrus quebecensis Provancher. Monotypic.

Some members of this genus are known to parasitize larvae of *Fenusa* spp., but one European species, *G. basalis* Ruthe, has been reared from an eriocraniid microlepidopteran.

Revision: Townes and Townes, 1951. Ent. Soc. Wash., Proc. 53: 301-307.

albipes Ruthe. Europe. Introduced in insular Newfoundland in 1973, but no recoveries have been reported. Host: Fenusa pusilla (Lep.). The host listed was the target species for the release in Newfoundland.

Grypocentrus albipes Ruthe, 1855. Stettin. Ent. Ztg. 16: 56. 8, 9.

N. name for annulicornis Provancher.

niveicola (Ashmead), revised status. Que. w. to s.e. Alaska, s. to D. C., w. N. C., s. Alta., and n. Calif. In their tribal revision, Townes and Townes (1949) treated niveicola as a subspecies of dilitata (Provancher) (which see). However, Dr. H. K. Townes said (personal commun., 1976) that Townes and Townes (1949) based their treatment on the "lectotype" selected by Gahan and Rohwer (1918). Barron (1975) rejected the Gahan and Rohwer "lectotype" in favor of the specimen which he regarded as the holotype. According to Barron, the latter specimen does not agree with dilitata dilitata (Provancher) sensu Townes and Townes (1949). Therefore, niveicola is here raised to species status; its distribution is a composite of the distributions of the two subspecies of dilitata sensu Townes and Townes (1949).

Erronemus(!) Bedardi Provancher, 1879. Nat. Canad. 11: 266. 9.

Genus MONOBLASTUS Hartig

Monoblastus Hartig, 1837, Arch. f. Naturgesch. 3: 155.

Type-species: Monoblastus caudatus Hartig. Desig. by Viereck, 1914.

Otoblastus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 201.

Type-species: Tryphon luteomarginatus Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1883. Coeloconus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 203.

Type-species: Ichneumon brachyacanthus Gmelin. By subsequent monotypy from inclusion by Morley, 1911.

Catocentrus Walsh, 1873. Acad. Sci. St. Louis. Trans. 3: 89.

Type-species: Tryphon philanthoides Cresson. Monotypic.

Cerda Cameron, 1904, Amer. Ent. Soc., Trans. 30: 255.

Type-species: Cerda fuscipennis Cameron. Monotypic. Idothrichus Schmiedeknecht, 1907. Hym. Mitteleuropas, p. 619.

Type-species: Phaestus sericeus Brischke. Monotypic.

Pseudopsilage Gregor, 1929. Tsechech. Realgym. Neu Titschein in Maehren, Jahresber. 1928-1929; 6.

Type-species: Pseudopsilage romani Gregor. Monotypic.

atroferia Townes. N. Y., Pa., N. C., Mich.

Monoblastus atroferia Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 413. ♂, ♀.

davisi (Townes). N. Y., Ont., Mich., Ill., Iowa.

Tryphon nigrum Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 281. J. Preocc. by Gravenhorst, 1829.

Tryphon davisi Townes, 1944. Amer. Ent. Soc., Mem. 11: 155. N. name for nigrum Davis.

dionnei (Provancher). N. S., s. to Pa., w. to Minn.

Truphon Dionnei Provancher, 1879. Nat. Canad. 11: 256. 9.

eurus Townes, Md.

Monoblastus eurus Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 410. ♂.

favonius Townes. Calif.

Monoblastus favonius Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 409. ♂, ♀.

feria feria (Davis). Que. s. to Fla., w. to Man. and Colo.

Otlophorus innumerabilis var. feria Davis, 1897. Amer. Ent. Soc., Trans. 24: 276. 8, 9. Epachtes(!) basilicus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 283. 8, 9.

feria rossi Townes. Colo., B. C., Oreg., Calif.

Monoblastus feria rossi Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 412. ♂. ♀.

fuscipennis (Cameron). Tex.; Mexico.

Cerda fuscipennis Cameron, 1904. Amer. Ent. Soc., Trans. 30: 255. d.

Monoblastus phaeopteris Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 415. 3.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 46 (syn.).

innumerabilis (Davis). Nev., Wash., Oreg., Calif.

Otlophorus innumerabilis Davis, 1897. Amer. Ent. Soc., Trans. 24: 278. 3, 9.

kaniacensis (Hall). Minn., Man., Mont., Wyo., Colo., Idaho, Utah, Ariz., Wash., Oreg. Ecology: On two separate occasions this species has been collected on Symphoricarpos bushes; in one instance the bushes were infested with sawfly larvae thought to be of the genus Blennocampa. Because Blennocampa is not known in N. Amer., it may have been a related genus in Blennocampinae.

Polyblastus kaniacensis Hall, 1919. Psyche 26: 156. 9.

macer Townes, N. Y., N. J., Pa., Md., Va., Ohio.

Monoblastus macer Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 405.

montezuma (Cameron). Que. s. to N. C., w. to B. C. and Calif.; Mexico.

Tryphon montezuma Cameron, 1886. Biol. Cent.-Amer., Hym., v. 1, p. 286. d.

Ottophorus affinis Ashmead, 1901. Psyche 9: 148. d. philanthoides (Cresson). N. H., N. Y., Ill.

Tryphon philanthoides Cresson, 1868. Amer. Ent. Soc., Trans. 2: 110. 9.

proximus Townes. Idaho, Wash., Oreg., Calif.

Monoblastus proximus Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 403. 3. 9.

Genus THIRETOIDES Davis

Thibetoides Davis, 1897. Amer. Ent. Soc., Trans. 24: 205.

Type-species: Thibetoides flosamoris Davis. Monotypic.

Revision: Viktorov, 1964. Ent. Obozr. 43: 182-184; 91-92 in Ent. Rev. (Palearctic spp.). flosamoris Davis. Wash., Oreg., Calif.

Thibetoides flosamoris Davis, 1897. Amer. Ent. Soc., Trans. 24: 205. 3.

Genus LAGOLEPTUS Townes

Lagoleptus Townes, 1969. Amer. Ent. Inst., Mem. 11: 173.
Type-species: Lagoleptus palans Townes. Orig. desig.
palans Townes. N. Y., Pa., N. C., S. C.

Lagoleptus palans Townes, 1969. Amer. Ent. Inst., Mem. 11: 174.

Genus BOETHUS Foerster

Boethus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: Boethus howardi Davis. Desig. by Viereck, 1914 from three species included by Davis, 1898 (1897).

Diplomorphus Giraud, 1872. Soc. Ent. de France, Ann. 1: 409.

Type-species: Diplomorphus thoracicus Giraud. Monotypic.

Aethalodes Kriechbaumer, 1890. Schweiz. Ent. Gesell., Mitt. 8: 207. Preocc. by Gahan, 1888.
Type-species: Aethalodes mesomelas Kriechbaumer. Desig. by Viereck, 1914.

Members of this genus parasitize the larvae of Argidae.

alaingens Davis. Calif.

Boethus alaingens Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 291. 9.

glabranotus Davis. Mont.

Boethus glabranotus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 291. 9.

nigripennis Cushman. N. Y., Ky., Ala. Host: Arge pectoralis (Leach).

Boethus nigripennis Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 12. 3, 9.

schizoceri (Riley and Howard). N. J. s. to Fla., w. to Minn. and La. Host: Sphacophilus cellularis (Say).

Boethus howardi Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 290. S, Q. Boethus aenigmaticus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 314. S.

Boethus daeckei Viereck, 1909, Ent. Soc. Wash., Proc. 11: 210. 8.

Genus DYSPETES Foerster

Duspetes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 201.

Type-species: Tryphon praerogator Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1883. Tryphon praerogator Gravenhorst is a

misidentification of *Ichneumon praerogator* Linnaeus, the available names for which are *Dyspetes arrogator* Heinrich (1949) and *Dyspetes fracticeps* Townes (1950 [1949]).

Dyspetus Thomson, 1883. Opusc. Ent. 9: 899. Emend.

Taxonomy: Townes and Townes, 1950 (1949). Ent. Soc. Amer., Ann. 42: 422. — Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11 (8): 419. — Townes, Momoi, and Townes, 1965. Amer. Ent. Inst. Mem. 5: 105.

rufus (Provancher). Que.

Exetastes rufus Provancher, 1874. Nat. Canad. 6: 78. 8, 9.

Genus COSMOCONUS Foerster

Cosmoconus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 203.
Type-species: Ichneumon elongator Fabricius. By subsequent monotypy from inclusion by Woldstedt, 1877.

Revision: Kasparyan, 1971. Vses. Ent. Obsh., Trudy 54: 286-307 (Palearctic spp.).

arcticus (Brues). Alaska, Wash., Oreg., Calif.

Polyblastus arcticus Brues, 1919. Rpt. Canad. Arctic Exped. 1913-18, v. 3G, p. 22. 2.

canadensis (Provancher). N. S. s. to N. C., w. to Sask. and Colo.

Truphon Canadensis Provancher, 1875. Nat. Canad. 7: 117. 3, 9.

vallis Townes, n. status. Que., Md., Ill., Iowa, Tex.

Cosmoconus canadensis vallis Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer. Ann. 42: 425. 3. 9.

Genus TRYPHON Fallen

There are five subgenera, three being strictly Palearctic (including Tryphon), one being Holarctic (Symboethus), and one being strictly Nearctic (Noemon). Species of this genus are chiefly parasitic upon sawflies of the subfamily Dolerinae.

Revision: Kasparyan, 1969. Ent. Obozr. 48: 639-662 and 899-918; 407-419 and 572-584 in Ent. Rev. (Palearctic spp.).

Genus TRYPHON Subgenus NOEMON Foerster

Noemon Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 207.

Type-species: Noemon palmaris Davis. Desig. by Viereck, 1914 from three species included by Davis, 1898 (1897).

californicus Cresson. Calif.

Tryphon californicus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 373. 8, 9.

coquilletti Townes. Calif.

Tryphon (Noemon) coquilletti Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 432. 3. 9.

hamatus Townes. Calif.

Tryphon (Noemon) hamatus Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 432. δ , \circ .

Tryphon (Symboethus) townesi Walkley, 1958. In Krombein, et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 41. N. name for humeralis Townes.

viator Townes. Que. w. to Alta., s. to Pa., Mo., and Colo.

Tryphon (Symboethus) viator Townes, 1950 (1949). In Townes and Townes, Ent. Soc. Amer., Ann. 42: 443. 3, 9.

TRIBE EXENTERINI

. The name Cteniscini Woldstedt (1877) is often used for this tribe, but Exenterini Foerster (1868) seems to be favored as much by recent authors; because the latter name has the additional advantage of being oldest, it is used here.

Revision: Davis, 1897. Amer. Ent. Soc., Trans. 24: 227-240. —Kerrich, 1952. Brit. Mus. (Nat. Hist.) Ent., Bul. 2: 307-459. (Old World spp.).

Genus EXYSTON Schiodte

Exyston Schiodte, 1839. Mag. Zool., sect. 3, (ser. 2) 1 (pl. 6-9): 12.

Type-species: Ichneumon cinctulus Gravenhorst. Monotypic.

Tricamptus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 194.
Type-species: Exenterus pratorum Woldstedt. By subsequent monotypy from

inclusion by Woldstedt, 1877.

Diaborus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 195.

Type-species: Cteniscus (Diaborus) sedulus Woldstedt. Desig. by Viereck, 1912 from two species included by Woldstedt, 1877. The type-species is regarded as a synonym of Exyston pratorum (Woldstedt).

Anecphysis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 195.

Type-species: Anecphysis curvineura Davis. By subsequent monotypy from inclusion by Davis, 1897.

Parexyston Kerrich, 1952. Brit. Mus. (Nat. Hist.) Ent., Bul. 2: 392.

Type-species: Exyston calcaratus Thomson. Monotypic and orig. desig.

According to Mason (1959) most of the species are found in grassy places. He presumed that they are mainly parasitic upon "sod-feeding" Dolerinae, but the only North American species so far reared (maculosum [Provancher]) parasitizes Pristiphora spp. (Nematinae) on Salix and Vaccinium.

Genus SMICROPLECTRUS Thomson

Microplectron Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 195. Preocc. by Streubel, 1842 and Dahlbom, 1857.

Type-species: Exenterus erosus Holmgren. By subsequent monotypy from inclusion by Woldstedt. 1877 (1876).

Smicroplectrus Thomson, 1883, Opusc. Ent. 9: 888.

Type-species: Exenterus jucundus Holmgren. Desig. by Viereck, 1914.

Anderis Davis, 1897. Amer. Ent. Soc., Trans. 24: 233.

Type-species: Cteniscus albilineatus Walsh. Desig. by Viereck, 1914. Auderis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 348 (errata). Emend.

Revision: Mason, 1956. Canad. Jour. Zool. 34: 124-151 (including Excavarus).

apicatus (Provancher). Que., Maine, N. Y., Ont., Colo., Alta., B. C. Host: Nematus currani Ross.

Cteniscus apicatus Provancher, 1879. Nat. Canad. 11: 263. "&" = 9.

californicus (Cresson). Que. w. to B. C., s. to N. C., Minn, Ariz., and Calif.

Ctenistes(1) californicus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 374. d.

Smicroplectrus disseptes Walley. 1933. Canad. Ent. 65: 256. Q.

eburneus Mason. Ont., Tex.

Smicroplectrus eburneus Mason, 1956. Canad. Jour. Zool. 34: 141. 9.

incompletus Walley. N. S. w. to Alta., s. to Pa. and Ariz. Host: Pikonema sp. Smicroplectrus incompletus Walley, 1937. Canad. Ent. 69: 134. ♀.

jucundus albilineatus (Walsh). Que. w. to Alaska, s. to Colo. and Calif. S. jucundus jucundus (Holmgren) is Palearctic.

Cteniscus albilineatus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 107. "♂" = ♀.

robustus Walley. Que. w. to Alta., s. to N. Y., Mich., and Nev. Ecology: Observed on Populus ovipositing on Nematus sp. Host: Nematus sp. Smicroplectrus robustus Walley, 1937. Canad. Ent. 69: 135. Q.

takomae Mason. N. W. T., Alaska, Wash.

Smicroplectrus takomae Mason, 1956. Canad. Jour. Zool. 34: 131. 8. 9.

walleyi Mason. Que., N. Y., Pa., Md., Va., Ont., Ohio, Ky., Nebr.

Smicroplectrus walleyi Mason, 1956. Canad. Jour. Zool. 34: 132. 3, 9.

Genus ACROTOMUS Holmgren

Acrotomus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 222.
 Type-species: Tryphon lucidulus Gravenhorst. Desig. by Viereck, 1912.
 Delotomus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 194, 215. Unnecessary n. name for Acrotomus Holmgren.

Taxonomy: Mason, 1962. Canad. Ent. 94: 1285-1287.

succinctus (Gravenhorst). N. Y., Ont., Mich.; Europe. Adventive.

Tryphon succinctus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 166. 3, 9.

Genus CTENISCUS Haliday

Cteniscus Haliday, 1832. In Curtis, Brit. Ent., v. 9, no. 399.
Type-species: Tryphon sexilituratus Gravenhorst. Monotypic. The type-species is regarded as a synonym of Cteniscus pedatorius (Panzer).
Eudiaborus Kerrich, 1952. Brit. Mus. (Nat. Hist.) Ent., Bul. 2: 415.

Type-species: Diaborus pallitarsis Thomson. Orig. desig. The type-species is regarded as a synonym of Cteniscus scalaris (Gravenhorst).

The name Cteniscus has not traditionally applied to this genus, the change in application being made by Townes, Townes, and Gupta (1965) in compliance with the fact that Tryphon sexilituratus Gravenhorst was the only species originally included; (see Townes, 1969); other names mentioned in the original description (e.g. Cteniscus aurifluus) were then nomina nuda. Prior to the description of Eudiaborus, the name Diaborus Foerster had been incorrectly applied to this genus.

Revision: Mason, 1955, Canad. Jour. Zool. 33: 21-63 (as Eudiaborus).

Taxonomy: Kerrich, 1952. Brit. Mus. (Nat. Hist.) Ent., Bul. 2: 314-316, 415-416. —Townes,
 Townes, and Gupta, 1965. Amer. Ent. Inst., Mem. 5: 113. —Townes, 1969. Amer. Ent. Inst.,
 Mem. 11: 188-190. — Kerrich, 1975. Polskie Pismo Ent. 40: 125-126.

devius (Mason). Man., Colo., Alaska; Europe.

Eudiaborus devius Mason, 1955. Canad. Jour. Zool. 33: 34. 9.

dorsalis Cresson. N. S. w. to Alaska, s. to N. Y., Ill., Colo., and Calif.

Cteniscus dorsalis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 282. "∂" = ♀.

Cteniscus mediatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 282. d.

eximius (Mason). N. Y.

Eudiaborus eximius Mason, 1955. Canad. Jour. Zool. 33: 33. 9.

flavicircus (Mason). Ont., Ohio, S. C., Ind. Host: Pristiphora sp.

Eudiaborus flavicircus Mason, 1955. Canad. Jour. Zool. 33: 27. ♂, ♀.

glutiniatus (Roman). Maine, B. C., Alaska; N. Eurasia.

Diaborus glutiniatus Roman, 1909. In Hamburg, Naturw. Unters. Sarekgebirges, v. 4, p. 282. δ , \circ .

leptonyx (Mason). Newfoundland (Labrador) w. to Alaska, s. to Man., Colo., Ariz., and Calif. Eudiaborus leptonyx Mason, 1955. Canad. Jour. Zool. 33: 37. 3, 9.

luminosus (Mason), N. Y.

Eudiaborus luminosus Mason, 1955. Canad. Jour. Zool. 33: 40. 9.

maculiventris maculiventris (Ashmead). Newfoundland (Labrador) w. to B. C., s. to Mass. and Colo.

Diaborus maculiventris Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 197. d.

Diaborus ignipes Davis, 1897, Amer. Ent. Soc., Trans. 24: 231. 9.

maculiventris sexmaculatus (Ashmead). N. W. T., N. Man., Alaska. More northwestern than the nominate subspecies, m. sexmaculatus probably having decended from a

Palearctic-Beringian glacial refugium. A third subspecies, m. borioal pinus Kerrich,

occurs in Europe and is rather similar to m. sexmaculatus.

Diaborus sexmaculatus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 212. 3.

nigrocephalus (Davis). Conn., Md., Ga.

Diaborus nigrocephalus Davis, 1897. Amer. Ent. Soc., Trans. 24: 232. 9.

promediatus arizonicus (Mason), N. Mex., Ariz.

Eudiaborus promediatus arizonicus Mason, 1955. Canad. Jour. Zool. 33: 60. 9.

promediatus cressoni (Mason). N. Y. w. to s. Ont. and Mich., s. to Va. Host: Nematus salicisodoratus Dyar.

Eudiaborus promediatus cressoni Mason, 1955. Canad. Jour. Zool. 33: 59. 8.

promediatus promediatus (Mason). Newfoundland (insular) w. to Alaska, s. to N. S., s. Ont., Minn., Colo., and B. C. Host: Nematus currani Ross, Hemichroa crocea (Geoff.).

Eudiaborus promediatus promediatus Mason, 1955. Canad. Jour. Zool. 33: 56. 8, 9.

pulchellus (Mason). Mass., N. J., Pa., Md., Mich.

Eudiaborus pulchellus Mason, 1955. Canad. Jour. Zool. 33: 50. 8, 9.

pyelechus (Mason). Mass., N. J., Pa., Md., Mich.

Eudiaborus pyelechus Mason, 1955. Canad. Jour. Zool. 33: 25. ♂, ♀.

scaphuloides (Mason). Que., Maine, R. I., Md., Ont., Mich., Idaho.

Eudiaborus scaphuloides Mason, 1955. Canad. Jour. Zool. 33: 40. 8, 9.

similis (Davis), Que. w. to Alaska, s. to N. H., Nebr., Colo., and Calif. The division of this species into four subspecies by Mason (1955) is rather unconvincing.

Diaborus similis Davis, 1897. Amer. Ent. Soc., Trans. 24: 231. 9 (& misdet.).

Diaborus nebraskensis Davis, 1897. Amer. Ent. Soc., Trans. 24: 232. d.

Diaborus citrifrons Ashmead, 1902, Wash, Acad. Sci., Proc. 4: 212. d.

Cteniscus vitticollis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 113. "&" = 9.

Genus SCAPNETES Townes

Scapnetes Townes, 1969. Amer. Ent. Inst., Mem. 11: 190.

Type-species: Exenterus ornatus Walsh. Orig. desig. Enigmatically, Townes (1969) added the qualifying phrase "as interpreted by Mason, 1956" to his type-species designation, but then went on to point out, in effect, that Mason (1956) had confused two species under the name ornatus.

ornatus (Walsh). N. S., N. B., Que., N. H., Conn., S. C., Ga., Fla., Ont., Mich. Exenteron (!) ornatus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 105. 8.

Taxonomy: Mason, 1956, Canad, Jour. Zool, 34: 120-124.

rufus (Provancher), Que.

Cteniscus rufus Provancher, 1876. Nat. Canad. 8: 318. 9.

Taxonomy: Townes, 1969. Amer. Ent. Inst., Mem. 11: 190.

Genus EXENTERUS Hartig

Exenterus Hartig, 1837. Arch. f. Naturgesch. 1: 156.

Type-species: Ichneumon marginatorius Fabricius. Monotypic.

Actenonyx Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 195. Preocc. by White, 1846. Type-species: Ichneumon marginatorius Fabricius. By subsequent monotypy from inclusion by Viereck, 1911.

Picroscomus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 195.

Type-species: Tryphon ictericus Gravenhorst, By subsequent monotypy from inclusion by Thomson, 1883.

Members of this genus are parasitic upon the larvae of Diprionidae.

Revision: Cushman, 1940. U. S. Dept, Agr. Misc. Pub. 354: 1-14. —Cushman, 1943. Canad. Ent. 75: 169-174 (additions and corrections to 1940 revision).

Taxonomy: Finlayson, 1963. Canad. Ent. 95: 468-488 (key to final-instar larvae). - Mason. 1967. Canad. Ent. 95: 375-384 (egg structure specializations).

abruptorius (Thunberg). Que., Ont.; Eurasia. Introduced. Host: Neodiprion sertifer (Geoff.), N. lecontei (Fitch), N. pratti banksianae Roh. Dowden (1960) stated that E. abruptorius is known to be established in N. J., but no specimens of abruptorius from N. J. can be found in the U. S. Natl. Museum collection; lacking evidence to the contrary, I assume that the N. J. record for abruptorius is based upon incorrectly identified specimens. Ichneumon abruptorius Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8:

279; 9: 360. ♂ (♀ misdet.). Exenterus cingulatorius Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.). 1:

229. ♀.

Exenterus coreensis Uchida, 1930. Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 270. 3, 9.

Taxonomy: Finlayson, 1960. Canad. Ent. 92: 28 (larva).

Biology: Morris, 1937. Bul. Ent. Res. 28: 525-534. - Salt, 1941. Cambridge Phil. Soc., Biol. Rev. 16: 256. - Wilkes, 1942. Ent. Soc. Ontario, Ann. Rpt. for 1941, p. 41-44. - Guryanova, 1972. Zool. Zhur. 51: 845-854 (Russ. with Ent. sum.).

adspersus Hartig. Eurasia. Introduced in N. B. in 1938 and possibly in mixture with other Exenterus spp. at other Canadian localities between 1933 and 1939, apparently without becoming established. The target host for introductions in Canada was Gilpinia hercyniae (Htg.), but I find no record of adspersus having been reared from hercyniae during the period in which hercyniae has been resurrected from snonymy with Gilpinia polytoma (Htg.) (i.e. since 1939).

Exenterus adspersus Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 271.

Exenterus lepidus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 231. ∂. Exenterus laricinus Thomson, 1888. Opusc. Ent. 12: 1254. ♀.

Exenterus oleaceus Uchida, 1931. Insecta Matsumurana 5: 146. 9.

Taxonomy: Beirne, 1941. Soc. Brit. Ent., Trans. 7: 180-181 (final-instar larva). —Iwata, 1958; 1960. Acta Hym. 1: 69; 163 (egg and ovary).

Biology: Morris, Cameron, and Jepson, 1937. Bul. Ent. Res. 28: 375-376.

affinis Rohwer. Que., Maine, Ont. Host: Gilpinia hercyniae (Htg.), Neodiprion abietis (Harris). Exenterus affinis Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 225. 9.

Taxonomy: Finlayson, 1960. Canad. Ent. 92: 928 (final-instar larva).

amictorius (Panzer), N. S. s. to n. W. Va., w. to N. Dak.; Europe. Introduced. Host: Gilpinia hercyniae (Htg.), Diprion similis (Htg.), Neodiprion lecontei (Fitch), N. nanulus nanulus Schedl, N. sertifer (Geoff), N. swainei (Midd.).

Ichneumon marginatorius Fabricius, 1793. Ent. System., v. 2, p. 145. (female). Preocc. by Rossi, 1790.

Taxonomy: Finlayson, 1960. Canad. Ent. 92: 928-930 (final-instar larva).

Biology: Morris, Cameron, and Jepson, 1937. Bul. Ent. Res. 28: 377 (as Exenterus sp.). walleyi Cushman. N. B., Ont., Ind. Host: Neodiprion abietis (Harris), N. nanulus nanulus Schell, N. sertifer (Geoff.).

Exenterus walleyi Cushman, 1943. Canad. Ent. 75: 171. 8, 9.

Taxonomy: Finlayson, 1960. Canad. Ent. 92: 29-30 (final-instar larva).

Genus ERIDOLIUS Foerster

Anisoctenion Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 194.

Type-species: Acrotomus xanthopus Holmgren. By subsequent monotypy from inclusion by Schmiedeknecht, 1907. The type-species is considered to be a synonym of Eridolius alacer (Gravenhorst).

Eridolius Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 195.

Type-species: Exenterus pygmaeus Holmgren. By subsequent monotypy from inclusion by Thomson, 1883.

Until recently the name Cteniscus was applied to this genus because Eridolius aurifluus (Haliday) was incorrectly regarded as the type-species of Cteniscus (see discussion under Cteniscus). Eridolius is Holarctic with many species of boreal distribution. Many of the species occurring in the Nearctic Region are undescribed.

Taxonomy: Mason, 1962. Canad. Ent. 94: 1291 (generic limits, as Cteniscus). —Townes, 1969. Amer. Ent. Inst., Mem. 11: 191-192.

Microplectron alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 212. 3.

Taxonomy: Mason, 1951. In Muesebeck, Krombein, and Townes, U. S. Dept. Agr., Agr. Monog. 2: 228 (syn.).

TRIBE IDIOGRAMMATINI

This tribe includes *Idiogramma* and the fossil genus *Urotryphon* described by Townes (1973) from Cretaceous amber (80 to 90 million years old) collected in the U. S. S. R.

Taxonomy: Townes, 1973. Ent. Soc. Wash., Proc. 75: 282-287.

Genus IDIOGRAMMA Foerster

Idiogramma Foerster, 1867. In Kirchner, Cat. Hym. Europae, p. 67. Nomen nudum. The nomen nudum Idiogramma euryops Foerster also appears on p. 67.

Idiogramma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 163.

Type-species: Idiogramma euryops Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1868.

Macrochasmus Thomson, 1888. Opusc. Ent. 12: 1279.

Type-species: Macrochasmus alysiinus Thomson. Monotypic.

Lysiognatha Ashmead, 1895. Ent. Soc. Wash., Proc. 3: 276.

Type-species: Lysiognatha comstockii Ashmead. Monotypic.

Members of this Holarctic genus parasitize larvae of Xyela in the staminate cones of Pinus. Oviposition occurs at about the time when the Xyela larval development is nearing completion, which apparently just precedes the time the host pine sheds its pollen. The eggs of Idiogramma hatch after the host has dropped to the ground and formed its earthen pupal cell.

SUBFAMILY EUCEROTINAE

Genus EUCEROS Gravenhorst

Euceros Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 368.

Type-species: Euceros crassicornis Gravenhorst, Monotypic.

Eumesius Westwood, 1840. Introd. Mod. Classif. Ins., v. 2, p. 153. Unnecessary n. name for Euceros Gravenhorst, which is not preoce. by Eucera Scopoli, 1770.

Omaloceros Giraud, 1857. Zool.-Bot. Gesell. Wien, Verh. 7: 163. Unnecessary n. name for Euceros Gravenhorst.

Tautozelus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 212.

Type-species: Euceros egregius Holmgren. Included and desig. by Perkins, 1962. The type species is regarded as a synonym of E. serricornis Haliday.

Eucerus(!) Verhoeff, 1892. Ent. Nachr. 18: 4.

Pseudasthenara Uchida, 1930. Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 276.

Type-species: Asthenara rufocincta Ashmead. Monotypic and orig. desig.

This is the only genus in the Eucerotinae; it is moderate sized, and its distribution is Holarctic, Australian (one undescribed sp.), and Ethiopian (one Madagascan sp.). The genus was placed in the Tryphoninae (as tribe Eucerotini) by Townes (1969), apparently based upon the similarities between the final instar larvae of Euceros and Exenterus (cf. Finlayson [1960, p. 34]), but the egg, the early larval instars, the adult, and the biology of Euceros differ so greatly from those of Tryphoninae or any other Ichneumonidae that the genus is here placed in a subfamily of its own, as was done by Perkins (1959). Barron (1977) has published a revision of the Nearctic species; I regret that it was not feasible for me to revise the present treatment of Euceros accordingly.

Euceros eggs are stalked and greatly resemble those of Chrysopidae; they are deposited on foliage near early-instar larvae of a carrier host (defoliating sawflies or Lepidoptera). The planidial first larval instar of Euceros remains upon its empty chorion at the top of the egg stalk until it is able to attach to a passing carrier host. Although a Euceros planidium obtains enough fluid from the carrier host to sustain itself, it is an obligate hyperparasite and cannot develop further on the carrier host; its chance for completing its development depends upon the host being parasitized (presumably most often subsequently) by another ichneumonid (it seems reasonable to expect rearings from larger Braconidae also). The time at which a Euceros planidium enters its true host is not known for certain and may vary according to the true host's mode of parasitism (true hosts include external as well as internal parasites). When the true host is an internal larval parasite (e.g. Phobocompe or Olesicampe), it appears likely that the first-instar Euceros planidium remains externally attached to the carrier host until the mature larva of the

true host has killed the carrier host and emerged from it. When the true host is an internal larval-pupal parasite (a species of Anomaloninae being recorded as a host of Euceros frigidis Cresson) it would be necessary for the Euceros planidium to bore through the integument of the carrier host in order to reach the true host. There appear to be seven or eight larval instars; during the first four stadia, the Euceros larvae are internal parasites, but during the last three or four stadia they are external parasites.

SUBFAMILY ADELOGNATHINAE

Genus ADELOGNATHUS Holmgren

Adelognathus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 196.

Type-species: Adelognathus brevicornis Holmgren, Desig, by Viereck, 1912. Pammicra Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 181.

Type-species: Hemiteles dorsalis Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1883.

Sunaema Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 201.

Type-species: Adelognathus brevicornis Holmgren. Monotypically included and desig, by Viereck, 1914, Perkins (1962) incorrectly stated that species had been included by Szepligeti (1911), but Szepligeti merely placed Sunaema as a synonym of Adelognathus, which does not constitute inclusion of species.

Notomeris Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25; 201.

Type-species: Adelognathus difformis Holmgren, By subsequent monotypy from inclusion by Thomson, 1888. According to Perkins (1943) the species identified as A. difformis Holmgren by Thomson is A. thomsoni Schmiedeknecht.

Cnemischus Foerster, 1868, Naturh. Ver. Rheinlande, Verh. 25; 201.

Type-species: Adelognathus (Cnemischus) pilosus Thomson. Desig. by Townes, 1944 from two species included by Thomson, 1888.

Pammicrus Thomson, 1883. Opusc. Ent. 9: 880. Emend. Cnemischus Thomson, 1888. Opusc. Ent. 12: 1277. Emend.

Townes (1969) treated Adelognathus as the only genus in the Adelognathinae; the genus is Holarctic and of moderate size. Several species have been reared from larvae or sawflies; in one case the Adelognathus larvae are known to have fed externally and gregariously.

Taxonomy: Szepligeti, 1911. In Wytsman, Gen. Ins., fasc. 144, p. 50. —Perkins, 1943. Roy. Ent. Soc. London, Trans. 93: 95-97. - Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 209-210. - Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 414, 439, 442, 455. - Townes, 1969. Amer. Ent. Inst., Mem. 11: 207-208.

C. was collected as an adult in its cocoon, which was extracted from rotten beech wood.
 - Odontocolon ochropus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 482. ♂, ♀.
- parvum Townes. Northwestern Wyo., n. Colo., n. Idaho, s. B. C., Wash., n.w. Oreg. Odontocolon parvum Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 472. 3, 9.
- polymorphum Cushman. Southwestern B. C., n.w. Wash., w. Oreg. Ecology: Thirteen paratypes were reared from a branch of Alnus (presumably rubra) infested with Anobiidae, and two other specimens emerged from a board of Unbellaria catifornica infested by Lyctus caricollis LeC. and the anobiid, Ptilinus basilis LeC. The adults can be wingless, brachypterous (brachypterous male not known), or fully winged. Odontocolon polymorphum Cushman, 1942. Ent. Soc. Wash, Proc. 44: 180. 3, 9.
- pullum Townes. Southern B. C., e. Calif. The four type specimens included one wingless female.
 - Odontocolon pullum Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 456. \eth , \Im .
- punctatum (Cushman). Northwestern Wyo., n. Idaho, s. B. C., w. Wash, e. Oreg., and e. Calif. Ecology: Notes in the U. S. Natl. Museum indicate that the holotype was "emerging? from [a] wood wasp? burrow in [a] dead grand fir," from which Leptura obliterata Hald. also emerged (cf. Cushman, 1930); one specimen was extracted from Abies along with

two immature adults and a larva of a siricid (="Tremex") and is labeled (incorrectly?) as being a parasite of "Tremex."

Odontomerus punctatus Cushman, 1930. U. S. Natl. Mus., Proc. 77 (3): 12. 9.

sierrae Townes. Eastern Calif.

Odontocolon sierrae Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 471. δ , \circ .

strangaliae (Rohwer). Que. s. to N. C., w. to e. Minn. and central Ala. Host: Strangalina luteicornis (F.) in grape. "Leptura" sp. in rotten oak branch.

Odontomerus strangaliae Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 158. 9.

vicinum (Cresson). Que. w. to s.e. B. C., s. to n. Va., s. Ohio, n. Colo., and e. Oreg. Host: Dicerca divaricata (Say) in Alnus sp., D. divaricata! in Betula nigra, D. obscura F. in hackberry.

Odontomerus vicinus Cresson, 1870. Amer. Ent. Soc., Trans. 3: 168. d.

Genus XORIDES Latreille

There are ten subgenera, only two of which have Nearctic species.

Revision: Townes and Townes, 1960. U. S. Natl. Mus. Bul. 216 (pt. 2): 489-530 (subgenera of world and Nearctic spp.).

Genus XORIDES Subgenus EXOMUS Townes

Xorides subg. Exomus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 496.

Type-species: Anomalon humerale Say sensu Townes and Townes (1960). Orig, desig.

A single variable species in known.

humeralis (Say). Newfoundland (Labrador) w. to B. C., s. to Fla., Tex., s.e. Ariz., and s. Calif.; Mexico. Host: Neoclytus acuminatus (F.) in Ilex opaca, Phymatodes testaceous (L.) in red oak, Xylotrechus undulatus (Say)? in Abies lasiocarpa. The six "subspecies" of Townes and Townes (1960) are too poorly defined and based upon too few specimens to be worth recognizing.

Anomalon humerale Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 74. 9.

Xylonomus australis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 167. 9.

Xylonomus Lavallensis Provancher, 1874. Nat. Canad. 6: 59. ♀.

Xylonomus (Mocrophora) piceatus Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 357. N. syn. Xorides (Exomus) humeralis mexicanus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 497. 9. N. syn.

Xorides (Exonus) humeralis excomptus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 500. ♂, ♀. N. syn.

Xorides (Exomus) humeralis chiricensis Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 501. ♀. N. syn.

Genus XORIDES Subgenus Xorides Latreille

Xorides Latreille, 1809. Gen. Crust. Ins., v. 4, p. 4.

Type-species; Ichneumon indicatorius Latreille. Monotypic.

Xylonomus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 819.

Type-species: Ichneumon irrigator Fabricius. Desig. by Curtis, 1831.

Sterotrichus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 169.

Type-species: Xylonomus pilicornis Gravenhorst. By subsequent monotypy from inclusion by Brischke, 1880. The type-species is regarded as a synonym of X. fuliador (Thunbere).

Sichelia Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 169.

Type-species: Xylonomus filiformis Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1888.

Rhadina Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 170. Preocc. by Billberg, 1828. Type-species: Xylonomus ater Gravenhorst. Monotypically included and desig. by Schmiedeknecht, 1888.

Rhadinopim pla Schulz, 1906. Zool. Ann. 4: 23. N. name for Rhadina Foerster.

Xylonomimus Clement, 1938. Festschr. Embrik Strand, v. 4, p. 539.

Type-species: Xylonomus gracilicornis Gravenhorst. Orig. desig.

Neoxylonomus Clement, 1838. Festschr. Embrik Strand, v. 4, p. 566. Preocc. by Szepligeti, 1914.

Type-species: Neoxylonomus strandi Clement. Monotypic.

Amphixylonomus Benoit, 1952. Soc. Ent. de Belg., Bul. et Ann. 88: 136. Described as a subgenus, but treated nomenclaturally as a genus.

Type-species: Amphixylonomus konduensis Benoit. Monotypic and orig. desig.

This is a large subgenus of Holarctic, Oriental, Australian? (one sp. described as being from New Guinea), and Ethiopian (one sp.) distribution.

albopictus (Cresson), Que. s. to n. Ga., w. to central N. Dak., e. Nebr., and n.e. Tex. Ecology: Parasite of Coleoptera which bore in hardwoods. Host: Saperda discoidea F., S. trideutata Oliv., Scolytus multistriatus (Mar.)?

Xyolonomus albopictus Cresson, 1870. Amer. Ent. Soc., Trans. 3: 168. 9.

Xorides Canadensis Provancher, 1875. Nat. Canad. 7: 248. 8.

Xylonomus (Moerophora) duplicatus Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 356. 3.

atrox Townes. Southeastern B. C. Known only from the holotype.

Xorides (Xorides) atrox Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 520. Q.

boharti Townes, Northwestern Calif.

rileyi (Ashmead). N. Y. s. to n. Fla., w. to Minn. and Mo. Host: Anoplodera nitens (Forster)?, Phymatodes aereus (Newm.), P. testaceus (L.), Physocnemum andreae (Hald.), Xylotrechus colonus (F.), buprestid? in black oak, borer under willow bark.

Xylonomus rileyi Ashmead, 1889. In Fox, U. S. Dept. Agr., Insect Life 2: 197. Nomen nudum.

Xylonomus rileyi Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 450. ?. The type-locality is presumably Kirkwood, Mo. because notes in the U. S. Natl. Museum pertaining to the number on the label of the holotype (Bureau of Entomology no. 2384) say: "parasite (and its cocoon) border [sic; presumably borer] under willow bark, April 20, 1880, from Miss Murtfeldt."

Xylonomus (Xylonomus) ruficoxis Rohwer, 1913. U. S. Natl. Mus., Proc. 45 (no. 1986): 354.

Xylonomus (Xylonomus) lepturae Rohwer, 1913. U. S. Natl. Mus., Proc. 45 (no. 1991): 534.

rudis Townes. Eastern Calif. Known only from the holotype.

Xorides (Xorides) rudis Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 510. 2.

semirufus Townes, Northern Fla. Known only from the holotype.

Xorides (Xorides) semirufus Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 506. 9.

stigmapterus floridanus (Ashmead). Northwestern S. C., s.e. Ga., n. Fla., s.e. Tex. Xylonomus floridanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 451. 9.

stigmapterus stigmapterus (Say). Newfoundland (Labrador), n. Man., n. B. C., and s. Alaska s. to n.w. S. C., lowa, e. N. Dak., and central Alta. Host: Anoplodera proxima (Say), Druobius sexnotatus Linsley?

Accenitus stigmapterus Say, 1824. In Keating, Narr. Long's 2nd Exped., v. 2 (App.), p.

Xylonomus tartarus Morley, 1913. Fauna Brit. India, Hym., v. 3, p. 78. \(\frac{9}{2}. \) According to Townes (1961) the holotype is erroneously labeled "India," which is presumed to be an error for Indiana.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 113, 175.

SUBFAMILY CRYPTINAE

This is the largest of ichneumonid subfamilies. Townes (1970) recognized 307 genera which he divided among three tribes, the Hemitelini (= Gelini), the Aptesini (= Echthrini), and the Cryptini (= Mesostenini). Most Cryptinae are external parasites.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12, 537 pp. (genera of world).

TRIBE HEMITELINI

This tribe includes most of the smaller Cryptinae. Many of the species oviposit into the egg cocoons of spiders or cocoons of beneficial insects such as Chrysopidae, Braconidae, or other Ichneumonidae. Species of a number of genera attack the puparia or larvae of cyclorrhaphous Dintera.

SUBTRIBE CHIROTICINA

Most of the species of this subtribe occur in the tropics or subtropics. There are 18 genera, but only the worldwide genus *Chirotica* has Nearctic species.

Genus CHIROTICA Foerster

Chirotica Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 173.

Type-species: Hemiteles insignis Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1897.

Allocota Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 173. Preocc. by Motschoulsky, 1860.

Type-species: Allocota confederatae Ashmead. By subsequent monotypy from inclusion by Ashmead, 1896.

Spinolia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 173. Preocc. by Dahlbom, 1854; Costa, 1858; and Robineau-Desvoidy, 1863.

Type-species: Hemiteles maculipennis Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht. 1897.

Syneches Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 173. Preocc. by Walker, 1852. Type-species: Hemiteles thyridopteryx Riley. By subsequent monotypy from inclusion by Ashmead. 1900.

Diaglypta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 176.

Type-species: Diaglypta radiata Ashmead. By subsequent monotypy from inclusion by Ashmead, 1895.

Deuterospinolia Dalla Torre, 1902. Cat. Hym. v. 3, p. 678. N. name for Spinolia Foerster. Hymenosyneches Viereck, 1912. U. S. Natl. Mus., Proc. 42: 149. N. name for Syneches Foerster.

Aphadnus Cameron, 1907. Ann. and Mag. Nat. Hist. (7) 20: 26.

Type-species: Aphadnus rufipes Cameron. Monotypic. A. rufipes is regarded as a synonym of Chirotica decorata (Tosquinet), which is one of the intermediate species tending to merge Chirotica and Paraphylax Foerster (see Townes, 1970).

Between 1944 and 1962 the name Phobetes Foerster was used for this genus in North America. Perkins' (1962) correction of the type-species of Phobetes from Phobetes albinopennis Davis to Tryphon fuscicornis Holmgren transferred the name Phobetes to the Ctenopelmatinae, Eu-

ryproctini. A similar correction also made by Perkins (1962), regarding the type-species of Chirotica, resulted in Chirotica being removed from synonymy with Gelis to take its present application.

Members of this genus parasitize Psychidae.

Taxonomy: Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 389, 413-414, 445. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 21.

confederatae (Ashmead). Fla., Mo., La.; Cuba, Guatemala, Honduras. Host: Astala confederata (Grt.), Cruptothelea nigrita (B. and M.).

Hemiteles alaefasciatus Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 153, Nomen nudum.

Allocota confederatae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 208. 9.

conspicua (Cresson). N. C., Tex. Host: Psychid.

Hemiteles conspicuus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 161. 9.

Taxonomy: Walley, 1941. Canad. Ent. 73: 165.

sheppardi (Walley). Que, Ont., Fla., Idaho, B. C., Wash. Host: Hyaloscotes pithopoera (Dyar). Allocota sheppardi Walley, 1941. Canad. Ent. 73: 165. 9.

thyridopteryx (Riley). Mass. s. to Fla., w. to S. Dak. and s. Calif.; Mexico. Host: Astala edwardsii (Heyl.), Cryptothelea gloveri (Pack.), C. nigrita (B. and M.), Oiketicus abbotii Grt., Thyridopteryx ephemeraeformis (Haw.). Three to six individuals emerge from a single host.

Hemiteles? thyridopteryx Riley, 1869. Mo. State Ent., Ann. Rpt. 1: 150. 9, 8.

Hemiteles thyridopterigis Riley, 1881. U. S. Ent. Comn., Bul. 6: 65. Emend. Phobetes albinopennis Davis, 1898 (1897), Amer. Ent. Soc., Trans. 24: 311. 3.

Hemiteles thyridopterigis var. leucozonatus Ashmead, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 152. Nomen nudum.

Hemiteles thyridopterigis var. fuscus Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 152. Nomen nudum.

Biology: Balduf, 1937. Ent. Soc. Wash., Proc. 39: 177-178.

SUBTRIBE ACROLYTINA

Some members of this subtribe commonly oviposit into the cocoons of Braconidae or other Ichneumonidae. It is possible that some species may at least occasionally be primary parasites of cocoon spinning Lepidoptera, but I am not aware of information establishing this as fact.

Genus CORMOBIUS Townes

Cormobius Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 32.

Type-species: Cormobius tenuis Townes. Monotypic and orig. desig.

There are two undescribed Nearctic species.

tenuis Townes. Md., S. C. Ecology: Two females (holotype and one paratype) were found crawling over the bark of a large standing dead Quercus.

Cormobius tenuis Townes. 1970 (1969). Amer. Ent. Inst., Mem. 12: 32. 9.

Genus ENCRATEOLA Strand

Encrates Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 180. Preocc. by Gistel, 1848. Type-species: Hemiteles (Encratis[1]!) subim pressus Brischke. By subsequent monotypy from inclusion by Brischke, 1892. The type-species is considered to be a synonym of Encrateola laevigata (Ratzeburg).

Encrateola Strand, 1916. Arch. f. Naturgesch. (Abt. A) 81 (5): 77. N. name for Encrates Foerster.

laevigata longicornis (Provancher). Que., N. H., N. Y., Wash., Oreg. E. laevigata laevigata (Ratzeburg) occurs in Europe.

Hemiteles longicornis Provancher, 1882. Nat. Canad. 13: 361. 9.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 34. —Barron, 1975. Nat. Canad. 102: 498 (lectotype selection).

Genus EUDELUS Foerster

Eudelus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 179.

Type-species: Hemiteles scabriculus Thomson. Monotypically included and desig. by Perkins, 1962.

Idemum Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 179.

Type-species: Hemiteles (Idemum) crassiformis Viereck. By subsequent monotypy from inclusion by Viereck, 1917.

Calliphrurus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: Calliphrurus granulosus Davis. By subsequent monotypy from inclusion by Davis, 1898.

crassiformis (Viereck). Conn.

Hemiteles (Idemum) crassiformis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 339-340. d.

Hemiteles selmae Riley, 1890. İn Riley and Howard, U. S. Dept. Agr., Insect Life 3: 153.

Nomen nudum.

Acrolyta aletiae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 209. 9, 8.

Sychnoporthus(!) tuckeri Viereck, 1905. Kans. Acad. Sci., Trans. 19: 315. ♀.

Genus ACROLYTA Foerster

Acrolyta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 174.

Type-species: Acrolyta empretiae Ashmead. Desig. by Viereck, 1914 from three species included by Ashmead, 1896.

Rhadinocera Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177.

Type-species: Hemiteles (Rhadinocera) algonquinus Viereck. By subsequent

monotypy from inclusion by Viereck, 1917.

Mosia Seyrig, 1952. Acad. Malgache, Mem. 39: 69.

Type-species: Mosia crassicomis Seyrig. Monotypic and orig. desig.

Parhemiteles Seyrig, 1952. Acad. Malgache, Mem. 39: 82.

Type-species: Parhemiteles flaviger Seyrig. Orig. desig.

alticola (Ashmead). Colo., Wash. Host: Apanteles sp.

Hemiteles alticola Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 22. 9.

mesochori Ashmead. Conn., Pa., N. C., S. C., Ark. Host: Apanteles congregatus (Say).

Ashmead gave D. C. as the type locality, but the syntypes were actually sent to Riley from Norwalk. Conn. by D. N. Couch.

Hemiteles mesochoridis Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 153. Nomen nudum.

Acrolyta mesochori Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 208. 9.

nigricapitata (Cook and Davis). Que. s. to Tenn., w. to Iowa. Host: Apanteles melanoscelus (Ratz.), Meteorus communis (Cr.).

Hemiteles minutus Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 153.

Nomen nudum.

Hemiteles laticinctus Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 153. Nomen nudum.

Mesochorus microgasteris Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 156. Nomen nudum.

Ischnocerus nigricapitatus Cook and Davis, 1891. Mich. Agr. Expt. Sta., Bul. 73: 11. 9.

Acrolyta empretiae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 209. 9. Hemiteles laticinctus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 210. 3.

Hemiteles (Rhadinocera) algonquinus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 340. 3.

Biology: Muesebeck and Dohanian, 1927. U. S. Dept. Agr. Bul. 1487: 15.

washingtonensis (Cushman). Maine, N. H., N. Y., Mich. Townes (1970) placed this species as a synonym of alticola, but I have examined the holotypes of both and doubt that he is

Stiboscopus washingtonensis Ashmead, 1906. In Slosson, Ent. News 17: 324. Nomen nudum.

Hemiteles (Isdromas) washingtonensis Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 14.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 40.

Genus INDOVIA Seyrig

Indovia Seyrig, 1952. Acad. Malgache, Mem. 39: 132.
Type-species: Indovia decorata Seyrig. Orig. desig.

Townes (1970) synonymized Indovia with Stiboscopus Foerster, but a correction of the type-species of Stiboscopus from Stiboscopus thoracicus Ashmead to Hemiteles mandibilaris Provancher makes Stiboscopus a synonym of Lysibia (which see). Hemiteles pinjoliae Cushman and Alegina laricellae Mason, which were placed in Stiboscopus by Townes, do nto belong in Indovia and are here left in the subtribe Mastrina where they are placed provisionally in Mastrus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 65-66.

maculithorax (Ashmead), n. comb. Fla.; Puerto Rico, Virgin Isls., Lesser Antilles. Host: Apanteles sp. There is a specimen in the U. S. Natl. Mus. collection which was reared from an Apanteles ocooon in 1927 at Sanford, Fla. by W. E. Stone.

Hemiteles maculithorax Ashmead, 1895. Zool. Soc. London, Proc. 65: 780. 3. Stiboscopus thoracicus Ashmead, 1890. Ent. Soc. London, Trans. 48: 267. 9. 3.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 55 (syn.).

Genus NEOPIMPLA Ashmead

Neopimpla Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 56.

Type-species: Neopimpla abbottii Ashmead. Monotypic and orig. desig.

Cyrtobasis Cushman, 1919. Ent. Soc. Wash., Proc. 21: 114. N. syn.

Type-species: Cyrtobasis rogae Cushman. Monotypic and orig. desig.

Microceratops Seyrig, 1952. Acad. Malgache, Mem. 39: 88. N. syn.

Type-species: Microceratops dentifrons Seyrig. Monotypic and orig. desig.

Townes (1971) erroneously placed Neopimpla as a synonym of Astomaspis Foerster and declared that the type locality of N. abbottii Ashmead is Zululand in South Africa by virtue of his synonymizing abbottii with Caenopimpla crassa Morley (1926). However, the handwritten manuscript of Ashmead's (1900) classification of the Ichneumonoidea shows that his parenthetical citation "Africa" was intended for Hemipimpla Saussure and not Neopimpla. Ashmead's use of the name abbottii for the type-species of Neopimpla was apparently a lapsus for the name he really intended and was caused by his confusion with his genus Erythropimpla (type-species: E. abbottii Ashmead). The only specimens ever to be found bearing a label with the name Neopimpla in Ashmead's handwriting are two of Cushman's paratypes of Cyrtobasis rogae. As noted by Cushman, these specimens run to Neopimpla in Ashmead's key to the Pimplini.

Taxonomy: Cushman, 1919. Ent. Soc. Wash., Proc. 21: 116. - Townes, 1971. Ent. Soc. Wash., Proc. 73: 445.

bicarinata (Riley), n. comb. Ill., Mo., Kans., Colo. Host: Rogas sp. Polysphincta bicarinata Riley, 1871. Mo. State Ent., Ann. Rpt. 3: 71. 3. Neopimpla abbottii Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 56. 9. N. syn. Cyrtobasis rogae Cushman, 1919. Ent. Soc. Wash., Proc. 21: 115. 9.

Genus DIAGLYPTIDEA Viereck

Diaglyptidea Viereck, 1913. U. S. Natl. Mus., Proc. 46: 371. Type-species: Diaglyptidea roepkei Viereck. Monotypic and orig. desig. lavoiei (Provancher). Que., Maine, N. H., N. Y., Mich., Wis. Phyadeuon Lavoiei Provancher, 1882. Nat. Canad. 13: 353. 9. Hemiteles pallipennis Provancher, 1882, Nat. Canad. 13: 360. 9. 8.

Genus LYSIBIA Foerster

Pemon Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 174. Type-species: Pemon proximum Perkins. Monotypically included and desig, by Perkins, 1962.

Lusibia Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 175.

Type-species: Hemiteles fulvipes Gravenhorst. Desig. by Townes, Momoi, and Townes, 1965 from three species included by Townes, Townes, and Gupta, 1961. The type-species is regarded as a junior synonym of Lysibia nana (Gravenhorst). The designation of nana as type-species by Perkins (1962) is invalid because nana was not among the species included by Townes, Townes, and Gupta (1961). Stiboscopus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 182. N. syn.

Type-species: Hemiteles mandibularis Provancher. By subsequent monotypy from inclusion by [Ashmead in] Slosson, 1896. Viereck (1911, 1914) and Perkins (1962) incorrectly believed Ashmead (1900) to be the oldest inclusion of species in Stiboscopus; consequently, Viereck's designation of Stiboscopus thoracicus Ashmead as the type-species of Stiboscopus is invalid.

Haplaspis Townes, 1944. Amer. Ent. Soc., Mem. 11: 190. N. syn. Type-species: Hemiteles mandibularis Provancher. Orig. desig.

Between 1914 and 1944 the name Astomaspis Foerster was applied to this genus in the belief that Hemiteles fulvipes Gravenhorst was its type-species. In 1944 Townes corrected this error, but he made another in describing Astomaspis of authors as the new genus Haplaspis while overlooking the fact that the name Stiboscopus should have been applied instead; it should have occurred to him to investigate this possibility because of the fact that the combination "Stiboscopus mandibularis Slosson, ... 1896" is given in his synonymy for mandibularis (Provancher). Since 1961 the name Lusibia has been applied to this genus, and I here suppress Stiboscopus as a synonym of Lysibia because I have been urged not to suppress Lysibia. Stiboscopus sensu Townes (1970) and Townes and Townes (1973) was a confused mixture of species; the two Nearctic species, Hemiteles pinifoliae Cushman and Alegina laricellae Mason, belong in the subtribe Mastrina (i.e. where Townes had placed Stiboscopus) where I am placing them provisionally in the genus Mastrus; the other three species belong in Indovia, which is here placed in the subtribe Acrolytina.

Taxonomy: Slosson, 1896. Ent. News 7: 264 (the combination "Stiboscopus mandibularis Prov." was almost certainly provided by Ashmead rather than Davis and was the first inclusion of a species in Stiboscopus. — Viereck, 1911. U. S. Natl. Mus., Proc. 40: 193 (incorrect designation of Stiboscopus thoracicus Ashmead as type-species of Stiboscopus.) — Viereck, 1914. U. S. Natl. Mus., Bul. 83: 138 (oversight of first inclusion of species in Stiboscopus as well as type-species designation by Viereck, 1911). — Townes, Townes, and Gupta, 1961. Amer. Ent. Inst., Mem. 1: 123 (first inclusion of species in Lysibia). — Perkins. 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 436, 453. — Townes, 1970 (1969).

Amer. Ent. Inst., Mem. 12: 65. — Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 76.

mandibularis (Provancher). Que. s. to N. C., w. to Oreg. and Calif. Host: Apanteles glomeratus (L.), A. longicornis (Prov.), A. melanoscelus (Ratz.), A. scitulus Riley, A. xylinus (Say), A. yakutatensis Ash., Microplitus gortynae Riley. According to Townes and Townes (1951) the Gravenhorst names fulvipes and nana have been erroneously applied to this Nearctic species (L. nana being Palearctic).

Hemiteles mandibularis Provancher, 1875. Nat. Canad. 7: 315. 9.

Acrolyta smerinthi Ashmead, 1900. İn Smith, N. J. State Bd. Agr., Ann. Rpt. 27, sup., p. 569. Nomen nudum.

Taxonomy: Townes and Townes, 1951. U. S. Dept. Agr., Agr. Monog. 2: 238.

SUBTRIBE HEMITELINA

Genus PLEUROGYRUS Townes

Pleurogyrus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 44.

Type-species: Hemiteles hungerfordi Cushman, Orig. desig.

Members of this genus parasitize Gyrinidae which attach their pupal cases to the stems of aquatic plants a few inches above the water line.

Biology: Butcher, 1933. Ent. Soc. Amer., Ann. 26: 79-82.

chebovganensis (Butcher), Mich. Host: Gyrinus sp.

Hemiteles cheboyganensis Butcher, 1933. Ent. Soc. Amer., Ann. 26: 77. 9.

hungerfordi (Cushman), Mich. Host: Gurinus sp.

Hemiteles hungerfordi Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76 (25): 4. 3, 9.

Taxonomy: Butcher, 1933. Ent. Soc. Amer., Ann. 26: 79.

Genus OBISIPHAGA Morley

Obisiphaga Morley, 1907. Brit. Ichn., v. 2, p. 59.

Type-species: Aptesis stenoptera Marshall. Monotypic.

According to Townes (1970) an undescribed species apparently belonging to this genus occurs in the northwestern U. S. The European O. stenoptera has been reared from the egg nests of a pseudoscorpion, Obisium sp.

Genus AROTREPHES Townes

Arotrephes Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 45. Type-species: Cryptus pusillus Cresson. Orig. desig.

mitralis (Provancher), Que.

Platylabus mitralis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 37. 9.

pusillus (Cresson). Mass., N. Y., Md., Ill. Ecology; Occurs in marshy meadows.

Cruptus pusillus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 302.

Genus XIPHULCUS Townes

Xiphulcus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 46.

Type-species: Hemiteles longulus Thomson. Orig. desig. The type-species is regarded as a synonym of x. floricolator (Gravenhorst).

Townes said "this is a moderate sized genus [he knew 15 species], of Holarctic distribution," but the Nearctic species known to him are apparently undescribed.

Taxonomy: Horstmann, 1974. Mus. Natl. Hungarici, Ann. Hist.-Nat. 66: 344 (European spp.).

Genus HEMITELES Gravenhorst

Hemiteles Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 780.

Type-species: Hemiteles tristator Gravenhorst. Desig. by Westwood, 1840. The

type-species is considered to be a synonym of H. bipunctator (Thunberg).

Ocymorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 180.

Type-species: Hemiteles cingulator Gravenhorst. Monotypically included and desigby Townes, 1944. The type-species is considered to be a synonym of H. bimactator (Thunberg).

Members of this genus apparently parsitize spider egg cocoons.

humeralis Provancher. Que. w. to Minn., s. to Tex.

Hemiteles humeralis Provancher, 1874, Nat. Canad. 6: 333. 9.

Stilpnus appendiculatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 44. δ .

Genus ACLASTUS Foerster

Microplex Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 175.

Type-species: Aclastus rufipes Ashmead. By subsequent monotypy from inclusion by Roman, 1909.

Daetora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 175.

Type-species: Hemiteles solutus Thomson. Monotypically included and desig. by Perkins, 1962.

Genus GELIS Thunberg

Gelis Thunberg, 1827. Soc. Sci. Upsala, Nov. Acta 9: 199.

Type-species: Mutilla acarorum Linnaeus. Desig. by Viereck, 1914.

Pezomachus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 867.

Type-species: Mutilla acarorum Linnaeus. Desig. by Curtis, 1835.

Pezolochus Foerster, 1850. Arch. f. Naturgesch. 16 (1): 71.

Type-species: Pezolochus rufipes Foerster, Monotypic.

Hemimachus Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 157.

Type-species; Hemimachus fasciatus Ratzeburg, Desig. by Viereck, 1914.

Thaumatotypus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 172.

Type-species: Thaumatotypus femoralis Brischke. By subsequent monotypy from inclusion by Brischke, 1881.

Plesiomma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 176. Preocc. by Macquart, 1838. Placed as a synonym of Gelis by Townes (1970), but no species have ever been included.

Alegina Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 176.

Type-species: Algina(!) alaskensis Ashmead. By subsequent monotypy from inclusion by Ashmead, 1902.

Rhadiurgus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177. Preocc. by Loew, 1849.

Type-species: Hemiteles bicolorinus Gravenhorst. By subsequent monotypy from inclusion by Uchida, 1933 (June). The type-species is considered to be a synonym of Gelis cinctus (Linnaeus).

Aschistus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177.

Type-species: Hemimachus variabilis Ratzeburg. Desig. by Viereck, 1914 from two species included by Brischke, 1891. The type-species is considered to be a synonym of Gelis cursitans (Fabricius).

Blapsidotes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177.

Type-species: Hemiteles melanarius Gravenhorst. Monotypically included and desig. by Perkins, 1962.

Philonyamus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177.

Type-species: *Philonygus*(!) *alaskensis* Ashmead. Desig. by Viereck, 1914 from two species included by Ashmead, 1902.

Barydotira Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 178.

Type-species: Barydotira hammari Viereck. By subsequent monotypy from inclusion by Viereck, 1912.

Ilapinastes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 179.

Type-species: Hemiteles davidsonii Ashmead. By subsequent monotypy from inclusion by Ashmead, 1896.

Urithreptus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 180. According to Perkins (1962) a male specimen of Gelis (species still unidentified) in the Foerster collection bears the name Urithreptus. No species included.

Terpiphora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 185.

Type-species: Alegina alaskensis Ashmead. Monotypically included and desig. by Viereck, 1914.

Micromeson Strickland, 1912. Ent. Soc. Amer., Ann. 5: 137.

Type-species: Micromeson annulatum Strickland. Desig. by Viereck, 1914. Pezomachus subg. Myrmicomorpha Viereck, 1913. U. S. Natl. Mus., Proc. 44: 566.

Type-species: Pezomachus (Myrmicomorpha) perniciosus Viereck. Monotypic and orig. desig.

Gelis subg. Leptogelis Ceballos, 1925. Eos 1: 155.

Type-species: Gelis (Leptogelis) ariasi Ceballos. Desig. by Townes, 1944.

Thaumatogelis Kupka, 1933. İn Schmiedeknecht, Opusc. Ichn., Sup., fasc. 17, p. 7-8. Name invalid; type-species not designated.

Gelis subg. Cryptogelis Hellen, 1944. Notulae Ent. 24: 2. Name invalid; type-species not designated.

Gelis subg. Holcogelis Aubert, 1957. Muenchen. Ent. Gesell., Mitt. 47: 226.

Type-species: Pezomachus corruptor Foerster. Orig. desig.

Arctodeuon Hellen, 1967. Notulae Ent. 47: 100.

Type-species: Hemiteles glacialis Holmgren. Monotypic and orig. desig.

Rhadiurginus Hellen, 1967. Notulae Ent. 47: 109. N. name for Rhadiurgus Foerster.

Members of this genus are particularly well known as hyperparasites which attack the cocoons of Braconidae or other Ichneumonidae, but there are also many species which attack the egg cocoons of spiders. Apparently, some species of *Gelis* can sometimes be primary parasites in the cocoons of sawflies or small Lepidoptera.

Revision: Strickland, 1912. Ent. Soc. Amer., Ann. 5: 113-140 (of very limited use).

Taxonomy: Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 462. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 53-55.

robustus (Strickland). Ariz.

Pezomachus robustus Strickland, 1912. Ent. Soc. Amer., Ann. 5: 120. 9.

rotundiceps (Cresson), Tex.

Mesoleptus? rotundiceps Cresson, 1872. Amer. Ent. Soc., Trans. 4: 167. 8.

Hemiteles pallidus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 406. J. N. syn. The holotype of pallidus has not been found, and it is my belief that its holotype is actually the same specimen as the holotype of rotundiceps. Although Ashmead's description of the propodeum does not agree perfectly with the holotype of rotundiceps, Ashmead is not renouned for his accuracy. There are at least two cases where it is known with certainty that Ashmead redescribed unique specimens from the Belfrage Collection which had already been described by Cresson.

sessilis (Provancher). Que., N. Y., S. C., Ohio, Oreg.

Hemiteles sessilis Provancher, 1874. Nat. Canad. 6: 334. 9.

Cruptus brevicornis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 67. 9. Preocc. by Gravenhorst, 1829 and Provancher, 1875.

Cruptus brevicinctus (!) Provancher, 1889, Addit, Corr, Faune Ent, Canada Hym., p. 452

Amydraulax echthroides Townes, 1944. Amer. Ent. Soc., Mem. 11: 174. N. name for C. brevicornis Provancher.

echthroides oribasus Torgerson. Colo., Ariz.

Pygocryptus echthroides oribasus Torgerson, 1974. Canad. Ent. 106: 893. ∂, ♀.

erugatus Torgerson, Que, s. to N. C., w. to Mich.

Pygocryptus erugatus Torgerson, 1974. Canad. Ent. 106: 894. ♂, ♀.

exilis Torgerson, Calif.

Pygocryptus exilis Torgerson, 1974. Canad. Ent. 106: 896. S.

exochus Torgerson. Que., N. Y., Md., S. C., Mich.

Pygocryptus exochus Torgerson, 1974. Canad. Ent. 106: 895. ♂, ♀.

Genus MASTRUS Foerster

Perosis Foerster, 1868, Naturh. Ver. Rheinlande, Verh. 25: 169.

Type-species: Echthrus armatus Gravenhorst. Desig. by Viereck, 1914 from two species included by Schmiedeknecht, 1888.

Daictes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 176.

Type-species: Phygadeuon (Daictes) fukai Viereck. By subsequent monotypy from inclusion by Viereck, 1911.

Aenoplex Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 176.

Type-species: Aenoplex betulaecola Ashmead. By subsequent monotypy from inclusion by Ashmead, 1896.

Mastrus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 176.

Type-species: Phygadenon (Mastrus) neodiprioni Viereck. By subsequent monotypy from inclusion by Viereck, 1911.

Isadelphus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177.

Type-species: Hemiteles inimicus Gravenhorst. Monotypically included and desig. by Viereck, 1914.

Zoophthorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 180.

Type-species: Hemiteles (Zoophthorus) nigricaniformis Viereck. By subsequent monotypy from inclusion by Viereck, 1917.

Micromonodon Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 195.

Type-species: Hemicryptus tener Kriechbaumer. By subsequent monotypy from inclusion by Ashmead, 1900. Ashmead (1900) suppressed the monotypic genus Hemicryptus Kriechbaumer as a synonym of Micromonodon, which inferred inclusion of Hemicryptus tener Kriechbaumer in Micromonodon (cf. Perkins, 1962).

Cecidonomus Bridgman, 1880. Entomologist 13: 264.

Type-species: Cecidonomus gallicola Bridgman. Desig. by Viereck, 1914.

Hemicryptus Kriechbaumer, 1893. Ent. Nachr. 19: 152. Preocc. by Zittel, 1885. Type-species: Hemicryptus tener Kriechbaumer. Monotypic.

Chaetomastrus Hellen, 1967. Notulae Ent. 47: 105.

Type-species: Hemiteles hirticeps Thomson. Monotypic and orig. desig.

Mastrus seems to be an extraordinarily heterogeneous assemblage of species, some of which may prove to belong in the subtribe Phygadeuontina. Dr. Klaus Horstmann will have significantly modified the generic synonymy prior to the appearance of this catalog.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 173, 212. — Perkins, 1962. Brit. Mus. (Nat. Hist.), Bul. 11: 436.

aciculatus (Provancher). N. B. s. to Va., w. to s. Alaska and Calif. Host: Coccygominus sanguinipes erythropus (Vier.), Itoplectis behrensii (Cr.), Meteorus niveitarsis (Cr.), Arge sp., Gilpinia hercyniae (Htg.), Zadiprion townsendi (Cock.), Neodiprion nanulus Schedl, N. pinetum (Nort.), N. pratti pratti (Dyar), N. ragifrons Midd., N. sertifer (Geoff.), N. swainei Midd., N. taedae linearis Ross, N. tsugae Midd., Lambdina fiscellaria (Sn.), Protoboarmia porcelaria (Gn.). The observations by Cushman (1919) cast suspicion upon records for aciculatus as a primary parasite of Lepidoptera.

Genus AMYDRAULAX Cushman

Amydraulax Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 4.

Type-species: Amudraulax pulchra Cushman, Monotypic and orig. desig.

There is an undescribed species which apparently occurs in northern Mexico as well as in the southwestern U. S., it has been reared from cones of *Pinus ponderosa*. The genus is not known to occur outside of the southwestern part of the Nearetic region.

pulchra Cushman. Calif. Ecology: The only host known for pulchra is a cerambycid which bores in the branches of Sequoia gigantea. Host: Callidium sequarium Fisher. Anudraular pulchra Cushman, 1922. U. S. Natl. Mus., Proc. 60 (22): 5. 9.

Genus APOTEMNUS Cushman

Apotemnus Cushman, 1940. U. S. Natl. Mus., Proc. 88: 359.

Type-species: Cryptus truncatus Cushman. Monotypic and orig. desig.

Only the type-species is known.

truncatus Cushman. Oreg., Calif. Ecology: Reared from cones of Cupressus macrocarpa. Apotemnus truncatus Cushman, 1940. U. S. Natl. Mus., Proc. 88: 360. 9.

Genus HELICOSTIZUS Foerster

Brachycentrus Taschenberg, 1865. Ztschr. f. die Gesam. Naturw. Halle 25: 106. Preocc. by Curtis, 1834.

Type-species: Cryptus pimplarius Taschenberg. Monotypic. The type-species is regarded as a synonym of H. restaurator restaurator (Fabricius).

Helcostizus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 186.

Type-species: Cryptus brachycentrus Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1888. The type-species is regarded as a synonym of H. restaurator restaurator (Fabricius).

Cyrtocryptus Marshall, 1872. Cat. Brit. Hym., v. 3, p. 41.

Type-species: Cryptus brachycentrus Gravenhorst. Monotypic.

Mesocryptus Thomson, 1873. Opusc. Ent. 5: 519, 521.

Type-species: Cryptus brachycentrus Gravenhorst. Monotypic and orig. desig. Heterocryptus Woldstedt, 1873. Bidr. till Kann. af Finlands Natur och Folk 21: 73. Type-species: Cryptus brachycentrus Gravenhorst. Desig. by Viereck, 1914.

Asternaulax Viereck, 1912. U. S. Natl. Mus., Proc. 42: 632.

Type-species: Asternaulax fiskei Viereck. Monotypic and orig. desig.

Chenbergus Navas, 1930. Soc. Ent. de Espana, Bol. 13: 43. N. name for Brachycentrus Taschenberg.

This genus was formerly placed by Townes in the Cryptini, where it was a member of his now defunct subtribe Echthrina. Townes (1970) said little concerning his placement of Helcostizus in the Hemitelini, which leads me to suppose that he placed it here because he did not know what else to do with it. He mentioned Helcostizus as one of a number of genera showing "convergence toward" his newly erected subtribe Gabuniina (Cryptini), but said that in certain cases (without saying which cases) it is uncertain whether these genera should be placed in the Gabuniina or elsewhere.

Revision: Cushman, 1919. U. S. Natl. Mus., Proc. 55: 531-535. —Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 513-522.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 326.

annulicornis (Walsh). N. Y., Md., Va., Mich., Ill.?, Okla. Host: Elaphidionoides parallelus (Newm.)?

Echthrus annulicornis Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 159. 9.

Taxonomy: Cushman, 1924. U. S. Natl. Mus., Proc. 64 (4): 8.

collinus (Provancher). Que. Not included in the revision by Townes and Townes (1962) and probably synonymous with one of the taxa included.

Mesostenus collinus Provancher, 1879. Nat. Canad. 11 (no. 126): 111. d.

Taxonomy: Barron, 1975. Nat. Canad. 102: 453-454 (lectotype selected).

Genus LOCHETICA Kriechbaumer

Lochetica Kriechbaumer, 1892. Ent. Nachr. 18: 340.

Type-species: Phygadenon pimplarius Thomson. Monotypic. The type-species is regarded as a synonym of L. Westoni (Bridgman).

This small Holarctic genus includes three Palearctic species and one undescribed species which occurs in the western U. S. (Townes, 1970).

Taxonomy: Townes, 1970 (1969), Amer. Ent. Inst., Mem. 12: 70.

SUBTRIBE ETHELLIRGINA

Genus RHEMBORIUS Foerster

Rhembobius Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 184.

Type-species: Phygadenon quadrispinus Gravenhorst. Monotypically included and desig, by Ashmead, 1900.

Ulothymus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 185.

Type-species: Ichneumon perscrutator Thunberg. Monotypically included and design by Perkins 1962.

Acanthocryptus Thomson, 1873. Opusc. Ent. 5: 520, 521.

Type-species: Phygadenon quadrispinus Gravenhorst. Monotypic and orig. desig.

This small Holarctic genus was removed from the Aptesini by Townes (1970), who discussed his reasons for transferring it to the Hemitelini. No other genus of Hemitelini is known to have species in which the adult females overwinter, but it is apparently not known if any Rhembobius sp. overwinters exclusively in this way. The known hosts are saprophagous Syrphidae.

Revision: Townes and Gupta, 1962. Amer. Ent. Inst., Mem. 2: 272-278.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 112.

abdominalis (Provancher), N. S. s. to Conn., w. to n. Alaska and Calif.; Hawaii. Host: Eumerus strigatus (Fall.), Merodon equestris (F.), Xylota sp. Townes and Gupta (1962) recognized three broadly overlapping subspecies.

Phygadeuon abdominalis Provancher, 1874. Nat. Canad. 6: 280. 8, 9.

Phygadeuon 4-carinatus Provancher, 1875. Nat. Canad. 7: 180, 183. 3.

Genus ETHELURGUS Foerster

Tolmerus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177. Preocc. by Loew, 1849. Type-species: Phygadeuon sodalis Taschenberg. Monotypically included and desig. by Townes and Townes, 1966.

Ethelurgus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 180.

Type-species: Hemiteles (Ehtelurgus) lonicerae Viereck. By subsequent monotypy from inclusion by Viereck, 1917.

Nuneches Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 186.

Type-species: *Phygadenon sodalis* Taschenberg. Monotypically included and desig. by Perkins, 1962.

Zamicrotoridea Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 340.
Type-species: Hemiteles (Zamicrotoridea) orbiformis Viereck. Monotypic.

416

I have seen one undescribed Nearctic species in the U. S. Natl. Museum collection, but suppose that there are other undescribed Nearctic species because Townes (1970) said that Ethelurgus is a moderate sized genus. Males of Ethelurgus will not key to the subtribe Ethelurgina in Townes (1970) because only the females have the apical margin of the clypeus impressed.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 7, 72.

syrphicola (Ashmead). Conn. s. to S. C., w. to Oreg. Host: Allograpta obliqua (Say), Baccha (Ocyptamus) fascipennis Wied., Mesograpta polita (Say), Syrphus rectus O. S.

Hemiteles surphicola Ashmead, 1890 (1889), U. S. Natl. Mus., Proc. 12: 399, 9.

SUBTRIBE PHYGADEUONTINA

Genus OECOTELMA Townes

Oecotelma Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 94.

Type-species: Hemiteles cushmani Butcher. Monotypic and orig. desig.

cushmani (Butcher). Mich. Host: Gyrinus sp.

Hemiteles cushmani Butcher, 1933. Ent. Soc. Amer., Ann. 26: 76. ♂, ♀.

Genus SULCARIUS Townes

Sulcarius Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 95.

Type-species: Hemiteles hellbachi Schmiedeknecht. Orig. desig.

Species of this genus apparently parasitize larvae of caddisflies whose cases are left exposed by the receding waters of vernal ponds or intermittent streams.

biannulatus (Gravenhorst). Minn.?, Ill.?; Europe. Host: Limnephilus indivisus Walker. North American specimens were identified as biannulatus by Roman (1925) and Mickel and Milliron (1939), but the question of conspecificity of Neartic and Paleartic specimens has apparently not been readdressed; therefore, the occurrence of biannulatus in North America remains unsubstantiated.

Hemiteles biannulatus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 846. 9.

Hemiteles Hellbachi Schmiedeknecht, 1905. Opusc. Ichn., v. 2, p. 851. ♀. Syn. verified by Dr. Klaus Horstmann (personal commun., 1976).

Hemiteles bianulatus (!) Oehlke and Townes, 1969. Beitr. z. Ent. 19: 400.

Taxonomy: Roman, 1925 (1924). Arkiv for Zool. 17 A (4): 16. —Hellen, 1967. Notulae Ent. 47: 107. —Oehlke and Townes, 1969. Beitr. z. Ent. 19: 400. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 96.

Biology: Mickel and Milliron, 1939. Ent. Soc. Amer., Ann. 42: 578-580.

bicornutus (Ashmead). Mo.

Hemiteles bicornutus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 403. d.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 96.

glacialis (Ashmead). B. C. The type-locality (Lowe Inlet, B. C.) was erroneously recorded by Townes (1944) as an Alaskan locality.

Philonygus (!) glacialis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 189. d.

Taxonomy: Townes, 1944. Amer. Ent. Soc., Mem. 11: 186. — Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 96.

Genus ORTHIZEMA Foerster

Orthizema Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 178.

Type-species: Hemiteles (Orthizema) ornatus Brischke. By subsequent monotypy from inclusion by Brischke, 1890. The type-species is regarded as a synonym of O. subannulatum (Bridgman).

Naetes Foerster, 1868. Naturh. Ver. Rheinlande, Ver. 25: 185.

Type-species: Hemiteles (Naites[!]) rufus Brischke. By subsequent monotypy from inclusion by Brischke, 1892. The type-species is regarded as a synonym of O. hadrocerus (Thomson).

Phyzelus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 185.

Type-species: Phyzelus fasciatus Brischke. By subsequent monotypy from inclusion by Brischke, 1888. Townes and Gupta (1962) disputed Perkins' (1962) synonymy of fasciatus with Aplesis flagitator (Rossi) on the premise that A. flagitator does not agree with the original description of fasciatus (the holotype of fasciatus having been destroyed), and Townes (1970) placed fasciatus as a synonym of O. hadrocerus (Thomson).

Townes (1970) stated that Orthizema is a large genus of Holarctic distribution, but did not state how many undescribed Nearctic species he has seen.

Taxonomy: Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 446. —Townes and Gupta, 1962. Amer. Ent. Inst., Mem. 2: 247. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 97-98.

testaceipes (Cushman), N. H., N. Y., Pa.

Genus UCHIDELLA Townes

Itamus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 179. Preocc. by Schmidt-Goebel, 1846.

Type-species: Hemiteles (Itamus) okamotoi Uchida. By subsequent monotypy from inclusion by Uchida, 1936. The type-species is regarded as a synonym of U. marginata (Uchida).

Uchidella Townes, 1957. Ent. Soc. Wash., Proc. 59: 109. N. name for Itamus Foerster.

Except for one species known from Taiwan, *Uchidella* is said to be a Holarctic genus of moderate size (see Townes, 1970). There are no described Nearctic species.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 99.

Genus GNOTUS Foerster

Gnotus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 179.
Type-species: Hemiteles tenuicornis Gravenhorst. Included and desig. by Perkins,

1962. The type-species is regarded as a synonym of G. tenuipes (Gravenhorst). chionops (Gravenhorst). N. Y., Pa., Md., Mich.; Japan; Europe. Townes (1970) stated that chionops is Holaretic without mentioning specific localities outside Europe; these he communicated to me personally and stated that he regards the European, Japanese, and Nearctic specimens he has seen as belonging to three separate subspecies.

Hemiteles chionops Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 797. 5.

Taxonomy: Townes, 1970 (1969), Amer. Ent. Inst., Mem. 12: 100,

Genus HEDYLUS Foerster

Hedylus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 183.
Type-species: Hedylus crassicoruis Ashmead. By subsequent monotypy from inclusion by Ashmead, 1899.

This genus is transferred from the Endaseina where Townes (1970) placed it as a synonym of *Medophron*. Although the type-species of *Hedylus* somewhat resembles *Medophron* species in the structure of the head and ovipositor, it differs from *Medophron* species so greatly in wing venation and petiolar structure that it seems illogical to suggest any close phyletic relationship

between Hedylus and Medophron. In Hedylus crassicornis the nervellus is reclivous, the discoidella is absent, the apical portion of the mediella is very strongly curved, and the petiole has the apex of the sternite opposite the spiracles. In Townes' (1970) key to the genera of Phygadeuontina H. crassicornis runs to Stibeutes.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 81, 92-94.

brooksi (Brooks), n. comb. W. Va. Host: Craponius inaequalis (Say). This species was placed in Slibeules by Townes (1970); it seems more a misfit in Slibeules than in Hedylus. Sliboscopus brooksi Ashmead, 1906. In Brooks, W. Va. Agr. Expt. Sta., Bul. 100: 240.

Nomen nudum.

Stiboscopus brooksi Brooks 1918, U. S. Dept. Agr., Bul. 730: 14. 9.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 100, 395.

crassicornis Ashmead. N. H., Wis.; e. U. S. S. R.

Hedylus crassicornis Ashmead, 1899 (1898). In Jordan, Fur Seals and Fur Seal Isls. No. Pacific. v. 4, p. 339. 9.

Genus STIBEUTES Foerster

Stibeutes Foerster, 1850. Arch. f. Naturgesch. 16 (1): 76.

Type-species: Stibeutes gravenhorstii Foerster. Desig. by Ashmead, 1900.

Chamaezelus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 181.

Type-species: Stibeutes heinemanni Foerster. Monotypically included and desig. by Perkins, 1962.

Schizopleuron subg. Schizopleuron Aubert, 1968. Soc. Ent. de. Mulhouse, Bul. 24: 6. Described as Schizopleuron n. genus or Medophron subg. Schizopleuron n. subg. Type-species: Medophron (Schizopleuron) tricinctor Aubert. Monotypic. The type-species was alternatively described as Schizopleuron tricinctor Aubert.

vuasai (Bradley), N. Y.

Phygadeuon (Stibeutes) yuasai Bradley, 1918. Brooklyn, Ent. Soc., Bul. 13: 99.9.

Genus THEROSCOPUS Foerster

Theroscopus Foerster, 1850. Arch. f. Naturgesch. 16 (1): 72.

Type-species: Pezomachus pedestris Gravenhorst. Desig. by Viereck, 1914. P. pedestris Gravenhorst is an identification of Ichneumon pedestris Fabricius.

Chamerpes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 172.

Type-species: Pezomachus hemipterus Gravenhorst. Monotypically included and desig. by Viereck, 1914. P. hemipterus Gravenhorst is an identification of Ichneumon hemipterus Fabricius which Viereck referred to as "Hemiteles hemipterus Gravenhorst."

Eriplanus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 180.

Type-species: Hemiteles (Eriplanus) metacomet Viereck. By subsequent monotypy from inclusion by Viereck, 1917.

Phyrtus Foerster, 1868. Naturh. Verh. Rheinlande, Verh. 25: 181.

Type-species: Pezomachus hemipterus Gravenhorst. Monotypically included and desig, by Ashmead, 1900. P. hemipterus Gravenhorst is an identification of Ichneumon hemipterus Fabricius which Ashmead referred to as "Hemiteles hemipterus Gravenhorst."

Thusiotorus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 181.

Type-species: Hemiteles (Physiotorus[!]) brevipennis Brischke. Desig. by Viereck, 1914 from two species included by Dalla Torre, 1902. Dalla Torre made the apparently erroneous assumption that Physiotorus was a typographical error for Thysiotorus. Cushman (1939) and Perkins (1962) suggest that Physiotorus was a lapsus Brischke made for Phyrtus instead of a typographical error for Thusiotorus.

Odontoneura Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 185. N. syn. Type-species: Phygadeuon annulicornis Thomson. Monotypically included and desig, by Perkins, 1962. The systematic position of the type-species is discussed by Frilli (1973).

423

Aenoplegimorpha Viereck, 1912. U. S. Natl. Mus., Proc. 42: 147.

Type-species: Aenoplegimorpha phytonomi Viereck, Monotypic and orig. desig.

Townes (1970) said that *Theroscopus* "is a large genus of Holarctic distribution: the hosts are

Townes (1970) said that *Theroscopus* "is a large genus of Holarctic distribution; the hosts are probably various small ecocons."

Taxonomy: Cushman, 1939. Wash. Acad. Sci., Jour. 29: 395-396. — Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 392. — Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 101. — Frilli. 1973. Entomologica 9: 95.

nigriceps (Ashmead), Calif.

Hemiteles nigriceps Ashmead, 1890 (1889), U. S. Natl. Mus., Proc. 12: 400. 9.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 101.

rationing. Wheek, 150 (1505). Amer. Ellic. Bist., Stein. 150.

Inflicating (Provancher). Que. s. to Conn., w. to Alta. and Utah; Eurasia. Adventive? Host: Hypera postica (Gyll). The name which has most frequently been applied to this species is micator (Gravenhorst), but the original description of Ichneumon micator Gravenhorst (1807) cannot apply to this species primarily because Gravenhorst specifically described the female (male not described) as having the scape yellowish-brown and only the apices of abdominal tergites 1 and 2 yellowish-brown; in addition, the micator female apparently has black coxae. Cushman (1922) apparently based his suppression of Aenoplegimorpha phytonomi as a synonym of micator upon a specimen in the U. S. Natl. Museum collection identified as micator by Schmiedeknecht. The European concept of micator apparently had evolved from Gravenhorst's (1829) expanded definition of the species. Dr. Klaus Horstmann told me (personal commun. 1976) that Gravenhorst (1829) described a senior synonym of microcus, and its identity

will probably be published prior to the appearance of this catalog. Hemiteles ruficoxus Provancher, 1874. Nat. Canad. 6: 331. δ , \circ .

Phygadeuon cornutus Provancher, 1882. Nat. Canad. 13 (no. 155): 334 (key); 13 (no. 156): 356. 9.

Hemiteles politus Bridgman, 1883. Ent. Soc. London, Trans. 31: 146. ♀. Uncertain syn.; placed as a synonym of micator by Horstmann (1972).

Genus MEGACARA Townes

Megacara Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 102. Type-species: Phygadeuon lucens Provancher. Orig. desig.

This is a small Holarctic genus, with lucens (Provancher) being the only described Nearctic species.

lucens (Provancher). Que., Wash.

Phygadeuon lucens Provancher, 1874. Nat. Canad. 6: 281. 9.

Genus PHYGADEUON Gravenhorst

Phygadeuon Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 635.

Type-species: Phygadeuon flavimanus Gravenhorst. Desig. by Westwood, 1840.

Apterophygas Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 172.

Type-species: Apterophygus(!) paradoxus Bridgman. By subsequent monotypy from inclusion by Bridgman, 1889.

Gunopaches Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 174.

Type-species: Gunopaches crassus Perkins. Monotypically included and desig. by Perkins, 1962.

Habromma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 176.

Type-species: Habromma nigrum Ashmead. By subsequent monotypy from inclusion by Ashmead, 1902.

Pantolispa Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 178.

Type-species: Gunopaches crassus Perkins. Monotypically included and desig. by Perkins, 1962.

Isochresta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 181.

Type-species: Isochresta unicincta Ashmead. By subsequent monotypy from inclusion by Ashmead, 1902.

Bathymetis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 182.

Type-species: *Phygadeuon (Bathymetis) cylindricus* Brischke. Desig. by Viereck, 1914 from two species included by Brischke, 1891.

Iselix Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 182.

Type-species: Phygadeuon nitidus Gravenhorst. Desig. by Viereck, 1914 from seven species included by Dalla Torre, 1902.

Homelys Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 182. Preocc. by Meyer, 1844.

Type-species: Phygadeuon lapponicus Thomson. By subsequent monotypy from

inclusion by Roman, 1909.

Ernoctona Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 183.

Type-species: Phygadenon rugulosus Gravenhorst. Monotypically included and desig. by Perkins, 1962.

Zaphleges Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 184.

Type-species: Phygadeuon leucostigmus Ashmead. By subsequent monotypy from inclusion by Ashmead, 1900.

Phygadeuon subg. Ischnocryptus Kriechbaumer, 1892. Ent. Nachr. 18: 351.

Type-species: Phygadenon nitidus Gravenhorst. Desig. by Viereck, 1914.

Members of this large genus parasitize the pupae of cyclorrhaphous Diptera.

aciculatus Provancher. Que., N. H., N. Y., Minn., Alta.

Genus CERATOPHYGADEUON Viereck

Ceratophygadeuon Viereck, 1924. Canad. Ent. 56: 110.

Type-species: Ceratophygadeuon taeniatus Viereck. Monotypic.

Remonzia Seyrig, 1952. Acad. Malgache, Mem. 39: 21.

Type-species: Remonzia impostor Seyrig. Monotypic.
Remonzia subg. Euremonzia Aubert, 1965. Soc. Ent. Mulhouse, Bul. 21: 17.

Type-species: Remonzia (Euremonzia) parvicaudator Aubert. Monotypic and orig. desig.

Townes' (1970) description and key characters for this genus are partly inaccurate and misleading. In making his description and choosing the characters to use in his key to the genera of the Phygadeuontina, Townes appears to have neglected the type-species of Ceratophygadeuon and based his description and key mainly upon a group of species (which I will call the perditus group) whose members are at least in part parasitic upon the larvae of Strationvidae. However, even the males of the perditus group (and occasionally the females as well) often have two median apical teeth on the clypeus instead of the "single median tooth" described by Townes. Viereck described Ceratophygadeuon as having the "clypeus bituberculate at [the] apex." which roughly agrees with the two specimens of the type-species I have seen and with Townes' figure of that species (One of the specimens is like Townes figure in having what could be described as a single biffid clypeal tooth). In addition to its sharp facial tubercle (whence the name Ceratophygadenon), the type-species has a rather unusual mandible which is short, very broad basally, narrowed very little from base to apex, and transversely concave on its outer surface; in the two examined specimens, both of the mandibular teeth have been worn down, but probably were almost equal in length. In species of the perditus group, the mandible is long, narrow, rather strongly tapered somewhat internal to the upper tooth, which seems to agree with what little Townes says concerning the mandible of Ceratophygadeuon. I do not know if either of the names Remonzia or Euremonzia would be applicable to members of the perditus group.

Xestophya polita Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 162. ♂, ♀. Xestophya nigripes Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 163. ♂.

UNPLACED TAXA OF HEMITELINI

Hemiteles nigricans Provancher, 1882, Nat. Canad. 13: 360. S. Que.

Taxonomy: Barron, 1975. Nat. Canad. 102: 514.

TRIBE APTESINI

In transferring the genus *Echthrus* to the group he formerly called the Hemigastrini, Townes (1970) changed the name of the group to Echthrini because of his preference to base supergeneric group names upon the oldest included genus rather than upon the oldest supergeneric mame; following the latter practice would have resulted in his retention of the name Hemigastrini. Because of my belief that *Hemigaster* actually belongs in the group Townes (1970) called the subtribe Baryceratina (tribe Cryptini), the name Hemigastrina is here applied to that subtribe

Most Aptesini oviposit into the cocoons of sawflies, but the species of *Echthrus* and *Denugheles* parasitize wood boring Coleoptera, and *Polytribax* parasitizes Lepidoptera.

Revision: Townes and Gupta, 1962. Amer. Ent. Inst., Mem. 2: 1-305.

Taxonomy: Townes, 19701969). Amer. Ent. Inst., Mem. 12: 111-140 (genera of world).

Genus DEMOPHELES Foerster

Demopheles Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 186.

Type-species: Phygadeuon caliginosus in the sense of Thomson (1873). By subsequent monotypy from inclusion by Ashmead, 1900. Ashmead (1900) suppressed the monotypic genus Mecocryptus as a synonym of Demopheles, thereby including the type-species of Mecocryptus (which see) in Demopheles (cf. Perkins, 1962).

Mecocryptus Thomson, 1873. Opusc. Ent. 5: 520, 521.

Type-species: Phygadenon caliginosus Gravenhorst, not as restricted by Taschenberg and Frilli. Monotypic and orig, desig. Thomson did not say that he was applying the name caliginosus to Gravenhorst's female, but this is implied by the fact that on the same two pages he described a new genus and species, Stenocryptus nigriventris, for what he believed to be Phygadenon caliginosus

"Taschenberg;" Taschenberg applied the name caliginosus to Gravenhorst's male and validated the name Phygadeuon corruptor for Gravenhorst's female. Frilli (1975) selected Gravenhorst's male as the lectotype of caliginosus, leaving corruptor as the valid name for P. caliginosus in the sense of Thomson.

A single species of Holarctic distribution is known; it was revised by Townes (1963) to include four subspecies, the European *D. corruptor corruptor*, the Japanese *D. corruptor atripes* Townes, and two Nearctic ones.

Revision: Townes, 1963. Ent. Soc. Wash., Proc. 65: 47-50.

Taxonomy: Gravenhorst, 1829. Ichn. Europaea, v. 2, pp. 645-646. —Taschenberg, 1865. Ztsch. f. die Gesam. Naturw. Halle 25: 22, 49. —Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 177, 214. — Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 416. —Frilli, 1975 (1974). Soc. Ent. Ital., Mem. 53: 127-129.

corruptor maturus (Provancher), Que. s. to Ga., w. to w. Ont. and possibly Alta. Host: Clytus ruricola (Oliv.). The Alta. record is based upon a male from Edmonton, and the distinction between the Nearctic subspecies is so far based only upon females.

Phygadeuon maturus Provancher, 1879. Nat. Canad. 11: 68. 9.

corruptor rufatus Townes. Colo., N. Mex., Wash.

Demopheles corruptor rufatus Townes, 1963. Ent. Soc. Wash., Proc. 65: 49. 9.

Genus JAVRA Cameron

Cnemocryptus Cameron, 1903. Manchester Lit. and Phil. Soc., Mem. and Proc. 47 (14): 38. Type-species: Cnemocryptus validicornis Cameron. Monotypic. The type-species is regarded as a synonym of J. parviceps Cameron.

Javra Cameron, 1903. Manchester Lit. and Phil. Soc., Mem. and Proc. 47 (14): 47.

Type-species: Javra parviceps Cameron. Monotypic.

Finchra Cameron, 1907. Ztschr. System. Hym. Dipt. 7: 463.

Type-species: Finchra gracilis Cameron. Monotypic.

Monocryptus Hellen, 1956. Notulae Ent. 36: 135.

Type-species: Cratocryptus opacus Thomson. Monotypic.

This genus is Holarctic and Oriental, with most of the species occurring in Asia.

glaesaria Townes. R. I., N. Y., Ont.

Javra glaesaria Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 13. 9. rugata Townes. Va., Ohio.

Genus PARMORTHA Townes

Parmortha Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 14. Type-species: Parmortha pleuralis atripes Townes. Orig. desig. P. pleuralis atripes is regarded as a synonym of P. pleuralis albomaculata (Ashmead).

This is a small genus of Holarctic distribution. The hosts are allantine sawflies which pupate in the stems of weeds and shrubs.

circumcincta circumcincta (Provancher). Que. w. to e. B. C., s. to n. S. C. and Colo. Cryptus circumcinctus Provancher, 1879. Nat. Canad. 11 (no. 125): 132. 3.

circumcincta flavipes (Harrington). Alta. s. to Colo., w. to B. C. and Calif. Host: Ametastegia glabrata (Fall.).

Cryptus flavipes Harrington, 1894. In Townes and Gupta, Amer. Ent. Inst., Mem. 26: 212.

parvula (Gravenhorst). N. S. and n. Ont. w. to Alaska, s. to N. J. and Oreg; Eurasia. Host:

Ametastegia glabrata (Fall.).

Cryptus parvulus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 459. ♀ (♂ misdet.).

Cruptus eruthropus Gravenhorst, 1829, Ichn. Europaea, v. 2, p. 469. d.

Cryptus velox Harris, 1835. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., ed. 2, p. 584. Nomen nudum.

Cruptus velox Cresson, 1864. Ent. Soc. Phila., Proc. 3: 293. 9.

433

Cryptus osculatus Provancher, 1874. Nat. Canad. 6: 178. d.

Isotina(!) tibialis Ashmead, 1897, In Slosson, Ent. News 8: 237, Nomen nudum.

pleuralis arctica Townes, Northern Que., N. W. T., Alaska, P. pleuralis pleuralis (Thomson)

occurs in Europe, and P. pleuralis albomaculata (Ashmead) occurs in Japan.

Parmortha pleuralis arctica Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 19. ♂. ♀.

pleuralis signata (Provancher). Southern Que. w. to s. Alaska, s. to N. C. and Wash. Host: Ametastegia glabrata (Fall.).

Cruptus quebecensis Provancher, 1874. Nat. Canad. 6: 179. 9.

Cryptus signatus Provancher, 1874. Nat. Canad. 6: 179. 9.

Parmortha pleuralis alpina Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 22. 9. N. svn.

Taxonomy: Barron, 1975, Nat. Canad. 102: 540, 566-567 (discussion of Provancher types).

Genus CRATOCRYPTUS Thomson

Cratocryptus Thomson, 1873, Opusc. Ent. 5: 521.

Type-species: Cryptus furcator Gravenhorst, Desig, by Viereck, 1914.

This genus includes only two species which Townes (1970) said "might better be treated as subspecies."

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 128.

petilus Townes, Que., Ont., Mich., B. C. Host: Cephalcia sp.

Cratocruptus petilus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 26. 6. Q.

Genus CUBOCEPHALUS Ratzeburg

Cubocephalus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 121.

Type-species: Cruptus fortipes Gravenhorst, Monotypic, The type-species is

regarded as a synonym of Cubocephalus distinctor (Thunberg).

Ecporthetor Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 184.

Type-species: Cruptus fortipes Gravenhorst, Monotypically included and desig, by Ashmead, 1900.

Pammachus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 184.

Type-species: Stenocruptus nigriventris Thomson, By subsequent monotypy from inclusion by Ashmead, 1900. Ashmead (1900) suppressed the monotypic genus Stenocryptus as a synonym of Pammachus, thereby including S. nigriventris (cf. Perkins, 1962).

Chaeretumma Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 187.

Type-species: Cryptus anatorius Gravenhorst, Monotypically included and desig, by Schmiedeknecht, 1890.

Stenocruptus Thomson, 1873. Opusc. Ent. 5: 520, 521.

Type-species: Stenocryptus nigriventis Thomson, Monotypic and orig. desig.

Microcruptus Thomson, 1873. Opusc. Ent. 5: 520, 521.

Type-species: Cryptus erythrinus Gravenhorst. Monotypic.

Planocryptus Heinrich, 1949. Muenchner Ent. Gesell., Mitt. 35-39: 56.

Type-species: Planocryptus mirabilis Heinrich. Orig. desig.

This is a large Holarctic genus. The few available rearing records indicate that the species parasitize sawflies which pupate in plant tissue, under bark, etc.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 31, 186, 218. - Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 442.

alacris (Cresson). Newfoundland (Labrador) s. to n.w. S. C., w. to Alaska and Calif. Host: Ametastegia glabrata (Fallen). In the tribal revision of Townes and Gupta (1962).

Townes recognized four subspecies, three of which were sympatric. Cryptus alacris Cresson, 1864. Ent. Soc. Phila., Proc. 3: 306. 9.

nigriventris (Thomson). Que. w. to B. C., s. to s.w. N. C., Mich., Colo., and Oreg; Eurasia. In describing nigriventris Thomson stated that it is the species for which Taschenberg (1865) had used the name Phygadeuon caliginosus Gravenhorst (1829). Apparently Thomson was mistaken because Taschenberg applied the name caliginosus to Gravenhorst's male, and a male which was selected as lectotype of caliginosus by Frilli (1975) was identified by Frilli as a species of Phygadeuon.

Stenocryptus nigriventris Thomson, 1874. Opuse. Ent. 6: 604. 6, 9.

Taxonomy: Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 645-646. —Taschenberg, 1865. Ztschr. f. die Gesam. Naturw. Halle 25: 22, 49. —Frilli, 1975 (1974). Soc. Ent. Ital., Mem. 53: 127-129.

nitidus nitidus (Provancher). N. S. w. to Alta., s. to Pa. and Mich.

Mesostenus nitidus Provancher, 1874. Nat. Canad. 6: 301. d.

Cryptus occidentalis Provancher, 1875. Nat. Canad. 7: 314. 9.

Phygadeuon nitidulus Provancher, 1879. Nat. Canad. 11: 70. Unnecessarily proposed n. name for M. nitidus; although nitidus was preoce. in Phygadeuon by Gravenhorst, 1829, Provancher could have used the name ruficoxus for the species because he suppressed Mesostenus ruficoxus (as "ruficornis [!]") Provancher and Cryptus ruficoxus Provancher as synonyms of nitidulus.

Cryptus ignotus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 73. c. Cryptus mellicoxus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p 75. c.

Opidnus aniptus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 151. 8,

arridens (Gravenhorst). N. H., Mass., N. Y., Ont., Mich., B. C.; Eurasia. Adventive? The species is not known to have been collected in North America before 1946.

Phygadenon arridens Gravenhorst, 1829, Ichn. Europaea, v. 2, p., 654. 3.

ciliatus (Townes), n. comb. Que.

Opidnus ciliatus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 164. 9.

cognatus (Townes), n. comb. Norhtern que. s. to N. Y., w. to B. C. and Calif.

Opidnus cognatus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 148. δ , \circ

dorsator (Ashmead), n. comb. Alaska,

Centeterus dorsator Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 161.

fulvibasis (Townes), n. comb. Que. s. to s.e. N. C., w. to Minn.

Opidnus fulvibasis Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 144. 8,

lindrothi (Townes), n. comb. Alaska.

Opidnus lindrothi Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 158. 9.

major (Townes), n. comb. Northern Que., N. H. Ecology: In N. H. this species occurs above timberline on Mt. Washington.

Opidnus major Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 156. d. mucronatus (Townes), n. comb. Maine, Mass., N. Y., Mich.

Opidnus mucronatus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 150. δ , \circ .

nivarius (Brues), n. comb. Alaska.

Aptesis nivarius Brues, 1919. Rpt. Canad. Arctic Exped. 1913-18, v. 3G, p. 21. 9.

orbitus (Townes), n. comb. N. H., n. Yukon. Ecology: In N. H. this species occurs above timberline on Mt. Washington.

Opidanus orbitus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 157. d. oresbius (Townes), n. comb. B. C., Wash.

Opidnus oresbius Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 136. d.

parallelus (Townes), n. comb. Que., N. H., N. Y., Man., Colo.

Opiduus parallelus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 165. d,

quadriceps (Townes), n. comb. Northwestern N. W. T., Alaska.

Opidnus quadriceps Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 168. δ , \circ .

rufinotum (Townes), n. comb. Northern Alaska. Townes (1962) said that rufinotum "may prove to be a subspecies of O. tumulus."

Opidnus rafinotum Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 161. S. shumaginensis Carlson, n. name. Alaska.

Stiboscopus ferrugineus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 173. 2. Preocc. in Oresbius by Cryptus ferrugineus Ashmead, 1890; in the tribal revision of Townes and Gupta (1962), Townes did not rename Stiboscopus ferrugineus because Cryptus ferrugineus Ashmead is an unavailable primary homonym which could not interfere with the use of the name Stiboscopus ferrugineus; S. ferrugineus is renamed here

because if it were to have had a junior synonym one would not be at liberty to use the name S. ferrugineus until such time as it was placed in a different genus than C. ferrugineus Ashmead.

sublaevis (Townes), n. comb. Wyo., Colo., Wash. Ecology: Occurs on mountains near timberline. Opidnus sublaevis sublaevis Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 134. d. ?.

Opidnus sublaevis miltomerus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 135. 3. N. syn.

taeniatus (Townes), n. comb. Northern Que., N. H., N. W. T., n. Yukon. Ecology: In N. H. this species occurs above timberline on Mt. Washington.

Phygadeuon alticola Ashmead, 1897 In Slosson, Ent. News 8: 237. Nomen nudum. Opidnus taeniatus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 154. &,

tegularis (Provancher). N. S. s. to Pa., w. to Wyo. and Colo. Host: Pristiphora erichsonii (Htg.).

Phygadeuon tegularis Provancher, 1874. Nat. Canad. 6: 282. 9.

Ichneumon decoratus Provancher, 1875. Nat. Canad. 7 (1): 25 (key); 7 (3): 83. 8.

Ischnus placidus Provancher, 1875. Nat. Canad. 7 (4): 110. S.

Phygadeuon orbitalis Provancher, 1882. Nat. Canad. 13 (no. 155): 335 (key); 13 (no. 156): 354. d.

Phygadeuon nigrieeps Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 52. 9. Phygadeuon (Scinoscopus?) orbitaliformis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 336. 3.

Taxonomy: Barron, 1975. Nat. Canad. 102: 459, 514, 522, 532, 573 (Provancher types revised). teres (Townes), n. comb. Northern Yukon, Alaska.

Opidnus teres Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 167. 8, 9.

tibialis (Townes), n. comb. Northern Que., n.e. N. W. T., n. Yukon, Alaska.

Opidnus tibialis Townes, 1962. In Townes and Gupta, Amer. Ent. Inst, Mem. 2: 163. 3, 9. trifasciatus (Ashmead), n. comb. Northern Que., N. W. T., n. Yukon, Alaska.

Microcryptus trifasciatus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 184. d.

tsugae (Cushman). Newfoundland (Labrador) w. to s. Alaska, s. to N. C., Colo., Ariz. and Calif. Host: Neodiprion tsugae Midd. The characters used by Townes (1962) for subspecific differentiation are neither strong nor entirely in agreement with the material he studied.

Aptesis (Pezoporus) tsugae Cushman, 1939. Wash. Acad. Sci., Jour. 29: 394. 8, 9.

Opidnus tsugae ruficoxa Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 138. $\eth,~ \S.$ N. syn.

Opidnus tsugae inflatus Townes, 1962. in Townes and Gupta, Amer. Ent. Inst., Mem. 2: 140. P. N. syn.

Biology: Furniss and Dowden, 1941. Jour. Econ. Ent 34: 49, 51.

tumulus (Townes), n. comb. N. W. T., Yukon, Alaska.

Opidnus tumulus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 160. male, female.

vockerothi (Townes), n. comb. Northern Que.

Opidnus vockerothi Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 166. δ, Ω.

vultuosus (Townes), n. comb. Newfoundland (Labrador), Que., n. Mich., N. W. T., Alaska. Opidnus vultuosus Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 152. \$\delta\$, \$\frac{9}{2}\$.

Genus POLYTRIBAX Foerster

Polutribax Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 183.

Type-species: Phygadeuon (Polytribax) pallescens Viereck. By subsequent monotypy from inclusion by Viereck, 1911.

Plesignathus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 183.

Type-species: Phygadenon fulvescens Cresson. By subsequent monotypy from inclusion by Ashmead (1900) as "Plestiggnathus flavescens Cress." Ashmead's N. J. record for this species is apparently based upon a misidentified female of Polytribax contiguus (Cresson).

Neleophron Foerster, 1868, Naturh, Ver. Rheinlande, Verh, 25: 184.

Type-species: Cryptus arrogans Gravenhorst. Monotypically included and designated by Perkins, 1962.

Epiphobus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 185.

Type-species: Cryptus rufipes Gravenhorst. Monotypically included and desig. by Townes and Gupta, 1962.

Steriphocryptus cameron, 1903. Entomologist 36: 233.

Type-species: Steriphocryptus luteus Cameron. Monotypic.

Chasmocryptus Uchida, 1936. Insecta Matsumurana 11: 16.

Type-species: *Plectocryptus hokkaidensis* Uchida. Monotypic and orig. desig. The type-species is regarded as a synonym of *P. penetrator* (Smith).

Members of this Holarctic genus parasitize the pupae and possibly prepupae of Lepidoptera.

Taxonomy: Ashmead, 1900. In Smith, N. J. State Bd. Agr., Ann. Rpt. 27, Sup., p. 568 (first inclusion of a species in Plesignathus).

contiguus (Cresson). N. S. w. to N. Dak., s. to N. C., n. Ga., and Kans. The coloration of the male is similar to that of the males in some species of *Cratichneumon*.

Ischnus contiguus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 190. S.

Phygadenon major Cresson, 1864. Ent. Soc. Phila., Proc. 3: 308. 9.

erotchii Crotchii (Cresson). Newfoundland (insular) w. to Alaska, s. to Pa., S. Dak., and s. B. C. Phygadenon Crotchii Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 357. 9.

crotchii fumipennis Townes and Gupta. Colo., N. Mex., Ariz., s.e. B. C. and Calif.

Genus APTESIS Foerster

Aptesis Foerster, 1850. Arch. f. Naturgesch. 16 (1): 71, 82.

Type-species: Ichneumon sudeticus Gravenhorst. Desig. by Viereck, 1914. The type-species is regarded as a synonym of A. nigrocincta (Gravenhorst).

Pezoporus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 181. Preocc. by Illiger, 1811 and Klug, 1842.

Type-species: Pezomachus nigrocinetus (Gravenhorst). Monotypically included and desig, by Ashmead, 1900. The type-species designation is Gravenhorst's 1929 identification of Ichneumon nigrocinetus Gravenhorst, 1815.

Aptesis subg. Clypeodiodon Aubert, 1968. Soc. Ent. Mulhouse, Bul. 24: 7.

Type-species: Aptesis (Clypeodiodon) flavifaciator Aubert. Monotypic. As "Aptesis Clypeodion subg nov. flavifaciator sp. nov."

This is a large Holarctic genus. Townes (1970) said that "the species occur mostly in natural meadows."

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 139.

Genus OXYTAENIA Foerster

Oxytaenia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 182.

Type-species: Oxytaenia rufolineata Cameron. By subsequent monotypy from inclusion by Cameron, 1904.

Townes (1970) said that he saw 13 species, all of which are Neotropic except for the fact that one of them has a Nearctic subspecies.

Taxonomy: Townes, 1970 (1969), Amer. Ent. Inst., Mem. 12: 140.

barda carolina (Townes). Que. s. to w. N. C., w. to Mich. and Kans. O. barda barda (Cresson) occurs in Mexico.

Aptesis barda carolina Townes, 1962. In Townes and Gupta, Amer. Ent. Inst., Mem. 2: 271. 3, \circ .

Genus ECHTHRUS Gravenhorst

Echthrus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 861.

Type-species: Ichneumon reluctator Linnaeus, Desig, by Westwood, 1840,

Sphaetes Bremi, 1849 Stettin. Ent. Ztg. 10: 95.

Type-species: Sphaetes crassicrus Bremi. Monotypic.

Karaechthrus Uchida, 1929. Insecta Matsumurana 3: 176.

Type-species: Karaechthrus tuberculatus Uchida, Monotypic and orig. desig. Bioleter Meyer, 1930, Zool, Mus. Akad, Nauk, SSSR, Ezheg, 31: 169.

Type-species: Bioleter eous Meyer, Monotypic and orig, desig.

Townes and Townes (1962) placed this small Holarctic genus in the Cryptini (=Mesostenini), subtribe Echthrina along with four other genera, but only Echthrus was transferred to the present tribe by Townes (1970).

Revision: Townes and Townes, 1962. U. S. Natl. Mus., Bul. 216 (pt. 3): 486-501.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 112, 113, 130.

abdominalis Cresson. N. S. w. to B. C., s. to N. Y., Minn., N. Mex., and Calif. Townes and Townes (1962) recognized four subspecies.

niger Cresson. N. S. w. to n. B. C., s. to N. C., Ohio, Minn., and s. Alta. Host: Anoplodera proxima (Say)?, Saperda candida F., S. discoidea F. Townes and Townes (1962) recognized three subspecies, two of which were almost completely sympatric and had ranges which broadly overlapped that of the third subspecies.

Echthrus niger Cresson, 1868. Canad. Ent. 1: 37. 9.

Echthrus rufopedibus Harrington, 1893. Canad. Ent. 25: 31. 9. N. syn.; name invalid because it is in the dative case.

Echthrus niger emaculatus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216(pt. 3): 494. ♂. ♀. N. syn.

TRIBE CRYPTINI

Just as the Cryptinae is the largest of ichneumonid subfamilies, the Cryptini is the largest tribe in the subfamily. Although the greatest numbers of genera and species of Cryptini occur in the tropics, the tribe is well represented in North America. Townes (1970) implies that the species of Cryptini search for their hosts primarily among foliage rather than in the soil or ground litter and differ from the species of Aptesini and Hemitelini in this respect as well as in having larger average size.

Townes (1970) divided the Cryptini (=Mesostenini) into subtribes which are partly for convenience and partly to show what he believed to be some of the natural groupings of genera. In the hope that this classification is actually an improvement over that of Townes and Townes (1962), the former is adopted here with little modification.

Revision: Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 1-602.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 141-346 (genera of world).

SUBTRIBE AGROTHEREUTINA

Genus APSILOPS Foerster

Apsilops Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 182.

Type-species: Cryptus hirtifrons Ashmead. By subsequent monotypy from inclusion by Ashmead, 1896.

Heterotupus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 183.

447

Type-species: Ichneumon cinctorius Fabricius. Monotypically included and desig. by Townes, Townes, and Gupta, 1961.

Dapanus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 183.

Type-species: Ichneumon cinctorius Fabricius. Monotypically included and desig. by Ashmead, 1900.

Sobas Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 187. Preocc. by Pascoe, 1863.

Type-species: Ichneumon cinctorius Fabricius. Monotypically included and desig. by Schmiedeknecht, 1890.

Trichocryptus Thomson, 1873. Opusc. Ent. 5: 520, 521.

Type-species: Cryptus cinctorius Gravenhorst. Monotypic. The type-species is Gravenhorst's identification of Ichneumon cinctorius Fabricius.

Neostricklandia Viereck, 1925, Canad. Ent. 57: 75.

Type-species: Neostricklandia sericata Viereck. Monotypic. and orig. desig. Trichestema Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 9.

Type-species: Trichestema helcostizoides Cushman. Monotypic and orig. desig.

The members of this small Holarctic genus parasitize aquatic or subaquatic Pyraloidea. There is a undescribed species which is known from Fla. and Cuba; it has been reared from Samea multiplicalis Gn.

bicolor (Cushman). Ont. and Mass., s. to Md., w. to Alta., Wash. and Calif. Host: Schoenobius melinellus (Clem.).

Trichocruptus bicolor Cushman, 1927, U. S. Natl. Mus., Proc. 72 (13): 8. 9.

Biology: Frohne, 1939. Amer. Micros. Soc., Trans. 58: 234, 325, 347.

Genus AGROTHEREUTES Foerster

Agrothereutes Foerster, 1850. Arch. f. Naturgesch. 16 (1): 71.

Type-species: Pezomachus abbreviator Gravenhorst. Desig. by Viereck, 1914. The type-species is Gravenhorst's identification of Ichneumon abbreviator Fabricius. Soilocruptus Thomson, 1873. Opusc. Ent. 5: 472, 501.

Type-species: Spilocryptus zygaenarum Thomson, Desig. by Viereck, 1914. The

type-species is regarded as a synonym of A. fumipennis (Gravenhorst).

Dayro Cameron, 1902. Ann. and Mag. Nat. Hist. (7) 9: 209.

Type-species: Dayro pilosus Cameron, Monotypic.

This Holarctic genus has a greater number of species in Eurasia than in North America.

abbreviator iridescens (Cresson). Northern Que. w. to Alaska, s. to N. C., La., Kans., Sask., and Alta. Host: Gilpinia hercyniae (Htg.), Heterarthrus nemoratus (Fall.), Neodiprion abietis (Harris), N. lecontei (Fitch), N. sertifer (Geoff.), Pristiphora erichsonii (Htg.), Paraclemensia acerifolia (Fitch), Parabbesia viteana (Clem.). A. abbreviator abbreviator (Fabricius) occurs in Europe. In their tribal revision, Townes and Townes (1962) divided iridescens into two arbitrarily and unnaturally separated subspecies supposedly based upon a combination of color and female wing length (normal versus brachypterus).

Cryptus iridesceus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 296. d.

mandator americanus Townes. Que. w. to B. C., s. to N. J., Mich., Colo., and Wash. Host: Cimbex americana Leach., Trichiosoma triangulum Kirby. A. mandator mandator (Linnaeus) is European. About eight individuals of manducator americanus emerge from a single host cocoon.

Agrothereutes mandator americanus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 68. δ , φ .

montanus Townes. Colo. Ecology: The unique holotype was collected at an elevation of 11,000 ft. in Rocky Mountain National Park.

Agrothereutes montanus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 48. \circ .

neodiprionis (Cushman). Wash., Oreg., Calif. Host: Neodiprion tsugae Midd. Spilocryptus neodiprionis Cushman, 1939. Wash. Acad. Sci., Jour. 29: 393. 3, 9.

pallipennis Townes. Calif. Ecology: The species is known from two specimens which were swept from Artemesia foliage at elevations of 8000 and 8500 ft.

Agrotherentes pallipennis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 49. δ , φ .

Genus GAMBRUS Foerster

Kaltenbachia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 187.

Type-species: Cryptus ornatus Gravenhorst. By subsequent monotypy from inclusion by Brischke, 1888? The type-species is regarded as a synonym of G. incubitor (Linnaeus).

Gambrus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 188.

Type-species: Gambrus (Cryptus) maculatus Brischke. By subsequent monotypy from inclusion by Brischke, 1888. The type-species is regarded as a synonym of G. incubitor (Linnaeus).

Hugrocruptus Thomson, 1873, Opusc. Ent. 5: 513.

Type-species: Cryptus carnifex Gravenhorst. Desig. by Viereck, 1914.

Allocryptus Viereck, 1917. Conn. State Geol. and Nat. Hist. Survey Bul. 22: 333.

Type-species: Agrothereutes (Allocryptus) hystopi Viereck. Monotypic.

This is a Holarctic genus which is rather arbitrarily distinguished from Agrothereutes and Aritranis.

apicatus (Provancher). N. S., Que., Maine, Vt., N. Y., Ont., Ohio, Sask. Ecology: This species has been reared from galls of Enura on Salix, but appears to be too large to be a parasite of Enura and may parasitize Lepidoptera which occupy the galls secondarily. Cryptus apicatus Provancher, 1874. Nat. Canad. 6 (6): 178 (key); 6 (7): 204.

Cryptus cinctus Provancher, 1875. Nat. Canad. 7: 175. S. Preocc. by Fabricius, 1805.

bituminosus (Cushman). Mass., Conn., N. Y., N. J., Ga., Ill., Minn., La., Calif. Ecology: This species has been collected on Spartina in salt marshes. Host: Diatraea sp., Ostrinia nubilalis (Hbn.), O. obumbratalis (Led.), O. penitalis (Grt.), Sphenophorus pertinax (Oliv.).

Cryptoideus bituminosus Cushman, 1924. U. S. Natl. Mus., Proc. 64 (4): 6. 9.

canadensis burkei (Viereck). California. Host: Orgyia leucostigma (J. E. S.), O. vetusta (Bdv.).
Malacosoma californicum californicum (Pack.).

Cryptus (Gambrus) burkei Viereck, 1909. Ent. News 20: 291. ♂, ♀.

canadensis canadensis (Provancher). N. S. w. to B. C., s. to N. C., Kans., Ariz., and Oreg. Host: Malacosoma americanum (F.), M. californicum fragile (Stretch), M. disstria Hbn., Laspeyresia pomonella (L.), Archips cerasivoranus (Fitch), Thymelicus lineola (Ochs.). In their tribal revision, Townes and Townes (1962) divided this subspecies into two with very broadly overlapping ranges.

Nematopodius Canadensis Provancher, 1875. Nat. Canad. 7: 268. 3.

Spilocryptus exareolatus Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 81. S. N. syn.

extrematis (Cresson). N. S. w. to B. C., s. to D. C., Kans., Utah, and Calif. Host: Hyalophora cecropia (L.), H. columbia (S. I. S.), H. euryalus (Bdv.), H. gloveri (Stkr.).

Cruptus extrematis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 404. 9.

Cryptus samiae Packard, 1865. Boston Soc. Nat. Hist., Proc. 9: 345. 8, 9.

Echthrus Provancheri Provancher, 1885. Canad. Ent. 17: 116. ♂, ♥. The evidence given by Barron (1975) does not seem sufficient for attributing authorship to Brodie (in Provancher) rather than to Provancher.

Spilocryptus cecropiae Habermehl, 1919. Ztschr. f. Wiss. Insekten-Biol. 14: 239. 2.

Taxonomy: Barron, 1975. Nat. Canad. 102: 536.

Biology: Riley, 1872. Mo. State Ent., Ann. Rpt. 4: 110-111. — Harrington, 1891. Ent. Soc. Ontario, Ann. Rpt. 21: 67. — Smith, 1908. Jour. Econ. Ent. 1: 294-297. — Marsh, 1937. Ecology 18: 107-111. — Marsh, 1937. Ent. Soc. Amer., Ann. 30: 40-42. — Marsh, 1938. N. Y. Ent. Soc., Jour. 46: 27.

Morphology: Riederer, 1890. N. Y. Micros. Soc., Jour. 46: 27.

nuncius (Say). N. B. w. to w. N. W. T., s. to Ala. and La. Host: Callosamia angulifera (Wlk.), C. promethia (Drury), Antheraea polyphemus (Cramer), Samia cynthia (Drury). Cryptus nuncius Say, 1836. Boston Jour. Nat. Hist. 1: 237. \(\rightarrow\).

polyphemi Townes. N. S. w. to B. C., s. to Fla., Tex., N. Mex. and Oreg. Host: Antheraea polyphemus (Cramer).

Cryptus sordidus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 67. Q. Preocc. by Tschek, 1870.

Gambrus polyphemi Townes, 1945. Amer. Ent. Soc., Mem. 11: 809. N. name for C. sordidus Provancher.

tunicularubra (Fyles). Southern Que. Host: Gnorimoschema gallaeasteriella (Kell.). The lectotype is apparently the only remaining specimen reared by Fyles. Fyles mentioned having encountered this ichneumonid repeatedly in his work on the biology of the host, but apparently the host has not been reared frequently since then. Perhaps tunicularubra will prove to be a melanic variant of $G.\ ultimus$ (Cresson).

Trychosis tunicula-rubra Fyles, 1896. Canad. Ent. 28: 148. ♂, ♀.

ultimus (Cresson). N. S. w. to Oreg., s. to Fla., Tex., Ariz., and Calif.; Hawaii. Host: Acrobasis caryae Grt., Herpetogramma bipunctalis (F.), Loxostege sticticalis (L.), Ostrinia nubilalis (Hbn.), Phlyctaenia coronata tertialis (Gn.), Udea rubigalis (Gn.), Astala confederata (Grt.), Hyaloscotes pithopoera (Dyar), Thyridopteryx ephemeraeformis (Haw.), Platynota flavedana Clem., Anglis comptana (Froel.), Grapholitha molesta (Bsk.), Paralobesia viteana (Clem.), Coleophora sp., Pectinophora gossypiella (Sdrs.), Exyra semicrocea (Gn.), Neogalea esula (Druce), Simyra henrici (Grt.), Trichoplusia ni (Hbn.), Bathyplectes curculionis (Thom.).

Cryptus ultimus Cresson, 1864, Ent. Soc. Phila., Proc. 3: 305, 9.

nigricoxa (Provancher). N. S. s. to w. N. C., w. to Minn.

Cryptus nigricoxus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 361. 3.

Brachycryptus niger Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23); 7. 3.

Genus IDIOLISPA Foerster

Idiolispa Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 188.

Type-species: Bassus analis Gravenhorst. Desig. by Viereck, 1914 from two species included by Tschek, 1870.

Liocryptus Thomson, 1873. Opusc. Ent. 5: 489.

Type-species: Bassus analis Gravenhorst. Monotypic.

Paracruptus Szepligeti, 1916. Mus. Natl. Hungarici, Ann. 14: 251.

Type-species: Paracryptus hungaricus Szepligeti. Monotypic.

This is a small Holarctic genus.

aestivalis Townes. Que. s. to Ga. w. to Iowa, Kans., and Tex.

Idiolispa aestivalis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 331. 3. 9.

albisoleata (Walsh). Que., Maine, N. H., Va., Ont., Mich., Minn., Iowa, Ariz., n.w. N. W. T., Alaska.

Cryptus! albisoleatus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 80. d.

analis analis (Gravenhorst). Newfoundland (Labrador) s. to Va., w. to Yukon, e. B. C., and Colo.; Eurasia. In their tribal revision, Townes and Townes (1962) divided this

subspecies into two, with the nominate form occupying nearly the entire range of the

other segregate.

Bassus analis Gravenhorst, 1807. Vergl. Uebers. Zool. Systeme, p. 266. Sex not indicated. In their tribal revision, Townes and Townes (1982) point out that the original description of analis does not fit the taxon for which the name has traditionally been used; lacking other evidence to indicate that Gravenhorst's original type material did not include specimens of this taxon, they selected a lectotype which preserves the traditional usage.

Ichneumon cursor Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 256;

9: 298. 9. Preocc. by Schrank, 1780.

Cryptus elevatus Zetterstedt, 1838. Insecta Lapponica, sect. 2, p. 370. ♀. Cryptus limatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 298. ♀. N. syn.

Ischnus lentus Provancher, 1875. Nat. Cand. 7: 110. ♂, ♀.

analis ignea Townes. Southern Sask. s. to N. Mex., w. to s. B. C. and Calif.

Idiolispa analis ignea Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 329. d. ?.

Genus TRYCHOSIS Foerster

Truchosis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 187.

Type-species: Cryptus titillator Gravenhorst. Included and desig. by Schmiedeknecht, 1890. The type-species is Gravenhorst's misidentification of Ichneumon titillator Linnaeus; the specimens which Gravenhorst identified as titillator are now identified as T. mesocastana (Tschek) (see van Rossem, 1967).

Phaedrophadnus Cameron, 1906. Bombay Nat. Hist. Soc., Jour. 17: 285.

Type-species: Phaedrophadnus striatus Cameron. Monotypic.

Ethaemorpha Viereck, 1913. U. S. Natl. Mus., Proc. 44: 565.

Type-species: Cryptus similis Cresson. Monotypic and orig. desig. Orthographus Viereck, 1913. U. S. Natl. Mus., Proc. 44: 567.

Type-species: Cryptus monticola Ashmead. Monotypic and orig. desig.

There are a few species of this moderately large genus in the Oriental Region and one known from the Neotropic Region, but *Trychosis* is otherwise Holarctic. Some of the species have been reared from spider egg cocoons, and records of rearings from Lepidoptera may be erroneous.

Revision: van Rossem, 1966. Zool. Verh. 79, 40 pp. (European spp.).

Taxonomy: van Rossem, 1965. Bul. Zool. Nomencl. 22: 259-260 (proposal for use of plenary powers). —Perkins, 1966. Bul. Zool. Nomencl. 23: 8 (comment on lack of need for use of plenary powers). —van Rossem, 1966. Bul. Zool. Nomencl. 23: 8 (rebuttal of Perkins). —Sabrosky, 1967. Bul. Zool. Nomencl. 24: 73-74 (suggested changes for proposal of van Rossem). —International Commission on Zoological Nomenclature, 1974. Bul. Zool. Nomencl. 31: 22-23 (unnecessary use of plenary powers).

albicaligata (Walsh). Conn. s. to Va., w. to Mich., Kans., and Tex. In their tribal revision, Townes and Townes (1962) suggest that albicaligata may prove to be a junior synonym of T. exulans (Cresson).

Cruptus albicaligatus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 82. d.

anagma Townes. Que. w. to B. C., s. to R. I., Ohio, S. Dak., and Calif.

Trychosis nigripes Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 345. ♂, ♀.

peratra Townes, n. status. Newfoundland (insular) w. to B. C., s. to Va., Tex., and Calif.

Cryptus albitarsis Cresson, 1864. Ent. Soc. Phila., Proc. 3 (Sept.); 300. 5. Preocc. in Cryptus by Cresson, 1864 (June). T. peratra is not sufficiently well collected to make it worthwhile proposing a new name for C. albitarsis in order to treat the eastern and western populations as separate subspecies. N. syn.

Trychosis albitarsis peratra Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 359. 3, 9.

reflexa Townes. S. Dak., Mont., and s. B. C., s. to Utah and Calif. Townes says reflexa "is very close to T. atrorubens and is likely to prove [to be] a subspecies of it;" see also the text for T. depilis. above.

Trychosis reflexa Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 371. δ , \circ .

sanderi (Dalla Torre). Colo. Known only from the holotype.

Cryptus monticola Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 410. ♀. Preocc. by Cameron, 1885.

Cryptus Sauderi Dalla Torre, 1902. Cat. Hym., v. 3, p. 587. N. name for monticola Ashmead.

semirubra Townes. Que. w. to n.w. N. W. T., s. to R. I., Ohio, Minn, N. Mex., and Calif.

Ecology: Has been reared from spider egg cocoons collected under rocks. Host: Eggs of
drassid spider. The subspecies recognized by Townes and Townes (1962) suffer from
being based upon too few specimens and, in two cases, from being based upon different
characters in each sex (hind tarsal coloration in males and flagellar coloration in
females). If the white banding on the female hind tarsus (contrary to the description of
Townes and Townes [1962], in at least one female they placed in their nominate
subspecies tarsal segments 2 through 4 are entirely white) does not correlate well with
the extent of white coloration on the female flagellum, it does not seem logical to

455

suppose that there could be a good correlation between the coloration of the male hind tarsus and the female flagellum.

Phygadeuon annulatus Provancher, 1875. Nat. Canad. 7: 179. 9. Preocc. by Cresson, 1864. Trychosis semiruber Townes, 1944. Amer. Ent. Soc., Mem. 11: 254. N. name for P. annulatus Provancher.

Trychosis semirubra pulla Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 352. 3, 9, N, syn.

Trychosis semirubra arizonica Townes, 1962. In Townes and Townes, U. S. Nat. Mus. Bul. 216 (pt. 3): 354. 3, 9, N. syn.

similis (Cresson). N. S. s. to S. C., w. to Minn., Kans., and Tex. The two subspecies recognized by Townes and Townes (1962) were almost completely sympatric:

Cruptus similis Cresson, 1864, Ent. Soc. Phila., Proc. 3: 299. 9.

Trychosis similis badiarmus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 343. δ , γ . N. syn.

subgracilis (Cresson). P. E. I. s. to Fla., w. to Colo. and Tex. Ecology: One specimen was reared from a head of Rudbeckia amplex.

Cruptus subgracilis Cresson, 1864, Ent. Soc. Phila., Proc. 3: 303, 9.

Cryptus rufoannulatus Provancher, 1874. Nat. Canad. 6 (6): 177 (key); 6 (7): 202.

sulcata Townes. Mass. s. to N. C., w. to Mich. and Kans.

Trychosis sulcata Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 349. δ , \circ .

SUBTRIBE CRYPTINA

Townes (1970) says that this is the dominant subtribe in the Holarctic Region. Most of the species appear to be parasites of the pupae or prepupae of Lepidoptera or Symphyta.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 158-159 (genera of world).

Genus CAMERA Townes

Camera Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 432.
Type-species: Mesostenus euryaspis Cameron. Orig. desig.

Except for the species which ranges into Texas, this small genus is Neotropic.

euryaspis (Cameron). Tex.; Mexico.

Mesostenus envyaspis Cameron, 1885. Biol. Cent.-Amer., Hym., v. 1, p. 226. ♀.

Genus ISCHNUS Gravenhorst

Ischnus Gravenhorst, 1829. Ichn. Europaea, v. 1, p. 638.

Type-species: Ichneumon porrectorius Fabricius. Desig. by Westwood, 1840. The type-species is regarded as a synonym of I. inquisitorius inquisitorius (Mueller). Habrocruptus Thomson, 1873. Opusc. Ent. 5: 498.

Type-species: Cryptus assertorius Gravenhorst. Desig. by Viereck, 1914. The type-species is Gravenhorst's identification of Ichneumon assertorius Fabricius and is regarded as a synonym of I. inquisitorius inquisitorius (Mueller).

Aglaocryptus Cameron, 1903. Manchester Lit. and Phil. Soc., Mem. and Proc. 47 (14): 31.

Type-species: Aglaocryptus curvimaculatus Cameron. Desig. by Viereck, 1914.

Erythrocryptus Cameron, 1905. Invertebrata Pacifica 1: 126.

Type-species: Erythrocryptus rufus Cameron. Monotypic.

This moderately large genus is almost worldwide in distribution. The species are pupal

parasites of Lepidoptera.

cinctipes (Walsh). Que. s. to Fla., w. to Minn. and Tex. Host: Ancylis comptana (Froel.), A. divisana Wlk., Paralobesia viteana (Clem.).

Cryptus cinctipes Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 72. 8, 9.

Phygadeuon fraterculus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 55. \(\cong \). Spilocryptus polychrosidis Cushman, 1917. U. S. Natl. Mus., Proc. 53: 461. \(\sigma \), \(\tau \).

inquisitorius assimilis (Uchida). Alaska; n.e. Asia. I. inquisitorius inquisitorius (Mueller) occurs in Europe.

Habrocryptus assimilis Uchida, 1930. Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 313. ♀.

inquisitorius atricollaris (Walsh). N. S. s. to w. N. C., w. to Alaska and Calif. Host: Archips argyrospilus (Wlk.), Choristoneuva conflictana (Wlk.), C. fumiferana (Clem.), C. rosaceana (Harris), orange torticid on azalea, Malacosoma disstria Hbn. Townes and Townes (1962) split this subspecies into three which were very arbitrarily separated and had broadly overlapping ranges.

Cryptus atricollaris Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 72. ∂, ♀.

Cryptus varius Provancher, 1874. Nat. Canad. 6 (6): 177 (key); 6 (7): 200. d.

Ischnus exilis Provancher, 1875. Nat. Canad. 7: 111. d.

Cryptus atriceps Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 361. ♀. N. syn.

Spilocryptus neomexicana Viereck, 1903 In Skinner, Amer. Ent. Soc., Trans. 29: 81. d.

Erythrocryptus rufus Cameron, 1905. Invertebrata Pacifica 1: 126. 9. N. syn.

Gambrus venablesi Viereck, 1924. Canad. Ent. 56: 65. 9.

Ischnus inquisitorius pectoralis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 146. δ , ϑ . N. syn.

laevifrons Townes. Ariz.

Ischnus laerifrons Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 156. δ , \circ

latus (Provancher). Que., Maine, N. H., Ont., Mich., Sask., Alta.

Cryptus latus Provancher, 1874. Nat. Canad. 6 (6): 178 (key); 6 (7): 204. \(\frac{9}{2} \). The holotype of this species was not located by Barron (1975); the original description seems to show that Townes and Townes (1962) were correct in removing latus from Cubocephalus where it had been placed by virtue of the incorrect synonymy of Provancher (1879).

Phygadeuon 3-annulatus Provancher, 1882. Nat. Canad. 13 (no. 155): 335 (key); 13 (no. 156): 355. 9. Preocc. by P. triannulatus Gravenhorst, 1829.

Cryptus 3-annulatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 74. d.

Preoce, in Ischnus by Provancher, 1882.

Ischnus fraterculus tricircularis Walkley, 1958. In Krombein, U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 46. N. name for P. 3-annulatus Provancher.

Taxonomy: Provancher, 1879. Nat. Canad. 11: 69 (incorrect syn.). —Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 135-136. —Barron, 1975. Nat. Canad. 102: 494, 575. laurae Townes. S. C., Fla.

Ischnus laurae Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 140. δ , \circ .

lautus Townes. Southern B. C., Calif. Host: Grapholitha molesta (Bsk.).

Ischnus lautus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 163. δ , \circ .

minor Townes. Northern Que, w. to Alaska, s. to n. Ga., Minn., Ariz., and Calif. Host: Epinotia aceriella (Clem.), Paralobesia viteana (Clem.), Acleris variana (Fern.), Choristoneura fumiferana (Clem.).

Ischnus minor Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 159.

pinguis (Provancher), revised status. Que. s. to w. N. C., w. to Minn. Townes and Townes (1962) placed pinguis as a subspecies of latus; the fact that they saw "no real intergrades" between pinguis and latus leaves the status of pinguis in doubt because most of the latus specimens they studied were collected within the northern portion of the range of pinguis.

Phaeogenes pinguis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 43. 9. A lectotype was selected by Barron (1975).

Taxonomy: Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 136-137. —Barron, 1975. Nat. Canad. 102: 531.

politus Townes. Colo. Ecology: Occurs in the Rocky Mountains at timberline. Ischnus politus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 162. 9. rhomboidalis (Walsh). Que. s. to e. Tenn., w. to N. Dak. and Colo. Host: Laspeyresia nomonella (L.).

Cryptus rhomboidalis Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 72. 9.

Ischnus velutinus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 155. 3, 2.

Genus GLABRIDORSUM Townes

Glabridorsum Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 174.
Type-species: Gambrus stokesii Cameron. Monotypic and orig. desig.

The eleven species (ten undescribed) known to Townes (1970) occur between Japan and Australia.

stokesii (Cameron). Australia. Introduced in N. J. and Va. in 1932 and in Idaho (date unknown to me) apparently without becoming established. Host: Grapholitha molesta (Bsk.).

Laspeyresia pomonella (L.). The hosts listed were the target species for introductions in North America.

Gambrus Stokesii Cameron, 1912. Linn. Soc. N. S. Wales, Proc. 37 (1): 180. 9.

Biology: Allen, Holloway, and Haeussler, 1940. U. S. Dept. Agr., Cir. 561: 50-51.

Genus CHROMOCRYPTUS Ashmead

Chromocruptus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 41.

Type-species: Chromocryptus albopictus Ashmead, Monotypic and orig. desig.

Mesostenimorpha Viereck, 1913, U. S. Natl. Mus., Proc. 44: 566.

Type-species: Cryptus nebraskensis Ashmead. Monotypic and orig. desig.

Neocryptopteryx Blanchard, 1947. Mus. Hist. Nat. Montevideo, Commun. Zool. 2 (no. 42): 1.

Type-species: Neocryptopteryx orientalis Blanchard. Monotypic and orig. desig.

Nothischnus Porter, 1967. Studia Ent. 10: 396.

Type-species: Nothischnus riverai Porter. Monotypic and orig. desig.

Periplasma Porter, 1967. Studia Ent. 10: 404.

Type-species: Periplasma tanaum Porter. Monotypic and orig. desig.

Townes (1970) said his reasons for regarding Chromocryptus as distinct from Trachysphyrus are not compelling. Because Townes and Townes (1962) had treated Chromocryptus as distinct from Trachysphyrus in their revision of the Nearetic Cryptini, it seems logical to do likewise here, thereby restricting the application of the name Trachysphyrus to Neotropic species. Except for four species which occur in the Nearetic region, Chromocryptus is also Neotropic; the South American species are numerous.

Revision: Porter, 1967. Amer. Ent. Inst., Mem. 10: 1-168, in part (Neotropic spp., treated as part of genus Trachysphyrus).

Taxonomy: Townes, 1970. Amer. Ent. Inst., Mem. 12: 179-181.

mesorufus Cushman, revised status. Fla.; Mexico. In the U. S. Natl. Mus. collection there is a female collected in a blacklight trap at Miami, Fla. In their tribal revision, Townes and Townes (1962) treated mesorufus as a subspecies of planosae (Pitch).

Chromocryptus mesorufus Cushman, 1930. U. S. Natl. Mus., Proc. 76 (25); 2. 9.

planosae (Fitch). Mass., Conn., N. Y., Pa., Ohio, Mich., Ind., Ill., Nebr. Host: Epicnaptera americana (Harris), Tolype laricis (Fitch), T. velleda (Stoll), Halisidota tesselaris (J. E.

S.). Apparently, a number of adults may emerge from a single host. *Phyaadeuon Planosae* Fitch, 1856. N. Y. State Agr. Soc., Trans. 15: 501. 9.

lumbarius Townes. Calif.

luctuosus luctuosus (Cresson). Que. w. to s. Yukon, s. to N. Y., S. Dak., Colo., Calif. Host: Trichiosoma triangulum Kirby, Zaraea inflata Nort., sawfly on Tsuga heterophyla. C. Inetwosus atrifemur (Townes) occurs in Japan and C. Inctuosus holalpinus (Heinrich) occurs in Europe. In the tribal revision of Townes and Townes (1962), the latter was treated as a synonym of Cryptus Inctuosus subquadratus Thomson. A bizarre situation developed when van Rossem (1969) treated holalpinus as an alpine subspecies of Cryptus Inctuosus distinct from Inctuosus subquadratus, followed by Townes (1970) treatment of subquadratus as a species not congeneric with Inctuosus holalpinus; Townes (1970) placed subquadratus in Itamoplex (=Cryptus), while placing Inctuosus and its subspecies in Caenocryptus. Both van Rossem (1969) and Townes (1970) had studied the lectotype of Cryptus subquadratus.

Cryptus luctuosus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 290. 9.

sororia (Cresson). Tex., Ariz., Calif.; Mexico.

Cryptus sororius Cresson, 1872. Amer. Ent. Soc., Trans. 4: 159. d.

Genus BUATHRA Cameron

Buathra Cameron, 1903. Ent. Soc. London, Trans. 51: 233.

Type-species: Buathra rufiventris Cameron, Monotypic.

Bathycrisis Cameron, 1905. Spolia Zeylanica (Ceylon Jour. Sci., Sect. B) 3: 96.

Type-species: Bathycrisis striaticallis Cameron. Monotypic.

This is a Holarctic and Oriental genus of small or moderate size. According to van Rossem (1971) the separation between Buathra and Meringopus is rather difficult and arbitrary; he believed that Buathra could be merged into Meringopus.

Revision: van Rossem, 1971. Tijdschr. v. Ent. 114: 201-208 (European spp.).

Taxonomy; van Rossem, 1969. Tijdschr. v. Ent. 112: 167, 169 (fig. and key to distinguish from Meringonus). - Townes, 1970 (1969), Amer. Ent. Inst., Mem. 12: 192-193 (referred additional spp. to genus). - Townes, 1971, Amer. Ent. Inst., Mem. 17: 239 (syn. corrected).

Cruptus Altonii Dalla Torre, 1902, Cat. Hym., v. 3, p. 560, N. name for C. proximus Cresson.

Cruptus & sachalinensis Matsumura, 1911, Tohoku Imp. Univ., Col. Agr., Jour. 4 (1): 95. 9. Cruptus tarsoleucus var. takagii Uchida, 1930, Hokkaido Imp. Univ., Faculty Agr., Jour.

Trachusphyrus laborator satoi Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 209, 9, N. syn. Described from a single specimen from Korea.

Taxonomy: Townes, Momoi, and Townes, 1965, Amer. Ent. Inst., Mem. 5: 180-181 (svn.). lochmaia (Townes). Ariz. Ecology: Occurs in chaparral areas.

Trachysphyrus lochmaius Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3); 216. ♂, ♀.

perplexa (Cresson), revised status. Idaho, w. Nev., s. B. C., Wash., Oreg., Calif. Townes and Townes (1962) treated perplexa as a subspecies of laborator. In one paragraph they stated that "intergrades between [perplexa] ... and altonii [now a syn. of laborator] are moderately common where the ranges of the two are adjacent or overlap." In a subsequent paragraph they stated that perplexa "intergrades with the subspecies altonii rather freely in western Idaho and near the crest of the Sierra Nevada." The kinds of localities from which they record both taxa lead me to believe that the specimens they regarded as intergrades actually were not.

Cryptus proximus var.? perplexus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 359. ♀.

Taxonomy: Townes and Townes, 1962, U. S. Natl, Mus. Bul, 216 (pt. 3): 213-214. strigosa (Pratt), Wash., Oreg., Calif.

Cryptus strigosus Pratt, 1945. Amer. Midland Nat. 34: 583. d, ♀.

Genus CRYPTUS Fabricius

Cryptus Fabricius, 1804. Systema Piezatorum, p. 70. Preocc. by Jurine, 1801 and Panzer, 1804.

Type-species: Cryptus viduatorius Fabricius. Desig. by Curtis, 1837.

Eucryptus Haldeman, 1842. Acad. Nat. Sci. Phila., Proc. 1: 191. N. name for Cryptus "(Hal.)," presumably Haliday, Haliday (1839) used the name Cryptus for Ichneumonidae in a paper describing insects whose names had been published as nomina nuda by Curtis (1837), who used the abbreviation "Hal." for Haliday and suppressed "Cryptus B. E." as a synonym of the sawfly name Scizocerus and used Cryptus "F[abricius]" for Ichneumonidae.

Itamoplex Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 188.

Type-species: Cryptus americanus Cresson. Desig. by Viereck, 1914 from three species included by Ashmead, 1900.

Plesiocryptus Cameron, 1903. Ztschr. f. System. Hym. Dipt. 3: 299. Type-species: Plesiocryptus carinifrons Cameron, Monotypic,

This large genus is Holarctic, Oriental, and Ethiopian. The controversy regarding the name Cryptus remains unsettled. Even if Opinion 135 (see Hemming, 1939) were valid, Cryptus Fabricius (1804) would still be preoccupied by Cryptus Panzer (1804) (a subjective synonym of Arge), and Eucryptus Haldeman may be a valid replacement name for Cryptus Fabricius. Hemming's (1945) conclusion that "suspension [of the Rules] would not be essential in the case of Cryptus Panzer [1804]" is incorrect because Panzer's fascicle 88 (1804) of Fauna Insectorum Germanicae is shown to predate Fabricius's Systema Piezatorum by virtue of the fact that the former is cited on page 35 of the latter. Cryptus is used here because I feel that it is virtually certain that the majority of specialists presently studying Ichneumonidae would choose to suppress Cryptus Jurine (1801), Cryptus Panzer (1804), and Eucryptus Haldeman (if the latter is valid).

Revision: Pratt, 1945. Amer. Midland Nat. 34: 562-661. —van Rossem, 1969. Tiidschr. v. Ent. 112: 229-375 (western Palearctic spp.).

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 70, 73. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 194.

Genus XYLOPHRURUS Foerster

Xylophrurus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 169.

Type-species: Echthrus lancifer Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1888. The name of the type-species has been incorrectly suppressed as a synonym of Ichneumon dispar Thunberg; the latter is preoce, by Gmelin, 1790.

Nyxeophilus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 187.

Type-species: Cryptus bimaculatus Gravenhorst. Included and desig. by Thomson (1885). In placing species in Nyxeophilus, Thomson (1885) said "Nyxeophilus mihi," and Thomson (1897) said "Nyxeophilus Thomson," which led Perkins (1962) to treat Nyxeophilus Thomson as a proposal of a new genus, and this seems inconsistent with his p. 387 discussion of Thomson's use of the Foerster names. The type-species is regarded as a synonym of X. augustus (Dalman).

Macrocryptus Thomson, 1873. Opusc. Ent. 5: 486.

Type-species: Echthrus lancifer Gravenhorst. Monotypic.

Xylophruridea Viereck, 1912. U. S. Natl. Mus., Proc. 42: 646.

Type-species: Xylophruridea agrili Viereck. Monotypic and orig. desig.

Revision: Cushman, 1919. U. S. Natl. Mus., Proc. 55: 536-540 (as Cryptoideus).

Taxonomy: Thomson, 1885. Soc. Ent. France, Ann. (6) 5: 18. —Thomson, 1897. Opusc. Ent. 11: 2363. —Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 387, 439.

agrili (Viereck). Ont., W. Va., Mich., Kans. Host: Agrilus horni Kerr., A. vittaticollis Rand. Both of these hosts are root borers and pupate a short distance above the ground in the stems of their hosts.

Xulophruridea agvili Viereck, 1912. U. S. Natl. Mus., Proc. 42: 646. 9.

Biology: Brooks, 1914. Jour. Agr. Res. 3: 184. —Brooks, 1923. U. S. Dept. Agr., Bur. Ent., Monthly Let. 108: 3. —Carlson, 1969. Amer. Ent. Inst., Contrib. 4 (3): 39.

bicolor bicolor (Cushman). Colo., Alta., Idaho, Alaska, B. C. Host: Oberea sp. on Salix, Saperda moesta LeC. The type locality is Fort Collins, Colo. (Holotype collected in May, 11896?) by C. F. Baker).

Cryptoideus bicolor Cushman, 1919. U. S. Natl. Mus., Proc. 55: 537. 9.

bicolor maurus Townes. Que., Ont., Mich., Man. Host: Agrilus horni Kerr.

Xylophrurus bicolor maurus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 483. ♂, ♀.

Biology: Carlson, 1969. Amer. Ent. Inst., Contrib. 4 (3): 39.

fasciatus hesperus Townes. Colo., Ariz., Calif. Host: Agrilus angelicus Horn.

Xylophrurus fasciatus hesperus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 481. δ, ♀.

nubilipennis abdominalis Townes, Sask., Utah, B. C.

Xylophrurus nubilipennis abdominalis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 484. ♂, ♀.

nubilipennis luctuosus (Provancher). Que., N. H., Conn., N. Y., W. Va., Fla., Ont., Mich. Host: Agrilus champlaini Frost, Oberea praelonga Casey, Saperda candida F., borer in Populus.

Mesochorus Inctuosus Provancher, 1874, Nat. Canad. 6: 299. 9.

Cryptoideus anthracinus Cushman, 1924. U. S. Natl. Mus., Proc. 64 (4): 7. 9.

nubilipennis nubilipennis (Cresson). Colo. Host: Dicerca divaricata (Say).

Cruptus nubilipennis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 291. 9.

sitkensis (Ashmead). Alaska, B. C., Wash., Oreg., Calif.

Cryptoidens sitkensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 193. 9.

Xylophrarus atroruber Townes, 1944. Amer. Ent. Soc., Mem. 11: 290. 9. Validated as a "new name" for Cryptoideus purpuripennis "Ashmead" (1900) and "Cushman" (1919), misidentifications of Cryptus purpuripennis Cresson (see discussion under Cryptoideus Ashmead).

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 42 (validation of name Cryptoideus and misidentification of its type-species). — Cushman, 1919. U. S. Natl. Mus., Proc. 55: 539 (redescription of specimen misidentified as purpuripennis [Cresson] by Ashmead under the assumption that Ashmead's identification had been correct).

Genus REPTATRIX Townes

Reptatrix Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 276. Type-species: Cryptus crassipes Pratt. Monotypic and orig. desig.

A single species is known.

crassipes (Pratt). Wyo., Idaho, Utah, Wash., Oreg., Calif. Cryptus crassipes Pratt, 1945. Amer. Midland Nat. 34: 585. 9.

Genus MERINGOPUS Foerster

Meringopus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 186.

Type-species: Cryptus recreator Fabricius. By subsequent monotypy from inclusion by Tschek, 1870. The type-species is regarded as a synonym of M. titillator (Linnaeus).

Goniocryptus Thomson, 1973. Opusc. Ent. 5: 490.

Type-species: Ichneumon titillator Linnaeus. Desig. by Viereck, 1914.

This Holarctic genus is of moderate size.

Revision: van Rossem, 1969. Tijdschr. v. Ent. 112: 165-199 (European spp. plus some Asian ones).

Taxonomy: Townes, 1970.(1969). Amer. Ent. Inst., Mem. 12: 201-202 (list of Nearctic spp.). asymmetricus asymmetricus (Pratt). Sask. w. to B. C., s. to Colo., n. Ariz., and n. Calif. Cruplus asymmetricus Pratt, 1945. Amer. Midland Nat. 34: 587. 3, 9.

asymmetricus mirabilis (Pratt). Southern Calif.

Cruptus mirabilis Pratt, 1945. Amer. Midland Nat. 34: 589. 9.

calescens robustus (Cresson). Northern Man. w. to Alaska, s. to n. N. Mex., Utah, and n. Calif. Ecology: Occurs near timberline in grassy areas with scattered conifers. M. c. calescens

(Gravenhorst) occurs in Europe and part of Asia and M. c. alaicus (Townes) occurs in Tadzhik S. S. R. and Kirgiz S. S. R., U. S. S. R.

Cryptus robustus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 289. 9.

Cryptus crassicornis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 292. d.

dirus (Cresson). Southern B. C. s. to Calif., e. to Idaho., Colo., and Ariz.

fasciatus (Townes). Ariz.

Trachysphyrus fasciatus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 188. δ , \circ .

genatus (Pratt). Southern Sask. and s. Alta., s. to N. Mex., Ariz., Nev. and n. Calif. Host:
Malacosoma californicum fragile (Stretch), M. disstria Hbn.

Cryptus genatus Pratt, 1945. Amer. Midland Nat. 34: 570. 3, 9.

nigerrimus murorum (Tschek). Northern Man., Calif.; n. Europe. M. nigerrimus nigerrimus (Fonscolombe) is known from southern Europe and central Asia.

Cryptus murorum Tschek, 1872. Zool.-Bot. Gesell. Wien, Verh. 22: 234. ♂, ♀.

Cryptus serratus Thomson, 1873. Opusc. Ent. 5: 478. ♀.

Taxonomy: van Rossem, 1969. Tijdschr. v. Ent. 112: 190, 191-193.

pacificus (Cresson). Southern B. C., Oreg., Calif.

Cryptus pacificus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 361. d.

punicus (Cresson), revised status. Southern B. C., Wash., Oreg., Calif. The discussion in the tribal revision of Townes and Townes (1962) indicates that there was not sufficient evidence to treat punicus as a subspecies or synonym of relativus.

Cryptus punicus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 364. 9.

Cryptus californicus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 411. 9.

relativus (Cresson). Southern Alta. s. to N. Mex., w. to s. B. C. and Calif. Host: Sesia tibialis (Harris). This taxon was divided into two sympatric subspecies in the tribal revision of Townes and Townes (1962); intermediate specimens which I have seen among the material they studied contradict their discussion and indicate the need for placing Cryptus nitschei Dalla Torre as a synonym of relativus rather than giving it species status.

Cruptus relativus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 359. 9.

Cryptus pictifrons Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 360. d.

Cryptus violaceipennis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 408. 3, 9. Preocc. by Brulle, 1846. N. syn.

Cryptus leucopus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 409. 5. Apparently preocc. in Cryptus by Ichneumon leucopus Gmelin, 1790. I. leucopus Gmelin was placed as a synonym of Cryptus tarsoleucus (Schrank) by Gravenhorst (1829), and Townes (1970) placed tarsoleucus in Itamoplex (=Cryptus). Neither tarsoleucus nor I. leucopus Gmelin was mentioned by van Rossem (1969) in his revision of the European species of Cryptus. N. syn.

Cryptus Nitschei Dalla Torre, 1902. Cat. Hym., v. 3, p. 581. N. name for C. violaceipennis
Ashmead. N. svn.

Cryptus eleucopus Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 46. N. name for C. leucopus Ashmead. N. syn.

Taxonomy: Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 449.—Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 192.

serraticaudus (Pratt). Colo., Idaho, Utah., s. B. C., Wash., Oreg., Calif.

Cryptus serraticaudus Pratt, 1945. Amer. Midland Nat. 34: 594. ♂, ♀.

symmetricus bilobatus (Pratt). Northern Calif.

symmetricus symmetricus (Pratt). Colo., s. Alta., Utah, s. B. C.

Cruptus symmetricus Pratt, 1945. Amer. Midland Nat. 34: 590. 8, 9.

tejonensis (Cresson). Alta. s. to N. Mex., w. to Alaska and Calif. In the tribal revision of Townes and Townes (1962) two subspecies with broadly overlapping ranges were recognized.

Cryptus tejonensis Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 360. ♀.

Cryptus rufopedibus Pratt, 1945. Amer. Midland Nat. 34: 597. \(\text{9}. \) Name invalid; dative grammatical case.

Cryptus mimicus Pratt, 1945. Amer. Midland Nat. 34: 607. 3, 9. N. syn. Cryptus temporalis Pratt, 1945. Amer. Midland Nat. 34: 609. 3, 9. N. syn. Cryptus regulosus Pratt, 1945. Amer. Midland Nat. 34: 615. 9. N. syn.

vancouverensis (Harrington). Southwestern B. C., w. Oreg., w. Calif. Host: Malacosoma sp. Cryptus vancouverensis Harrington, 1894. Canad. Ent. 26: 211. ♀.

Genus COMPSOCRYPTUS Ashmead

Cryptoideus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 42.

Type-species: Cryptus purpuripennis Cresson. Monotypic and orig. desig. The type-species was misidentified by Ashmead; the specimen Ashmead misidentified as purpuripennis is the holotype of Xylophrurus atroruber Townes (=X. sitkensis [Ashmead]).

Compsocryptus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 43.

Type-species: Cryptus calipterus Say. Monotypic and orig. desig.

Callicryptus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 43.

Type-species: Cryptus fasciatus (!) Brulle. Monotypic and orig. desig. Dalla Torre (1902) regarded the type-species citation as a typographical error for C. fusco-fasciatus Brulle, while Viereck (1914) regarded it as a lapsus for C. fasciipennis Brulle. It seems that Viereck is probably correct, but both fuscofasciatus and fasciipennis are presently placed in Compsocruptus.

Stictocryptus Cameron, 1908. Amer. Ent. Soc., Trans. 34: 243. Preocc. by Cameron, 1907. Type-species: Cryptus fascipennis Brulle. Monotypic and orig. desig. Cameron made the type-species designation as Cryptus "fasciatipennis" Brulle, which is certainly a lapsus for fascipennis.

Sophocryptus Mallo, 1961. Idia 165: 17. Nomen nudum.

This moderate sized genus is Nearctic and Neotropic.

Taxonomy: Dalla Torre, 1902. Cat. Hym., v. 3, p. 556. — Viereck, 1914. U. S. Natl. Mus., Bul. 83; 25.

apicalis Townes, Northwestern B. C. s. to Calif., e. to Idaho, Colo., and N. Mex.

Compsocryptus apicalis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3); 291. δ , \circ .

aridus Townes. Wyo., Colo., Idaho, Utah, Ariz., Nev., Calif.

Compsocryptus aridus Townes, 1962. In Townes and Townes, U. S. Nalt. Mus. Bul. 216 (pt. 3): 289. 3, 9.

buccatus (Cresson), Tex.; Mexico.

Cruptus buccatus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 159. 8, 9.

calipterus (Say). Northwestern Okla., Tex., N. Mex., Ariz., Calif.; Mexico. In their tribal revision, Townes and Townes (1962) treated the majority of specimens from Calif. as subspecifically distinct, but because the differences seem to be more or less clinal the subspecies are not recognized here.

Cruptus calipterus Say, 1836. Boston Jour. Nat. Hist. 1; 234. 9.

Cruptus fulvus Taschenberg, 1876. Ztschr. f. Gesam. Naturw. 48: 66. d.

Ichneumon munerosus Cameron, 1885. Biol. Cent.-Amer., Hym., v. 1, p. 159. δ .

Campsocryptus(!) brevicornis Cameron, 1905. Invertebrata Pacifica 1: 127. ♀. Cryptus (Mansa!) politicalupterus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 293. ♂.

crotchii (Cresson), Calif.

Cryptus crotchii Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 362. ♂, ♀.

fasciipennis (Brulle), Southern Fla.; Cuba.

Cryptus fasciipennis Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 191. ♂, ♀.

fletcheri (Provancher). Western Idaho, n. Utah, s. B. C., Oreg., n. Calif. C. fletcheri may not be distinct from C. turbatus (Cresson) (see Townes and Townes [1962]).

Cruptus Fletcheri Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 361. 9.

Taxonomy: Townes and Townes, 1962, U. S. Natl. Mus. Bul. 216 (pt. 3): 298.

pallens Townes. Idaho, Utah, Oreg., Calif.

Compsocryptus pallens Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 293. 3, 9.

purpuripennis (Cresson). Western Idaho, n. Utah, s. B. C., Wash., Oreg., Calif.

Cryptus purpuripennis Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 364. ♀.

resolutus (Cresson), Southern Alta, s. to Colo., w. to Wash, and Calif.

Cryptus resolutus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 363. d.

Cruptus Edwardii Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 363. 9.

Compsocryptus resolutus subfasciatus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 303. δ, 9. Overlapped and intergraded with more than half of the Calif. population Townes and Townes treated as the nominate subspecies. N. syn.

texensis Townes. Kans., Okla., Tex.; Mexico.

Compsocryptus texensis Townes, 1962. In Townes and Townes, U. S. Natl. Mus., Bul. 216 (pt. 3): 283. δ , \circ .

tricinctus Townes. Ga.?, Calif. Townes studied a specimen labeled Dewitt, Ga. and Thought that those data may be erroneous.

Compsocryptus tricinctus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 295. 3, 9.

turbatus (Cresson), Western Idaho, n. Utah, Oreg., Calif.

Cryptus turbatus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 363. 9.

unicolor Townes. Central Calif.

Compsocryptus unicolor Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 297. 3, $\,$ $\,$ $\,$

SUBTRIBE HEMIGASTRINA

It is may belief that the Old World genera Hemigaster, Litochila, and Mansa are unrelated to the genera here placed in the Aptesini and are most likely related to some of the eleven genera placed in the subtribe Baryceratina by Townes (1970) (compare Townes and Townes (1962). Townes (1970) said it is almost certain that the genera he has grouped in the Baryceratina are not all related but are associated for convenience partly on convergent characters resulting from the habit of attacking cocoons of Limacodidae. Only three of the genera of Hemigastrina occur in the New World, and only two of these have North American species.

Taxonomy: Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 12 (list of genera placed in Baryceratina). —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 120-121, 205-215.

Genus BARYCEROS Gravenhorst

Baruceros Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 777.

Type-species: Baryceros guttatus Gravenhorst. Monotypic. Christolia Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 246.

Type-species: Christolia punctata Brulle. Monotypic.

Crypturopsis Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 45.

Type-species: Crypturus texanus Ashmead. Monotypic and orig. desig.

Neochristolia Blanchard, 1936, Rev. Argentina de Ent. 1; 40.

Type-species: Neochristolia eucleidis Blanchard. Monotypic and orig. desig.

Most of the species of this large genus are Neotropic.

audax (Cresson). Que. s. to Ala., w. to Wis. and Kans. In the tribal revision of Townes and Townes (1962) part of the specimens from the northern end of the distribution were distinguished as a separate subspecies.

Mesostenus audax Cresson, 1878. Canad. Ent. 10: 207. 9.

Mesostenus exaptus Cresson, 1878. Canad. Ent. 10: 208. 9.

Mesostenus Saundersi Cresson, 1878. Canad. Ent. 10: 208. ♀. N. syn.

Mesostenus armatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 76. 9. N.

Mesostenus saundersii Dalla Torre, 1902. Cat. Hym., v. 3, p. 546. Emend.

candidus (Cresson), Mass, s. to Fla., w. to Mich, and Kans.

Mesostenus candidus Cresson, 1878. Canad. Ent. 10: 206. d.

Crupturus albomaculatus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 414. d.

Crypturopsis abdominalis Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 28. 9. Preocc. in Baryceros by Cresson, 1873.

Christolia dumetorum Townes, 1944. Amer. Ent. Soc., Mem. 11: 271. N. name for Crupturopsis abdominalis Cushman.

halli Townes. Ariz.

Baryceros halli Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 30. δ .

texanus (Ashmead). Md. s. to Fla., w. to n. Mich. and e. Tex.; n.w. Mexico. Host: Alarodia slossoniae Pack.

Crypturus texanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 413. δ . Crypturus Dyari Ashmead, 1897. Canad. Ent. 29: 113. δ , \circ .

Genus WHYMPERIA Cameron

Whymperia Cameron, 1903, Entomologist 36: 122.

Type-species: Whymperia carinifrons Cameron. Monotypic.

Protocryptus Schmiedeknecht, 1904. Opusc. Ichn., v. 2, p. 414.

Type-species: Protocryptus grandis Schmiedeknecht. Desig. by Viereck, 1914.

Zamansa Viereck, 1912. U. S. Natl. Mus., Proc. 42: 647.

Type-species: Cryptus aztecus Cresson. Monotypic and orig. desig.

Eleven species and subspecies are known, ten of them Neotropic.

tricolor Townes, Southern Ariz.

Whymperia tricolor Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul 216 (pt. 3): 22. \circ .

SUBTRIBE MESOSTENINA

Genus CRYPTANURA Brulle

Cryptanura Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 242.

Type-species: Cryptanura nigripes Brulle. Desig. by Viereck, 1914.

Mesostenus subg. Polyaenus Cresson, 1873. Acad. Nat. Sci. Phila., Proc. 25: 149.

Type-species: [Mesostenus] Polyaenus ectypus Cresson. Desig. by Viereck, 1914. Polyaenidea Viereck, 1913. U. S. Natl. Mus., Proc. 46: 381.

Type-species: Polyaenidea pretiosa Viereck. Monotypic and orig. desig.

Except for the three species known to occur in North America, this very large genus is Neotropic.

Revision: Cushman, 1945. U. S. Natl. Mus., Proc. 96: 139-176.

banchiformis (Megerle). Mass. s. to Fla., w. to Mich., Kans., and Tex. In their tribal revision, Townes and Townes (1962) say that "the sting of this species is moderately severe and of long duration; one sting received by the senior author [while collecting] was still painful on the night of the third day."

Ichneumon Banchiformis Megerle, 1802. App. ad Cat. Ins., Quae Mense Novembris 1802 Vienne Austriae Auctionis Lege Vendita Fuere, p. 16. [male].

Mesostenus spinarius Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 227. 9. Mesostenus albopictus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 312. 3. Preocc. by Smith, 1858.

Mesostenus Delawarensis Dalla Torre, 1901. Cat. Hym., v. 3, p. 540. N. name for M. albonictus Cresson.

compacta (Cresson). Southern Tex.; Mexico, Honduras.

Mesostenus (Mesostenus) compactus Cresson, 1873. Acad. Nat. Sci. Phila., Proc. 25: 153. 9. Cruptanura planiscatellata Cushman, 1945. U. S. Natl. Mus., Proc. 96: 152. 9.

septentrionalis Cushman. Southern N. Y. s. to S. C., w. to Mo. and La. Cryptanura septentrionalis Cushman, 1945. U. S. Natl. Mus., Proc. 96: 156. 9.

Genus MESOSTENUS Gravenhorst

Mesostenus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 750.

Type-species: Mesostenus transfuga Gravenhorst. Desig. by Westwood, 1840. Stenaraeus Thomson, 1896. Opusc. Ent. 21: 2380.

Type-species: Mesostenus transfuga Gravenhorst, Desig. by Viereck, 1914.

Unlima Cameron, 1902, Ann. and Mag. Nat. Hist. (7) 9: 208. Type-species: Unlima penetralis Cameron. Monotypic.

Derocentrus Cushman, 1919. Ent. Soc. Wash., Proc. 21: 113. Type-species: Coleocentrus texanus Ashmead. Orig. desig.

This genus is of moderate size and nearly worldwide distribution.

Revision: Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 40-50. - Porter, 1973. Acta Zool. Lilloana [Tucuman] 30: 227-267 (South American spp.).

Taxonomy: Porter, 1974. Acta. Zool. Lilloana [Tucuman] 31: 27-46 (additions to 1973) revision).

albinotatus promptus Cresson, N. B. w. to B. C., s. to w. N. C., S. Dak., Colo., and n. Calif. M. albinotatus albinotatus Gravenhorst is European.

Mesostenus promptus Cresson, 1878. Canad. Ent. 10: 209. 3.

americanus Cresson. Que. s. to Va., w. to S. Dak. Barron (1975) resurrected the name brevipennis from synonymy with albinotatus promptus and placed temporalis as a synonym of brevipennis; he failed to note that Townes (1970) had placed temporalis as a synonym of americanus,

Mesostenus tarsatus Provancher, 1875. Nat. Canad. 7: 265. d. Preocc. by Cresson, 1865. The syntypes were not found by Barron (1975).

Mesostenus americanus Cresson, 1878. Canad. Ent. 10: 209. 9.

Mesostenus macrarus Dalla Torre, 1901. Cat. Hym., v. 3, p. 544. Unnecessary n. name for M. longicaudis Cresson, which is not preoce. by M. longicauda Brulle, 1846. Nematopodius exclamans Viereck, 1905. Kans. Acad. Sci., Trans. 19: 318. 9.

melanurus Cushman. Alta. Known only from the holotype.

Mesostenus melanurus Cushman, 1929, U. S. Natl. Mus., Proc. 74 (16); 47. 9.

sicarius Townes. N. C., Tex., s. Alta., Mont., Colo., Ariz., Calif.; Mexico. Ecology: Distribution seems to correlate with that of cacti of the genus Opuntia; one specimen emerged from a cocoon found in a cactus stem.

Mesostenus sicarius Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 448. & . . .

3): 448. 0, ¥.

thoracicus Cresson. Que. w. to B. C., s. to Fla., Tex., and s. Calif. Host: Acrobasis betulella Hulst, A. caryivorella Rag., Macrobotys theseusalis (Wlk.), Phlyctaenia extricalis (Gn.). Mesostenus thoracicus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 314. 3, 9.

Mesostenus erythrogaster Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 406. 3.

Genus POLYCYRTUS Spinola

Polycyrtus Spinola, 1840. Soc. Ent. de France, Ann. 9: 154.

Type-species: Polycyrtus histrio Spinola. Desig. by Viereck, 1914.

Cruptanuridimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 46: 369.

Type-species: Cryptanuridimorpha elegans Viereck. Monotypic and orig. desig. C. elegans is a synonym of Polycyrtus vierecki Townes, 1966.

Cryptopterygimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 46: 371.

Type-species: Cryptopterygimorpha tubulifera Viereck, Monotypic and orig. desig. Polycyrtimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 46: 383.

Type-species: Polycyrtimorpha amoenus Viereck. Monotypic and orig. desig.

Polycyrtus is a very large genus of the New World. Only one species is known from the Nearctic Region, but in view of the number of species known from Mexico and Cuba, it seems likely that additional species will be found in the southern U.S.

Revision: Cushman, 1931. U. S. Natl. Mus., Proc. 78 (14): 1-62.

neglectus Cushman. Mass. s. to Fla., w. to Wis. and e. Tex. Ecology: Occurs in moist forests. $Polycyrtus\ neglectus\ Cushman,\ 1926.\ U.\ S.\ Natl.\ Mus.,\ Proc.\ 67\ (23):\ 5.\ \cdot\ \c$

Taxonomy: Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 2, 4, 5, 51.

SUBTRIBE GORYPHINA

This subtribe includes 33 genera, 29 of which are restricted to the Old World. Only three of the genera occurring in the New World have Nearctic species.

Genus DIAPETIMORPHA Viereck

Diapetimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 44: 564.

Type-species: Cryptus armatus Ashmead. Monotypic and orig. desig.

This is a large Nearctic and Neotropic genus.

Revision: Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 29-37 (Nearctic spp.). acadia Cushman, Md. s. to Fla., w. to Mo. and Tex.; Mexico.

Diapetimorpha acadia Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 35. 8, 9.

alabama Cushman. Southern N. Y. s. to S. C., w. to e. Kans. and Ala.

Diapetimorpha alabama Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 34. 8, 9.

brunnea Townes. Southern Ga., Fla.

Diapetimorpha brunnea Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 382. δ , \circ .

introita (Cresson). N. C. s. to Fla., w. to Tex.; Mexico.

Mesostenus introitus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 162. d.

Mesostenus dejectus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 163. 9.

Cryptus armatus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 411. d. Preocc. by Lucas, 1846.

Cryptus ashmeadii Dalla Torre, 1902. Cat. Hym., v. 3, p. 562. N. name for C. armatus Ashmead.

macula confederata Cushman. Northern Va. s. to mid Fla., w. to e. Tex. Host: Pilocrosis tripunctata (F.). D. macula macula (Cameron) is Mexican.

Diapetimorpha confederata Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 34. 9.

macula ustulata Townes. Southern Fla. One would expect m. ustulata to be found in Cuba, particularly if the taxon really deserves being distinguished from m. confederata.

Diapetimorpha macula ustulata Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 386. δ , \circ .

picta Townes. Southeastern Ga., s. Fla.

Diapetimorpha picta Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 387. δ , \circ

rufigaster Cushman, Md. s. to Fla., w. to s.e. Wis. and Tenn.

Diapetimorpha rufigaster Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 33. 9.

rugosa Townes. N. J. s. to S. C., w. to s.w. Wis., e. Kans., and Tex.

Diapetimorpha rugosa Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 392. δ , φ .

Genus LISTROGNATHUS Tschek

Townes (1970) recognized five subgenera, two of which have Nearctic species. In their tribal revision, Townes and Townes (1962) erroneously treated the name Listrognathus as being of feminine gender. If one chooses to ignore the provision in the Code (art. 30, [a], [i], [3) regarding the genders of Greek generic names latinized with a change in termination, it is inconsistent to also ignore the scholarly work of Hopper (1959). Hopper regarded Listrognathus as masculine, which is apparently explained by his statement that "a large proportion of the compounds of Greek nouns are adjectives by Greek grammar and may be either masculine or feminine ..., and in such cases the gender must be considered to be determined by the first species included whose name is of definite gender" (in this case L. cornutus Tschek).

Revision: Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 15-22.

Taxonomy: Hopper, 1959. Ent. Soc. Wash., Proc. 61 (4): 158, 166 (nomenclature). —Townes, 1970 (1969). Amer. Ent. Soc., Mem. 12: 259-262.

Genus LISTROGNATHUS Subgenus FENESTULA Townes

Listrognathus subg. Fenestula Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 408.

Type-species: Mesostenus paludatus Cresson. Orig. desig.

Townes (1970) said that there are three species, one Nearctic, one Japanese, and one Korean (undescribed).

paludatus californicus Townes. Calif. Host: Lepidopteran on Salix.

Listrognathus (Fenestula) paludata californica Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 410. d, 9.

paludatus ocularis Townes. Ariz. Described from one specimen from the Chiricahua Mts. Listrognathus (Fenestula) paludata ocularis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 411. 9.

473

paludatus paludatus (Cresson). Mich., w. Ohio, Ill., Minn., Man., Tex., Wyo., Colo., N. Mex., Yukon, Alaska, B. C., Oreg. Host: Cerura cinerea Wlk.

Mesostenus paludatus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 162. č. Listrognathus agnatus Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 21. \(\varphi \).

Genus LISTROGNATHUS Subgenus LISTROGNATHUS Tschek

Listrognathus Tschek, 1870, Zool.-Bot, Gesell, Wien, Verh, 20: 153.

Type-species: Listrognathus cornutus Tschek. Monotypic. L. cornutus is regarded as a synonym of L. pubescens (Fonscolombe).

Mesostenoideus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 45.

Type-species: Mesostenus albomaculatus Cresson. Monotypic and orig. desig.

This is apparently the largest subgenus; it is Neotropic (species unidentified or undescribed), Holarctic, and Oriental. I have seen one undescribed species from southern Calif.

achelomus Townes, Md., Fla.

Listrognathus (Listrognathus) acheloma Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 425. ♀.

albomaculatus (Cresson). R. I., s. Ont., Mich., and Kans. s. to Fla. and Tex. Host; Gretcheng bolliang (Sling.).

Mesostenus albomaculatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 313. 9.

Mesostenus leucocoxus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 407. d. albomaculatus sagax (Provancher). Southern Que., Ont., and Alta. s. to W. Va. and Wis.

 $\label{eq:Mesostenus} \textit{Mesostenus sagax} \ \text{Provancher}, 1879. \ \text{Nat. Canad.} \ 11 \ (\text{no.} \ 126): 112. \ \ ^{\circ}.$ **bicolor** Townes. Ariz. Known only from the holotype, which was collected in Oak Creek

Canyon.

Listrognathus (Listrognathus) bicolor Townes, 1962. In Townes and Townes, U. S. Natl.

Mus. Bul. 216 (pt. 3): 414. 9.

femoratus Townes. P. E. I., Que., Ont., Va., W. Va., Mich.

Listrognathus (Listrognathus) femorata Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 415. δ, Ψ.

glomeratus Townes. N. J. s. to Fla., w. to Pa., W. Va., and Tex.

Listrognathus (Listrognathus) glomerata Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 424. δ , \circ .

multimaculatus Cushman. Maine s. to N. J., w. to Minn. and Mo. Host: Tortricid on Gleditsia. Listrognathus albomaculatus var. multimaculatus Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 18. 9.

nigrescens Townes. Wyo., N. Mex., Alta., Utah.

Listrognathus (Listrognathus) nigrescens Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 416. S. 9.

nubilipennis (Cresson). N. C., Ga. Ecology: According to Porter (1963) this species occurs in cypress swamps. L. nubilipennis was known to Townes and Townes (1962) only from the female holotype; Porter (1963) discussed two males and two females collected on the North Carolina coastal plain.

Mesostenus nubilipennis Cresson, 1878. Canad. Ent. 10: 205. 9.

Taxonomy: Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 416. —Porter, 1963. Ent. News 74: 19-21.

rufitibialis Cushman. N. J., Md., S. C., Ind., Okla., Tex.

Listrognathus albomaculatus var. rufitibialis Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 18. 8, 9.

rufus Townes, N. Y., Kans.

Listrognathus (Listrognathus) rufa Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 419. 3.

victoriensis (Harrington), Southern B. C., n. Calif.

Cryptus victoriensis Harrington, 1894. Canad. Ent. 26: 211. 9.

Listrognathus multicolor Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 20. 9.

Genus HYLOPHASMA Townes

Hylophasma Townes, 1970 (1969). Amer. Ent. Inst., Mem. 12: 275.

Type-species: Hemisphragia debilis Townes. Monotypic and orig. desig.

According to Townes (1970) this genus is Neotropic, Nearctic, and eastern Palearetic and included seven undescribed species.

debile (Townes). Md., Va., Ohio, Tenn., La., Kans.

Hemisphragia debilis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3); 378. δ, ♀.

SUBTRIBE LYMEONINA

Genus MALLOCHIA Viereck

Mallochia Viereck, 1912. U. S. Natl. Mus., Proc. 43: 591.

Type-species: Mallochia agenioides Viereck. Monotypic and orig. desig.

This New World genus is of moderate size; there are fewer Nearctic species than Neotropic ones (most of which are undescribed).

Revision: Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 13-15.

agenioides Viereck. R. I. s. to Fla., w. to Mich., e. Kans., and Ala.; Mexico.

Mallochia agenioides Viereck, 1912. U. S. Natl. Mus., Proc. 43: 591. ♀.

frontalis Townes. N. J., Md., Va., N. C., e. Kans., Tex.

Mallochia frontalis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 96, 8, 9.

laevis Townes. Southeastern Ga., n.e. Fla.

Mallochia laevis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 97. β , φ .

strigosa (Cresson). Tex., Ariz.? In their tribal revision, Townes and Townes (1962) were uncertain that the female from Ariz. which they identified as *strigosa* was really conspecific with the male holotype from Texas.

Mesoleptus! strigosus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 167. d.

Genus LYMEON Foerster

Lumeon Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 176.

Type-species: Lymeon annulicornis Ashmead. By subsequent monotypy from inclusion by Ashmead, 1894.

Neomesostenus Schmiedeknecht, 1904. Opusc. Ichn., v. 2, p. 562.

Type-species: Neomesostenus tuheitensis Brues and Richardson. Desig. by Townes and Townes, 1966 from three species included by Brues and Richardson, 1913.

Christolimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 44: 564.

Type-species: Christolimorpha plesius Viereck. Monotypic and orig. desig. The type-species is regarded as a synonym of L. fuscipennis (Brulle).

Zamastrus Viereck, 1913. U. S. Natl. Mus., Proc. 46: 385.

Type-species: Zamastrus photopsis Viereck. Monotypic and orig. desig.

Neogoryphus Roman, 1936. Ent. Tidskr. 57: 3.

Type-species: Ichneumon ariolator Linnaeus. Monotypic and orig. desig.

Nasutocruptus Pratt, 1945. Amer. Midland Nat. 34: 560.

Type-species: Nasutocryptus nasutus Pratt. Monotypic and orig. desig.

Except for four Nearctic species, this very large genus is Neotropic. The females oviposit into cocoons of various sorts, including the egg cocoons of spiders.

bicinctus (Cresson). Southern Fla.; Cuba.

Hemiteles bicinctus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 24. 9.

Lyneon leiponeuron Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 397. δ , \circ .

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 89 (syn.).

cinctiventris (Cushman). Md. s. to Fla., w. to Tex.

Mesostenus laticinctus Cresson, 1878. Canad. Ent. 10: 208. ♀. Preocc. by Mesostenus! laticinctus Walker, 1874.

Mesostenus Cressonii Dalla Torre, 1901. Cat. Hym., v. 3, p. 539. N. name for M. laticinctus Cresson; preocc. by Ashmead, 1900.

Diapetimorpha cinctiventris Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 32. N. name for M. cressonii Dalla Torre.

nasutus (Pratt), N. Mex.

Nasutocruptus nasutus Pratt, 1945. Amer. Midland Nat. 34: 561. 9.

orbus (Say). Southern N. Y. s. to Fla., w. to s. Wis., Kans., and Tex. Host: Coleophora sp., Homaledra sabalella (Chamb.), Phereocea walsinghami (Bsk.), Grapholitha molesta (Bsk.), Astala confederata (G. and R.), Lineodes vulnifica Dyar, eggs of Zelotes sp., Hyposoter fugitivus (Say).

Cryptus orbus Say, 1836. Boston Jour. Nat. Hist. 1: 231. [female].

Mesostenus diligens Cresson, 1878. Canad. Ent. 10: 207. 9.

Lymeon annulicornis Ashmead, 1894. U. S. Dept. Agr., Insect Life 7: 243. 9.

Genus ACERASTES Cushman

Acerastes Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 53.

Type-species: Mesostenus pertinar Cresson, Monotypic and orig. desig.

Except for the widely distributed type-species which ranges into the Nearctic Region, this moderately large genus is Neotropic.

pertinax (Cresson). Md. s. to Fla., w. to Tex.; Mexico, West Indies, Honduras, Panama, Venezuela, Brazil, Paraguay. Townes and Townes (1962) said that pertinax "appears to overwinter in southern Florida and near Brownsville, Tex., and to work northward each season."

Mesostenus pertinax Cresson, 1872. Amer. Ent. Soc., Trans. 4: 163. 9.

Phytodietus ornatus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 431. 9.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 98 (syn.).

Biology: Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 405.

Genus POLYCYRTIDEA Viereck

Polycyrtidea Viereck, 1913. U. S. Natl. Mus., Proc. 46: 382.

Type-species: Polycyrtidea gracilis Viereck. Monotypic and orig. desig.

Except for one species that ranges into the southern tip of Texas and one that occurs in Fla., this small genus is restricted to America south of the U. S.

Taxonomy: Townes, 1970 (1969), Amer. Ent. Inst., Mem. 12: 288.

floridana Porter. Northern Fla. Known only from the holotype.

Polycurtidea floridana Porter, 1975. Fla. Ent. 58: 250. 9.

limitis Cushman. Southern Tex.; Mexico, Costa Rica. In their tribal revision, Townes and Townes (1962) said that limitis may prove to be only subspecifically distinct from P. flavopicta (Ashmead) which is known from Grenada and South America. Polucurtidea limitis Cushman, 1929. U. S. Natl. Mus., Proc. 74: (16): 52. 2.

Taxonomy: Porter, 1975. Fla. Ent. 58: 248-250.

Genus PACHYSOMOIDES Strand

Pachysoma Szepligeti, 1916. Mus. Natl. Hungarici, Ann. 14: 290. Preocc. by Macleay, 1821 and five additional authors.

Type-species: Pachysoma albopictum Szepligeti. Monotypic.

Pachysomoides Strand, 1917. Internatl. Ent. Ztschr. 10: 137. N. name for Pachysoma Szepligeti.

Polistiphaga Cushman, 1925, Wash, Acad. Sci., Jour. 15: 391.

Type-species: Mesostenus arvalis Cresson. Monotypic and orig. desig.

476

The species of this small New World genus are parasites of *Polistes* larvae.

Revision: Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 55-57.

fulvus (Cresson). N. Y. s. to Fla., w. to s. B. C. and Calif.; Cuba, Mexico. Host: Polistes annularis (L.), P. apachus Sauss., P. carolina (L.), P. cubensis Lep., P. fuscatus fuscatus (F.).

Mesostenus! fulvus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 316. d.

Mesostenus arvalis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 163. 9.

[Mesostenus] Mesostenus collaris Cresson, 1873, Acad. Nat. Sci. Phila., Proc. 25, 162, &.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 96 (syn.).

Biology: Dow, 1932. Psyche 39: 16. -Gaul, 1940. Canad. Ent. 70: 240-242. -Rau, 1941. Ent. Soc. Amer., Ann. 34: 364.

stupidus (Cresson). N. C. s. to Fla., w. to s. Ill. and Tex.; West Indies and Mexico s. to South America; Hawaii. Host: Polistes annularis (L.), P. canadensis (L.), P. exclamans Vier., P. fuscatus fuscatus (F.).

[Mesostenus] Mesostenus stupidus Cresson, 1873. Acad. Nat. Sci. Phila., Proc. 25: 162. &.

Pachysoma albopictum Szepligeti, 1916. Mus. Nat. Hungarici, Ann. 14: 290. 9.

Polistiphaga zonata Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 56. 9.

SUBTRIBE CERATOCRYPTINA

Of the 18 genera, 16 are confined to the Old World tropics.

Chamula Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 430. Type-species: [Mesostenus] Polycrytus reliquus Cresson. Monotypic and orig. desig.

This genus includes the type-species and an undescribed species from Venezuela.

reliqua (Cresson). Southwestern La.; Mexico. The female is unknown.

[Mesostenus] Polycrytus reliquus Cresson, 1873. Acad. Nat. Sci. Phila., Proc. 25: 146. d.

SUBTRIBE OSPRYNCHOTINA

Most of the nine genera are tropical, and the hosts are larvae of wasps which make nests entirely or partly of mud.

Genus MESSATOPORUS Cushman

Messatoporus Cushman, 1929, U. S. Natl. Mus., Proc. 74 (16): 8. Type-species: Mesostenus discoidalis Cresson, Orig. desig.

This is a rather large genus of the New World; most of the species are Neotropic.

Revision: Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 8-13.

compressicornis Cushman, Conn. s. to Fla., w. to Ohio and Ala. Host: Ancistrocerus

tuberculocephalus sutterianus (Sauss.), Trypargilum collinum rubrocinctum (Pack.). In their tribal revision, Townes and Townes (1962) said that compressicornis may prove to be a subspecies of M. arcuatus (Cresson) which is known from Mexico.

Messatoporus compressicornis Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 12. 8, 9.

Messatoporus major Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 13. 9.

discoidalis (Cresson). Que. s. to S. C., w. to Minn. and Tex. Host: Auplopus mellipes mellipes (Say), Phanagenia bombycina (Cr.).

Mesostenus ferrum-equinum Walsh and Riley, 1869. Amer. Ent. 1: 133. Sex not indicated. Preocc. by Brulle, 1846.

Mesostenus discoidalis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 162. 9.

Mesostenus jocosus Provancher, 1874. Nat. Canad. 6: 300. 9.

rufiventris Cushman, Que. w. to s. B. C., s. to Fla., s. Tex., Ariz., and n. Calif. Host: Auplopus sp., Phanagenia bombycina (Cr.)?, Trypoxylon sp.

Messatoporus rufiventris Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 11. 9.

Genus ACRORICNUS Ratzeburg

Acroricnus Ratzeburg, 1852. Ichn. d. Forstinsecten, v. 3, p. 92.

Type-species: Acroricnus schaumii Ratzeburg. Monotypic.

Xenodocon Foerster, 1855. Naturh. Ver. Rheinlande, Verh. 12: 237.

Type-species: Xenodocon reficornis Foerster. Monotypic. The type-species is regarded as a synonym of A. seductor (Scopoli).

Macrobatus Holmgren, 1856 (1854). Svenska Vetensk.-Akad. Handl. 75: 50.
Type-species: Cruptus macrobatus Gravenhorst. Monotypic.

Linoceras Taschenberg, 1865. Ztschr. f. die Gesam. Naturw. Halle 25: 105.

Type-species: Cryptus macrobatus Gravenhorst. Desig. by Viereck, 1914.

Leptobatides Buysson, 1896. In Andre, Spec. Hym. Eur. Alg., v. 6, p. 678, pl. 3. Type-species: Leptobatides abeillei Buysson. Monotypic.

Type-species: Leptobattaes abetitet Buysson. Monotypic Agathobanchus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 97.

Type-species: Banchus aequatus Say. Monotypic and orig. desig. The type-species was misidentified by Ashmead, who based his description of Agathobanchus upon specimens of Agathilla bradleyi (Viereck) (see Cushman and Gahan, 1921).

This small genus is widely distributed in the northern hemisphere. The hosts are larvae of Eumenidae and Sphecidae.

Revision: Mitchell, 1950. Ent. Soc. Amer., Ann. 43: 249-261.

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 158-159.

stylator aequatus (Say). N. S. s. to S. C., w. to Man. and Mo. Host: Ancistrocerus

birenimaculatus (Sauss.), A adiabatus (Sauss.), Eumenes fraternus Say, Sceliphron caementarium (Drury). The gradual south-to-north reduction in the amount of yellow pigmentation led Townes (1944) to divide this subspecies into two. The name aequatus was applied to the northern population, presumably to agree with Say's color description. Mitchell (1950) and Townes and Townes (1962) applied the name aequatus in the same manner. The inconsistencies in Say's color description of aequatus indicate that it would not be accurate enough to show that it applies to a specimen collected north of the type-locality (which was indicated as "Indiana," but which presumably would have been southwestern Indiana). Therefore, those wishing to recognize an arbitrary division of A. s. aequatus into two subspecies should apply the name aequatus to the southern population.

Banchus acquatus Say, 1836. Boston Jour. Nat. Hist. 1: 247. [male]. Cryptus junceus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 295. \(\begin{align*} \chi \). N. syn. Atractodes Cloutieri Provancher, 1874. Nat. Canad. 6: 150. \(\delta \), \(\delta \).

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 158. —Townes, 1944. Amer. Ent. Soc., Mem. 11: 296-297. — Mitchell, 1950. Ent. Soc. Amer., Ann. 43: 258-259. —Townes and Townes, 1962. U. S. Natl. Mus. Bul. 216 (pt. 3): 474.

Biology: Walsh and Riley, 1869. Amer. Ent. 1: 137.

stylator edwardsii (Cresson). Western Oreg., Calif. Host: Sceliphron caementarium (Drury). Linoceras Edwardsii Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 365. &.

stylator excelsus (Cresson). Western S. Dak., Colo. The range of this form is almost entirely overlapped by the southern end of the range of s. niger, which casts doubt upon'the validity of the distinction between them.

Cryptus excelsus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 293. ♂, ♀.

Acroricans stylator axilaris Mitchell, 1950. Ent. Soc. Amer., Ann. 43: 259. 9. Synonymy based upon data in the tribal revision of Townes and Townes (1962). N. syn.

stylator niger Mitchell, Alta. s. to Colo. w. to B. C., e. Wash., e. Oreg., and Utah.

*Acrorignus stylator niger Mitchell, 1950. Ent. Soc. Amer., Ann. 43: 253. 3, 9.

stylator stylator (Thunberg), Western N. W. T., n. B. C.; Eurasia.

Ichneumon stylator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 265 (key); 9: 320. [male].

Macrobatus clarator Holmgren, 1856 (1854). Svenska Vetensk.-Akad. Handl. 75: 50. Unnecessary n. name for Cryptus macrobatus Gravenhorst.

stylator townesi Mitchell. N. Mex., Ariz.

Acroricaus stylator townesi Mitchell, 1950. Ent. Soc. Amer., Ann. 43: 256. 8, 9.

SUBTRIBE GABUNIINA

The members of this subtribe are all thought to be parasitic upon wood-boring Coleoptera and Lepidoptera. Only two of the 23 genera have Nearctic species.

Genus AGONOCRYPTUS Cushman

Agonocryptus Cushman, 1929. U. S. Natl. Mus., Proc. 74 (16): 6.
Type-species: Mesostenus discoidaloides Viereck. Orig. desig.

This moderately large New World genus is Neotropic except for the one species which occurs in eastern North America.

discoidaloides (Viereck). Southern N. H. s. to Fla., w. to s. Wis., e. Kans., and Tex. Host: Podosesia syringae (Harris), Eupogonius vestitus (Say), Psyrassa unicolor (Rand). Mesostenus discoidaloides Viereck, 1905. Kans. Acad. Sci., Trans. 19: 319. 9.

Genus CRYPTOHELCOSTIZUS Cushman

Cryptohelcostizus Cushman, 1919. U. S. Natl. Mus., Proc. 55: 534.

Type-species: Cryptohelcostizus rufigaster Cushman. Monotypic and orig. desig.

This is a small Nearctic genus.

Revision: Cushman, 1940. U. S. Natl. Mus., Proc. 88: 357-359.

alamedensis (Ashmead). Western Tex., Utah, s. B. C., Oreg., Calif. Host: Agrilus angelicus Horn, Chrysobothris mali Horn, Myrmex arizonicus (Schaef.).

Cryptus alamedensis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 409. 9.

Cryptohelcostizus rufigaster Cushman, 1919. U. S. Natl. Mus., Proc. 55: 534. δ , \circ .

caudatus Townes, Calif.

Cryptohelcostizus caudatus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 511. $\, \circ$.

chrysobothridis Cushman. Okla. Host: Chrysobothris sp. in Malus pumila.

Cryptohelcostizus chrysobothridis Cushman, 1940. U. S. Natl. Mus., Proc. 88: 358. ♀.

dichrous Viereck. N. J., Va., N. C., Ga., Mo., Tex.

Cryptohelcostizus dichrous Viereck, 1921. Psyche 28: 73. 8, 9.

fuminennis Townes, Ariz.

Cryptohelcostizus fumipennis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 507. 9.

genalis Townes, Calif.

Cryptohelcostizus genalis Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 507. Q.

leiomerus Townes, Calif.

maculosus Townes. Calif. Ecology: The holotype emerged from Prosopis.

Cryptoheleostizus maculosus Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 512. $\,^{\circ}$

nigricans Townes, Ariz.

Cryptohelcostizus nigricans Townes, 1962. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 3): 508. \eth , \circ .

ornatus Cushman. Southern Ariz., Calif. Host: $Chrysobothris\ deserta$ Horn. The type locality is Death Valley.

Cruptohelcostizus ornatus Cushman, 1940, U. S. Natl. Mus., Proc. 88: 359. 9.

SUBTRIBE SPHECOPHAGINA

This subtribe includes the Holarctic genus *Sphecophaga* and two other genera which are restricted to the Old World. The hosts are pupae of Vespinae or Polistinae.

Genus SPHECOPHAGA Westwood

Sphecophaga Westwood, 1840. Introduct. Mod. Classif. Ins., v. 2, Synopsis Genera Brit.

Type-species: Anomalon vesparum Curtis. Monotypic and orig. desig.

Chryonomon Desvignes, 1856. Cat. Brit. Ichn., p. 47.

Type-species: Anomalon vesparum Curtis. Monotypic.

Cacotropa Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208.

Type-species: Cacotropa sericea Thomson. By subsequent monotypy from inclusion by Thomson, 1888. The type-species is regarded as a synonym of S. vesparum resparum (Curtis).

There is a single species.

vesparum burra (Cresson). N. H. w. to B. C., s. to S. C., Ariz., and Calif. Host: Vespula arenaria (F.), V. maculata (L.), V. maculifrons (Buyss.). S. vesparum vesparum occurs in Europe. Both diapausing and nondiapausing larvae may develop on the same host pupa presumably from eggs deposited by a single v. burra female. Only females develop from nondiapausing larvae, and they usually differ somewhat in coloration from females which develop from diapausing larvae. Nondiapausing larvae spin a delicate, white cocoon, while diapausing larvae spin a tough, brown one.

Euceros burrus Cresson, 1869. Canad. Ent. 1: 104. 9.

Sphecophagus[!]! praedator Zabriskie, 1894. N. Y. Ent. Soc., Jour. 2: 84. 8, 9.

Biology: Couper, 1870. Canad. Ent. 2: 52-53. — Zabriskie, 1894. N. Y. Ent. Soc., Jour. 2: 81, 86.
 — Cushman, 1933. Ent. Soc. Wash., Proc. 35: 10-11. — Schmieder, 1939. Ent. News 50: 92-97, 125-131. — Leech, 1954. Pan-Pacific Ent. 30: 80.

UNPLACED TAXA OF CRYPTINI

Cryptus mundus Provancher, 1874. Nat. Canad. 6 (6): 177 (key); 6 (7): 203. "♂" = ♂, ♀. Que. Barron (1975) said that the lectotype (no. 245 in second collection of Provancher) keyed to Cryptus ruralis Pratt, a species not known from Quebec. Townes' (1944) placement of mundus as a synonym of C. persimilis Cresson was based upon specimen no. 189 in Provancher's first collection (personal commun., Dr. H. K. Townes, 1975).

Taxonomy: Townes, 1944. Amer. Ent. Soc., Mem. 11: 280. —Barron, 1975. Nat. Canad. 102: 511-512.

SUBFAMILY ACAENITINAE

Revision: Cushman and Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 503-523. —Townes and Townes, 1960. U. S. Natl. Mus. Bul. 216 (pt. 2): 544-579.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 159-179 (genera of world).

TRIBE COLEOCENTRINI

This Holarctic and Oriental tribe includes six genera, only two of which have North American species.

Genus COLEOCENTRUS Gravenhorst

Coleocentrus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 437.

Type-species: Ichneumon excitator Poda. Desig. by Westwood, 1840.

Macrocoleus Desvignes, 1850. Ent. Soc. London, Trans. (n. s.) 1: 13.

Type-species: Macrus longiventris Gravenhorst. Desig. by Viereck, 1914. The type-species is regarded as a synonym of C. excitator (Poda).

This is a moderately large Holarctic and Oriental genus.

flavipes (Provancher). N. S. s. to w. N. C. and e. Tenn., w. to n. and w. Ont. Host: Leptura sp.? Accountes flavipes Provancher, 1874. Nat. Canad. 6: 80. Q.

Acoenites Canadensis Provancher, 1880. Nat. Canad. 12: 10. 8.

Coleocentrus similis Cushman, 1920. In Cushman and Rohwer, U. S. Natl. Mus., Proc. 57: 514. δ , \circ .

Genus MESOCLISTUS Foerster

Mesoclistus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 168.

Type-species: Acaeuites rufipes Gravenhorst. By subsequent monotypy from

Only the European type-species and one North American species are known.

cushmani Townes, Interior Alaska.

Mesoclistus cushmani Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 560. ♂, ♀.

TRIBE ACAENITINI

This tribe includes eighteen genera; only three of these occur in the New World, and none occur in South America.

Genus AROTES Gravenhorst

Arotes Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 446.

inclusion by Schmiedeknecht, 1888.

Type-species: Arotes albicinctus Gravenhorst. Monotypic.

Asthenomeris Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 168.

Type-species: Asthenomeris nigricoxis Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknect, 1888.

481

Sphalerus Kriechbaumer, 1878. Ent. Nachr. 4: 41.

Type-species: Sphalerus bifasciatus Kriechbaumer. Monotypic. The type-species is regarded as a synonym of A. albicinctus Gravenhorst.

Retanisia Cameron, 1886, Biol. Cent.-Amer., Hym., v. 1, p. 299.

Type-species: Retanisia facialis Cameron, Monotypic,

This moderate sized genus is Holarctic and Neotropic (mountains of Mexico and Guatemala). The known hosts include Cerambycidae, Melandryidae, Buprestidae, and Mordellidae.

amoenus Cresson, Que. w. to Minn., s. to w. N. C. and n. Ga. Host: Melandrya striata Say.

Acaenitus amoenus Harris, 1835. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., ed. 2, p. 586. Nomen nudum.

Arotes amoenus Cresson, 1868. Canad. Ent. 1: 34. 9.

Tropistes elegans Provancher, 1874. Nat. Canad. 6: 80. d.

decorus (Say). Mann. s. to Ga., w. to Wis., e. Kans., and e. Tex. Host: Tomoxia bidentata (Say). Acaenitus decorus Sav. 1836. Boston Jour. Nat. Hist. 1: 248. 9 (& misdet.).

maurus Rohwer. Northern Minn., w. Sask., central Alta., s.w. B. C. May be only subspecifically distinct from A. amoenus Cresson.

Arotes maurus Rohwer, 1920. In Cushman and Rohwer, U. S. Natl. Mus., Proc. 57: 517. 9.

melleus (Say). N. Y., N. J., Pa., Md., D. C., w. N. C., s. Mich., s.w. Ind. Host: Metacmaeops vittatus (Swed.).

Acaenitus melleus Say, 1836. Boston Jour. Nat. Hist. 1: 249. 9.

Genus SPILOPTERON Townes

Spilopteron Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 568. Type-species: Spilopteron franclemonti Townes. Orig. desig.

This is a small Holarctic and Oriental genus.

formosum (Cresson), Que, w. to s.w. Man., s. to s.e. Ga. Host: Bellamira scalaris (Say). Arotes formosus Cresson, 1868. Canad. Ent. 1: 34. d.

Spilopteron formosum australe Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 573. ♂, ♀. N. syn.

franclemonti Townes, N. B. w. to s. Man., s. to N. Y., s. Ohio, and Minn.

Spilopteron franclementi Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 569. ♂, ♀.

occiputale (Cresson). Mass. w. to Mich., s. to e. N. C., n.w. S. C., and s. Ind. Host: Strangalia bicolor (Swed.).

Arotes occiputalis Cresson, 1869, Amer. Ent. Soc., Trans. 2: 260. d. Arotes apicalis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 366. 9.

vicinum (Cresson), N. S. w. to s.w. N. W. T., s. to Va., Tex., Colo., and n.w. Oreg. Host:

Anoplodera nigrella (Say), A. rubrica (Say)?, A. vagans (Oliv.)?, Metacmaeops vittatus (Swed.). The two "subspecies" recognized by Townes and Townes (1960) were largely sympatric.

Arotes vicinus Cresson, 1869. Amer. Ent. Soc., Trans. 2: 260. d.

Arotes venustus Cresson, 1869. Amer. Ent. Soc., Trans. 2: 260. 8, 9.

Arotes superbus Provancher, 1874. Nat. Canad. 6: 81. 3, 9.

Spilopteron vicinum melanderi Townes, 1960. In Townes and Townes, U. S. Natl. Mus. Bul. 216 (pt. 2): 575. ♂, ♀. N. syn.

Genus YEZOCERYX Uchida

Yezocerux Uchida, 1928, Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 36. Type-species: Yezoceryx scutellaris Uchida. Monotypic and orig. desig.

This is a large Holarctic and Oriental genus; the majority of the species are Oriental.

rupinsulensis (Cresson), Central Mich., Ill., s.e. Minn.

Acoenitus rupinsulensis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 143. 9.

SUBFAMILY LYCORININAE

This is a small subfamily including three cosely related genera, only one of which occurs in the New World.

Genus TOXOPHOROIDES Viereck

Toxophoroides Cresson, 1874 (1873). Acad. Nat. Sci. Phila., Proc. 25: 406. Manuscript name cited in synonymy (i.e. nomen nudum). Townes (1970) regarded the name Toxophoroides as being validated by Viereck (1911); Townes opinion is (personal communication, 1975) that because Cresson did not adopt this name (Cresson said that it was an MS name which he had intended to use for the species he described on the following page as Lycorinat apicalis) it should be regarded as having been published in synonymy by Cresson. Those who agree with the present Code regarding the publication date and authorship of names which have been accepted as having been validated in synonymy, possibly could regard Toxophoroides as having been validated by Cresson.

Toxophoroides Viereck, 1911. U. S. Natl. Mus., Proc. 40: 195.

Type-species: Lycorina! apicalis Cresson. Monotypic and orig desig. Chlorolycorina Cushman, 1920. U. S. Natl. Mus., Proc. 58: 9.
Type-species: Glypta scitula Cresson. Orig. desig.

This is a small Neotropic and Nearctic genus.

Revision: Cushman, 1920. U. S. Natl. Mus., Proc. 58: 7-13.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 3.

albomarginatus albomarginatus (Cresson). Maine w. to Man., s. to N. C., Ark., Kans., and Colo. Host: Psorosina hammondi (Riley), Anarsia lineatella Zell., Dichomerus bipunctella (Wlshm.), Archips rosaceana (Harris), Acleris minuta (Rob.), Grapholitha molesta (Bsk.).

Glypta albomarginata Cresson, 1870. Amer. Ent. Soc., Trans. 3: 157. 9.

albomarginatus soror (Cushman). N. Mex., Ariz., Calif. Host: Acrobasis~nuxvorella Neun. Chlorolycorina soror Cushman, 1920. U. S. Natl. Mus., Proc. 58: 10. \circ .

glaucomatus Cushman, N. J., Pa., Md., N. C., Ohio, Mich.

Toxophoroides glaucomatus Cushman, 1920. U. S. Natl. Mus., Proc. 58: 12. 9.

scitulus (Cresson). N. Y., N. J., Md., D. C., Va., N. C., Fla., Ind., Ky., Tenn. Host: Aerobasis juglandis (LeB.), Nephopteryx uvinella (Rag.), Tetralopha subcanalis (Wlk.), Arogalea cristifasciella (Chamb.), Gelechia albisparsella (Chamb.), Ancylis comptana (Froel.), "tineid" on apple, leaf feeder on Rubus allegheniensis.

Glypta scitula Cresson, 1870. Amer. Ent. Soc., Trans. 3: 155. 9.

xanthozonatus (Ashmead). Southeastern N. C., s. Fla., Mo. Host: Tortricid on oak, Antaeotricha humilis (Zell), leaf roller on Vaccinium australe. Glupta xanthozonata Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 449. d.

Taxonomy: Viereck, 1911. U. S. Natl. Mus., Proc. 40: 195 (syn.). —Cushman, 1920. U. S. Natl. Mus., Proc. 58: 11-12. —Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 2, p. 85 (syn.).

SUBFAMILY COLLYRIINAE

Genus COLLYRIA Schiodte

Pachymerus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 721. Preocc. by Thunberg, 1805 and Serville, 1825.

Type-species: Bassus calcitrator Gravenhorst. Desig. by Westwood, 1840. Collyria Schiodte, 1839. Mag. Zool. (Ser. 2, sect. 3) 9 (insectes, pl. 6-10): 10. N. name for Pachumerus Gravenhorst.

This is a small Palearctic genus. The hosts are Cephidae. The eggs are inserted into the eggs of the host and the Collyria adults emerge from the cocoon of the host.

coxator (Villers). N. Y., N. J., Pa., Del., Md., n. Va., Ont., Ohio; Eurasia; n. Africa. Introduced. Host: Cephus pygmaeus (L.), Janus integer (Nort.). Despite repeated attempts to establish coxator in western Canada in the 1930's on the native Cephus cinctus Nort., it apparently no longer occurs there. Townes, Momoi, and Townes (1965) were apparently the first authors to suppress Collyria calcitrator (Gravenhorst) as a synonym of coxator, but Gravenhorst had placed calcitrator as a definite synonym of coxator in 1829 and uncharacteristically neglected to use the senior name.

Ichneumon coxator Villers, 1789. Caroli Linnaei Ent., v. 3, p. 193. Sex not indicated. Bassus calcitrator Gravenhorst, 1807. Vergl. Uebers. Zool. Systeme, p. 266. 9. Pachymerus puncticeps Thomson, 1877. Opusc. Ent. 8: 734. 9. Colluria calcitratrix Schulz, 1906. Spolia Hym., p. 122. Emend.

Taxonomy: Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 727-729. — Kerrich, 1936. Soc. Brit. Ent., Trans. 3: 63. — Kerrich, 1936. Soc. Brit. Ent., Jour. 1: 124. — Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 397-398.

SUBFAMILY ORTHOPELMATINAE

Genus ORTHOPELMA Taschenberg

Orthopelma Taschenberg, 1865. Ztschr. f. die Gesam. Naturw. [Halle] 25: 137.

Type-species: Hemiteles luteolator Gravenhorst. Desig. by Viereck, 1914.

Proedrus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 147.

Type-species: Hemiteles Inteolator Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1889.

This is the only genus in the subfamily; it is medium sized and Holarctic. The species are internal larval parasites of Cynipidae which make galls on Rosa, Rubus, and Ribes. Dr. John Barron has completed a revision of Orthopelma which will probably be published prior to the appearance of this catolog.

californicum Ashmead. Northern Calif. Host: Cynipid gallmaker on wild currant. According to Ashmead, the syntypes were "reared in May, 1887, from a Rose gall," but the Koebele notes in the U. S. Natl. Museum say that they were reared from a cynipid which makes galls on wild currant and that the parasites of the cynipids emerged in May, 1888, from galls collected near Alameda Calif. in March, 1888.

Orthopelma californicum Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 417. 3, 9.

coloradense Ashmead, Colo. Host: Diplolepis tuberculator (Ckll.).

Orthopelma coloradense Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 418. ♀. Orthopelma americanum Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life

3: 154. Nomen nudum (also on same page as "americana").

diastrophi Ashmead. Conn., Ind.? Host: Diastrophus radicum Bass., Diplolepis radicum (O. S.), Apparently parasitizes cynipids which make galls on the roots of both Rosa and

Rubus.

luteolator (Gravenhorst). Que., Mass., R. I., N. Y., Pa., Ont., Ind., Ariz.; Europe. Host: Diastrophus turgidus Bass., Diplolepis ignota (O. S.), D. rosae (L.), D. rosaefolii (Ckll.). Ichneumon mediator Thunberg, 1822: 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 269; 9: 332. Q. Unavailable by virtue of preoccupation in Ichneumon by Pimpla mediator Fabricius, which was unnecessarily renamed Ichneumon modulator by

Thunberg on key p. 271 (v. 8, 1822) and text p. 340 (v. 9, 1824). Although Thunberg never indicated that any of his names were replacement names until he cited the names being replaced in his 1824 text, it is imperative that we accept the fact that the renamed species (such as P. mediator Fabricius) were included in Ichneumon by Thunberg in his 1822 key. Otherwise, the numerous replacement names proposed in the key must instead be treated as proposals of new species. The only practical course is to continue to treat Thunberg's (1822; 1824) replacement names as such, particularly in view of the fact that most of them have been unavailable because they were unnecessarily proposed. Without having heard the foregoing argument, Dr. H. K. Townes informed me (personal commun., 1975) that he would consider I. mediator Thunberg to be available were it not for the fact that the combination I. mediator (Fabricius) had been published by Jurine in 1807. I am not certain that the latter would

have any bearing on the question.

Hemiteles luteolator Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 826. 3, 9.

Orthopelma minutum Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 416. ?. The type locality is Jamaica Plain, Mass. (not "Jamaica Plains, New York," as stated by Ashmead). Orthopelma rosaecola Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 417. &, ?. Notes in the U. S. Natl. Museum indicate that the syntypes were reared from a cynipid gall on rose sent to Washington, D. C. by H. K. Morrison, Ft. Grant, Ariz.

Orthopelma thompsoni Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 157. 8, 9.

Taxonomy: Roman, 1912. Zool. Bidr. Uppsala 1: 267, 292.

occidentale Ashmead. Southwestern Wyo. Host: Diplolepis similis (Ash.).

Orthopelma occidentale Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 417. S. ovale (Provancher). Que., Alta.

Hemiteles ovalis Provancher, 1874. Nat. Canad. 6: 332. 8, 9.

SUBFAMILY ICHNEUMONINAE

The Ichneumoninae is the second largest of ichneumonid subfamilies (only the Cryptinae being larger). The species are all internal parasites of Lepidoptera. The females of some species oviposit into larvae and some into fresh pupae, but the progeny always emerge from the pupa. The sexual dimorphism in structure and color is often marked, but the differences between species often are subtle, which not infrequently causes difficulty in identification and association of the sexes.

Historically, the Ichneumoninae have been divided into categories having names that were not derived from those of included genera. The names cyclopneusticae and particularly stenopneusticae are two which persist to some extent in current literature. The cyclopneusticae is composed of the Alomyini and Phaeogenini, while the stenopneusticae includes the remainder of the tribes of Ichneumoninae. The species of cyclopneusticae are parasites of microlepidoptera, while those of stenopneusticae generally parasitize macrolepidoptera. Accordingly, the species of cyclopneusticae are generally smaller than those of stenopneusticae.

Heinrich (1961-1962) published a revision of the stenopneusticae which applies mostly to northeastern North America. Many of the subspecies recognized or described in that work or its supplements (Heinrich, 1969-1976) are not recognized here, often because they merely represent ends and intermediate portions of clines. In some cases synonymy of these subspecific names is based upon specimens in the U. S. National Museum collection. In a few cases, subspecies are placed in synonymy because they are based upon too few specimens to demonstrate that they deserve recognition (particularly when there is no zoogeographical reason for expecting subspeciation).

Revision: Heinrich, 1961-1962 (Phaeogenini excluded). Canad. Ent. Sup. 15: 1-87 (1961 [1960)); 18: 89-205 (1961 [1960)); 21: 207-368 (1961); 23: 369-505 (1961); 26: 507-671 (1962); 27: 675-802 (1962); 29: 803-886 (1962). —Peck, 1964. Ent. Soc. Canada, Mem. 35: 887-925 (addenda, corrigenda, host-parasite list, and indices for Heinrich, 1961-1962). —Heinrich, 1969-1976. Nat. Canad. 96: 935-963 (1969); 98: 959-1026 (1971); 99: 173-211 (1972); 100: 461-465 (1973); 102: 753-782 (1976) (supplements to Heinrich, 1961-1962).

Taxonomy: Dasch, 1971. Ohio Jour. Sci. 71: 279-283 (key to stenopneusticae found overwintering as adult females, particularly in Ohio). Biology: Dasch, 1971, Ohio Jour, Sci. 71: 270-279 (overwintering sites preferred by stenopneusticae found overwintering as adult females, particularly in Ohio).

TRIBE PHAEOGENINI

The members of this tribe are parasites of microlepidoptera. Townes and Townes (1973) persisted in suppressing the name Phaeogenini as a synonym of Alomyini. Because this seems inconsistent with their recognition of a tribe Heterischnini, the Phaeogenini are here regarded as tribally distinct from the Alomyini.

Taxonomy: Perkins, 1959. Handb. Ident. Brit. Ins., v. 7, pt. 2 (ai), p. 68-111. - Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 219-221 (Ethiopian cat.).

SUBTRIBE HETERISCHNINA

Genus HETERISCHNUS Wesmael

Heterischnus Wesmael, 1859. [Brussels] Acad. Roy. de Belg., Mem. 8: 83. Type-species: Ichneumon pulex Mueller. Monotypic.

Rhexidermus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 192.

Type-species: Rhexidermus japonicus Ashmead. By subsequent monotypy from inclusion by Ashmead, 1906.

Posocentrus Provancher, 1875. Nat. Canad. 7: 272.

Type-species: Posocentrus huardi Provancher. Monotypic.

Ischnopsidea Viereck, 1914. U. S. Natl. Mus. Bul. 83: 77.

Type-species; Ichneumon thoracicus Gravenhorst, Monotypic and orig, desig. Aethiopischnus Heinrich, 1936. Paris, Mus. d'Hist. Nat., Mem. (n. s.) 4: 244. Name invalid as of 1936 because neither of the two species names validated was designated as type-species.

Aethiopischnus Heinrich, 1938. Acad. Malgache, Mem. 25: 127.

Type-species: Aethiopischnus olsoufieffi Heinrich. Monotypic and orig. desig.

Species of this genus are known from the Holarctic and Ethiopian Regions.

coloradensis (Cushman), n. comb. Colo. According to notes pertaining to the C. F. Baker collection, the holotype was collected by C. F. Baker on July 21, 1896 at an elevation of 10,000 ft. in Rabbit Ear's Pass, Colo.

Ischnopsidea coloradensis Cushman, 1920. U. S. Natl. Mus., Proc. 58: 253. 9.

huardi (Provancher). Que. s. to N. Y., w. to Alaska and Oreg.

Posocentrus Huardi Provancher, 1875, Nat. Canad. 7: 273. 9.

Posocentrus Huarti(!) Provancher, 1879. Nat. Canad. 11: 251.

Phaeogenes recticaudus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 42. 9. Ischnopsidea alberta Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 1. 9.

SUBTRIBE PHAEOGENINA

Taxonomy: Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 415-423, 592-593 (cat. of E. Palearctic spp. and key to genera).

Genus STENODONTUS Berthoumieu

Gnathoxys Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 168. Preocc. by Westwood, 1842.

Type-species: Ichneumon marginellus Gravenhorst. Monotypic. The type-species was identified with a query by Berthomieu.

Stenodontus Berthoumieu, 1896. Soc. Ent. de France, Ann. 65: 346. N. name for Gnathoxys Wesmael.

This is a small Holarctic genus with two undescribed species occurring in North America. The known ranges of these species are: (1) Newfoundland (insular) s. to N. C., w. to Mich. and (2) Idaho and Wash.

Genus DICAELOTUS Wesmael

Dicaelotus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveax Mem. 18: 175.
Type-species: Ichneumon pumilis Gravenhorst. Desig. by Ashmead, 1900.

Leptodemas Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 182.

Type-species: Leptodemas cariniscutis Cameron. By subsequent monotypy from inclusion by Cameron, 1906.

Deloglyptus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 193.

Type-species: Deloglyptus punctiveutris Thomson. By subsequent monotypy from inclusion by Thomson, 1891.

Cinxaelotus Holmgren, 1890 (1889). Ichn. Suecica, v. 3, p. 367.

Type-species: Cinxaelotus erythrogaster Holmgren. Monotypic.

Euryptilus Holmgren, 1890 (1889). Ichn. Suecica, v. 3, p. 375.

Type-species: Euryptilus kriechbaumeri Holmgren, Monotypic.

This is apparently a moderate sized genus of the Holarctic and Ethiopian Regions. Perkins (1959) placed Deloglyptus as a synonym of Dicaelotus because he thought the differences between them were rather weak. He said that if a division is made between them, other groups of species should also be split off as genera distinct from Dicaelotus. I assume, therefore, that Perkins's (1969) treatment of Deloglyptus as distinct from Dicaelotus was for the purpose of making the first revisor decision to suppress Leptodemas as a synonym of Deloglyptus. Consequently, I have not followed Townes and Townes (1973), who treated Deloglyptus as a distinct genus.

Taxonomy: Perkins, 1959. Handb. Ident. Brit. Ins., v. 7, pt. 2 (ai), p. 83. —Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 416, 435. —Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 220.

attenuatus (Provancher). Que., Conn., w. B. C. Because the range, "Atlantic to Cont. Divide in Transit. and U. Austr. Zones," given by Townes and Townes (1951) conflicts with the type-localities of two of their synonyms, one is inclined to doubt the correctness of their synonymy and to wonder about the sort of data they generally used to make their sweeping generalizations about the ranges of species.

Phygadeuon attenuatus Provancher, 1882. Nat. Canad. 13 (no. 155): 334 (key); 13 (no. 156): 359. 9. Barron (1975) said that the lectotype selected by Rohwer and Gahan (1918) is

now represented only by the pin and labels.

Phaeogenes sectus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 358. d.

Herpestomus flavicoxae Harrington, 1894. Canad. Ent. 26: 210. S.

Phygadenon (Plesignathus) taeniatus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 335, 336. &.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 135. —Townes and Townes, 1951. In Musesbeck et al., U. S. Dept. Agr., Agr., Monog. 2: 279. —Barron, 1975. Nat. Canad. 102: 430. 563.

clypeatus (Cresson). Maine s. to N. C., w. to Ill.

Stilpnus clypeatus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 95. 3.

gelechiae (Ashmead). N. H., N. Y., Ont., Ohio. Host: Gnorimoschema gallaesolidaginis (Riley).

Phaeogenes gelechiae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 392. ♂, ♀.

missouriensis (Ashmead). D. C., Mo. Ecology: The holotype of the synonym *Phaeogenes hemiteloides* was reared together with the type series of *Emphylina pallidiscapa* Rohwer (1911) (a synonym of *Ametastegia recens* [Say]) from beneath the bark at the base of a black birch (*Betula nigra*).

Phaeogenes missouriensis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 393. Q. Phaeogenes hemiteloides Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 393. Q.

Taxonomy: Rohwer, 1911. U. S. Natl. Mus., Proc. 41: 401 (discussion of Bureau of Entomology notes).

pacificus (Ashmead). Md., W. Va., Alta., Calif.

Ischurocuemis pacificus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 199. ♀ (male misdet.).

ruficornis (Ashmead). Mo.? The holotype bears a label with what is apparently the illegible name of a collector and another label reading "Collection C. V. Riley;" as often as not, Ashmead was incorrect concerning localities for specimens in the Riley collection. *Phaeogenes ruficornis* Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 394. §.

Genus ORONOTUS Wesmael

Oronotus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 213. Type-species: Oronotus coarctus Wesmael. Monotypic. The type-species is regarded as a synonym of O. binotatus (Gravenhorst).

Fedalma Cameron, 1903. Ann. and Mag. Nat. Hist. (7) 13: 318.

Type-species: Fedalma tricolor Cameron. Monotypic.

Pramha Cameron, 1903. Ent. Soc. London, Trans. 51: 231.

Type-species: Pramha mandibularis Cameron. Monotypic.

Takanona Uchida, 1926. Hokkaido Imp. Univ., Faculty Agr., Jour. 18: 163.

Type-species: Takanona ishiyamana Uchida. Monotypic and orig. desig.

Taxonomy: Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 420 (syn.).

vincibilis (Cresson), n. comb. N. H. s. to D. C., w. to Iowa and Ark.

Ichneumon vincibilis Cresson, 1867. Amer. Ent. Soc., Trans. 1: 312. 9.

Phaeogenes decoloratus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 203. 9. Phaeogenes discus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 203. 3.

Taxonomy: Townes, 1957. Ent. Soc. Wash., Proc. 59: 119 (generic transfer).

Genus DIADROMUS Wesmael

Diadromus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 207. Type-species: Ichneumon troglodytes Gravenhorst. Desig. by Ashmead, 1900.

Thyraeella Holmgren, 1890 (1889). Ichn. Suecica, v. 3, p. 402.

Type-species: Ischnus collaris Gravenhorst. Monotypic.

erythrostomus (Cameron), Calif.

Stiboscopus eruthrostomus Cameron, 1908. Amer. Ent. Soc., Trans. 34: 244. 9.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 113.

helvolus (Cresson). Eastern Que. s. to Va., w. to Sask., Colo., and Tex. Host: Sparganothis sulfureana (Clem.), Endothenia hebesana (Wlk.).

Ichneumon helvolus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 312. 9.

Ichneumon Magdalensis Provancher, 1890. Nat. Canad. 19: 248. d.

Taxonomy: Cresson, 1877. Amer. Ent. Soc., Trans. 6: 205.

marginatus (Provancher). N. Y., N. J., Md., Ont., Alta.

Phygadeuon marginatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 56.

subtilicornis (Gravenhorst). Ont., Ohio, Ind., N. Dak., Kans., Utah, Wash., Oreg.; Eurasia. Host: Plutella xylostella (L.). Cushman (1935) suppressed Herpstomus plutellae Ashmead as a synonym of subtilicornis, and, after comparing North American and European specimens, I have concluded that Townes (1944) was incorrect in resurrecting plutellae from synonymy. Phaeageones japonicus Ashmead was erroneously suppressed as a synonym of subtilicornis by Townes, Momoi, and Townes (1965).

Ichneumon subtilicornis Gravenhorst, 1829. Ichn. Europaea, v. 1, p. 592. 9.

Diadronus imbellis Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 209. 9.

Herpestomus plutellae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 396. d.

Taxonomy: Cushman, 1935. Wash. Acad. Sci., Jour. 25: 548. —Townes, 1944. Amer. Ent. Soc., Mem. 11: 305. —Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 420.

Biology: Lloyd, 1942. Rev. Canad. de Biol. 1: 633-645. —Harcourt, 1963. In LeRoux et al., Ent. Soc. Canada, Mem. 32: 61.

Genus TEREBRAELLA Heinrich

Terebraella Heinrich, 1972. Nat. Canad. 99: 211.

Type-species: Terebraella culiciops Heinrich. Monotypic and orig. desig.

culiciops Heinrich, Fla.

Terebraella culiciops Heinrich, 1972. Nat. Canad. 99; 211. ♂, ♀.

Genus COLPOGNATHUS Wesmael

Colpognathus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18:

Type-species: Ichneumon celerator Gravenhorst. Monotypic.

helvus (Cresson), Que, s. to Ga., w. to Calif. Host: Platuntilia carduidactula (Riley),

Ichnenmon fungor Cresson, 1867. Amer. Ent. Soc., Trans. 1: 306. d.

Ichneumon helvus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 312. 9. Cryptus certus Provancher, 1874. Nat. Canad. 6 (6): 177 (key); 6 (7): 200. d.

Phygadenon hilaris Provancher, 1874. Nat. Canad. 6: 284. "&" = 9.

Taxonomy: Cresson, 1877. Amer. Ent. Soc., Trans. 6: 204, 206.

Genus CENTETERUS Wesmael

Centeterus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 176. Type-species: Centeterus major Wesmael. Desig. by Ashmead, 1900.

euryptychiae (Ashmead). N. Y., Mich. Host: Epiblema scudderianum (Clem.). Ashmead erroneously stated that the two syntypes were from Washington, D. C. Notes made by T. Pergande show that he reared these specimens from galls (on Solidago) sent by D. S. Kellicott of Buffalo, N. Y.

Colpognathus euryptychiae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 395. 9.

linearis (Provancher). Que., N. J., N. Mex. Host: Epiblema scudderianum (Clem.). Cryptus linearis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 72. 8.

Phaeogenes beulahensis Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 80 8.

quadriceps (Cresson). Que. s. to Va., w. to Mich.

Ichneumon quadriceps Cresson, 1867. Amer. Ent. Soc., Trans. 1: 312. 8, 9.

Taxonomy: Cresson, 1877. Amer. Ent. Soc., Trans. 6: 204.

tuberculifrons (Provancher). Que., Maine, N. Y., S. C., Ont.

Phygadeuon tuberculifrons Provancher, 1874. Nat. Canad. 6: 284. 9.

Phygadenon fasciatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 55. 9.

Genus AETHECERUS Wesmael

Aethecerus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 213. Type-species: Aethecerus dispar Wesmael. Desig. by Ashmead, 1900.

parvus (Provancher). Que., Maine, R. I., N. Y.

Ischnus parvus Provancher, 1875, Nat. Canad. 7: 112. 3. Barron (1975) rejected the "lectotype" selected by Gahan and Rohwer (1917) because it is a specimen which Provancher used only for his 1879 redescription; Barron gave label data for the specimen he regarded as the holotype.

Phaeogenes Farladeani Provancher, 1882. Nat. Canad. 13: 331. 9.

Phaeogenes Falardeaui(!) Townes, 1944. Amer. Ent. Soc., Mem. 11: 302.

Taxonomy: Provancher, 1879. Nat. Canad. 11: 121. - Gahan and Rohwer, 1917. Canad. Ent. 49: 428. — Mason, 1960. Canad. Ent. 92: 145. — Barron, 1975. Nat. Canad. 102: 469, 527-528. pinifolii Mason, Alta., Calif. Host: Coleotechnites milleri (Bsk.), C. starki (Free.).

Aethecerus pinifolii Mason, 1960. Canad. Ent. 92: 145. 8, 9.

Genus JETHSURA Cameron

Jethsura Cameron, 1902. Amer. Ent. Soc., Trans. 28: 373.

Type-species: Jethsura ferruginea Cameron. Monotypic.

pyriformis (Provancher). Que., N. H., Mass., R. I., N. Y., N. Mex. Ischnus pyriformis Provancher, 1875. Nat. Canad. 7: 109. \(\text{ } \).

Jethsura ferruginea Cameron, 1902. Amer. Ent. Soc., Trans. 28: 374. 9.

Taxonomy: Provancher, 1879. Nat. Canad. 11: 40. —Townes, 1961. Ent. Soc. Wash., Proc. 63: 109.

Genus PHAEOGENES Wesmael

Phaeogenes Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 180. Type-species: Phaeogenes primarius Wesmael. Desig. by Ashmead, 1900. The type-species is regarded as a synonym of P. semivulpinus (Gravenhorst).

Dirophanes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 183.

Type-species: Phygadeuon (Dirophanes) plesius Viereck. By subsequent monotypy from inclusion by Viereck, 1912.

Tycherus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 192.

Type-species: *Phaeogenes elongatus* Thomson. Monotypically included and desig. by Perkins, 1962.

Proscus Holmgren, 1890 (1889). Ichn. Suecica, v. 3, p. 420.

Type-species: Phaeogenes cephalotes Wesmael. Desig. by Ashmead, 1900.

Townes, Momoi, and Townes (1965) distinguished *Dirophanes* from *Phaeogenes*, but the characters they ascribed to *Dirophanes* in their key do not fit the type-species very well. Their key also distinguishes *Phaeogenes* in the strict sense from "species placed in *Phaeogenes* with a query," but because the latter category includes most of the species presently in *Phaeogenes* it does not seem practical to adopt that classification here.

Taxonomy: Perkins, 1959. Handb. Ident. Brit. Ins., v. 7, pt. 2 (ai), p. 99-111. —Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 461. —Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 593.

TRIBE GYRODONTINI

This is the Ichneumonini in the sense of Heinrich and, in part, the Joppini in the sense of Townes. It is a very large tribe of worldwide distribution. Heinrich (1967) divided the tribe into five subtribes, four of which are represented in North America.

Taxonomy: Heinrich, 1967. Synopsis and Reclassif. Ichneumoninae Stenopneusticae Africa So. of Sahara, v. 1, p. 26-27; v. 3, p. 486-487 (keys to subtribes).

SUBTRIBE GYRODONTINA

Genus CRATICHNEUMON Thomson

Cratichneumon Thomson, 1893. Opusc. Ent. 18: 1945.

Type-species: Ichneumon luteiventris Gravenhorst. Desig. by Ashmead, 1900.

Lareiga Cameron, 1903. Ztschr. System. Hym., Dipt. 3: 13.

Type-species: Laveiga rufofemorata Cameron. Monotypic.

Belargea Cameron, 1903. Ztschr. System. Hym., Dipt. 3: 15.

Type-species: Belargea albomaculata Cameron. Monotypic. The type-species is regarded as a synonym of C. rufofemorata (Cameron).

Odontojoppa Cameron, 1903. Ztschr. System., Dipt. 3: 16, 177.

Type-species: Odontojoppa metallica Cameron. Monotypic.

Sycaonia Cameron, 1903. Ent. Soc. London, Trans. 51: 224.

Type-species: Sycaonia rufofacies Cameron. Monotypic.

Leptothecus Cameron, 1903. Entomologist 36: 240.

Type-species: Leptothecus rufomaculatus Cameron. Monotypic.

Tanyjoppa Cameron, 1904. Ztschr. System. Hym., Dipt. 4: 217.

Type-species: Tanyjoppa sanguineoplagiata Cameron. Monotypic.

Lissichneumon Cameron, 1906. Entomologist 39: 227.

Type-species: Lissichneumon levis Cameron. Monotypic. Nimbolareiga Heinrich, 1969 (1968). Synopsis and Reclassif. Ichneumoninae

Stenopneusticae Africa So. of Sahara, v. 4, p. 933.

Type-species: Nimbolareiga merucapitis Heinrich. Monotypic and orig. desig.

This is a very large and widely distributed genus which is particulary difficult taxononomically.

Taxonomy: Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 304 (generic syn.). acronictae Heinrich. Que., Maine, N. Y., N. C. Host: Acronicta sp.

Cratichneumon acronictae Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 125. ∂, ♀.

nigritarius acerbus (Cresson), Newfoundland (Labrador) s. to N. Y., w. to S. Dak, and Colo.

Host: Isturgia truncataria (Wlk.), Protoboarmia porcelaria (Gn.), Semiothisa sexmaculata (Pack.). C. nigritarius nigritarius (Gravenhorst) is Eurasian.

Ichneumon acerbus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 293. S.

Ichnenmon corvinus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 145. 9.

Taxonomy: Heinrich, 1953. Wash. Acad. Sci., Jour. 43: 149-150.

paraparatus Heinrich. N. Y., N. J., Md., N. C., S. C. Heinrich's description of paraparatus was based upon 12 female specimens, apparently including the specimen ("neallotype") upon which Heinrich (1961) based his description of what was presumed to be the female of C. vinnulus (Cresson). Because the description of paraparatus was not accompanied by the description of a female which could more definitely be associated with vinuulus males, the status of the name paraparatus seems dubious.

Cratichneumon paraparatus Heinrich, 1962. Canad. Ent. Sup. 29: 869. 9.

Taxonomy: Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 100, 138-140. - Heinrich, 1971. Nat. Canad. 98: 988 (key including male thought possibly to be conspecific with paraparatus).

vaccinii Heinrich, Que., Maine, Pa., Ont., Mich.

Cratichneumon vaccinii Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 141. S.

valdefuscus Heinrich. N. Y. s. to n. Fla., w. to La.

Cratichneumon valdefuscus Heinrich, 1972. Nat. Canad. 99: 177. ∂, ♀.

vescus (Provancher). Que., Maine, N. H., Vt., N. Y., Pa., Ont., Mich., N. Mex., Alta., B. C. Host: Protoboarmia porcelaria (Gn.).

Ichneumon vescus Provancher, 1877. Nat. Canad. 9: 9. 8.

vinnulus (Cresson). Que. s. to N. C., w. to Wis. and Ky.

Ischnus vinnulus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 189. d.

Cratichneumon gracilior Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 147. 9 (male misdet.).

Taxonomy: Heinrich, 1962. Canad. Ent. Sup. 29: 868 (syn.).

vockerothi Heinrich, N. H. Ecology: The holotype was collected on the summit of Mt. Washington, N. H. (elevation 6100 to 6288 ft.).

Cratichneumon vockerothi Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 158. 9.

w-album (Cresson). Que. s. to Ga., w. to Wis. and Ala. Host: Heterocampa guttivitta (Wlk.), Dryocampa rubicunda rubicunda (F.). Heinrich (1959, 1961) erroneously applied the name w-album to C. signatipes (Cresson) because of the fact that Cresson's (1916) lectotype for w-album does not agree in decisive respects with the original description. Although Cresson made no mention of variation to indicate that he used more than one of his syntypes in writing his original description of w-album, the fact that he had more that one type-specimen is indicated by his statement: "Hablitat]- Pennsylvania (C. A. Blake); Delaware (Dr. Wilson); New Jersey (Cresson)." Unless it can be shown that Cresson's (1916) lectotype from Pa. was not the specimen from C. A. Blake, there is no basis for disregarding it as the legitimate lectotype. Although it is possible that Cresson's lectotype is not one of the original syntypes, but instead a specimen aquired later and used in making his 1867 expanded description of w-album, lack of agreement with the original description is not proof of this.

Ischnus W-album Cresson, 1864. Ent. Soc. Phila., Proc. 3: 191. d.

Ischnus variegatus Provancher, 1875. Nat. Canad. 7: 250. 8.

Cratichneumon variegatus insignitus Heinrich, 1971. Nat. Canad. 98: 985. ♂, ♀. N. syn.

Taxonomy: Cresson, 1867. Amer. Ent. Soc., Trans. 1: 309. — Cresson, 1877. Amer. Ent. Soc., Trans. 6: 179-180 (redescription based on specimens from Canada, N. H., and Mass.). — Cresson, 1916. Amer. Ent. Soc., Mem. 1: 63 (lectotype selection). — Heinrich, 1959. Ent. News 70: 190. — Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 122-124, 126-127, 129. vakutatensis Ashmead. Alaska.

Cratichneumon yakutatensis Ashmead, 1902, Wash, Acad. Sci., Proc. 4: 157, 3.

Genus CRYPTEFFIGIES Heinrich

Aculichneumon subg. Crypteffigies Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 17. Type-species: Cratichneumon confusus Ashmead. Monotypic and orig. desig.

According to Heinrich (1969) Crypteffigies is Holarctic.

Taxonomy: Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 178-180. —Heinrich, 1969 (1968). Synopsis and Reclassif. Ichneumoninae Stenopneusticae Africa So. of Sahara, v. 5, p. 1106. confusa (Ashmead). Que., N. Y., Alaska, B. C.

Cratichneumon confusus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 158. &. Plectocryptus popofensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 183. \$. Plectocruptus uakutatensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 183. \$.

megalura Heinrich. Maine, Ont. Specimens in the U. S. Natl. Museum collection appear to indicate that megalurus will not likely prove to be deserving of anything more than suppression as a synonym of confusus.

Aculichneumon (Crypteffigies) confusus megalurus Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 180, 205. 9. The alternate spelling "mogalurus" appears on p. 205.

Taxonomy: Heinrich, 1971. Nat. Canad. 98: 1003-1004 (description of male and elevation to species status).

Genus HOMOTHERUS Foerster

Homotherus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 185.
Type-species: Ichneumon locutor Thunberg. Monotypically included and desig. by Perkins, 1960.

This is a small genus of Holarctic distribution.

Taxonomy: Perkins, 1960. Handb. Ident. Brit. Ins., v. 7, pt. 2 (aii), p. 153. —Heinrich, 1971. Nat. Canad. 98: 1000 (key for some males).

erythromelas (MacLachlan). Northern N. W. T.; w. Greenland. Dr. W. R. M. Mason informed me that there are specimens from Greenland in the Canadian National Collection, but none from Canada. The holotype, which is from northern Ellesmere Island is apparently the only Canadian specimen known.

Ichneumon erythromelas MacLachlan, 1879 (1878). Linn. Soc. Zool., Jour. 14: 106. 9.

Taxonomy: Strand, 1905. Rpt. Second Norwegian Arctic Exped. in the "Fram" 1898-1902, no. 3, p. 6. —Roman, 1930. Ann. and Mag. Nat. Hist. (10) 5: 282. —Heinrich, 1962. Canad. Ent. Sup. 29: 871-872.

magus (Wesmael). Newfoundland (insular); Greenland; Europe.

Ichneumon magus Wesmael, 1855. [Brussels] Acad. Roy. de Belg., Bul. 22: 389. d., ♀. Homotherus magus nearctis Heinrich, 1976 (1975). Nat. Canad. 102: 753, 766. ♀. N. syn. Based upon a single female from insular Newfoundland. The variant spelling

"nearcticus" which appears on p. 583 (French resume and English abstract) is here rejected in favor of nearctis.

Phaeogenes nitidus Bridgman, 1886. Ent. Soc. London, Trans. 34: 337. d.

Taxonomy: Roman, 1938. In Carpenter, Ann. and Mag. Nat. Hist. (11) 1: 538. — Perkins, 1953. Brit. Mus. (Nat. Hist.) Ent., Bul. 3: 116, 134, 136. — Perkins, 1960. Handb. Ident. Brit. Ins., v. 7, pt. 2 (aii), p. 121, 138, 145, 147.

porcelariae Heinrich. Newfoundland (Labrador), N. B., Maine, Ont., Mich., Man. Host: Eufidonia notataria (Wlk.), Protoboarmia porcelaria (Gn.), Semiothisa sp.

Ichneumon extrematatis (!) Cresson, 1867. Amer. Ent. Soc., Trans. 1: 290.

Phygadeuon niger Provancher, 1874. Nat. Canad. 6: 280. 9.

heleiobatos (Porter). N. J., Mich. Ecology: This species has been collected only in and around swamps where the vegetation was predominantly grasses interspersed with Salix bushes.

Melanichneumon (Vulgichneumon) heleiobatos Porter, 1964. Psyche 71: 130. 3, 9.

mimicus (Cresson). Newfoundland (insular), Que., Maine, Mass., Conn., N. Y., Mich., S. Dak., Idaho, Oreg.

Ichneumon mimicus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 300. d.

phaeogenops Heinrich. N. C., Fla., Miss.

Vulgichneumon phaeogenops Heinrich, 1972. Nat. Canad. 99: 209. ∂, ♀.

saevus (Cresson). Maine, N. Y., R. I., Ill.

Ichneumou saevus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 296. 9.

subcyaneus (Cresson). Que. s. to Ga., w. to B. C. and Calif.; Mexico? Host: Diacrisia virginica (F.), Hyphantria canea (Drury), Tyria jacobaeae (L.).

Ichneumon pullatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 146. d.

Ichneumon cordatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 146. d. N. syn.

Ichneumon subcyaneus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 148. 9.

Ichneumon solitus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 144. 9. N. syn.

Ichneumon odiosus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 145. d. N. syn.

Ichneumon neutralis Cresson, 1877. Amer. Ent. Soc., Trans. 6: 149. S. N. syn.

tenneumon neutratis Cresson, 1971. Amer. Ent. Boc., 11ans. 6. 143. 6. 14. Syn.

Taxonomy: Heinrich, 1959. Ent. News 70: 212. —Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 264 (oversight of Heinrich [1959]).

terminalis (Cresson). Que. s. to N. C., w. to Minn. and Mo.

Ichneumon terminalis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 184. 9.

Ichneumon finitimus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 302. "9" = 3.

Mesostenus apicalis Provancher, 1875. Nat. Canad. 7: 266. d.

Phygadeuon brevicaudus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 54.

Melanichneumon (Vulgichneumon) terminalis carolinensis Heinrich, 1962. Canad. Ent. Sup. 26: 619. ♀. N. syn.

zebratus (Cresson). N. Y. w. to s. B. C., s. to Ga., Tex., and Calif. Host: Prochoerodes forficaria (Gn.).

Ichneumon zebratus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 299. 9.

Genus RICHTICHNEUMON Heinrich, n. status?

Melanichneumon subg. Richtichneumon Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 17.
Type-species: Ichneumon residuus Say. Monotypic and orig. desig.

belfragei (Cresson), n. comb. La., Tex., e. Wyo., s. w. Utah. The discovery of two females in the collection of the U.S. Natl. Museum shows that this species should be removed from Melanichneumon (see Heinrich, 1959) and placed in Richtichneumon by virtue of general agreement with Heinrich's definition of the latter. Ichneumon Belfragei Cresson, 1872. Amer. Ent. Soc., Trans. 4: 156. d.

residuus (Say). Mass. s. to Md., w. to N. Dak. and Kans. Host: Alsophila pometaria (Harris). Ichneumon residuus Say, 1829, Contrib, Maclurian Lyceum to Arts and Sci. 1: 73. 9. Ichneumon utilis Cresson, 1867. Amer. Ent. Soc., Trans. 1: 311. d. Platylabus (Colocnema?) omniferrugineus Viereck, 1905. Kans. Acad. Sci., Trans. 19:

322. ♀.

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 167. virginicus (Cresson), W. Va.

Ichneumon virginicus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 165. d. Ichneumon ornatipes Cresson, 1867. Amer. Ent. Soc., Trans. 1: 294. d.

Genus STENOBARICHNEUMON Heinrich

Stenobarichneumon Heinrich, 1961 (1960), Canad. Ent. Sup. 15: 16. Type-species: Ichneumon citator Thunberg, Monotypic and orig, desig,

This is a small genus of Holarctic and Neotropic distribution.

agitator Heinrich. Que., Maine, Ont., Mich.

Stenobarichneumon agitator Heinrich, 1962, Canad. Ent. Sup. 26: 639. 8.

duplicans Heinrich, Maine,

Stenobarichneumon duplicans Heinrich, 1962. Canad. Ent. Sup. 26: 638. 8, 9.

melanocephalus Heinrich. Newfoundland (insular).

Stenobarichneumon melanocephalus Heinrich, 1976 (1975). Nat. Canad. 102: 770. d.

pergracilis Heinrich, Newfoundland (insular), Que., Maine, Ont., Mich.

Stenobarichneumon pergracilis Heinrich, 1962. Canad. Ent. Sup. 26: 635. 8.

pygmaeops Heinrich. Newfoundland (insular), Que., Maine, Ont., Mich.

Stenobarichneumon pygmaeops Heinrich, 1962. Canad. Ent. Sup. 26: 637. 8, 9. Stenobarichneumon pygmaeops insulanus Heinrich, 1976 (1975). Nat. Canad. 102: 771. 3,

Q. N. syn. The specimens in the type series, which are from two localities in insular Newfoundland, were described as showing, "on the average, a markedly increased melanism in comparison with populations from the type locality ([Dryden], Maine)."

saundersi (Cresson). Que., Maine, N. Y., Alta.

Ichneumon Saundersi Cresson, 1877. Amer. Ent. Soc., Trans. 6: 141 (key), 177, 211 (index). 8. The spelling Saundersii appears on pages 177 and 211, but Walkley (1958) appears to have chosen the alternate spelling Saundersi.

Taxonomy: Walkley, 1958, In Krombein et al., U. S. Dept. Agr., Agr., Monog. 2, sup. 1, p. 49.

Genus MENKOKIA Heinrich

Melanichneumon subg. Menkokia Heinrich, 1934. Berlin Zool. Mus., Mitt. 20: 209. Type-species: Melanichneumon (Menkokia) major Heinrich. Orig. desig.

This genus is Oriental and Nearctic. Heinrich (1969, 1971) placed the genus in the Pterocormina, but I doubt that he is correct.

Taxonomy: Heinrich, 1969 (1968), Synopsis and Reclassif, Ichneumoninae Stenopneusticae Africa So. of Sahara, v. 5, p. 1147. - Heinrich, 1971. Nat. Canad. 98: 971-973.

blandii (Cresson), N. Y. s. to N. C., w. to Mich., Kans., and Ark.

Ischnus blandii Cresson, 1864. Ent. Soc. Phila., Proc. 3: 188. d.

Genus RUBICUNDIELLA Heinrich

Rubicundiella Heinrich, 1961 (1960), Canad. Ent. Sup. 15: 15. Type-species: Ichneumon mucronatus Provancher. Monotypic and orig. desig. annulicornis (Ashmead). N. J., Ga., Fla., Mich, La. Host: Plathypena scabra (F.), Hellula rogatalis (Hulst), Herpetogramma sp., Udea rubigalis (Gn.).

Colpognathus annulicornis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 396. 9.

blanchardi (Davis). Que., Maine, N. H., Mass., Mich.

Ichneumon blanchardi Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 350. 9. Ichneumon blanchardii Dalla Torre, 1902. Cat. Hym., v. 3, p. 865. Emend.

deuteromelas Heinrich. Maine, Mich., Yukon.

Rubicundiella deuteromelas Heinrich, 1962. Canad. Ent. Sup. 26: 573. d.

mucronata (Provancher). Que., Md., Kans.

Ichneumon mucronatus Provancher, 1875. Nat. Canad. 7 (1): 24 (key); 7 (3): 81. "9" = 8.

perturbatrix Heinrich. Maine w. to Oreg., s. to Ga., s. Tex., and Calif.; Bermuda; Hawaii. Host: Ostrinia nubilalis (Hbn.), Macronoctua onusta Grt., Spodoptera exigua (Hbn.). Ichneumon rubicundus Cresson, 1864. Ent. Soc. Phila, Proc. 3: 176. 9. Preoc. by

Geoffroy, 1785.

Rubicundiella perturbatrix Heinrich, 1962. Canad. Ent. Sup. 26: 577. N. name for I. rubicundus Cresson.

Rubicundiella perturbans(!) Heinrich, 1972. Nat. Canad. 99: 195.

Biology: Wishart, 1949 (1948). Canad. Ent. 80: 118-137.

simplicior Heinrich. Southern Sask., s. w. B. C., w. Oreg. Host: Fishia discors (Grt.), Heliothis oninis (D. and S.), Synanthedon bibionipennis (Bdv.).

Rubicundiella simplicior Heinrich, 1962. Canad. Ent. Sup. 26: 575. 8, 9.

Genus LIMONETHE Townes

Limonethe Townes, 1946. Bol. Ent. Venezolana 5: 56.

Type-species: Ichneumon insolens Cresson. Orig. desig.

maurator (Brulle). Que. s. to Fla., w. to Minn. and Tex.

Joppa maurator Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 287. δ , \circ .

Ichneumon insolens Cresson, 1867. Amer. Ent. Soc., Trans. 1: 302. 3, 9.

Joppa Canadensis Provancher, 1874. Nat. Canad. 6: 336. 9.

Tetragonochora mauratrix Schulz, 1906. Spolia Hym., p. 129. Emend.

Genus CARINODES Hancock

Carinodes Hancock, 1926, Entomologist 59; 189.

Type-species: Carinodes spinosus Hancock. Monotypic and orig. desig.

Ditremops Townes, 1946. Bol. Ent. Venezolana 5: 52.

Type-species: Ichneumon abjectus Cresson. Orig. desig.

This is a very large genus. Except for the two species with ranges that extend into the United States, Carinodes is Neotropic.

Taxonomy: Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 48-49 (syn.). - Fitton, 1975. Studia Ent. 18: 381 (holotype of C. spinosus Hancock found). albinectus (Brulle). Fla.: Cuba. Jamaica.

Ichneumon albipectus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 306. d. Ichneumon burrus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 14. 9.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 255 (syn.).

havanensis (Cameron). Fla.; Cuba, Puerto Rico, St. Croix. Host: Anticarsia gemmatalis Hbn. The host record pertains to a Cuban specimen in the U. S. Natl. Museum collection. Ichneumon(?) havanensis Cameron, 1906. Cuba, Estac. Expt. Agron, Informe, 277. 3.

Taxonomy: Heinrich, 1937. Ann. and Mag. Nat. Hist. (10) 20: 262.

Genus AOPLUS Tischbein

Aoplus Tischbein, 1874. Stettin, Ent. Ztg. 35: 137.

Type-species: Aoplus inermis Tischbein. Monotypic.

Trachichneumon Viereck, 1912. U. S. Natl. Mus., Proc. 42: 645.

Type-species: Ichneumon confirmatus Cresson. Monotypic and orig. desig.

cestus (Cresson). Idaho, B. C., Wash., Oreg. Host: Lambdina fiscellaria lugubrosa (Hulst), Melanolophia imitata (Wlk.).

Ichneumon cestus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 182. 9.

Platylabus opacitus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 353. 8.

confirmatus (Cresson), Que, s. to Ga., w. to Colo.

Ichneumon confirmatus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 178. 9.

Phygadeuon potens Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 47. 9.
Phygadeuon jocosus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 53. 9.

This name was based upon the same type-specimen or specimens as was *P. potens* Provancher, the latter being the name Provancher used in his key.

groenlandicus (Lundbeck). Greenland.

Ichneumon groenlandicus Lundbeck, 1897 (1896). Dansk Naturhist. For
. Kjobenhavn, Vidensk. Meddel., p. 223. \S .

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 108 (generic placement).

limbatae Heinrich. Mich., B. C. Host: Nematocampa filiamentaria Gn.

Aoplus limbatae Heinrich, 1962. Canad. Ent. Sup. 26: 542. 8, 9.

mathewi (Cameron). Southwestern B. C.

Ichneumon mathewi Cameron, 1907. Entomologist 40: 277. 3.

melanisticus Heinrich. Ont., Yukon.

Aoplus melanisticus Heinrich, 1962. Canad. Ent. Sup. 26: 547. 9.

moilietti Heinrich, Alta, Host: Enupia griseata Grossb.

Aoplus moilietti Heinrich, 1962. Canad. Ent. Sup. 26: 544, 671. 9. The name is a mispelling of a host name now in synonymy with E. griseata; the name appears as "moiletti Cress." on p. 671 (index).

monotonus Heinrich. Colo., Alta., B. C., Wash., Oreg., Calif. Host: Geometrid on *Polygonum*. Aoplus monotonus Heinrich, 1962. Canad. Ent. Sup. 26: 548. ♂, ♀.

ochropis coloradensis Heinrich. Newfoundland (insular), Que., Colo., Alta.

Applus ochropis coloradensis Heinrich, 1962. Canad. Ent. Sup. 26: 556. 8, 9.

ochropis ochropis (Gmelin), Alaska; Eurasia.

Ichneumon ochropis Gmelin, 1790. In Linnaeus, Syst. Nat., ed. 13, p. 2679. Sex not indicated.

Melanichneumon seldoviae Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 155. d.

permutabilis Heinrich. Newfoundland (insular), s. to Md., w. to Mich. and Mo.

Aoplus permutabilis permutabilis Heinrich, 1962. Canad. Ent. Sup. 26: 541. ♂, ♀. Aoplus permutabilis leucorbis Heinrich, 1962. Canad. Ent. Sup. 26: 542. ♀.

pseudovelox Heinrich. Que., Maine, N. H., N. Y., Pa., Ont., Mich., Alta. Aoplus pseudovelox Heinrich, 1962. Canad. Ent. Sup. 26: 556. 3, 9.

rarior Heinrich, Que., Ont.

Applus rarior Heinrich, 1962. Canad. Ent. Sup. 26: 546. 9.

ruficeps sitkensis (Ashmead). Newfoundland (insular) w. to Alaska, s. to Maine, Mich., Colo., and Wash. Host: Macaria sp., Rheumaptera hastata (L.). A. ruficeps ruficeps (Gravenhorst) is Eurasian.

Ichneumon vagans Provancher, 1875. Nat. Canad. 7 (1): 22 (key); 7 (2): 51. 8. N. syn.; preocc. by Olivier, 1792.

Ichneumon sitkensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 152. d.

Ichneumon simulator Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 153. d. Uncertain syn.; preocc. by Olivier, 1792.

Taxonomy: Heinrich, 1959. Ent. News 70: 211 (syn.).

thujarum Heinrich. Que., Ont.

Aoplus thujarum Heinrich, 1962. Canad. Ent. Sup. 26: 543. 9.

torpidus (Wesmael). Newfoundland (insular), Que., Maine, Ont., Mich., Alta.; Europe.

Phygadeuon cressoni Provancher, 1876. Nat. Canad. 8: 318. ¥. Ichneumon occidentalis Harrington, 1894. Canad. Ent. 26: 210. ♀.

Biology: Schedl, 1931, Ztschr. f. Angew. Ent. 8: 270-273.

Genus HEMIHOPLIS Heinrich

Hemihoplis Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 15.

Type-species: Hoplismenus teres Swift. Monotypic and orig. desig.

teres (Swift), N. Y. s. to Fla., w. to Mich., Ill., and La. Host: Precis lavinia Cr. Hoolismenus teres Swift, 1946. Ent. Soc. Amer. Ann. 39: 409.

Genus PLATYLABOPS Heinrich

Platylabops Heinrich, 1950. Naturw. Mus. Aschaffenburg, Mitt. d. Sammelstelle f. Schmarotzerbestimmung 27: 4.

Type-species: Platylabops hinzi Heinrich, Monotypic.

This is a small Holarctic genus.

apricus nearcticus Heinrich. Maine, N. Y. P. apricus apricus (Gravenhorst) is European. Platylabops apricus nearcticus Heinrich, 1962. Canad. Ent. Sup. 26: 648. d, 9.

eupitheciarum Heinrich. Alta., B. C. Host: Eupithecia ornata (Hulst), E. placidata Tay., E. unicolor (Hulst).

Platylabops enpitheciarum Heinrich, 1962. Canad. Ent. Sup. 26: 648. d.

fraterculus Heinrich. Newfoundland (insular), Maine, Vt., N. Y.

Platylabops fraterculus Heinrich, 1962. Canad. Ent. Sup. 26: 644. 8, 9.

holoerythrus Heinrich. Newfoundland (insular), B. C. Host: Eupithecia transcanadata MacK. Platylabops holoerythrus Heinrich, 1962. Canad. Ent. Sup. 26: 645. ♀.

Taxonomy: Heinrich, 1976 (1975). Nat. Canad. 102: 771-772 (male described).

leucopsis (Ashmead). Wash., Oreg., Calif. According to Riley and Howard (1890), the holotype was reared from a "Tortricid pupa on oak."

Ichneumon leucopsis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 391. d.

Biology: Riley and Howard, 1890. U. S. Dept. Agr., Insect Life 3: 152.

novaescotiae Heinrich. Newfoundland (insular), N. S. Heinrich (1976) made a subspecific distinction between the two specimens from which this species is known.

Platylabops pecki novaescotiae Heinrich, 1962. Canad. Ent. Sup. 26: 643. 9.

Platylabops novascotiae(!) Peck, 1964. In Heinrich, Ent. Soc. Canada, Mem. 35: 918. Platylabops novaescotiae nigrimembris Heinrich, 1976 (1975). Nat. Canad. 102: 773. 9. N. syn.

pecki Heinrich, Sask.

Platylabops pecki pecki Heinrich, 1962. Canad. Ent. Sup. 26: 642. d, Q.

Taxonomy: Heinrich, 1976 (1975). Nat. Canad. 102: 773.

UNPLACED TAXA OF GYRODONTINA

Ichneumou limbifrons Cresson, 1864. Ent. Soc. Phila., Proc. 3: 182. d. Colo.

Taxonomy: Townes, 1944. Amer. Ent. Soc., Mem. 11: 326.

Ichneumon pectoralis Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 72. 3. Southwestern Ind. Heinrich (1961) misinterpreted Say's use of the term pectus. In his writings on Hymenoptera, Say used both the terms pectus and postpectus, and it

consequently seems evident that his usage of pectus is essentially synonymous with mesosternum. In his statement that the pectus of pectoralis is "black with a large yellow spot between the intermediate and posterior feet," Say presumably intended to write: intermediate and anterior feet.

Taxonomy: Say, 1836. Boston Jour. Nat. Hist. 1: 231 (coloration of propodeum). —Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 166. —Heinrich, 1961 (1960). Canad. Ent. Sup. 18: 172-173.

Ichneumon vultus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 165. d. Colo.

Taxonomy: Townes, 1944. Amer. Ent. Soc., Mem. 11: 332.

SUBTRIBE AMBLYTELESINA

All available evidence seems to indicate that the females of species in this subtribe oviposit into the host larva rather than the pupa. In some of the genera, inseminated adult females are apparently the only overwintering life stage.

Genus ECTOPIMORPHA Viereck

Ectopimorpha Viereck, 1912. U. S. Natl. Mus., Proc. 43: 589

Type-species: Ichneumon anceps Cresson. Monotypic and orig. desig.

This genus is apparently restricted to the Nearctic Region.

boops Heinrich. Calif.

Ectopimorpha boops Heinrich, 1961. Canad. Ent. Sup. 23: 494. d.

californica Heinrich. Calif.

Ectopiniorpha californica Heinrich, 1961. Canad. Ent. Sup. 23: 486. 9.

hiulca (Cresson). B. C. Known only from the holotype which, according to Cresson (1879), was collected at "Lake Lahache" (i.e. Lac la Hache), B. C.

Amblyteles hiulcus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 172. "δ" = ♀.

Taxonomy: Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 355-356.

hiulcops Heinrich. Sask., B. C.

Ectopimorpha hiulcops Heinrich, 1961, Canad. Ent. Sup. 23: 486. 9.

indemnis (Cresson). Sask., B. C.

Eutanyacra leucopus Heinrich, 1968, Nat. Canad. 95: 712. d.

Genus DIPHYUS Kriechbaumer

Diphyus Kriechbaumer, 1890. Ent. Nachr. 16: 184. Diphyus was probably a typographical error for "Diphyes," a variant spelling which also appeared on page 184 of Kriechbaumer's paper (Diphyes appeared subsequently in both the author index [p. IV] and the taxonomic index [p. VII], but no choice between the two spellings was made in the errata [p. VIII]). Sharp (1892) and Berthoumieu (1896) accepted the spelling Diphyes, but Ashmead (1900) appears to have been the first author to have made a choice between the two spellings. It is fortunate that Ashmead selected Diphyus instead of Diphyes as the latter is preoccupied by Cuvier, 1817.

Type-species: Diphyus tricolor Kriechbaumer. Monotypic. Pseudamblyteles Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 18.

Type-species: Ichneumon palliatorius Gravenhorst. Monotypic and orig. desig. Physcoteles Berthoumieu, 1904. In Wytsman, Gen. Ins., fasc. 18, p. 51.

Type-species: Ichneumon palliatorius Gravenhorst. Desig. by Viereck, 1914. Antelca Morley, 1914. Ann. and Mag. Nat. Hist. (8) 14: 407. Nomen nudum.

America Morrey, 1914. Ann. and Mag. Wat. 1116t. (6) 14. 401. Women in

This large genus is apparently Neotropic, Holarctic, and Oriental.

Taxonomy: Sharp, 1892 (1890). Zool. Rec. 27: 194. — Berthoumieu, 1896. Soc. Ent. de France, Ann. 65: 291. — Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 17, 210. — Heinrich, 1968 (1967). Ichneumoninae Stenopneusticae Africa So. of Sahara, v. 3, p. 649-651 (syn.).

Amblyteles tricolor Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 351. $\,^{\circ}$ (male misdet. ?). Ichneumon apicator Hopper, 1938. Amer. Ent. Soc., Trans. 64: 100. $\,^{\circ}$.

foxleei Heinrich. B. C., Oreg., Calif.

Tricholabus foxleei Heinrich, 1961. Canad. Ent. Sup. 23: 396. ∂, ♀.

mitchelli Heinrich. Mass., N. Y., N. J., Del., Md., Va., N. C., S. C., Ga., Miss., Ark. Ecology: Occurs in marshes, particularly salt marshes along the Atlantic coast and Gulf of Mexico.

Tricholabus mitchelli Heinrich, 1961. Canad. Ent. Sup. 23: 395. ♂, ♀.

nortonii (Cresson). Que. w. to Alaska, s. to Va., Ohio, S. Dak., and Alta.

Ichneumon Nortonii Cresson, 1867. Amer. Ent. Soc., Trans. 1: 304. \(\varphi \). Ichneumon merus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 148. \(\delta \).

pax (Dalla Torre), Wash.

Ichneumon pacificus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 350. d. Preocc. by Cameron, 1887.

Ichneumon pax Dalla Torre, 1902. Cat. Hym., v. 3, p. 964. N. name for I. pacificus Davis.

Genus SPILICHNEUMON Thomson

Spilichneumon Thomson, 1894. Opusc. Ent. 19: 2087.

Type-species: *Ichneumon occisorius* Gravenhorst. Desig. by Ashmead, 1900. The type-species is Gravenhorst's identification of *I. occisorius* Fabricius.

Spiloteles Berthoumieu, 1904. In Wytsman, Gen. Ins., fasc. 18, p. 54.

Type-species: Ichneumon occisorius Fabricius. Desig. by Viereck, 1914.

Pseudichneumon Kokujev, 1909. Acad. Imp. des Sci. St. Petersburg, Mus. Zool., Ann. 14: 12

Type-species: Pseudichneumon primarius Kokujev. Monotypic.

This Holarctic and Oriental genus is apparently of moderate size.

borealis (Provancher). Newfoundland (insular), Que., Maine, Ont. Ecology: Heinrich (1971) said that "this species is confined to peat bogs, where it appears in the latter part of summer."

Amblyteles borealis Provancher, 1882. Nat. Canad. 13: 328. 9.

Taxonomy: Heinrich, 1971, Nat. Canad. 98: 974-975.

bronteus (Cresson). Newfoundland (insular), Que., Maine, Pa., Ont., Mich., Colo., B. C.?

Ichneumon Bronteus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 144. d.

Ichneumon citrinus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 31. d. N. syn.; preocc. by Cresson, 1873; the information given by Heinrich (1968) indicates that this is the best disposition for the name I. citrinus Provancher until such time as it can be proven that the lectotype represents a valid species.

Taxonomy: Heinrich, 1968. Nat. Canad. 95: 722. — Heinrich, 1971. Nat. Canad. 98: 975-977. inconstans (Cresson). revised status. Newfoundland (insular) w. to N. W. T., s. to Va., Mich.,

Colo., and Ariz. Host: Crymodes devastator (Brace).

Ichneumon (Ichneumon) aleatorius Harris, 1835. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., Ed. 2, p. 585. Nomen nudum.

Ichneumon inconstans Cresson, 1864, Ent. Soc. Phila., Proc. 3: 153. d.

Taxonomy: Heinrich, 1971. Nat. Canad. 98: 983 (syn.).

UNPLACED TAXA OF AMBLYTELESINA

The following species were not included in Heinrich's (1961-1962) work on the stenopneusticae of northeastern North America.

Amblyteles hudsonicus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 192. 9. "Hudsons Bay Territory."

Ichneumon crudosus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 175. &. Calif.

Ichneumon Dakota Cresson, 1867, Amer. Ent. Soc., Trans. 1: 302. 3. "Dakota Territory."

Ichneumon delicatus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 253. 8. Colo.

Ichneumon dictiosus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 164. d. Kans.

Ichneumon (Barichneumon) Humphreyi Viereck, 1905. Kans. Acad. Sci., Trans. 19: 296. S. Ariz.

Ichneumon juxtus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 163. d. Colo.

Ichneumon semissus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 183. ?. Calif. According to Cresson (1879), the type locality is Mohave Desert, Calif.

Taxonomy: Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 354.

Ichneumon sequax Cresson. 1877. Amer. Ent. Soc., Trans. 61: 181. 9. Southern B. C.

Ichneumon ventralis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 250. S. Colo.

SUBTRIBE PTEROCORMINA

Genus STENICHNEUMON Thomson

Stenichneumon Thomson, 1893. Opusc. Ent. 18: 1964.

Type-species: Ichneumon pistorius Gravenhorst. Desig. by Schmiedeknecht, 1902. The type-species is regarded as a synonym of S. militarius militarius (Thunberg).

Muermo Cameron, 1901. Ann. and Mag. Nat. Hist. (7) 7: 523.

Type-species: Myermo rufipes Cameron. Monotypic. The type-species is regarded as a synonym of S. appropinguans (Cameron).

Chiaglas Cameron, 1902. Ann. and Mag. Nat. Hist. (7) 9: 152.

Type-species: Chiaglas nigripes Cameron. Monotypic.

Bolbonuschus Tosquinet. 1903. Soc. Ent. de Belg., Mem. 10: 342.

Type-species: Bolbomyschus albipictus Tosquinet. Monotypic.

The type-species is regarded as a synonym of S. nigripes (Cameron).

Stenichneumonoides Uchida, 1930. Insecta Matsumurana 9: 95.

Type-species: Ichneumon posticalis Matsumura. Orig. desig.

This is a moderate-sized genus of Neotropic, Holarctic, and Oriental distribution.

517

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 263. (syn.).

culpator cincticornis (Cresson). Newfoundland (insular), Que., N. W. T., Yukon, and Alaska, s. to n. Ga., Ill., Colo., and Wash. Host: Trichoplusia ni (Hbn.). S. culpator culpator (Schrank) is Eurasian.

Ichneumon cincticornis Cresson, 1864, Ent. Soc. Phila., Proc. 3: 139. 9.

Ichneumon galenus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 292. d.

Ichneumon mathewi Cameron, 1907. Entomologist 40: 277. d.

Taxonomy: Heinrich, 1953. Wash. Acad. Sci., Jour. 43: 149. —Townes, 1961. Ent. Soc. Wash., Proc. 63: 109 (syn.).

militarius leucopus Heinrich. N. B. w. to Alaska, s. to Maine, Mich., and B. C. Host: "Plusia" sp. S. militarius militarius (Thunberg) is Eurasian.

Stenichneumon militarius leucopus Heinrich, 1962. Canad. Ent. Sup. 26: 525. 8, 9.

pallidipennis (Viereck). N. W. T., S. Dak., and N. Mex., w. to B. C. and Calif.

Cratichneumon pedalis var. pallidipennis Viereck, 1902. Ent. News 13: 87. 8.

salvus (Cresson). P. E. I. w. to B. C., s. to N. H., Mich., and Oreg. This species appears to vary clinally from east to west. Heinrich (1962) recognized two subspecies; he used the name bioculatus for a transcontinental form; his nominate form apparently consisted only of some of the extreme variants from the western end of the range.

Ichneumon bioculatus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 158. 8, 9. N. syn.

Ichneumon salvus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 166. d.

Cratichneumon rubicundus Bradley, 1904. Ztschr. System. Hym. Dipt. 4: 106. 9.

Genus PATROCLOIDES Heinrich

Patrocloides Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 16.

Type-species: Amblyteles perluctuosus Provancher. Monotypic and orig. desig.

This is a small Holarctic genus.

montanus (Cresson). Newfoundland (insular) w. to Wash., s. to n. Ga., N. Mex., and Calif. Host: Syngrapha sp., Trichoplusia ni (Hbn.).

Ichneumon montanus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 141. d, 9.

Patrocloides montanus occidentalis Heinrich, 1962. Canad. Ent. Sup. 26: 517. 9. N. syn.

perluctuosus (Provancher). Newfoundland (insular), w. to B. C., s. to Mass. and Mich. Host: Syngrapha epigaea (Grt.), S. selecta (Wlk.).

Amblyteles perluctuosus Provancher, 1877. Nat. Canad. 9: 10. " δ " = \circ .

wallevi (Heinrich), Que., Ont., Wis., N. W. T., Alta.

Patroclus walleyi Heinrich, 1956. Canad. Ent. 88: 486. 8, 9.

Genus PATROCLUS Cresson

Patroclus Cresson, 1873. Acad. Nat. Sci. Phila., Proc. 25: 104.

Type-species: Patroclus nigrocaeruleus Cresson, Desig, by Ashmead, 1900.

Pseudoamblyteles Heinrich, 1926. Deut. Ent. Ztschr. (1926), p. 255.
Type-species: Amblyteles homocerus Wesmael. Monotypic.

Ctenamblyteles Heinrich, 1928. Deut. Ent. Ztschr. (1928), p. 141. Unnecessary n. name for Pseudoamblyteles Heinrich (Pseudoamblyteles not preocc. by Pseudamblyteles Ashmead).

This is a small Neotropic and Holarctic genus.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 263 (syn.).

homocerus homocerus (Wesmael). Que. w. to Alaska, s. to Colo. and Utah; Eurasia. Townes, Momoi, and Townes (1965) recognized P. homocerus karafutonis (Uchida) as a distinct subspecies from Sakhalin.

Amblyteles homocerus Wesmael, 1854. [Brussels] Acad. Roy. de Belg., Bul. 21, Annexe aux Bul. 1853-1854, p. 120. \eth , $\,^{\circ}\!\!\!\!/$.

Taxonomy: Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 455.

Genus PROTOPELMUS Heinrich

Protopelmus Heinrich, 1959. Ent. Soc. Wash., Proc. 61: 200. Type-species: Troqus atrocaeruleus Cresson. Monotypic and orig. desig.

A single species is known.

atrocaeruleus (Cresson). Northeastern Md., Fla., La.; Mexico. Host: Ecpantheria muzina Oberthur, E. scribonia (Stoll).

Troans atrocaeruleus Cresson, 1868, Amer. Ent. Soc., Trans. 2: 92. 9. Trogus atrocoeruleus Dalla Torre, 1902. Cat. Hym., v. 3, p. 1032. Emend.

Genus ORGICHNEUMON Heinrich

Orgichneumon Heinrich, 1961 (1960), Canad. Ent. Sup. 15: 15.

Type-species: Ichneumon calcatorius Thunberg. Monotypic and orig. desig.

This is a small genus of Holarctic and Oriental distribution.

calcatorius (Thunberg), N. S. w. to B. C., s. to S. C., Tex., and Oreg.; Europe. Host: Dasychira grisefacta (Dyar)?, D. plagiata (Wlk.), Orgyia antiqua (L.), O. leucostigma (J. E. S.), O. pseudotsugata McD.

Ichneumon calcatorius Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8:

254; 9: 291. ♀.

Ichneumon otiosus Say, 1829 Contrib, Maclurian Lyceum to Arts and Sci. 1: 69. 9.

Ichneumon infidelis Cresson, 1867. Amer. Ent. Soc., Trans. 1: 296. d.

Ichneumon sylvanus Holmgren, 1880, Ent. Tidskr. 1: 27. 9 (male misdet.).

Ichneumon (Cratichneumon) burkei Viereck, 1910. U. S. Natl. Mus., Proc. 38: 383. d. Ichneumon (Stenichneumon) calcatorius var. nigritarsis Schmiedeknecht, 1928. Opusc.

Ichn., Sup., fasc. 4, p. 219. Syn.? Preocc. by Kriechbaumer, 1889.

Taxonomy: Roman, 1912. Zool. Bidr. Uppsala 1: 240 (syn.). - Heinrich, 1953. Wash. Acad. Sci., Jour. 43: 148. - Heinrich, 1957 (1956). Canad. Ent. 88: 647-648. - Heinrich, 1959. Ent. News 70: 211.

Genus THYRATELES Perkins

Thurateles Perkins, 1953, Brit. Mus. (Nat. Hist.) Ent., Bul. 3: 149.

Type-species: Amblyteles camelinus Wesmael. Monotypic and orig. desig.

This is a small Holarctic genus which is rather arbitrarily separated from Pterocormus.

Taxonomy: Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 263 (syn.). amoenapex Heinrich, N. W. T.

Thurateles amoenapex Heinrich, 1961. Canad. Ent. Sup. 21: 357. 9.

caliginops Heinrich. Que. w. to Minn., s. to W. Va. and Ohio. Host: Vanessa atalanta (L.). Thyrateles caliginops Heinrich, 1961. Canad. Ent. Sup. 21: 351. 8, 9.

camelinops Heinrich. Alta., B. C. Host: Nymphalis milberti (Goed.), Polygonia sp. Thurateles camelinops Heinrich, 1961. Canad. Ent. Sup. 21: 349. 8, 9.

instabilis (Cresson), Maine, N. H., N. Y., N. J., Ont., Ohio, Mich., Ind., S. Dak., Calif. Host: Colias eurytheme Bois., C. philodice Godt., Satyrus sp.

Ichneumon instabilis Cresson, 1867. Amer. Ent. Soc., Trans. 1: 303. 8, 9.

Biology: Dasch, 1971. Ohio Jour. Sci. 71: 278 (hibernation sites). - Heinrich, 1971. Nat. Canad. 98: 973 (hibernation site).

lugubrator (Gravenhorst), N. S. w. to B. C., s. to central Ga., Tex., and Calif.; Hawaii. Host: Cynthia cardui (L.), C. virginiensis (Drury), Nymphalis milberti (Godt.), Polygonia comma (Harris).

Ichneumon lugubrator Gravenhorst, 1807. Vergl. Uebers. Zool. Systeme, p. 256. [male]. Ichneumon rufiventris Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 301. d, 9.

Ichneumon incertus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 180. 9. Preocc. by Sulzer, 1776 and Christ, 1791.

Ichneumon californicus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 180. d.

Ichneumon hunterae Packard, 1881. Boston Soc. Nat. Hist., Proc. 21: 22. 8, 9.

Ichneumon vulviventris (!) Nason, 1905. Ent. News 16: 148. Lapsus for I. rufiventris Brulle.

Taxonomy: Kriechbaumer, 1875. Stettin. Ent. Ztg. 36: 41. —Townes, 1961. Ent. Soc. Wash., Proc. 63: 108, 109, 169-170.

mormonus (Cresson). Que., Ont., Colo., Alta., Utah. Host: Polygonia sp.

Amblyteles mormonus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 190. Q. According to Cresson (1879) the type locality is "Great Salt Lake, Utah."

Ichneumon adjunctus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 29. 9. Cratichneumon pedalis var. varitarsis Viereck, 1902. Ent. News 13: 87. 9.

Taxonomy: Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 355.

procax (Cresson). Ont., Alaska. Host: Nymphalis antiopa (L.).

Ichneumon procax Cresson, 1877. Amer. Ent. Soc., Trans. 6: 170. d.

Amblyteles torontosus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 351. 9.

Genus PTEROCORMUS Foerster

Brachypterus Gravenhorst, 1829. Ichn. Europaea, v. 1, p. 673. Preocc. by Kugelman, 1794.
Type-species: Brachypterus means Gravenhorst. Monotypic. The type-species is regarded as a synonym of P. latrator (Fabricius).

Pterocormus Foerster, 1850. Arch. f. Naturgesch. 16: 71. N. name for Brachypterus Gravenhorst.

Colobacis Cameron, 1900. New Zeal. Inst., Trans. 33: 110.

Type-species: Colobacis forticornis Cameron. Monotypic. The type-species is regarded as a synonym of P. lotatorius (Fabricius).

Tyanites Cameron, 1903. Entomologist 36: 95.

Type-species: Tyanites rufipes Cameron. Monotypic.

Vabsaris Cameron, 1903. Entomologist 36: 96.

Type-species: Vabsaris forticornis Cameron. Monotypic. The type-species is regarded as a synonym of P. rufipes (Cameron).

Euichneumon Berthoumieu, 1904. Gen. Ins., fasc. 18, p. 33.

Type-species: Ichneumon sarcitorius Linnaeus. Desig. by Townes, 1944.

Matsumuraius Ashmead, 1906: U. S. Natl. Mus., Proc. 30: 169.

Type-species: Matsumuraius grandis Ashmead. Monotypic. The type-species is regarded as a subspecies of P. primatorius (Forster).

Coreojoppa Uchida, 1926. Hokkaido Imp. Univ., Faculty Agr., Jour. 18: 63.

Type-species: Coreojoppa flavomaculata Uchida, Monotypic and orig, desig, Bureschias Heinrich, 1936, K. Naturw, Inst. Sofia, Mitt, 9: 82.

Type-species: Bureschias balcanicus Heinrich. Orig. desig. The type-species is

regarded as a synonym of P. tuberosus (Berthomieu).

This is a very large genus with species occurring throughout the Old and New World, but apparently with greater numbers of species in temperate areas.

Taxonomy: Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 263 (syn.). adonis (Viereck). N. Mex.

Cratichneumon adonis Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 77. 8.

alpestriformis (Viereck). Western Alaska.

Ambluteles (Pterocormus) alpestriformis Viereck, 1923. North Amer. Faune 46: 234. 9.

Taxonomy: Heinrich, 1957 (1956), Canad. Ent. 88: 690-691.

amauropus (Heinrich), n. comb. Northern N. W. T.

Ichneumon amauropus Heinrich, 1956. Canad. Ent. 88: 481. 9.

ambulatorius (Fabricius). Newfoundland (nsular) w. to B. C., s. to Ga., Kans., N. Mex., and Oreg. Host: Crymodes devastator (Brace), Faronta diffusa (Wlk.), Luperina stipata (Morr.), Macronoctua onusta Grt., Papaipema circumlucens (Smith), P. nebris (Gn.), Pseudaletia uninuncta (Haw.).

Ichneumon ambulatorius Fabricius, 1775. Systema Ent., p. 329. [female].

Ichneumon multor Harris, 1833. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., p. 587. Nomen nudum; uncertain syn. Ichneumon jucundus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 305. 9. Ichneumon flavizonatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 156. 3.

Ichneumon multor Cresson, 1867. Amer. Ent. Soc., Trans. 1: 299. d.

Taxonomy: Perkins, 1952. Entomologist 85: 66. — Heinrich, 1953. Wash. Acad. Sci., Jour. 43: 149. — Townes, 1961. Ent. Soc. Wash., Proc. 63: 106, 108, 168.

annulatorius (Fabricius). Newfoundland (insular) s. to Va., w. to Iowa.

Ichneumon annulatorius Fabricius, 1775. Systema Ent., p. 330. [male]. Ichneumon funestus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 166. \(\frac{9}{2}\). Ichneumon haesstans Provancher, 1875. Nat. Canad. 7 (1): 24 (key). \(\frac{9}{2}\).

Ichneumon hoesitans(!) Provancher, 1875. Nat. Canad. 7 (3): 80.

Taxonomy: Perkins, 1952. Entomologist 85: 67. —Townes, 1961. Ent. Soc. Wash., Proc. 63: 106, 169.

approximans (Provancher). Ont.

Ichneumon approximans Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 32.

artemis (Viereck). Newfoundland (Labrador), n. Man., Colo., Alta. Cratichneumon artemis Viereck, 1902. Ent. News 13: 87. 9.

atrox (Cresson). Newfoundland (Labrador), Ont., Man., S. Dak., Colo., Alaska, B. C. Ichneumon atrox Cresson, 1877. Amer. Ent. Soc., Trans. 6: 151. \(\frac{9}{2} \).

Ichneumon browniops Heinrich, 1969. Nat. Canad. 96: 950. 9.

byrdiae (Heinrich), n. comb. Northwestern N. W. T., n. Yukon. Host: Gynaephora rossi (Curt.).

Ichneumon burdiae Heinrich. 1956. Canad. Ent. 88: 479. ♂. ♀.

byridops (Heinrich), n. comb. Southern Alaska.

Ichneumon byrdiops Heinrich, 1956. Canad. Ent. 88: 480. 9.

caliginosus (Cresson). Newfoundland (insular), N. W. T., and Alaska, s. to W. Va., Mich., and Colo. Host: Polygonia gracilis (G. and R.), P. interrogationis (F.), P. satyrus (Ed.). Ichneumon caliginosus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 144. 9.

calitergus (Cresson). Que., Maine, Mass., N. Y., Md., W. Va., Ont., Mich.

Ichneumon calitergus Harris, 1835. In Hitchcock, Rpt. Geol. Mineral. Bot. Zool. Mass., Ed. 2, p. 586. Nomen nudum.

Ichneumon calitergus Cresson, 1867. Amer. Ent. Soc., Trans. 1: 299. 9.

canadensis (Cresson). N. S., N. B., Que., Maine, N. H., Ont., Ohio, Mich., Wis., Sask. Host: Ctenucha virginica (Charp.). Heinrich (1959b, 1961) incorrectly used the synonym trizonatus instead of canadensis as the valid name for this species; Heinrich's (1959a) selection of a new lectotype for canadensis (=clasma n. sp., below) did not invalidate the lectotype selected by Cresson (1916) because lack of agreement with the original description is not sufficient proof that the lectotype selected by Cresson was not one of his original syntypes.

Ichneumon canadensis Cresson, 1867. Amer. Ent. Soc., Trans. 1: 308. 9. Inheumon trizonatus Provancher, 1877. Nat. Canad. 9: 8. 8. N. syn. Amblyteles ctenuchae Cushman, 1933. U. S. Natl. Mus., Proc. 82: 3. 9.

Taxonomy: Cresson, 1916. Amer. Ent. Soc., Mem. 1: 23. —Townes, 1944. Amer. Ent. Soc., Mem. 11: 382-383 (syn.). —Heinrich, 1959a, Ent. News 70: 104. —Heinrich, 1959b, Canad. Ent. 91: 806 (syn.). —Heinrich, 1961. Canad. Ent. Sup. 21: 238, 292-293.

canadicola (Heinrich), n. comb. Newfoundland (insular), Que., Maine, Mass., Ont., Ohio, Mich. Ichneumon canadicola Heinrich, 1961. Canad. Ent. Sup. 21: 293. 9.

centrator (Say). Que. w. to B. C., s. to N. C., Mo., and Oreg. Host: Isia isabella (J. E. S.).

Ichneumon centrator Say, 1825. Amer. Ent. 2: 49. 9.

nereni emigrator (Heinrich), n. comb. Newfoundland (insular), P. E. I., Que., Maine, Ont. P. nereni nereni (Thomson) is Eurasian.

Ichneumon nereni emigrator Heinrich, 1961. Canad. Ent. Sup. 21: 289. 3, 9. Ichneumon emigrator Walkenaer, 1802 is apparently a lapsus for I. migrator Fabricius, 1785 and, therefore, would not preoccupy emigrator Heinrich.

nigrotergus (Davis), S. Dak,

Ichneumon nigrotergus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 350. 9.

Taxonomy: Heinrich, 1961. Canad. Ent. Sup. 23: 417.

nigrovariegatus (Provancher). Newfoundland (insular) s. to S. C., w. to Mich.

Ichneumon humilis Provancher, 1875. Nat. Canad. 7 (1): 24 (key); 7 (3): 82. "δ" = 9. Preocc. by Wesmael. 1857.

Phygadeuon nigrovariegatus Provancher, 1875, Nat. Canad. 7 (6): 182. 9.

Ichneumon humillimus Dalla Torre, 1902. Cat. Hym., v. 3, p. 923. N. name for Ichneumon humilis Provancher. Townes (1944) regarded I. humilis as replacing Phygadeuon dorsalis Provancher (formerly a synonym of humilus), but I do not think this view is tenable. I. humilis is the name which had been in use for the species most immediately preceding Dalla Torre's proposal of humillimus; therefore, it is logical to conclude that Dalla Torre proposed humilimus to replace humilis.

Taxonomy: Townes, 1944. Amer. Ent. Soc., Mem. 11: 399-400.

oblitus (Heinrich), n. comb. Que., Maine, N. Y., Ont., Mich., S. Dak.

Ichneumon oblitus oblitus Heinrich, 1961. Canad. Ent. Sup. 21: 234. 8, 9.

Ichneumon oblitus polyglaucos Heinrich, 1961. Canad. Ent. Sup. 21: 236. 8, 9.

Ichneumon rutilus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 169. 9.

Ichneumon scutellatus Provancher, 1875. Nat. Canad. 7 (1): 24 (key); 7 (3): 78. δ (♀ misdet.?). Preoce. by Geoffroy, 1785. Barron (1975) has shown that the specimen selected as lectotype by Gahan and Rohwer (1917) had been erroneously labeled, and Barron selected a valid lectotype.

Taxonomy: Gahan and Rohwer, 1917. Canad. Ent. 49: 432. —Barron, 1975. Nat. Canad. 102: 562.

rutilus transversus Davis. Wyo., Colo., Ida., Oreg.

Hoplismenus transversus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 351. d. Hoplismenus rutilus tenuis Swift, 1946. Ent. Soc. Amer. Ann. 39: 407. 9.

TRIBE ICHNEUMONINI

With exception of the Old-World genus Lymantrichneumon, females of this tribe do not hibernate.

SUBTRIBE ICHNEUMONINA

Genus SYSPASIS Townes

Syspasis Townes, 1965. In Townes, Momoi, and Townes, Amer. Ent. Inst., Mem. 5: 429, 595, 603.

Type-species: Ichneumon scutellator Gravenhorst, Orig. desig.

This is a small Holarctic genus.

tauma (Heinrich). Que., Maine, N. Y., n.w. S. C., Ont., Mich., Minn.; Europe. Host: Tigroides bicolor (Grt.), Paraphia sp.?, Christoneura fiumiferana (Clem.). Coelichneumon tauma Heinrich. 1951. Bonner Zool. Beitr. 2: 253. 9.

Taxonomy: Heinrich, 1953. Wash. Acad. Sci., Jour. 45: 148. —Heinrich, 1969. Nat. Canad. 96: 939-940.

Genus ICHNEUMON Linnaeus

Ichneumon Linnaeus, 1758. Syst. Nat., ed. 10, p. 560.

Type-species: Ichneumon comitator Linnaeus. Desig. by Curtis, 1839.

Coelichneumon Thomson, 1893. Opusc. Ent. 18: 1901.

Type-species: Ichneumon lineator Gravenhorst. Desig. by Ashmead, 1900. The type-species is Gravenhorst's misidentification of I. lineator Fabricius; the latter is a species of Syspasis while I. lineator in the sense of Gravenhorst is regarded as a synonym of I. comitator Linnaeus.

Cyanojoppa Cameron, 1902. Ztschr. System. Hym. Dipt. 2: 398.

Type-species: Cyanojoppa rufo-femorata Cameron. Desig. by Viereck, 1914 from four species included by Cameron, 1903.

Taphanes Cameron, 1903. Entomologist 36: 239. Heinrich (1966) gave Taphanes subgeneric status.

Type-species: Taphanes rufiventris Cameron, Monotypic.

Spilojoppa Cameron, 1904. Entomologist 37: 208.

Type-species: Spilojoppa fulvipes Cameron. Monotypic. The type-species is a synonym of I. fulvimanus Townes, Townes, and Gupta.

Shalisa Cameron, 1904. Ztschr. System. Hym. Dipt. 4: 221.

Type-species: Shalisa fulvipes Cameron. Monotypic. Lodryca Cameron, 1904. Ztschr. System. Hym. Dipt. 4: 223.

Type-species: Lodryca lineaticeps Cameron. Monotypic.

Eugyrus Townes, 1946. Bol. Ent. Venezolana 5: 57.

Type-species: Ichneumon alvarado Cresson. Monotypic and orig. desig.

This is a large genus of Neotropic. Holarctic, and Oriental distribution.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 284-285 (syn.). —Heinrich, 1966. Ent. Tidskr. 87: 188-192.

albicoxa (Heinrich), n. comb. N. Y., N. C., Ont., Mich., Wis.

Coelichneumon albicoxa Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 81. d.

Taxonomy: Heinrich, 1971. Nat. Canad. 98: 964-965 (variation and female description).

walleyi (Heinrich), n. comb. Ont., B. C. Not to be confused with Pterocormus walleyi (Heinrich).

Coelichneumon walleyi Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 77. 3, 9.

Genus COELICHNEUMONOPS Heinrich

Coelichneumonops Heinrich, 1958. Canad. Ent. 90: 739.

Type-species: Coelichneumonops vockerothi Heinrich. Orig. desig.

This is a small genus of Holarctic distribution.

cashmani Heinrich, Northern Yukon.

Coelichneumonops cashmani Heinrich, 1958. Canad. Ent. 90: 740. 9.

occidentalis (Roman). Northern Que., n.e. N. W. T.; Greenland.

Coelichneumon solutus var. occidentalis Roman, 1934. Ann. and Mag. Nat. Hist. (10) 14: 606. &

Taxonomy: Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 85. — Townes, 1961. Ent. Soc. Wash., Proc. 63: 105.

solutus (Holmgren). Northern Que., N. H.; n. Europe.

Ichneumon solutus Holmgren, 1864. Ichn. Suecica, v. 1, p. 145. \(\bar{\chi}\). Coelichneumonops vockerothi Heinrich, 1958. Canad. Ent. 90: 739. \(\delta\), \(\bar{\chi}\).

Taxonomy: Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 83-84.

walkleyae Heinrich. Southwestern B. C. Apparently known only from the holotype which was collected at Vancouver, B. C. on May 1, [19]04 (not 1940).

Coelichneumonops walkleyae Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 85. 9.

Genus PROTICHNEUMON Thomson

Protichneumon Thomson, 1893, Opusc. Ent. 18: 1899.

Type-species: Ichneumon fusorius Linnaeus. Desig. by Ashmead, 1900.

Protichneumon subg. Metopichneumon Uchida, 1935. Insecta Matsumurana 10: 13.

Type-species: Protichneumon (Metopichneumon) superomediae Uchida. Monotypic and orig. desig.

This is a moderate sized Holarctic and Oriental genus which is rather arbitrarily separated from *Ichneumon*. The usual hosts are Sphingidae.

Taxonomy: Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 530-531 (syn.).

effigies Heinrich. Newfoundland (insular) w. to s. B. C., s. to Ga., Miss., Kans., and Colo. Protichneumon effigies Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 26. 3, 9.

Protichneumon sartoris Heinrich, 1971. Nat. Canad. 98: 961. 9. N. syn.; this synonymy is based upon the comparison of 19 females of effigies from throughout much of the range with a female from Ark. identified as sartoris by Mr. Heinrich through comparison with the holotype.

grandis (Brulle). Que. w. to s. B. C., s. to Fla., Kans., N. Mex., and Oreg. Host: Dryocampa rubicunda rubicunda (F). Heinrich (1961) recognized three subspecies, all of which were raised to species status by Heinrich (1971). The specimens in the U. S. Natl. Museum collection show that variation of grandis throughout eastern North America does not permit the recognition of well defined northern and southern subspecies, yet alone species. Specimens also in the U. S. Natl. Museum collection from Colo., N. Mex., Utah, and Oreg. seem to indicate that victoriae Heinrich cannot be recognized as a distinct subspecies either.

Ichneumon grandis Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 300. 9.

Ichneumon ambiguus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 161. d.

Ichneumon regnatrix Cresson, 1864. Ent. Soc. Phila., Proc. 3: 178. 9.

Protichneumon grandis victoriae Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 25. 3, 9. N. syn.

Taxonomy: Heinrich, 1961. Canad. Ent. Sup. 15: 22-26. —Townes, 1961. Ent. Soc. Wash., Proc. 63: 108. —Heinrich, 1962. Canad. Ent. Sup. 29: 862. —Heinrich, 1971. Nat. Canad. 98: 962.

polytropus Heinrich. Southeastern N. C. Ecology: The host pupa from which the holotype was reared was found in a bark crevice on Taxodium distichum. Host: Sphingid. The

species is apparently known only from the holotype, which may not be an entirely normal specimen; it emerged in the laboratory on Jan. 12, 1905 (host pupa collected Nov. 1, 1904) and was apparently killed before it had completely hardened and darkened because the pupal skin had not been completely shed from either antenna.

Protichneumon polytropus Heinrich, 1961 (1960). Canad. Ent. Sup. 15: 22, 27. 5. The variant spelling "polytropos" which appeared on page 22 was rejected in favor of polytropus by Heinrich (1962).

Taxonomy: Heinrich, 1962. Canad. Ent. Sup. 29: 862.

radtkeorum Heinrich, N. Y., Pa., Md., Va., Fla., Kans.

Protichneumon radtkeorum Heinrich, 1971. Nat. Canad. 98: 962. Nomen nudum. Protichneumon radtkeorum Heinrich, 1972. Nat. Canad. 99: 174. 3, 9.

Genus AMBLYJOPPA Cameron

Amblujoppa Cameron, 1902 (Apr.). Entomologist 35: 108.

Type-species: Amblyjoppa rufo-balteata Cameron. Desig. by Viereck, 1914.

Hadrojoppa Cameron, 1902 (Nov.). Ztschr. System. Hym. Dipt. 2: 396.
Type-species: Hadrojoppa annulitarsis Cameron. Monotypic.

Gluptojoppa Cameron, 1906. Entomologist 39: 229.

Type-species: Glyptojoppa sulcata Cameron. Monotypic.

Cnemojoppa Cameron, 1907. Tijdschr. v. Ent. 50: 77. Nomen nudum. Cnemojoppa Heinrich, 1937. Ann. and Mag. Nat. Hist. (10) 20: 261, 277.

Type-species: Amblyjoppa rufipes Cameron. Monotypic and orig. desig.

This is a moderate sized genus of Oriental and Holarctic distribution.

Taxonomy: Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 533 (syn.). magna (Cresson), Nebr., Colo.

Ichneumon magnus Cresson, 1865. Amer. Ent. Soc., Trans. 6: 191. d.

Genus CATADELPHOPS Heinrich

Catadelphops Heinrich, 1962. Canad. Ent. Sup. 29: 863.

Type-species: Trogus buccatus Cresson. Monotypic and orig. desig.

buccatus (Cresson). Idaho, Nev., B. C., Wash., Oreg., Calif.

Trogus buccatus Cresson, 1877. Amer. Ent. Soc., Trans. 6: 199. 9.

Genus NEAMBLYJOPPA Heinrich

Neamblyjoppa Heinrich, 1962. Canad. Ent. Sup. 29: 865.

Type-species: Neamblyjoppa nasuta Heinrich. Monotypic and orig. desig.

nasuta Heinrich. Ariz.

Neamblyjoppa nasuta Heinrich, 1962, Canad. Ent. Sup. 29: 866. 9.

Genus CATADELPHUS Wesmael

Catadelphus Wesmael, 1854. [Brussels] Acad. Roy. de Belg., Bul. 22, App., p. 134.
Type-species: Ichneumon arrogator Fabricius. Monotypic.

This is a small Holarctic genus.

Taxonomy: Heinrich, 1971. Nat. Canad. 98: 967-968.

atrox (Cresson). S. Dak., Kans., Okla., Tex., Wyo., Colo., N. Mex., Alta., Calif. Host:

Proserpinus juanita (Stkr.). Specimens with uniformly infuscated wings have been recorded from all above listed localities except Alta., while specimens with banded wings ("var. marginipennis") are known from "Dakota Territory," Kans., Wyo., N. Mex., and Alta.

Trogus marginipennis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 93. 3. N. syn. Trogus atrox Cresson, 1868. Amer. Ent. Soc., Trans. 2: 93. 9.

ochraceus Heinrich. Okla.

TRIBE TROGUSINI

Revision: Hopper, 1939. Amer. Ent. Soc., Trans. 65: 307-339, 344-345.

SUBTRIBE CALLAJOPPINA

All species are thought to be parasites of Sphingidae.

Taxonomy: Heinrich, 1967. Synopsis and Reclassif. Ichneumoninae Stenopneusticae Africa So. of Sahara, v. 1, p. 230, 233.

Genus GNAMPTOPELTA Hopper

Gnamptopelta Hopper, 1939. Amer. Ent. Soc., Trans. 65: 333.

Type-species: Trogus obsidianator Brulle. Orig. desig.

obsidianator austrina (Cresson). N. C., S. C., Ga., Fla.

Trogus austrinus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 92. 8, 9.

obsidianator obsidianator (Brulle). Que. w. to Man., s. to Ga., s. La., Tex., and N. Mex.

*Trogus obsidianator Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 299. "?" =

5.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 113 (lectotype selection).

Genus CALLAJOPPA Cameron

Callajoppa Cameron, 1903. Entomologist 36: 236.

Type-species: Callajoppa bilineata Cameron. Monotypic. The type-species is regarded as a subspecies of C. cirrogaster (Schrank).

cirrogaster cirrogaster (Schrank). Ont.?; Europe. Townes, Momoi, and Townes (1965) seem to have implied that the two specimens in the Canadian National Collection which are labeled as being collected at Toronto, Ont. by A. Gibson are mislabeled. C. cirrogaster bilineata Cameron occurs in eastern Asia.

Taxonomy: Hopper, 1939. Amer. Ent. Soc., Trans. 65: 331-332. — Heinrich, 1962. Canad. Ent. Sup. 29: 814-815. — Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 539-540.

Genus TRICYPHUS Kriechbaumer

Tricuphus Kriechbaumer, 1898, Ent. Nachr, 24: 4, 30.

Type-species: Tricyphus cuspidiger Kriechbaumer, Desig, by Viereck, 1914.

This small genus is Nearctic and Neotropic.

apicalis (Cresson). Vt. s. to Fla., w. to Mich, and Ill. Host; Sphinx kalmiae J. E. S. Troque apicalis Cresson, 1877, Amer. Ent. Soc., Trans. 6: 197. 9.

ater Hopper, Fla., Ill.

Tricyphus ater Hopper, 1939. Amer. Ent. Soc., Trans. 65: 339. d.

elegans (Cresson). P. E. I. s. to Fla., w. to Kans. Host: Darapsa myron (Cramer). Specimens with banded wings have been treated as subspecifically distinct under the name elegans elegans, but specimens with uniformly infuscated wings have been collected in the following states or provinces where banded winged specimens are also found (in some instances at the same localities): Mass., Conn., N. Y., Pa., D. C., Fla., Ont., and Ill. Trogus elegans Cresson, 1868. Amer. Ent. Soc., Trans. 2: 94. 9.

Tricyphus vulpinus Szepligeti, 1900. Termes. Fuzetek 23: 288. 9. N. syn.

Tricyphus elegans floridanus Heinrich, 1962. Canad. Ent. Sup. 29: 842. J. N. syn.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 113.

Genus TMETOGASTER Hopper

Conocalama subg. Tmetogaster Hopper, 1939, Amer. Ent. Soc., Trans. 65: 321. Type-species: Trogus nubilipennis Haldeman, Monotypic and orig, desig,

Taxonomy: Heinrich, 1962, Canad, Ent. Sup. 29: 836, 861.

nubilipennis (Haldeman). Maine s. to Ga., w. to Ill. Host: Darapsa myron (Cramer), Sphecodina abbottii (Swainson).

Trogus nubilipennis Haldeman, 1846. Acad. Nat. Sci. Phila., Proc. 3, 127. Sex not indicated.

Genus CONOCALAMA Hopper

Conocalama Hopper, 1939. Amer. Ent. Soc., Trans. 65: 319. Type-species: Trogus brullei Cresson. Orig. desig.

This genus is Nearctic and Neotropic.

bolteri (Cresson). N. H., N. Y., Ont., Alta., w. N. W. T., B. C. Trogus Bolteri Cresson, 1868. Amer. Ent. Soc., Trans. 2: 94. d.

brullei (Cresson), N. H. s. to Ga., w. to Mich., Colo., and Tex. Host: Dolba hyloeus (Drury), Manduca sexta (L.), Paonias astylus (Drury).

Trogus Brullei Cresson, 1877, Amer. Ent. Soc., Trans. 6: 196. 8. 9.

canadensis (Provancher). Que. w. to Alta., s. to Ga. and Ill. Host: Paonias myops (J. E. S.). Possibly a color phase of C. brullei according to Heinrich (1962).

Trogus Canadensis Provancher, 1877. Nat. Canad. 9: 2. 9.

Trogus nigrocinctus Hasey, 1925. Ent. News 36: 306. d.

Taxonomy: Heinrich, 1959, Ent. News 70: 206, 207, —Heinrich, 1962, Canad. Ent. Sup. 29: 822-823.

catalinarum Heinrich, Ariz.

Conocalama catalinarum Heinrich, 1957. Canad. Ent. 89: 334. 3.

copei (Cresson). Que., Maine, Pa., W. Va., Ont.

Trogus Copei Cresson, 1868. Amer. Ent. Soc., Trans. 2: 94. d.

Conocalama copei heteropteryx Heinrich, 1962. Canad. Ent. Sup. 29: 822. 8, 9. N. syn. fuscalata Hopper. N. Y., Pa., Ont.

Conocalama (Conocalama) fuscalata Hopper, 1939. Amer. Ent. Soc., Trans. 65: 330. 8, 9.

manitobae Heinrich. Southern Man.

Conocalama manitobae Heinrich, 1962. Canad. Ent. Sup. 29: 834. d.

occidentalis (Cresson). "Dakota Territory," Mont., Colo., s.e. Alaska, B. C., Oreg., Calif. Host: Smerinthus cerisyi Kby.

Trogus occidentalis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 92. 3.

Conocalama (Conocalama) occidentalis var. luteata Hopper, 1939. Amer. Ent. Soc., Trans. 65: 326. ♂, ♀.

Conocalama orientalis (!) Heinrich, 1962. Canad. Ent. Sup. 29: 818 (key). Lapsus for occidentalis.

quebecensis (Provancher), N. S., Que., Maine, Ont., Minn., Man., Alta., B. C., Oreg. Host: Eacles imperalis imperalis (Drury).

Trogus Quebecensis Provancher, 1874, Nat. Canad. 6: 335. 9.

rileyi (Cresson). Ill., S. Dak., Nebr., Kans., Colo., N. Mex. Heinrich (1962) and Walkley (1967) recognized two subspecies, and incorrectly gave species status to the junior synonym T. mellosus Cresson.

Trogus Rileyi Cresson, 1868. Amer. Ent. Soc., Trans. 2: 95. 9. An unlabeled specimen in the U.S. Natl. Museum collection appears to be the holotype.

Trogus mellosus Cresson, 1876 (1875). In Wheeler, Rept. Geog. and Geol. Explor. and Surveys W. of Hundredth Merid., v. 5 (zool.), p. 708. "3" = 9. N. syn.

Taxonomy: Heinrich, 1962. Canad. Ent. Sup. 29: 829-830. - Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 2, p. 169-170.

violipennis Hopper, Calif.

Conocalama (Conacalama) violipennis Hopper, 1939. Amer. Ent. Soc., Trans. 65: 327. 8,

SUBTRIBE TROGUSINA

Genus MACROJOPPA Kriechhaumer

Macrojoppa Kriechbaumer, 1898. Ent. Nachr. 24: 21.

Type-species: Trogus blandita Cresson. Desig. by Ashmead, 1900.

Aglaojoppidea Viereck, 1913. U. S. Natl. Mus., Proc. 46: 368.

Type-species: Trogus fascipennis Cresson. Orig. desig.

This genus is mostly Neotropic, with one Nearctic species.

Taxonomy: Heinrich, 1962. Canad. Ent. Sup. 29: 845-846. - Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 275 (syn.).

fascipennis (Cresson), Tex.

Trooms fascipennis Cresson, 1877. Amer. Ent. Soc., Trans. 6: 196. 9.

Trogus fasciipennis Dalla Torre, 1902. Cat. Hym., v. 3, p. 1033. Emend.

Genus TROGUS Panzer

Trogus Panzer, 1806, Krit, Rev. Insektenf, Deutschlands, v. 2, p. 80. Type-species: Ichneumon coerulator Fabricius. Monotypic.

Dinotomus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 188.

Type-species: Ichneumon lapidator Fabricius. Desig. by Ashmead, 1900 from three species included by Berthoumieu, 1896.

This genus is Neotropic, and Oriental.

edwardsii Cresson. Mont., Idaho, s. B. C., Wash. Host: Papilio eurymedon Lucas. A specimen in the U. S. Natl. Museum collection appearing to be intermediate between edwardsii and pennator (Fabricius) indicates that edwardsii is probably a subspecies or possibly only a color phase of the partially sympatric pennator.

Trogus Edwardsii Cresson, 1877. Amer. Ent. Soc., Trans. 6: 195. S. Trogus Fletcherii Harrington, 1894. Canad. Ent. 26: 245. "?" = 3.

flavipennis Cresson, Colo., N. Mex., Utah., Ariz.

Trogus flavipennis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 287. d.

lapidator brevicaudae Heinrich. Southern Newfoundland (insular). Host: Papilio brevicauda Sdrs. Doubtfully distinct from lapidator panzeri Carlson.

Trogus lapidator brevicandae Heinrich, 1976 (1975). Nat. Canad. 102: 755. ∂, ♀.

lapidator panzeri Carlson, Yukon; n. Eurasia, Host: Papilio machaon L. T. lapidator lapidator (Fabricius) occurs in southern Europe and North Africa.

Ichneumon coerulator Fabricius, 1804. Systema Piezatorum, p. 68. 3. Preocc. by Weber, 1795. When I proposed the replacement name T. lapidator panzeri, I stated that I. coerulator Fabricius, 1804 was preocc. by Fabricius, 1796, but I have since discovered that Weber (1795) preceded Fabricius (1796) in validating coerulator as an unnecessary replacement name for I. lapidator Fabricius, 1787 (instead of 1793).

Trogus panzeri Carlson, 1975. Ent. Soc. Wash., Proc 77: 305. N. name for I. coerulator Fabricius.

Taxonomy: Weber, 1795. Nomencl. Ent. Secundum Ent. System. Fabricii, p. 73. — Fabricius, 1796. Ent. System., Index Alphabeticus, p. 83, 84.

pennator (Fabricius). Que. w. to Wash., s. to Fla., Kans., Nev., and Calif. Host: Papilio brevicauda Sdrs., P. eurymedon Lucas, P. glaucus L., Papilio polyzenes asterius Stoll, P. rutulus Lucas, P. troilus L., P. zelicaon Lucas, Graphium marcellus (Cramer). Ichneumon pennator Fabricius, 1793. Ent. System., v. 2, p. 155. [female].

Trogus vulpinus Gravenhorst, 1829. Ichn. Europaea, v. 2, 1. 55, [female].

Trogus vulpinus Gravenhorst, 1829. Ichn. Europaea, v. 2, 1. 55, [female].

Trogus exesorius Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 298. 6, 9.

Ichneumon asteriae Jaeger, 1859. Life of No. Amer. Insects, p. 240. Sex not indicated.

Macrojoppa californica Cameron, 1911. Soc. Ent. 26: 35. Sex not indicated.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 109, 110, 113.

pennator var. fulvipes Cresson, n. status. Newfoundland (insular), Que., Maine, N. H., Vt., Mass., N. Y., Ont., Mich., Man., Sask., Colo., B. C., Oreg. Host: Papilio brevicauda Sdrs., P. glaucus L., P. eurpmedon Lucas. Because fulvipes appears to be a color phase (sympatric) rather than a subspecies of pennator, I have chosen to treat it as a "variety." Heinrich (1962) does not seem to have been objective in arguing that fulvipes is a species distinct from pennator. In collecting "dozens of specimens" of pennator and fulvipes in Maine he claimed to have seen only one "looking like an intergrade." He said "I would guess that the specimen is an erythristic fulvipes rather than a melanistic pennator; both types of variation are to be expected anyway, and would create the impression of intergrades without actually being such." In the U. S. Natl. Museum collection there are only five fulvipes specimens, while there are six (from Maine, Vt., Mass., Pa., and Wash.) which impress me as being intergrades between pennator and var. fulvipes.

Trogus fulvipes Cresson, 1868. Amer. Ent. Soc., Trans. 2: 93. $\delta.$ Trogus apicatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 352. $\delta.$

Taxonomy: Heinrich, 1962. Canad. Ent. Sup. 29: 849-850.

TRIBE JOPPOCRYPTINI

Genus PLAGIOTRYPES Ashmead

Plagiotrypes Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 20.
Type-species: Ichneumon concinuus Say. Monotypic and orig. desig.
Neopyga Heinrich, 1930. Zool. Mus. Berlin, Mitt. 15: 545.
Type-species: Neopyga armata Heinrich. Desig, by Townes, 1944.

This small genus is Neotropic and Nearctic.

concinnus (Say). Southern N. H. s. to Fla., w. to Ill. and Tex.

Ichneumon conciunus Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 68. \$\partial \text{(not second female described).}

Taxonomy: Cresson, 1877. Amer. Ent. Soc., Trans. 6: 194. — Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 164.

Genus NARTHECURA Townes

Narthecura Townes, 1946. Bol. Ent. Venezolana 5: 50. Type-species: Hoplismenus munitus Cresson. Orig. desig. This is a moderate sized Neotropic and Nearctic genus.

invadens Heinrich. N. Mex., Ariz.

Northecura invadens Heinrich, 1962. Canad. Ent. Sup. 27: 682. 8, 9.

Genus LOBAEGIS Townes

Lobaegis Townes, 1946. Bol. Ent. Venezolana 5: 54.

Type-species: Ichneumon maritus Cresson, Orig. desig.

This is apparently a moderate sized Neotropic and Nearctic genus.

septentrionalis Heinrich. N. Y., Md., W. Va., S. C., Tenn., Ala.

Lobaegis septentrionalis Heinrich, 1962. Canad. Ent. Sup. 27: 684. 3, 9.

Genus PSEUDOPLATYLABUS Smits van Burgst

Pseudoplatylabus Smits van Burgst, 1920. Ent. Ber. 5: 282.

Type-species: Pseudoplatylabus caudatus Smits van Burgst. Monotypic.

This is a small Holarctic and Oriental genus.

townesi Heinrich. R. I., N. Y., Md.

Pseudoplatylabus townesi Heinrich, 1962. Canad. Ent. Sup. 27: 686. 8, 9.

violentus (Gravenhorst). Mich.; Europe.

Ichneumon violentus Gravenhorst, 1829. Ichn. Europea, v. 1, p. 613. [male].

Hoplismenus infaustus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 110. ♂. ♀.

Pseudoplatylabus caudatus Smits van Burgst, 1920. Ent. Ber. 5: 282. 9.

TRIBE LISTRODROMINI

SUBTRIBE LISTRODROMINA

Species of Trogomorpha apparently parasitize Hesperiidae, but the normal hosts for other genera in this subtribe are Lycaenidae.

Genus TROGOMORPHA Ashmead

Trogomorpha Ashmead, 1900, U. S. Natl. Mus., Proc. 23: 15.

Type-species: Ichneumon trogiformis Cresson. Monotypic and orig. desig.

This is a small Neotropic and Nearctic genus.

arrogans (Cresson). Southern Texas; Mexico, Honduras, El Salvador, Costa Rica, Panama, Colombia, Peru. Probably only a subspecies of *T. trogiformis* (Cresson). Ichneumon arrogans Cresson, 1873. Acad. Nat. Sci. Phila, Proc. 25: 115. d, §.

Ichneumon panamensis Cameron, 1885. Biol. Cent.-Amer., Hym., v. 1, p. 158. d.

trogiformis (Cresson). Central N. Y., s. Ohio, and Mo. s. to Fla. and Tex.; Puerto Rico. Host: Ephyriades brunnea floridensis (B. and C.).

Ichneumon ferrugator Fabricius, 1793. Ent. System., v. 2, p. 154. Sex not indicated. Preocc. by Swederus, 1787. Townes (1961) apparently was unable to locate any type specimen and accepted Brulle (1846) as the first revisor of this name.

Ichneumon trogiformis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 175. d.

Taxonomy: Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 295. —Townes, 1961. Ent. Soc. Wash., Proc. 63: 107.

Genus NEOTYPUS Foerster

Neotypus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 194.

Type-species: Ichneumon lapidator Fabricius, 1793 (not 1787). Desig. by Ashmead, 1900 from two species included by Holmgren, 1871. The type-species is regarded as a synonym of N. coreensis Uchida.

Cillimus Tosquinet, 1896. Soc. Ent. de Belg., Mem. 5: 122.

Type-species: Cillimus adornatus Tosquinet. Desig. by Ashmead, 1900.

This is a small Palearctic, Oriental, and Ethiopian genus.

nobilitator nobilitator (Gravenhorst). Conn., N. J., Md., D. C., Va., Ohio, Ill., Mo., Wyo., Alta., Oreg.; Europe. Adventive. Host: Everes comyntas (Godt.). N. nobilitator orientalis Ilchida occurs in eastern Asia.

Ichneumon nobilitator Gravenhorst, 1807. Vergl. Uebers. Zool. Systeme, p. 235. 9. Neotypus gwericanus Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23): 1. 8.

Taxonomy: Heinrich, 1933. Zool. Mus. Berlin, Mitt. 19: 155, 157.

Genus ANISOBAS Wesmael

Anisobas Wesmael, 1845 (1844). [Brussels] Acad. Roy de Belg., Nouveaux Mem. 18: 145.

Type-species: Ichneumon cingulatorius Gravenhorst. Desig. by Ashmead, 1900.

Lucaeninhios Heinrich. 1933. Zool. Mus. Berlin. Mitt. 19: 158.

Type-species: Anisobas cephalotes Kriechbaumer. Monotypic and orig. desig.

This is a small Holarctic and Oriental genus.

angustior Heinrich, Newfoundland (insular), w. Tenn.

Anisobas angustior Heinrich, 1976 (1975). Nat. Canad. 102: 780. 9.

bicolor Cushman. Idaho, Utah, Nev., Ariz., B. C., Wash., Oreg., Calif. Host: Strymon adenostomatis (Hv. Edw.).

Anisobas bicolor bicolor Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23): 2. 8, 9.

bicolor boreoaustralis Heinrich, Newfoundland (insular).

Anisobas bicolor boreogustralis Heinrich, 1976 (1975), Nat. Canad. 102; 780. 9.

coloradensis (Cresson). S. Dak., Colo., Idaho, Ariz.

Ambluteles coloradensis Cresson, 1877, Amer. Ent. Soc., Trans. 6: 193. 9.

luzernensis (Bradley). Que., Maine, N. Y., Pa., Ont., Mich. Host: Limacodid.

Platylabus luzernensis Bradley, 1903. Canad. Ent. 35: 282. Q. Anisobas nearcticus Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23): 2. Q.

separatus (Davis), Ill., Tex., Ariz.

Eurylabus separatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 353. "\delta" = \cap \tau.

texensis (Ashmead). Conn., Man., Nebr., Tex. Host: Incisalia niphon (Hbn.), Strymon falacer (Godt.).

Cryptus texensis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 410. "δ" = ♀.

Taxonomy: Townes and Townes, 1951. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2: 282 (syn.). — Heinrich, 1962. Canad. Ent. Sup. 27: 694-695.

Genus DIACANTHARIUS Schmiedeknecht

Diacantharius Schmiedeknecht, 1902. Opusc. Ichn., v. 1, p. 20.

Type-species: Diacantharius elegans Schmiedeknecht. Monotypic.

Lausoba Cameron, 1910 (1909). Amer. Ent. Soc., Trans. 35: 438.

Type-species: Lausoba forticeps Cameron. Monotypic. Oedicephalopsis Heinrich, 1930. Zool. Mus. Berlin, Mitt. 15: 548.

Type-species: Oedicephalopsis peruensis Heinrich. Monotypic.

An undescribed species occurs in southern Texas. It has been reared from Strymon melinus melinus (Hbn.).

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 272 (syn.).

Genus DILOPHARIUS Townes

Dilopharius Townes, 1966. In Townes and Townes, Amer. Ent. Inst., Mem. 8: 332.

Type-species: Hoplismenus otomitus Cresson. Monotypic and orig. desig.

An undescribed species occurs in southern Texas.

TRIBE PLATYLABINI

The members of this tribe are principally parasites of Geometridae.

542

Genus APAELETICUS Wesmael

Apaeleticus Wesmael, 1845 (1844). [Brussels] Acad. Roy. de Belg., Nouveaux Mem. 18: 166. Type-species: Apaeleticus bellicosus Wesmael. Desig. by Ashmead, 1900.

americanus Cushman. Maine, Md., D. C., Alta.?, Ariz.

Apaeleticus americanus Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23): 4. 9.

brunnescens Heinrich. Maine, Mich.

Apaeleticus brunnescens Heinrich, 1962. Canad. Ent. Sup. 27: 793. 8, 9.

Genus CARLSONIA Heinrich

Carlsonia Heinrich, 1971. Nat. Canad. 100: 461.

Type-species: Linyous perturbator Heinrich. Monotypic and orig. desig.

perturbator (Heinrich). Maine, Mich. Known from two males from Maine and one female from Mich.; the latter was collected with a Malaise trap situated at the edge of a rather large area of muskeg which then was rather dry.

Lingua perturbator Heinrich, 1971. Nat. Canad. 98: 1022. 3.

Genus LINYCUS Cameron

Linycus Cameron, 1903. Entomologist 36: 234.

Type-species: Linycus rufipes Cameron, Monotypic. Erythroischnus Cameron, 1904. Amer. Ent. Soc., Trans. 30: 252.

Type-species: Erythroischnus annulicornis Cameron. Monotypic.

This small genus is Neotropic, Holarctic, and Oriental.

barbarae Heinrich. Newfoundland (insular). Known from a single specimen. Heinrich made no direct comparison with the male specimens of Carlsonia perturbator (Heinrich) in his collection (holotype and paratype); his descriptions of the males of the two species seem to differ with respect to the tyloids. If the species actually differ, it remains to be determined whether the female presumed by Heinrich to be that of Carlsonia perturbator may not actually be that of Lingcus barbarae.

Linycus barbarae Heinrich, 1976 (1975). Nat. Canad. 102: 779. 3.

exhortator montanus Heinrich. Colo. L. exhortator exhortator (Fabricius) is Eurasian. Linycus exhortator montanus Heinrich, 1962. Canad. Ent. Sup. 27: 781. δ.

exhortator thoracicus (Cresson). Maine s. to Va., w. to Wis. and Mo.

Hoplismenus thoracicus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 288. "∂" = ♀.

nigrices Heinrich. Ariz., Alaska, B. C., Wash., Oreg. Males with the thorax extensively or completely black are known from Alpine, Ariz. (types of syn. arizonensis), Palmer, Alaska (types of syn. niapr.), and Juneau, Alaska.

Linycus nigriceps nigriceps Heinrich, 1962. Canad. Ent. Sup. 27: 782. 3, 9.

Lingcus nigriceps arizonensis Heinrich, 1962. Canad. Ent. Sup. 27: 782. &. N. syn. Lingcus nigriceps alaskae Heinrich, 1962. Canad. Ent. Sup. 27: 782. &, Q. N. syn.

Linycus nigriceps niger Heinrich, 1962. Canad. Ent. Sup. 27: 783. S. N. syn.

temporalis Heinrich, Maine,

Linucus temporalis Heinrich, 1971. Nat. Canad. 98: 1024. d.

Genus NEOLINYCUS Heinrich

Neolinycus Heinrich, 1971. Nat. Canad. 98: 1025.

Type-species: Neolinycus michaelis Heinrich. Monotypic and orig. desig.

michaelis Heinrich. Central Ga., n. Miss., La.

Neolinucus michaelis Heinrich, 1971, Nat. Canad. 98: 1025, 9.

Neolinycus michaelis georgianus Heinrich, 1972. Nat. Canad. 99: 210. 9. N. syn.

Genus CYCLOLABUS Heinrich

Cyclolabus Heinrich, 1936 (1935). Deut. Ent. Ztschr., p. 198.
Type-species: Platylabus nigricollis Wesmael. Orig. desig.

This is a moderate sized genus of Holarctic and Oriental distribution.

albicinctus Heinrich. Newfoundland (insular), N. S. Host: Acasis viridata (Pack.). Cyclolabus albicinctus Heinrich, 1962. Canad. Ent. Sup. 27: 771. δ , φ .

arizonae Heinrich. Ariz.

Cyclolabus arizonae Heinrich, 1962. Canad. Ent. Sup. 27: 765. 8, 9.

carolinensis Heinrich. Northwestern S. C., Mich.

Cuclolabus carolinensis Heinrich, 1962, Canad. Ent. Sup. 27: 764. 9.

dubiosus Perkins. Newfoundland (insular), N. S., Mich., Man., Colo., Alta., B. C., Wash., Calif.; Europe. Host: Eupithecia annulata (Hulst), E. filmata Pear., E. luteata Pack., E. palpata Pack. This species has been confused with C. pactor (Wesmael), which is not known to occur in the Nearetic region.

Cyclolabus dubiosus Perkins, 1953. Brit. Mus. (Nat. Hist.) Ent., Bul. 3: 156. 8, 9.

gibsonatae Heinrich, Ont., B. C. Host: Eupithecia gibsonata Taylor.

Cuclolobus gibsonatae Heinrich, 1962, Canad. Ent. Sup. 27: 764.

gracilicornis gracilicornis Provancher. Newfoundland (Labrador and insular), Que., Maine, N. H., N. Y., N. C., Ont., Mich.

Phygadeuon gracilicornis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 56.

gracilicornis subdentatus (Ashmead). Colo., Idaho, Alaska, B. C., Wash., Oreg., Calif.

Probolus subdentatus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 160. 3.

Taxonomy: Heinrich, 1959, Ent. News 70: 216.

impressus impressus (Provancher). Newfoundland (insular), Que., Maine, N. H., Mass., N. Y., Ont., Mich.

Phygadeuon impressus Provancher, 1874. Nat. Canad. 6: 281. 9.

Chorinaeus labiosus Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 17: 32. ♀.

longicalcar Thomson. Que. w. to B. C., s. to N. C., s. Wis., and Calif.; Eurasia. Host: Caripeta angustiorata Wlk.?, C. divisata Wlk., Hypagrytis piniata (Pack.), Protoboarmia porcelaria (Gn.), Semiothisa "granitata" auct., Choristoneura fumiferana (Clem.). Specimens with black hind femora (sometimes all femora black) are known from Que., Ont., Mich., Wash. Oreg., and Calif. The correct name for this species may be subcarinatus Holmgren. Roman (1925) suppressed longicalcar as a synonym of subcarinatus; he stated that Holmgren's type was lost, but that it appeared certain from the description that Holmgren's "male" of subcarinatus was a longicalcar female. It seems quite likely that Roman was correct, and I was prepared to accept Roman as first revisor. However, Dr. J.-P. Aeschlimann pointed out to me (personal commun., August, 1976) that Holmgren (1873) had in fact been first revisor and had suppressed subcarinatus as a synonym of C. cristator (Gravenhorst). A search is to be made for the subcarinatus type in places to which Holmgren is known to have sent material; if it is not found, and if no specimens of cristator having a black face are found, longicalcar must be suppressed as a synonym of subcarinatus.

Genus TRICLISTUS Foerster

Triclistus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 161.

Type-species: Exochus podagricus Gravenhorst. Desig. by Morley, 1913 from five species included by Holmgren, 1873.

This is a large genus of worldwide distribution. Some species are often abundant. The interspecific differences are often somewhat obscure, and the males of some species cannot be distinguished.

Revision: Kusigemati, 1971. Kagoshima Univ., Faculty Agr., Mem. 8: 228-240 (Japanese spp.).

Truphon! trifasciatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 276. d.

Genus PERIOPE Haliday

Periope Haliday, 1838. Ann. Nat. Hist. 2: 114.

Type-species: Periope auscultator Haliday. Monotypic.

Monoplectron Holmgren, 1856 (1854), Svenska Vetensk,-Akad. Handl. 75: 81.

Type-species: Monoplectron zygaenator Holmgren. Monotypic. The type-species is regarded as a synonym of P. auscultator Haliday.
Oligoplectron Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 161, 218, 219.

Unnecessary n. name for Periope Haliday. The variant spelling Oligoplectrum appeared on p. 218.

Monoplectrochus Heinrich, 1949. Muenchen. Ent. Gesell., Mitt. 35-39: 109.

Type-species: Monoplectrochus hoerhammeri Heinrich. Monotypic and orig. desig.

This is a small Holarctic genus.

aethiops (Cresson), Que. w. to e. Alta., s. to n.w. S. C. and e. Nebr. Ecology: Occurs in late summer and early fall and is often found on flowers of Aster.

Tryphon aethiops Cresson, 1868. Amer. Ent. Soc., Trans. 2: 106. 9.

Choringeus pulchripes Provancher, 1883. Nat. Canad. 14: 12. 9.

Genus SPUDAEUS Gistel

Trachyderma Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 283. Preocc. by Latreille, 1829 (April).

Type-species: Trachyderma scabra Gravenhorst. Monotypic.

Spudaeus Gistel, 1848. Naturgesch. Thierr. f. Hoeh. Schul., p. xi. N. name for Trachyderma Gravenhorst.

Tylocomnus Holmgren, 1873. Svenska Vetensk.-Akad., Ofvers. af ... Forh. 30 (4): 76 N. name for Trachyderma Gravenhorst.

This is a small Holarctic genus.

indigus (Davis), N. S. w. to B. C., s. to N. H., Mich., and Colo.

Tylecomnus (!) indigus Davis, 1897. Amer. Ent. Soc., Trans. 24: 204. 8, 9.

556

scaber umbrosus (Davis). Southern Alta. s. to Ariz., w. to s. B. C. and Calif. S. scaber scaber (Gravenhorst) is European.

Tulecomnus (!) umbrosus Davis, 1897, Amer. Ent. Soc., Trans. 24: 203. 9.

Genus BOTHROMUS Townes

Bothromus Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 142. Type-species: Tylecomnus (!) minoris Davis. Orig. desig.

This is a small Nearctic genus.

Revision: Walley, 1966, Canad. Ent. 98: 1272-1275.

bicolor Walley, Que., S. Dak., Alta., B. C., Wash.

Bothromus bicolor Walley, 1966. Canad. Ent. 98: 1273. 9.

cruralis Townes, Northeastern Calif.

Bothromus minoris cruralis Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 144. $\,$ $\,$ $\,$

gibbus Townes. Ont., w. Colo., Alta., B. C. Host: Enpithecia ravocostaliata Pack. on willow, geometrid on willow.

Bothromus gibbus Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 145. δ , φ .

minoris (Davis). Que., Maine, N. H., N. Y., Ont., Mich., Sask.?, s. B. C. Host: Eupithecia sp. on Ceanothus sanguineus, E. castigata Hbn.? on Betula papprifera, geometrid on Alnus. Tylecomnus (!) minoris Davis, 1897. Amer. Ent. Soc., Trans. 24: 204. ?

Genus APOLOPHUS Townes

Apolophus Townes, 1971. Amer. Ent. Inst., Mem. 17: 111.

Type-species: Apolophus borealis Townes. Monotypic and orig. desig.

This is a small Neotropic and Holarctic genus.

borealis Townes. Northern Mich., w. Oreg., n.w. Calif.; Germany.

Apolophus borealis Townes, 1971. Amer. Ent. Inst., Mem. 17: 112. 9.

Genus LEURUS Townes

Leurus Townes, 1946, Bol. Ent. Venezolana 5: 59.

Type-species: Exochus caeruliventris Cresson. Monotypic and orig. desig.

This is a small Neotropic and Nearctic genus. I have seen an undescribed species from eastern N. C.; hopefully, it will soon be described by Mr. T. P. Nuhn.

caeruliventris borealis Townes. Southeastern Mass. s. to Fla., w. to s. Mich., e. Kans. and La. Host: Desmia funeralis (Hbn.). L. caeruliventris caeruliventris is Neotropic.

Leurus caeruliventris borealis Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 149. δ , \circ .

Genus SETICORNUTA Morley

Megatrema Cameron, 1907. Ztschr. System. Hym. Dipt. 7: 468. Preocc. by Leach, 1825 and Mayr, 1865.

Type-species: Megatrema albopilosa Cameron. Monotypic. Seticornuta Morley, 1913. Fauna Brit. India, Hym., v. 3, pt. 1, p. 310.

Type-species: Seticornuta albicalcar Morley. Monotypic and orig. desig. The type-species is regarded as a synonym of S. albopilosa (Cameron).

This is a small Oriental and Holarctic genus.

apicalis (Cresson). R. I. s. to n. Fla., w. to Wis., Nebr., and Ala. Host: Acrobasis betulella
Hulst, A. caryivorella Rag., A. indigenella (Zell.), A. juglandis (LeB.), A. sylviella Ely.
Exochus apicalis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 285. "3" = 9.

557

terminalis (Ashmead). Que. s. to w. N. C., w. to e. Kans. Host: Tortricid, Nephopteryx virgatella (Clem.) on Robinia pseudoacacia, N. subcaesiella (Clem.).

Triclistus terminalis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 201. d.

Genus CARRIA Schmiedeknecht

Carria Schmiedeknecht, 1924. Ent. Monthly Mag. 60: 112.

Type-species: Carria paradoxa Schmiedeknecht. Monotypic.

This is a small Holarctic and Australian genus.

dreisbachi californica Townes, Northeastern Calif.

Carria dreisbachi californica Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 157. 3, \circ .

dreisbachi dreisbachi Townes. Que. w. to Sask., s. to w. N. C. and Ill.

Carria dreisbachi dreisbachi Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 155. ♂, ♀.

dreisbachi montana Townes. Colo., N. Mex., Ariz., w. Wash.

Carria dreisbachi montana Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 156. δ , \circ .

inculcata Townes. N. J., Md., s.e. N. C., e. S. C.

Carria inculcata Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 158. 3. 9.

Genus MACROMALON Townes

Macromalon Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 118.
Type-species: Macromalon montanum Townes. Monotypic and orig. desig.

Only two species are known; one from India has been reared from Plutella xylostella (L.).

montanum Townes, Colo. Ecology: The type specimens were collected at elevations of 9400, 9500, and 11000 ft. in the Rocky Mountains.

Macromalon montanum Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 159. ♂, ♀.

Genus HYPSICERA Latreille

Hupsicera Latreille, 1829. In Cuvier, Le Regne Anim., ed. 2, v. 5, p. 288.

Type-species: Ichneumon femoralis Gravenhorst. Monotypically included and design by Viereck, 1914. The type-species designation is Gravenhorst's 1820 identification of Ichneumon femoralis Google from

identification of Ichneumon femoralis Geoffroy.

Metacoelus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 161.

Type-species: Exochus femoralis Gravenhorst. Desig. by Viereck, 1914 from four species included by Holmgren, 1873. The type-species designation is Gravenhorst's 1829 identification of Ichneumon femoralis Geoffroy.

Polyclistus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 161.

Type-species: Ichneumon femoralis Geoffroy. Desig. by Viereck, 1912 from three species included by Thomson, 1887.

Plesioexochus Cameron, 1905. So. African Phil. Soc., Trans. 15: 202.
Type-species: Plesioexochus rufipes Cameron. Monotypic.

This large genus is Ethiopian, Oriental, and Holarctic. The largest number of species occur in the tropics of the Old World.

Revision: Kusigemati, 1971. Kagoshima Univ., Faculty Agr., Mem. 8: 253-261 (Japanese spp.). cuneata Townes. Maine, R. I., N. Y., Ont., Ohio, Alta, Ariz., Alaska, Calif.

Hypsicera cuneata cuneata Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 165. 3. 9.

Hypsicera cuneata opaca Townes, 1959. In Townes and Townes, U. S. Natl. Mus. Bul. 216 [pt. 1]: 166. δ , \circ . N. syn.

curvator (Fabricius). N. S. w. to s. B. C., s. to Pa., Colo., and Wash.; Europe. Adventive. Host: Tinea pellionella (L.). Also occurs adventively in the Neotropic region according to Townes and Townes (1959). Only females are known.

Ichneumon curvator Fabricius, 1793. Ent. System., v. 2, p. 177. [female].

Ichneumon mansuetor Gravenhorst, 1807. Vergl. Uebers. Zool. Systeme, p. 254. [female]. Hyperacmus tineae Riley, 1890. U. S. Dept. Agr., Insect Life 2: 213. 9.

Hyperacmus ovatus Davis, 1897, Amer. Ent. Soc., Trans. 24: 218. 9.

Taxonomy: Townes and Townes, 1959. U. S. Natl. Mus. Bul. 216 [pt. 1]: 161, 163-164 (syn. distribution).

femoralis (Geoffroy). Que. w. to Wash., s. to e. N. C., Ark., Kans., and Calif.; Eurasia; S. Africa, Madagascar; Australia; Hawaii; Brazil, Argentina, Chile. Ecology: Often collected on windows in buildings. Adventive. Presumably a parasite of Lepidoptera which feed upon stored products.

Ichneumon femoralis Geoffroy, 1785. In Fourcroy, Ent. Parisiensis, v. 2, p. 396. [female?] Exochus laevis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 286. δ , \circ .

Metacoelus levis Dalla Torre, 1901. Cat. Hym., v. 3, p. 217. Emend.

turgidus Holmgren. Ont., Sask., and Mont. s. to n. Fla., La., N. Mex., and s. Calif.; Eurasia.

Host: Petrova albicapitana (Bsk.), Dioryctria amatella (Hulst), D. auranticella (Grt.), D. disclusa Hein., D. reniculella (Grt.).

Exochus turgidus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 312. 9.

SUBFAMILY BANCHINAE

The distribution of this large subfamily is worldwide. The species are all thought to be internal larval parasites of Lepidoptera.

TRIBE STILBOPINI

This small tribe includes three genera, only one of which is known from the Nearctic region.

Genus STILBOPS Foerster

Stilbops Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 163.

Type-species: Pimpla vetula Gravenhorst. Desig. by Ashmead, 1900 from two species included by Schmiedeknecht, 1888.

Aphanoroptrum Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 168.

Type-species: Lissonota ruficornis Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1877. The type-species is regarded as a synonym of S. abdominalis (Gravenhorst).

Aphanoroptra Thomson, 1877, Opusc, ent. 8: 736, Emend.

Aphanorrhoptrum Dalla Torre, 1901. Cat. Hym., v. 3, p. 528. Emend.

Eritrachynus Schmiedeknecht, 1913. Opusc. Ichn. v. 5, fasc. 24, p. 2709.

Type-species: Eritrachynus asper Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1913 (fasc. 25, p. 2724).

According to Townes (1970) this is a moderate sized genus of Holarctic and Oriental distribution. An undescribed species is known from Maryland. The European S. abdominalis (Gravenhorst) has been reared from the incurvarioid lepidopteran Adela reamurella (L.); its life cycle is apparently analogous to that of pionine Ctenopelmatinae, the egg being deposited inside that of the host and the adult emerging from the host after the latter has spun its cocoon.

Taxonomy: Short, 1957. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 26: 175-176 (final-instar larva). — Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 405-406, 453. — Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 7.

TRIBE GLYPTINI

Ten genera are known. Three occur in the Nearctic region.

Revision: Momoi, 1963. Insecta Matsumurana 25: 98-117 (Japanese spp.).

Genus SPHELODON Townes

Sphelodon Townes, 1966. Amer. Ent. Inst., Mem. 8: 328. Type-species: Glypta phoxopteridis Weed. Orig. desig.

Only three species have been described, but according to Townes this is a moderately large genus. It is principally Neotropic, but two species are Nearctic.

nomene (Davis). N. Y., Colo.

Glypta nomene Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 370. 9.

phoxopteridis (Weed). N. H. w. to B. C., s. to s.e. Ga., Ala., and n. Tex. Host: Ancylis comptana (Froel.), Grapholitha interstinctana (Clem.), G. molesta (Bsk.), Amorbia humerosana Clem., Choristoneura rosaceana (Harris), Platynola flavedana Clem.? on Solanum, P. rostrana (Wlk.), tortricid on Gleditsia, Psilocorsis quercicella Clem., pyralid on ragweed.

Glypta phoxopteridis Weed, 1888. Ent. Amer. 4: 151. 9.

Glypta leucozonata Ashmead, 1890 (1888). U. S. Natl. Mus., Proc. 12: 449. S.

Genus APOPHUA Morley

Apophua Morley, 1913. Fauna Brit. India, Hym., v. 3, pt. 1, p. 213. Type-species: Apophua carinata Morley. Orig. desig.

Although only one Nearctic species is known, this is a fairly large Holarctic, Oriental, and Ethiopian genus.

Taxonomy: Cushman, 1933. Insecta Matsumurana 8: 20-23. —Momoi, 1965. Insecta Matsumurana 28: 80-81.

simplicipes (Cresson). Maine w. to s. B. C., s. to D. C., Tex., Utah, and Wash. Host: Acleris minuta (Rob.), Archips argyrospilus (Wlk.), Choristoneura rosaceana (Harris), Sparganothis putmanana Free., tortricid on Gleditsia, Ancylis comptana (Froel.), Exartema footianum Clem., E. inornatanum Clem., Ennomos subsignarius (Hbn.), Malacosoma americanum (F.), Heterocampa bilineata (Pack.), Symmerista albifrons (J.

E. S.), Zotheca tranquila (Grt.), Hemileuca sp.

Glypta simplicipes Cresson, 1870. Amer. Ent. Soc., Trans. 3: 156. d, 9. Glypta aldrichii Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 370. d, 9. Glypta (Glypta) rosaceanae Viereck, 1926. Canad. Ent. 58: 55. d, 9.

Genus GLYPTA Gravenhorst

Glupta Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 3.

Type-species: Glypta sculpturata Gravenhorst. Desig. by Westwood, 1840.

Conoblasta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 165.

Type-species: Glypta ceratites Gravenhorst. Desig. by Viereck, 1914 from two species included by Woldstedt, 1877.

Diblastomorpha Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 165.

Type-species: Glypia bicornis Desvignes. By subsequent monotypy from inclusion by Woldstedt, 1877. The type-species is homonymous with Glypta bicornis Boie, which is regarded as a senior synonym.

Hemiephialtes Ashmead, 1906. U. S. Natl. Mus., Proc. 30: 177.
Type-species: Hemiephialtes glyptus Ashmead. Monotypic.

Glypta subg. Foveoglypta Hellen, 1915. Soc. pro Fauna et Flora Fenn., Acta 40 (6): 57.

Type-species: Glypta (Foveoglypta) monstrosa Hellen. Monotypic.

This is a very large genus. The greatest number of species is found in the Holarctic region and a few species occur in the Neotropic and Oriental regions. The hosts are larvae of Lepidoptera which conceal themselves when feeding, such as in leaf rolls, buds, cones, stems, etc.

Taxonomy: Momoi, 1965. Insecta Matsumurana 28: 81-82.

albiscutellaris Walsh. Ill.? The holotype was destroyed in the 1871 Chicago fire, and apparently no concerted effort has been made to identify the species since it was described.

Glypta albiscutellaris Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 127. d.

animosa Cresson. Conn. s. to N. C., w. to Mich.

Glypta animosa Cresson, 1870. Amer. Ent. Soc., Trans. 3: 154. 9.

aprilis Viereck, Northeastern Kans.

Glypta aprilis Viereck, 1905. Kans. Acad. Sci., Trans. 19: 316. 9.

areolata Viereck, Northern N. Mex.

Glypta areolata Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 89. 9.

borealis Cresson. "Canada," Colo.

Glupta borealis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 158. d.

brunneisigna Viereck. Northeastern Kans.

Glupta brunneisigna Viereck, 1905. Kans. Acad. Sci., Trans. 19: 316. 9.

californica Provancher, Calif.

Glupta californica Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 117. 9.

canadensis Cresson. Que., Maine, N. H., Vt., N. Y., Pa., Mich.

Genus CEPHALOGLYPTA Obrtel

Cephaloglypta Obrtel, 1956. Zool. Listy 5: 139.

Type-species: Cephaloglypta excavata Obrtel. Monotypic and orig. desig.

This genus is Palearctic; only two species are known.

laricis Momoi. Northern Japan. Introduced in N. B. in 1973; the fact that only 29 adults were released would seem to have precluded establishment. Host: Choristoneura diversana (Hbn.), Ptycholomoides aeriferanus (H.-S.). The target species for the release in N. B. was Choristoneura fumiferana (Clem.).

Cephaloglypta laricis Momoi, 1963. Insecta Matsumurana 25: 104. ∂, ♀.

murinanae (Franz). Europe. Introduced in Ont. in 1950, 1955, and 1956, apparently without becoming established. Host: Choristoneura murinana (Hbn.). The target species for releases in Ont. was Choristoneura fumiferana (Clem.).

Glypta murinanae Franz, 1941. Ztschr. f. Angew. Ent. 27: 594. 8, 9.

Glypta murinanae Bauer, 1942. Mitt. aus der Ent. Gesell. zu Halle 19: 11. ♂, ♀. Preocc. by Franz. 1941; n. syn.

Cephaloglypta excavata Obrtel, 1956. Zool. Listy 5: 140. 8, 9. N. syn.

Biology: Bucher, 1953. Canad. Jour. Agr. Sci. 33: 463. — Franz and Wellenstein, 1958. Ztschr. f. Pflanzenkrank. 65: 21. — Capek, 1961. Ztschr. f. Angew. Ent. 48: 88. — Capek, 1963. Ztschr. f. Angew. Ent. 51: 138. — Zwoelfer, 1963. Ztschr. f. Angew. Ent. 51: 348.

TRIBE LISSONOTANINI

This is a very large tribe. Twenty-six genera were recognized by Townes (1970); ten of them are represented by Nearctic species. The majority of the Nearctic species parasitize larvae of Lepidoptera which conceal themselves when feeding, such as in cones, buds, stems, leaf rolls, etc. Drs. H. K. and M. C. Townes expect to publish a revision of the Nearctic species in 1978.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 17-45 (genera of world).

Genus MNIOES Townes

Mnioes Townes, 1946. Bol. Ent. Venezolana 5: 58.

Type-species: Lampronota jucunda Cresson. Monotypic and orig. desig.

This is a large genus which is restricted to the New World; all but one of the species are Neotropic.

lunatus Kennedy. Md., D. C., Va., e. N. C., S. C., s. Ind., Ky., Tenn., s.e. Okla., Colo. Mnioes lunatus Kennedy, 1966. Mich. Ent. 1: 17. δ , φ .

Genus LISSONOTA Gravenhorst

Lissonota Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 30.

Type-species: Ichneumon setosus Geoffroy. Desig. by Curtis, 1932. Curtis designated I. setosus as the type-species of Lampronota, his replacement name for Lissonota.

Lampronota Curtis, 1832. Brit. Ent., v. 9, pl. 407. Unnecessary n. name for Lissonota Gravenhorst, which is not preocc. by Lissonotus Dalman, 1817.

Stilbonota Stephens, 1835. Illus. Brit. Ent., v. 7, p. 126.

Type-species: Lissonota sulphurifera Gravenhorst. Desig. by Viereck, 1914.

Meniscus Schiodte, 1839. Mag. Zool., Ins. 9: 10

Type-species: Ichneumon catenator Panzer. Desig. by Viereck, 1914.

Asynida Gistel, 1848. Naturgesch. Thierr. f. hoeh. Schul., p. ix. N. name for "Lissonotus Grav[enhorst]."

Bothynophrys Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 166.

Type-species: Ichneumon catenator Panzer. By subsequent monotypy from inclusion by Woldstedt, 1877.

Ensimus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 167. Preocc. by Thomson, 1859.

Type-species: Lissonota dubia Holmgren. Desig. by Viereck, 1914 from four species included by Schmiedeknecht, 1888.

Amersibia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 167, 214, 218. N. name for Meniscus Schiodte.

Bathycetes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 167.

Type-species: Ichneumon catenator Panzer. Monotypically included and desig. by Schmiedeknecht, 1888.

Opisorhussa Kriechbaumer, 1890. Wien. Mus. der Naturgesch., Ann. 5: 488.

Type-species: Opisorhyssa flavopicta Kriechbaumer. Monotypic. The type-species was described from "Amer. Sept. (?)," but is actually not a Nearctic species (personal commun, Dr. H. K. Townes, 1977).

Ctenopimpla Cameron, 1899. Manchester Lit. and Phil. Soc., Mem. and Proc. 43 (3): 189. Preocc. by Kriechbaumer, 1898.

Type-species: Ctenopimpla albomaculata Cameron. Monotypic.

Pimplopterus Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 52.

Type-species: Pimplopterus alaskensis Ashmead. Monotypic and orig. desig. Harrimaniella Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 52. Transfer from synonymy with Cruptopimpla was advised by H. K. Townes (1976, personal communication).

Type-species: Harrimaniella yukakensis Ashmead. Monotypic and orig. desig. Echthrodoca Schmiedeknecht, 1900. Zool. Jahrb., Abt. f. System., Geog., u. Biol. Tiere 13: 328.

Type-species: Lissonota conflagrata Gravenhorst. Desig. by Viereck, 1914.

Anarthronota Schmiedeknecht, 1900. Zool. Jahrb., Abt. f. System., Geog., u. Biol. Tiere 13:
330.

Type-species: Lissonota manca Brauns. Desig. by Viereck, 1914.
Campocineta Schmiedeknecht, 1900. Zool. Jahrb., Abt. f. System., Geog., u. Biol. Tiere 13:

Type-species: Campocineta varicornis Schmiedeknecht, Monotypic, Adelopimpla Schulz, 1906. Spolia Hym., p. 116. N. name for Ctenopimpla Cameron. Stilbopoides Rohwer, 1913. Ent. Soc. Wash, Proc. 15: 183.

Type-species: Stilbopoides maculiventris Rohwer. Orig. desig.

Lophantium Clement, 1925. Konowia 4: 400.

Type-species: Lissonota clypealis Thomson. Orig. desig. Gibbonota Heinrich, 1937. Polskie Pismo Ent. 14-15: 354.

Type-species: Gibbonota duplanae Heinrich. Monotypic and orig. desig.

Lissonotoides Benoit, 1955. Mus. du Congo Belge, Ann. Zool. 38: 29.

Type-species: Lissonotoides pectinatus Benoit. Monotypic and orig. desig.

This is a very large genus. According to Townes (1970) it is best represented in the Holarctic region, but has a nearly worldwide distribution.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 25-27 (new generic synonyms). acrobasidis (Ashmead). Southwestern Ind.

Polysphincta phycitis Riley, 1891. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 464. Nomen nudum.

Eusimus(!) acrobasidis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 212. d. The type-locality is Paxtons, Sullivan Co., Ind. (not "Paxton, Ohio"). aleutiana (Cresson), n. comb. Southwestern Alaska.

Mesoleius? aleutianus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 371. S.

argyresthiae (Walley), n. comb. N. S., N. B., Que., Ont., Wis. Host: $Argyresthia\ laricella\ Kft.$ $Pimplopterus\ argyresthiae\ Walley,\ 1961.\ Canad.\ Ent.\ 93:\ 1.\ \delta,\ \mathcal{S}.$

bibrevicincta (Davis). N. Y., Mich.

Lampronota bibrevicincta Davis, 1895. Amer. Ent. Soc., Trans. 22: 31. 9.

breviventris (Walsh). Ill.? The synonymy and transfer from unplaced species of Ichneumonidae is based upon advice received from Drs. M. C. and H. K. Townes, (personal communications, 1977).

Lampronota pictiventris Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 119. d. Lampronota breviventris Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 120. 9.

brunnea Cresson. Maine w. to Oreg., s. to Va., Kans., and Calif. Host: Achatodes zeae (Harris), Luperina stipata (Morr.), Papaipema cataphracta Grt., P. nebris (Gn.). Lissonota brunnea Cresson, 1868. Canad. Ent. 1: 37. 9.

Nadia apalachia Viereck, 1902, Canad. Ent. 34: 68. 3.

Genus LOXODOCUS Townes

Loxodocus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 27. Type-species: Lampronota pallorana Davis. Orig. desig.

This is a moderate sized genus of Nearctic and Neotropic (Mexico and probably Central America) distribution. Most of the species are Neotropic; at least half of them are undescribed.

palloranus (Davis). Mass., N. J., Pa., N. C.

Lampronota pallorana Davis, 1895. Amer. Ent. Soc., Trans. 22: 31. 9.

Genus ALLOPLASTA Foerster

Alloplasta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 167.

Type-species: Lissonota murina Gravenhorst. By subsequent monotypy from inclusion by Woldstedt, 1877. The type-species is regarded as a synonym of A. piceator piceator (Thunberg).

Asymmictus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 200.

Type-species: Asymmictus iridescens Davis. Desig. by Viereck, 1914 from two species included by Davis, 1898.

Trysicampe Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 207.

Type-species: Ichneumon piceator Thunberg. Monotypically included and desig. by Perkins, 1962.

Trichopimpla Cameron, 1903. Ztschr. System. Hym. Dipt. 3: 303.

Type-species: Trichopimpla pilosa Cameron. Monotypic.

This is a small Holarctic and Oriental genus.

piceator bullata (Davis). Pa., Alta., Mont., Idaho, Wash. A. piceator piceator (Thunberg) is Eurasian. Treatment of bullata as a subspecis of piceator is based upon unpublished information provided by Dr. H. K. Townes.

Lampronota bullata Davis, 1895. Amer. Ent. Soc., Trans. 22: 30. 9.

superba iridescens (Davis). Nev.

Asymmictus iridescens Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 325. "?" = 8.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 29.

superba superba (Provancher). Que., Maine, N. H., Vt., Conn., N. Y., Wis., Tex.?, Sask.?, Colo.? Meniscus superbus Provancher, 1874. Nat. Canad. 6: 30. ♀.

Genus ARENETRA Holmgren

Lasiops Holmgren, 1856 (1854). Svenska Vetensk.-Akad. Handl. 75: 68. Preocc. by Meigen, 1838.

Type-species: Tryphon pilosella Gravenhorst. Monotypic.

Arenetra Holmgren, 1859. Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 16: 127. N. name for Lasiops Holmgren.

This is a moderate sized Holarctic genus. The adults occur in late winter through mid-spring or in mid to late fall.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 310.

canadensis Cresson. Southeastern Ont., Wis., w. Iowa, e. S. Dak., e. Wyo., Colo., N. Mex., s. Idaho, e. Wash.

Arenetra canadensis Cresson, 1868. Canad. Ent. 1: 36. 8.

hirsutula Walley, revised status. Southern Mich., s.e. Minn., s. Sask. Resurrection from synonymy with canadensis based upon unpublished information provided by Dr. H. K. Townes.

Arenetra hirsutula Walley, 1931. Canad. Ent. 63: 169. d.

leucotaenia Viereck, revised status. Mass., N. Y., Md., D. C., n. Va., n.e. Kans. Resurrection from synonymy with nigrita based upon unpublished information provided by Dr. H. K. Townes.

Arenetra leucotaenia Viereck, 1905. Kans. Acad. Sci., Trans. 19: 318. 9.

nigrita Cresson. N. H., Mass., Conn., N. J., Pa., n. Va., s. Wis., n. Miss., Iowa, e. S. Dak. Arenetra nigrita Cresson, 1870. Amer. Ent. Soc., Trans. 3: 159. 3, 9.

pallipes Harrington, revised status. Southeastern and n. Idaho, s.w. B. C., e. Wash., w. Oreg. Resurrection from synonymy with nigrita based upon unpublished information provided by Dr. H. K. Townes.

Arenetra pallipes Harrington, 1894. Canad. Ent. 26: 250. d.

Arenetra pallidipes Dalla Torre, 1901. Cat. Hym., v. 3, p. 313. Unjustified emend.

rufipes Cresson, revised status. Que. w. to Alaska, s to s.e. N. Y., S. Dak., N. Mex., s. Idaho, and s. Oreg. Host: Επεσα sp. Resurrection from synonym with nigrita based upon unpublished information provided by Dr. H. K. Townes.

Arenetra rufipes Cresson, 1870. Amer. Ent. Soc., Trans. 3: 159. 9.

Arenetra vernalis Walley, 1931. Canad. Ent. 63: 171. \(\begin{align*} \text{N. N. syn.} \); identification labels of Dr. H. K. Townes on specimens in the U. S. Natl. Museum collection indicate that he will be treating vernalis as a sympatric subspecies of rufipes.

UNPLACED TAXA OF ARENETRA

In the forthcoming revision of Drs. H. K. and M. C. Townes, the names below will presumably be suppressed as synonyms of one or two of the *Arenetra* species listed above (cf. Townes and Townes, 1951).

573

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 310

Arenetra occulta Walley, 1931. Canad. Ent. 63: 170. S. Southwestern B. C. Arenetra ventralis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 160. S. N. Y.

Genus CRYPTOPIMPLA Taschenberg

Cryptopimpla Taschenberg, 1863. Ztschr. f. die Gesam. Naturw. [Halle] 21: 292.

Type-species: Phytodictus blandus Gravenhorst. Desig. by Viereck, 1914.

Aphanodon Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 166.

Type-species: Phytodietus errabundus Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1888.

Xenacis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 167.

Type-species: Lissonata caligata Gravenhorst. By subsequent monotypy from inclusion by Brischke, 1880.

Xenocornia Schmiedeknecht, 1900. Zool. Jahrb., Abt. f. System. 13: 334.
Type-species: Xenocornia solitaria Schmiedeknecht. Monotypic.

Trevoria Ashmead, 1900, U. S. Natl. Mus., Proc. 23: 50.

Type-species: Trevoria yukatatensis Ashmead. Monotypic and orig. desig.

Fintona Cameron, 1909. Bombay Nat. Hist. Soc., Jour. 19: 726.

Type-species: Fintona nigripalpis Cameron. Monotypic.

This is a moderate-sized genus of Holarctic, Oriental, and Ethiopian distribution. It is best represented in the Palearctic Region.

blanda jocosa (Cresson), n. status. Que. s. to W. Va., w. to Ill. C. blanda blanda (Gravenhorst) is European; treatment of jocosa as a subspecies of blanda is based upon unpublished information provided by Dr. H. K. Townes.

Lampronota! jocosa Cresson, 1870. Amer. Ent. Soc., Trans. 3: 162. d.

Lampronota agilis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 164. ♀.

Mesoleptus angustus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 96. 3, 9. Truphon fractus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 101. 3.

Polyblastus decoratus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 107. "2" = 3.

Polyblastus inornatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 108. 9.

genalis obscurella (Cresson), n. status. Que., w. N. C., Wash., Calif. C. genalis genalis (Thomson) is European; treatment of obscurella as a subspecies of genalis is based upon unpublished information provided by Dr. H. K. Townes.

Phytodietus obscurellus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 379. 9.

Aphanodon luctuosus Walley, 1934. Canad. Ent. 66: 237. 8, 9.

pleuralis (Cresson). Que. s. to N. C., w. to Minn., Mo., and Tex. Host: Argyrotaenia velutinana (Wlk.). Generic placement on advise from H. K. Townes (1976, personal commun.).

Lampronota pleuralis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 161. 3, \(\varphi \). Lampronota occidentalis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 161. \(\varphi \).

Lampronota occidentalis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 161. \$\varphi\$ Lampronota insita Cresson, 1870. Amer. Ent. Soc., Trans. 3: 162. \$\varphi\$.

Lampronota pulchella Cresson, 1870. Amer. Ent. Soc., Trans. 3: 162. d.

Lissonota cressoni Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 314. Unnecessarily proposed n. name for Lampronota occidentalis Cresson.

yukatatensis (Ashmead). Southeastern Alaska.

Trevoria yukatatensis Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 50. d. Trevoria yakutatensis(!) Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 198.

Trevoria yakutatensis Cushman, 1942. U. S. Natl. Mus., Proc. 92: 287. Unjustified emend.

Genus ISOMERIS Townes

Isomeris Townes, 1970 (1969), Amer. Ent. Inst., Mem. 13: 35.

Type-species: Lampronota marginata Provancher. Monotypic and orig. desig.

This is a small Neotropic and Nearctic genus.

marginata (Provancher). Que., R. I., N. Y., Pa., Ont., W. Va. Host: Trichotaphe levisella Fyles. Lampronota marginata Provancher, 1873. Nat. Canad. 5: 474. 9.

Genus SYZEUCTUS Foerster

Diceratops Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 167.

Type-species: Pimpla bicornis Gravenhorst. Monotypically included and desig. by Schmiedeknecht, 1888.

Suzeuctus foerster, 1868, Naturh, Ver. Rheinlande, Verh, 25: 167.

Type-species: Ichneumon maculatorius Fabricius. Monotypically included and desig. by Schmiedeknecht, 1888.

Syzeucta Thomson, 1889. Opusc. Ent. 13: 1415. Emend.

Meuva Cameron, 1899, Manchester Lit. and Phil. Soc., Mem. and Proc. 43 (3): 191.

Type-species: Meyva villosa Cameron, Monotypic,

Rhynchotrevoria Cameron, 1906. So. African Mus., Ann. 5: 125.

Type-species: Rhynchotrevoria rostrata Cameron. Monotypic.

Ephialtina Szepligeti, 1908. In Sjostedt, Kilimandjaro-Meru Exped., v. 8, p. 74.

Type-species: Ephialtina apicalis Szepligeti. Monotypic. Leptoglyphis Brethes, 1927. Ent. Mitt. 16: 39.

Type-species: Leptoglyphis minasensis Brethes, Monotypic, Paratanera Rao, 1953. Indian Forest Rec., New Ser., Ent. 8: 171.

Type-species: Paratanera indica Rao, Monotypic and orig. desig.

This is a large genus of Neotropic, Holarctic, Oriental, and Ethiopian distribution, Most of the species are tropical.

comptus (Davis). Que. w. to Iowa, s. to n. Ga. and e. Kans. Meniscus comptus Davis, 1894. Canad. Ent. 26: 322. 9.

elegans (Cresson). Maine s. to Fla., w. to Minn. and Mo. Host: Tetralopha aplastella (Hulst), T. asperatella (Clem.), T. robustella zell.

Meniscus elegans Cresson, 1870, Amer. Ent. Soc., Trans. 3: 165, 8, 9,

Meniscus Slossonae Davis, 1894. Canad. Ent. 26: 322. 9.

epischniae epischniae Cushman. Southern Oreg., n. Calif. Host: Pima granitella (Rag.). Suzeuctus epischniae Cushman, 1926, U. S. Natl. Mus., Proc. 67 (23): 9. 8. 9.

epischniae sigmoidalis Cushman, n. status. Eastern Que. Treatment of sigmoidalis as a subspecies of epischniae is based upon unpublished information supplied by Dr. H. K. Townes.

Syzeuctus sigmoidalis Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23): 8. d. 9.

eximius Walley. Northwestern Iowa, s. Man., Colo., n.e. Oreg., Nev.; Mexico. Syzeuctus eximius Walley, 1934. Canad. Ent. 66: 238. 3, 9.

Genus EUDELEBOEA Lopez Cristobal

Eudeleboea Lopez Cristobal, 1935. La Plata Univ. Nac., Facultad de Agron., Rev. 20: 156. Type-species: Eudeleboea lopezi Lopez Cristobal. Monotypic.

Austrolissonota Blanchard, 1941. Dir. Sanid. Veg., Bol. Informativo 4 (14): 16. Nomen nudum.

This large genus is restricted to the New World. Most of the species are Neotropic.

Taxonomy: Townes, 1970 (1969), Amer. Ent. Inst., Mem. 13: 43-44 (N. Amer. spp. referred to genus).

michiganensis (Davis). Northern Va., n.w. S. C., s. Mich., Mo., n.e. Kans. Host: Stenoma schlaegeri Zell., Psilocorsis reflexella Clem.

Meniscus Michiganensis Davis, 1894. Canad. Ent. 26: 323. 9.

mirabilis (Cresson). Newfoundland (insular) s. to N. C., w. to Mich., e. Kans., and Ariz. Host: Aroga trialbamaculella (Chamb.), Filatima pseudoacaciella (Chamb.)?, tortricid on Murica asplenifolia.

Meniscus mirabilis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 166. 9.

57

Clistopyga pleuralis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 448. 3. Notes on file in the U. S. Natl. Museum indicate that the syntypes were possibly reared from Filatima pseudogaceilla (Chamb.).

Meniscus ostentator Davis, 1894. Canad. Ent. 26: 321. 8, 9.

Asphragis pulcherrimus Ashmead, 1898. In Dimmock and Ashmead, Ent. Soc. Wash., Proc. 4: 170. 3. 9.

subflava (Davis). N. C., S. C., Ga., Mo., Tex. Host: Caterpillar in Reullia sp.

Meniscus subflavus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 371. 3, 9.

Genus DIRADOPS Townes

Diradops Townes, 1946. Bol. Ent. Venezolana 5: 59.

Type-species: Meniscus bethunei Cresson. Orig. desig.

This large genus is restricted to the New World. All but one of the species are Neotropic.

bethunei (Cresson). Ont. s. to central Ga., w. to n.e. Kans. Host: Heterocampa manteo (Dbldy.). Meniscus Bethunei Cresson, 1869. Canad. Ent. 1: 105. 9. Meniscus! Johnsonii Davis, 1894. Canad. Ent. 26: 323. 9.

TRIBE BANCHINI

This is a small tribe of worldwide distribution. Four of the nine currently recognized genera are represented by Nearctic species. The hosts are caterpillars of Lepidoptera which expose themselves when feeding. Drs. H. K. and M. C. Townes have essentially completed a revision of the Nearctic species and expect to publish it in 1978.

Genus EXETASTES Gravenhorst

Exetastes Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 395.

Type-species: Ichneumon fornicator Fabricius. Desig. by Westwood, 1840.

Leptobatus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 432.

Type-species: Leptobatus ziegleri Gravenhorst. Desig. by viereck, 1914.

Semnophrys Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 158.

Type-species: Exetastes notatus Holmgren. Monotypically included and desig. by Perkins, 1962.

Rhimphalea Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202. Preocc. by Lerder, 1863.

Type-species: Rhimphalea brevicorpa Davis. By subsequent monotypy from inclusion by Davis, 1897.

Icyona Cameron, 1903. Ztschr. System. Hym. Dipt. 3: 340.

Type-species: Iconya rufipes Cameron. Monotypic. The type-species is an objective synonym of E. cameroni Townes.

Exetastes subg. Allexetastes Kokujev, 1904. Rev. Russe d'Ent. 4: 106.

Type-species: Exetastes (Allexetastes) komarovi Kokujev. Desig. by Viereck, 1914. Rhynchexetastes Cameron, 1906. So. African Mus., Ann. 5: 102.

Type-species: Rhynchexetastes violaceipennis Cameron. Monotypic.

Tegona Morley, 1913. Fauna Brit. India, Hym., v. 3, p. 251.

Type-species: Tegona rufipes Morley. Monotypic. The type-species is regarded as a synonym of E. cameroni Townes.

Psuedexetastes Meyer, 1927. Konowia 6: 308.

Type-species: Pseudexetastes diakonovi Meyer. Monotypic and orig. desig.

This is a large genus of Neotropic, Holarctic, Oriental (except East Indies), and Ethiopian distribution. Most of the species occur in unforested terrain or in ecotones between forest and grassland.

Revision: Cushman, 1937. U. S. Natl. Mus., Proc. 84: 243-312.

abdominalis Cresson. Minn., Colo., Alta.

Exetastes abdominalis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 276. 9.

affinis Cresson, Mich., Colo., Oreg.

Exetastes affinis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 277. 9.

albitarsis albitarsis Provancher. N. S. w. to interior Alaska, s. to Pa and Minn.

Exetastes albitarsis Provancher, 1874. Nat. Canad. 6: 78. 9.

Exetastes rugosus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 280. Unnecessary n. name for albitarsis Provancher, which is not preocc. by albitarsus Gravenhorst, 1829.

albitarsis concavus Cushman, n. status. Colo., Ariz.

Exetastes concavus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 281. 8, 9.

albitarsis crassisculptus Cushman, n. status. Alta.?, s.e. Alaska, s. B. C., e. Wash., w. Oreg. Exetastes crassisculptus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 278. ♂, ♀.

alternatipes Cushman. Central N. Mex.

Exetastes alternatipes Cushman, 1937. U. S. Natl. Mus., Proc. 84: 299. 9.

alticola Cushman. Southwestern Colo., Wash.?

Exetastes alticola Cushman, 1937. U. S. Natl. Mus., Proc. 84: 284. 8, 9.

angustoralis Cushman. Que. s. to n. Ga., w. to n. Wyo. and Nebr.

Exetastes angustoralis Cushman, 1937. U. S. Natl. Mus., Proc. 84: 291. 8, 9.

bifenestratus Cushman. D. C., s. Ind., and Kans. s. to s. Fla. and s. Tex.; Cuba, Mexico. Host: Agrotis malefida Gn.

Ichneumon bifasciatus Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 72. 9. Preocc. by Geoffroy, 1785.

Exetastes bifenestratus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 274. N. name for I. bifasciatus Say.

bioculatus Cresson. D. C., n. Va., Ky., n. Ill., n.e. Kans., Tex.

Exetastes bioculatus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 169. S. Rhimphalea brevicorpa Davis, 1897. Amer. Ent. Soc., Trans. 24: 274. Q.

bituminosus Cushman. Mass., n. Minn., and B. C. s. to central S. C., n. Ga., Mo., and N. Mex. Host: Abagrotis alternata (Grt.).

Exetastes bituminosus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 300. 8, 9.

brevicornis Cushman. Eastern S. Dak., Sask., s. Alta.

Exetastes brevicornis Cushman, 1937. U. S. Natl. Mus., Proc. 84: 273. 8, 9.

buccatus Cushman. Colo., Utah, s.w. Calif.

Exetastes buccatus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 271. 8, 9.

caeruleus Cresson. Mont., Colo., s. Yukon, s.e. Alaska.

Exetastes caeruleus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 276. 9.

caliginosus (Walley). Southern Sask., e. Wyo.?, Alta. This species was not included in the revision of Cushman (1937).

Arenetra caliginosa Walley, 1931, Canad. Ent. 63: 168. 3.

callipterus Cushman, Southern Ariz.

Exetastes callipterus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 277. 9.

carinatifrons Cushman, Southwestern Tex., N. Mex., Ariz.; Mexico.

Exetastes carinatifrons Cushman, 1937. U. S. Natl. Mus., Proc. 84: 255. 9.

carinatus Cushman. Southern Tex.

Exetastes carinatus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 258. 9.

coloradensis Cushman. Colo. Cushman did not give complete data for the holotype; according to C. F. Baker's notebook it was collected at Fort Collins, Colo. on June 2, 1894 by R. C. Stephenson.

Exetastes coloradensis Cushman, 1937. U. S. Natl. Mus., Proc. 84: 298. 9.

convergens Cushman. Ont., w. S. Dak., Wyo., Colo., s.w. Alta., w. Mont., Alaska, s. B. C., w. Oreg.

Exetastes subimpressus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 288. ∂, ♀. N. syn. Exetastes nigribasis Cushman, 1937. U. S. Natl. Mus., Proc. 84: 289. ∂, ♀. N. syn.

Exetastes rufobalteatus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 290. ♂, ♀. N. syn. Exetastes angustus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 290. ♀. N. syn.

Exetastes convergens Cushman, 1937. U. S. Natl. Mus., Proc. 84: 291. \colors.

corvinus Cushman. Western Wash., w. Nev., Calif.

Exetastes corvinus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 303. 9.

57

deuteromaurus Dalla Torre. Calif.

Exetastes maurus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 370. 9. Preocc. by Desvignes, 1856.

Exetastes deuteromaurus Dalla Torre, 1901. Cat. Hym., v. 3, p. 71. N. name for maurus Cresson.

dichrous Cushman. Colo., n.e. Calif.

Exetastes dichrous Cushman, 1937, U. S. Natl. Mus., Proc. 84: 302. 9.

dilutipes Cushman. Northwestern Wyo., s.w. Alta., s.w. B. C. Cushman failed to give complete data for the holotype; it was collected on Mt. Norquay, Banff Natl. Park, Alta. in a mountain meadow at an elevation between 5000 and 6000 ft.

Exetastes dilutipes Cushman, 1937. U. S. Natl. Mus., Proc. 84: 285. 8, 9.

erythrogaster Cushman. Northern Colo., s.w. Alta., s. B. C., w. Oreg.

Exetastes erythrogaster Cushman, 1937. U. S. Natl. Mus., Proc. 84: 297. 8, 9.

Exetastes concoloripes Cushman, 1937. U. S. Natl. Mus., Proc. 84: 298. 3, 9. N. syn. Cushman did not give complete data for the holotype; it was collected at North Park, Colo. in July by C. F. Baker.

fascipennis Cresson, Colo., N. Mex., Alta., Ariz.

Exetastes flavitarsis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 277. 8.

Exetastes fascipennis Cresson, 1865, Ent. Soc. Phila., Proc. 4: 278. 9.

Exetastes Cressonii Dalla Torre, 1901. Cat. Hym., v. 3, p. 70. Unnecessary n. name for flavitarsis Cresson, which is not preocc. by E. flavitarsus Gravenhorst, 1829.

flavipennis Cresson. Mass., s. Mich., and w. Idaho s. to w. N. C., s. Ga., and Colo.; Mexico. Incorrectly treated as a subspecies of the Eurasian E. fornicator (Fabricius) by Townes and Townes (1966).

Exetastes flavipennis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 275. 9.

Exetastes anthracinus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 305. \eth , \heartsuit . N. syn. Exetastes geminus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 306. \heartsuit . N. syn.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 137.

flavus Cushman, Northeastern Colo., N. Mex.

Exetastes flavus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 265. 9.

igneipennis Cushman, Northeastern Colo., N. Mex., Ariz.; Mexico.

Exetastes igneipennis Cushman, 1937. U. S. Natl. Mus., Proc. 84: 270. 8.

illinoiensis (Walsh). Southern Mich., Ill., Minn., w. Iowa, Sask., Colo., Alta. Host: Cutworm. Leptobatus illinoiensis Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 148. ♀.

infumatricus Cushman. B. C., w. Wash.

Exetastes infumatricus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 283. 9.

lasius Cushman. Eastern Nebr., Kans., s. Ariz., s.w. Calif. Host: Euxoa (Chorizagrotis) auxiliaris (Grt.).

Exetastes lasius Cushman, 1937. U. S. Natl. Mus., Proc. 84: 258. 8, 9.

matricus Provancher. Que., Mass., Ont., s.w. S. Dak., Alta.

Exetastes matricus Provancher, 1879. Nat. Canad. 11: 213. 9.

nervulus nervulus (Say). N. B. w. to w. Ont. and s.w. S. Dak., s. to w. N. C., n. Ga., and s. Ind. Banchus nervulus Say, 1836. Boston Jour. Nat. Hist. 1: 246. Sex not indicated.

Exetastes rufofemoratus Provancher, 1877. Nat. Canad. 9: 14. 9. N. syn.

Exetastes exploratus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 365. 8, 9.

Exetastes nervulus var. intermedius Cushman, 1937. U. S. Natl. Mus., Proc. 84: 310. d, 9. N. syn.

nervulus niger Cresson, Southwestern S. Dak. w. to s.w. Alta, and w. Oreg., s. to N. Mex. and Ariz.

Exetastes niger Cresson, 1865. Ent. Soc. Phila., Proc. 4: 275. ♂, ♀.

Exetastes persimilis Cushman, 1937, U. S. Natl. Mus., Proc. 84: 306. 8, 9, N. syn.

obscurus Cresson. Mass., s. Man., and s. Wash. s. to e. N. C., n. Ga., Mo., and n.w. Oreg.; n.w. Mexico? Host: Euroa ochrogaster (Gn.).

Exetastes decoloratus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 280. d.

Exetastes obscurus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 281. 9.

ornatus Cushman, N. H., R. I., Conn., N. Y., N. J., Pa., Md., Ohio, Mich. Exetastes ornatus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 286. S. Q.

pallidus Cushman, Northwestern S. Dak., Colo.

Exetastes pallidus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 266. 9.

pectinatus Cushman. Sask., w. S. Dak., Colo., s.w. Alta., n.w. Mont., n.e. Calif. Exetastes pectinatus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 272. 9.

pictus Cushman. Western Tex., s. Ariz.; Mexico.

Exetastes pictus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 260. 9.

pilosus Cushman, Western Oreg.

Exetastes pilosus Cushman, 1940. U. S. Natl. Mus., Proc. 88: 364. 8, 9.

 $\mbox{{\bf propinquus}}$ Cushman. N. J. s. to Fla., w. to central Tenn. and s. Tex. Ecology: Occurs on Solidago flowers.

Exetastes propinquus Viereck, 1910 (1909). In Smith, N. J. State Mus., Rpt. (for 1909), p. 618. Nomen nudum.

Exetastes propinquus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 267. 3, 9.

ridens Cushman. Northern Utah, Ariz., n. Idaho, s. B. C., e. Wash., n.w. Calif. Exetastes ridens Cushman, 1937. U. S. Natl. Mus., Proc. 84: 262. £, 9.

ruficoxalis Cushman, S. Dak., Colo., Alta., Idaho, n. Utah, B. C., Wash.

Exetastes ruficoxalis Cushman, 1937. U. S. Natl. Mus., Proc. 84: 294. 8, 9.

rufipes Cresson. Wyo., Colo., s. Idaho, Wash., Oreg., n. Calif.

Exetastes rufipes Cresson, 1865. Ent. Soc. Phila., Proc. 4: 277. ♀. Exetastes purpureus Cushman, 1937. U. S. Natl. Mus., Proc. 84: 285. ♀.

Taxonomy: Cushman, 1940. U. S. Natl. Mus., Proc. 88: 364.

scutellaris Cresson. Western S. Dak., Colo., N. Mex., s. Alta., n. Utah, s.w. Calif.; n.w. Mexico? Exetastes scutellaris Cresson, 1865. Ent. Soc. Phila., Proc. 4: 279. δ, γ. Banchus candatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 121. γ.

septum Cushman. Southwestern Oreg., w. Calif. Host: Catabena lineolata Wlk. Exetastes septum Cushman, 1937. U. S. Natl. Mus., Proc. 84: 257. 3, 9.

suaveolens Walsh. N. B. s. to n. Ga., w. to s. Alta. Host: Cucullia asteroides Gn. Exetastes suaveolens Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 146. ♂, ♀.

Paniscus Quebecensis Provancher, 1874. Nat. Canad. 6: 106. " \mathfrak{P} " $= \mathfrak{F}$? (\mathfrak{F} misdet.). Provancher's description of the "female" agrees with suaveolens, but according to Barron (1975) the only suaveolens female in the Provancher collections was collected too recently to be a syntype of E. Quebecensis. Because there are five suaveolens males in the Provancher collections which cannot be otherwise excluded as possible syntypes, it would seem logical to conclude that Provancher misdetermined the sex of his E.

Taxonomy: Provancher, 1879. Nat. Canad. 11: 212 (syn.). —Barron, 1975. Nat. Canad. 102: 541-542.

zelotypus Cresson. Western Calif.

Quebecensis "female."

Exetastes zelotypus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 370. 8, 9.

Genus AGATHILLA Westwood

Agathilla Westwood, 1882. Tijdschr. v. Ent. 25: 23.

Type-species: Agathilla fulvopicta Westwood. Monotypic.

Three species are known. The type-species is Mexican, and an undescribed species occurs in Arizona.

bradleyi (Viereck). N. J., n. Va., n. Ohio, s. Ill., n.e. Kans. Host: Cirrophanus triangulifer Grt. This is obviously the species upon which Ashmead (1900) based his description of Agathobanchus; however, because Ashmead misidentified bradleyi as Banchus aequatus Say, Agathobanchus is placed as a synonym of Acroricnus (which see) rather than Agathilla.

Agathobanchus bradleyi Viereck, 1905. Kans. Acad. Sci., Trans. 19: 303. ∂, ♀.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 97. - Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 158-159.

Genus CERATOGASTRA Ashmead

Ceratosoma Cresson, 1865. Ent. Soc. Phila., Proc. 4: 281. Preocc. by Adams and Reeve,

Type-species: Ceratosoma fasciata Cresson, Desig. by Viereck, 1914. Ceratogastra Ashmead, 1900. Canad. Ent. 32: 368. N. name for Ceratosoma Cresson.

Two species are known, C. pulchricolor Aubert having been recently described from Turkestan.

ornata (Say). Mass., s. Ont., s. Wis., and n.e. Calif., s. to n. Fla., s. La., s. N. Mex., and s.e. Calif.; Mexico. Ecology: Numerous specimens in the U.S. Natl. Museum collection were collected by J. C. Bridwell and many of them are labeled as ovipositing in flowers of Ambrosia artemisiifolia; a few of them are labeled as ovipositing in flowers of Eupatorium. Bridwell collected numerous specimens on Solidago, but none of these are labeled as ovipositing in the flowers. According to Dr. H. K. townes (personal communication, 1976) the information on ornata given by Townes (1970) was in part personally communicated to him by Bridwell. According to Bridwell, ornata oviposits in newly hatched larvae of a species of Feltia (generic identification in need of confirmation) which oviposits in flowers of Compositae but whose larvae feed terrestrially (i.e. as cutworms on or in the ground). This account appears to be supported by a number of specimens labeled as being reared from cutworms. Host: Feltia sp.?, cutworm.

Agathis polita Sav. 1836, Boston Jour. Nat. Hist. 1: 225. 8, 9. Agathis ornata Say, 1836. Boston Jour. Nat. Hist. 1: 226. d.

Ceratosoma rubyata Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 366. 9.

Ceratogastra trifasciata Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 21. 9. N. syn.

Taxonomy: Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 21-22. - Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 319-320.

Biology: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 51.

Genus BANCHUS Fabricius

Banchus Fabricius, 1798. Sup. Ent. System., p. 209, 233.

Type-species: Banchus pictus Fabricius. Desig. by Curtis, 1836.

Corynephanus Wesmael, 1849. [Brussels] Acad. Roy. de Belg., Bul. de Cl. des Sci. 16 (1):

Type-species: Bauchus monileatus Gravenhorst. Monotypic. Cidaphurus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 159.

Type-species: Ichneumon volutatorius Linnaeus. By subsequent monotypy from inclusion by Woldstedt, 1877.

Corynephanes(!) Marschall, 1873. Nomencl. Zool., p. 258.

Nawaia Ashmead, 1906. U. S. Natl. Mus., Proc. 30: 184.

Type-species: Nawaia japonica Ashmead. Monotypic.

This is a moderate sized genus of Neotropic (Sonora, Mexico), Holarctic, and Oriental distribution. About half of the Nearctic species are undescribed. Dr. Michael Fitton is preparing a revision of the western Palearctic species.

horealis Cresson, Ont.

Banchus borealis Cresson, 1868. Canad. Ent. 1: 33. "♂" = ♀.

Banchus superbus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 273. d.

SUBFAMILY NEORHACODINAE

This small subfamily includes two genera, only one of which occurs in the Nearctic region.

Genus NEORHACODES Hedicke

Rhacodes Ruschka, 1922. Arch. f. Naturgesch. (ser. A) 88 (5): 138. Preocc. by Koch, 1856. Type-species: Rhacodes enslini Ruschka. Monotypic.

Neorhacodes Hedicke, 1922. Deut. Ent. Ztschr. (for 1922), p. 427. New name for Rhacodes Ruschka.

This is a small Holarctic and Neotropic genus. There appear to be several undescribed Nearctic species. The type-species, which is European, has been reared from the pemphredonine sphecid Spilomena troglodytes (V. d. L.). An undescribed species from W. Va. was reared from a pemphredonine in the galleries of an anobiid in a house timber.

Taxonomy: Horstmann, 1968, Ent. Nachr. 12: 33-36 (final-instar larva and adult of type-species). - Townes, 1971. Amer. Ent. Inst., Mem. 17: 240.

brevicauda Cushman, Ariz.; s. Mexico.

Neorhacodes brevicauda Cushman, 1940, U. S. Natl. Mus., Proc. 88: 526, 8, 9.

longicauda Cushman, Colo., Ariz.

Neorhacodes longicauda Cushman, 1940, U. S. Natl. Mus., Proc. 88: 526, 9.

SUBFAMILY CTENOPELMATINAE

This is a large subfamily; its distribution is worldwide, but it is best represented in the Holarctic Region. The vast majority of the species are thought to be internal parasites of sawfly larvae: however, two species of Lathrolestes (one Neartic and one European) have been reared from primitive microlepidoptera of the family Eriocraniidae. The unreliable nature of Townes' (1970) keys to the genera appears to indicate that this subfamily is very difficult taxonomically.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 53-143 (genera of world).

TRIBE CTENOPELMATINI

Five genera are included in this small Holarctic tribe; four of them have nearctic species. The known hosts are Pamphiliidae.

Genus CTENOPELMA Holmgren

Ctenopelma Holmgren 1857 (1855), Svenska Vetensk,-Akad, Handl. 1: 117. Type-species: Ctenopelma nigrum Holmgren. Desig. by Viereck, 1912.

Xaniopelma Tschek, 1868. Zool.-Bot. Gesell. Wien., Verh. 18: 443. Type-species: Xaniopelma sericans Tschek. Monotypic. The type-species is regarded as a synonym of C. nigrum Holmgren.

Zachresta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 151.
Type-species: Zachresta insignis Woldstedt. By subsequent monotypy from inclusion by Woldstedt, 1877. The type-species is regarded as a synonym of C. lucifer (Gravenhorst).

Diedrus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25; 200.

Type-species: Diedrus areolatus Davis. Desig. by Viereck, 1914 from two species included by Davis, 1898.

Eruma Foerster, 1868 Naturh, Ver. Rheinlande, Verh, 25; 202. Preocc. by Meyer, 1840 and Albers, 1854.

Type-species: Eryma stygium Kriechbaumer. By subsequent monotypy from inclusion by Kriechbaumer, 1891. The type-species is regarded as a synonym of C. nigrum Holmgren.

Holmgrenia Kriechbaumer, 1877. Zool.-Mineral. Ver. Regensburg, Corresp.-Bl. 31: 146. Preocc. by Foerster, 1868.

Type-species: Holmgrenia pulchra Kriechbaumer. Monotypic. The type-species is regarded as a synonym of C. xanthostigma Holmgren.

Kriechbaumeria Dalla Torre, 1885. Naturf. Gesell. Graubuendens, Jahresber. 28: 52. N. name for Holmgrenia Kriechbaumer.

Polyomorus Kriechbaumer, 1894. Ent. Nachr. 20: 60.

Type-species: Polyomorus gagatinus Kriechbaumer. Monotypic. The type-species is regarded as a synonym of C. luteum Holmgren.

Neoeryma Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 169. N. name for Eryma Foerster. Pseudobanchus Szepligeti, 1911. In Wytsman, Gen. Ins., fasc. 114, p. 79.

Type-species: Exetastes nigripennis Gravenhorst. Monotypic.

Polyhomorus Schulz, 1906. Spolia Hym., p. 99. Emend. of Polyomorus Kriechbaumer.

This is a Holarctic genus of moderate size.

areolatum (Davis). N. H.

Diedrus areolatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 324. 9.

slossonae Cushman, Que., N. H., N. Y., Ont., Wash,

Homaspis slossonae Ashmead, 1897. In Slosson, Ent. News 8: 237. Nomen nudum. Homaspis slossonae Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 15. d.

TRIBE PIONINI

Sixteen genera are currently recognized. Only six of them have Nearctic species. It is thought that all members of this tribe oviposit into the egg or early larval instar of their sawfly hosts. The host larva is not killed until after it has reached the prepupal stage and spun its cocoon.

Genus LETHADES Davis

Lethades Davis, 1897. Amer. Ent. Soc., Trans. 24: 204.

Type-species: Adelognathus texanus Ashmead. Monotypic.

Townes (1970) said that this Holarctic genus includes ten Nearctic species, eight of which are undescribed.

Taxonomy: Townes, 1970 (1969), Amer. Ent. Inst., Mem. 13: 70.

kukakensis (Ashmead). Southwestern Alaska.

Trematopyaus kukakensis Ashmead, 1902, Wash. Acad. Sci., Proc. 4: 212. 9.

texanus (Ashmead), Tex.

Adelognathus texanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 442. 9.

Genus HODOSTATES Foerster

Guesia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202. Preocc. by Doubleday, 1848.

Type-species: Gnesia caliroae Rohwer. Monotypically included and desig. by Rohwer, 1915.

Hodostates Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202.

Type-species: Hodostatus brevis Thomson. By subsequent monotypy from inclusion by Thomson, 1883.

Hodostatus Thomson, 1883. Opusc. Ent. 9: 929. Emend.

Esigna Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 425. N. name for Gnesia Foerster.

One Nearctic and one European species are known.

rotundatus (Davis). N. H., N. J., n. Va. Host: Caliroa lorata MacG.?

Trematopygus rotundatus Davis, 1897. Amer. Ent. Soc., Trans. 24: 277. 3, 9.

Gnesia caliroae Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 220. 9. Rohwer erroneously

stated that notes under Hopkins' number 11381 pertaining to the holotype record the species as being reared from a species of Caliroa which feeds on Nyssa sylvatica. Actually the notes record the holotype as having emerged on Aug. 10, 1913 from a larva of Caliroa (="Eriocampoides") collected on July 7. 1913 feeding on Castanea dentata. D. R. Smith has informed me (personal commun., 1976) that Caliroa lorata is the only species of its genus which he knows to feed on Castanea.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 70-71 (syn.).

Genus TREMATOPYGUS Holmgren

Trematopygus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 179.
Type-species: Trematopygus ruficornis Holmgren. Desig. by Viereck, 1912.

Amorphognathon Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 203.

Type-species: Tryphon melanocerus Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1897.

Rhigelus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208.

Type-species: Trematopygus kriechbaumeri Thomson. Monotypically included and desig, by Perkins, 1962. The type-species is regarded as a synonym of Trematopugus melanocerus (Gravenhorst).

Aselasma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

Type-species: Tryphon vellicans Gravenhorst. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Campoporus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: Ichneumon dictator Thunberg. Monotypically included and desig. by Perkins, 1962. The name of the type-species is preocc. by Geoffroy, 1785; I. dictator Thunberg is regarded as a synonym of T. nigricornis (Holmgren).

Volucris Davis, 1897. Amer. Ent. Soc., Trans. 24: 269.

Type-species: Tryphon semirufus Cresson. By subsequent monotypy from inclusion by Davis, 1898.

This is a Holarctic genus of moderate size.

semirufus (Cresson). Que. w. to s.w. B. C., s. to N. J., Ill., Colo., and w. Oreg. *Tryphon semirufus* Cresson, 1864. Ent. Soc. Phila., Proc. 3: 278. 9.

Truphon rufocinctus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 280. 9.

Tryphon tuberculifer Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 103. " \circ " = δ .

Taxonomy: Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 287, 332.

Genus GLYPTORHAESTUS Thomson

Rhaestus subg. Glyptorhaestus Thomson, 1894. Opusc. Ent. 19: 1976.

Type-species: Rhaestus punctatus Thomson. Desig. by Viereck, 1914.

Loxoneurus Schmiedeknecht, 1913. Opusc. Ichn., v. 5, fasc. 34, p. 2711.

Type-species: Loxoneurus thuringiacus Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1913 (fasc. 35, p. 2752).

Oocenteter Cushman, 1935. Wash. Acad. Sci., Jour. 25: 556.

Type-species: Oocenteter tomostethi Cushman. Monotypic and orig. desig.

This is a Holarctic genus of moderate size.

tomostethi (Cushman). Mass., Md., s.w. Iowa. Host: Tomostethus multicinctus (Roh.).

Oocenteter tomostethi Cushman, 1935. Wash. Acad. Sci., Jour. 25: 556. 3, 9.

Biology: McConnell, 1938. Ent. Soc. Wash., Proc. 40: 23.

Genus RHORUS Foerster

Rhorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 195.

Type-species: Tryphon mesoxanthus Gravenhorst. By subsequent monotypy from inclusion by Woldstedt, 1877.

Monoblastus subg. Dolichoblastus Strobl, 1903 (1902) Naturw. Ver. f. Steiermark, Mitt. 39: 52.

Type-species: Monoblastus (Dolichoblastus) flavopictus Strobl. Monotypic.

Cyphanza Cameron, 1909. Bombay Nat. Hist. Soc., Jour. 19: 723.

Type-species: Cyphanza nigra Cameron. Monotypic. The name of the type-species is preocc. in Rhorus by Provancher, 1883 and Ashmead, 1902. Townes' (1970) proposal of the replacement name cameroni was apparently unnecessary because he did not indicate that the synonymy of Monoblastus orientalis Cameron (1909, p. 727) and Cyphanza nigra Cameron (1909, p. 723) by Townes, Townes, and Gupta (1961) had been incorrect. Therefore, R. cameroni Townes should be presumed to be a synonym of R. orientalis (Cameron).

This is a large genus of Holarctic distribution. The tryphonine name Monoblastus was incorrectly applied to some species of Rhorus, particularly before World War II.

Taxonomy: Cameron, 1909. Bombay Nat. Hist. Soc., Jour. 19: 723, 727. —Townes, Townes, and Gupta, 1961. Amer. Ent. Inst., Mem. 1: 217. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 73.

clapini (Provancher). Que., Maine, Wash. Host: Trichiosoma triangulum Kirby.

Tryphon Clapini Provancher, 1876. Nat. Canad. 8: 327. "9" = 3. Tryphon clapinii Dalla Torre, 1901. Cat. Hym., v. 3, p. 293. Emend.

dufresnei (Provancher), Que., Md., N. C.

Tryphon Dufresnei Provancher, 1875. Nat. Canad. 7: 309. 8, 9.

extirpatorius obscurellus (Cresson). Calif. R. extirpatorius extirpatorius (Gravenhorst) is European.

Erromenus obscurellus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 373. ♀.

extirpatorius punctifrons (Davis). Tex.

Monoblastus punctifrons Davis, 1897. Amer. Ent. Soc., Trans. 24: 261. 9.

extirpatorius varifrons (Cresson), Que. s. to Va., w. to Alta.

Tryphon varifrons Cresson, 1868. Amer. Ent. Soc., Trans. 2: 104. d.

Tryphon scutellaris Cresson, 1868. Amer. Ent. Soc., Trans. 2: 104. 9.

Tryphon frontalis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 109. 9.

Tryphon variifrons Dalla Torre, 1901. Cat. Hym., v. 3, p. 303. Emend.

haemorrhoicus borealis (Ashmead). Southeastern Alaska. R. haemorrhoicus haemorrhoicus (Hartig) is Eurasian.

Monoblastus niger Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 213. S. Preocc. in Rhorus by Provancher, 1883.

Phthorina(!) borealis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 225. S.

haemorrhoicus fusculosus (Davis). Que. s. to n. Va., w. to Mich. Host: Caliroa cerasi (L.).

Mesoleius niger Provancher, 1883. Nat. Canad. 14: 9. "?" = 3. Formerly preocc. in

Mesoleius by Gravenhorst, 1829.

Trematopygus fusculosus Davis, 1897. Amer. Ent. Soc., Trans. 24: 277. 8.

Mesoleius nigratus Dalla Torre, 1901. Cat. Hym., v. 3, p. 263. N. name for M. niger Provancher.

Monoblastus caliroae Viereck, 1912. U. S. Natl. Mus., Proc. 42: 151. 8, 9.

Trematopygus eriocampoididis Cushman, 1915. Ent. Soc. Wash., Proc. 17: 135. 8, 9.

hervieuxii (Provancher). Que.

Tryphon hervieuxii Provancher, 1879. Nat. Canad. 11: 254. 9.

586

pilosus (Davis). Mont., w. Wash.

Eryma pilosa Davis, 1897. Amer. Ent. Soc., Trans. 24: 274. d.

tristis (Provancher). Que., Maine, Conn., Ont. Host: Arge clavicornis (F.), Nematus ventralis Say, sawfly on poplar.

Erronemus(!) tristis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 110. 9.

Genus SYMPHERTA Foerster

Sympherta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 196.

Type-species: Tryphon burrus Cresson. Desig. by Viereck, 1914 from two species included by Davis, 1897.

Stiphrosomus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 198. preocc. by Fieber, 1858.

Type-species: Mesoleptus fuscicornis Gravenhorst. Desig. by Viereck, 1914 from six species included by Thomson, 1895. The type-species is Gravenhorst's identification of Ichneumon fuscicornis Gmelin, 1790, p. 2701 (not p. 2684).

Trapezocora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208.

Type-species: Mesoleptus antilope Gravenhorst. Included and desig. by Perkins, 1962.

Atrestes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

Type-species: Catoglyptus (Stiphrosomus) sulcatus Thomson. Monotypically included and desig. by Perkins, 1962.

Campogenes Foerster, 1868. Naturh. Ver. Rheinlande Verh. 25: 209.

Type-species: Mesoleptus antilope Gravenhorst. Monotypically included and desig. by Perkins, 1962.

Provancherella Dalla Torre, 1901. Cat. Hym., v. 3, p. 305.

Type-species: Baryceros rhopalocerus Provancher. Monotypic.

Eustiphrosomus Hincks, 1944. Roy. Ent. Soc. London, Proc. (ser. B) 13: 34. N. name for Stiphrosomus Foerster.

According to Townes (1970) this is a moderately large genus of Holarctic distribution.

Taxonomy: Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 245 (syn.).

-Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 81-82 (spp. referred to genus).

aciculata (Davis). Mont.

Monoblastus aciculatus Davis, 1897. Amer. Ent. Soc., Trans. 24: 262. 8.

burra (Cresson). Que. s. to s.e. Ga., w. to e. Iowa.

Truphon burrus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 108. 9.

Baryceros rhopalocerus Provancher, 1875. Nat. Canad. 7: 269. Barron (1975) appears to have had valid grounds for rejecting the lectotype selected by Gahan and Rohwer

Mesoleptus largus Provancher, 1886, Addit, Corr. Faune Ent. Canada Hym., p. 98, 9.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 33. —Barron, 1975. Nat. Canad. 102: 493. 545.

clinata (Walley). Southwestern Alta.

Stiphrosomus clinatus Walley, 1937. Canad. Ent. 69: 190. 9.

fucata fucata (Cresson). Que. w. to s.w. Alta., s. to N. C., Colo., and n. Ariz.

Mesoleptus fucatus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 99.

Mesoleptus erectus Provancher, 1875. Nat. Canad. 7: 317. 9.

Mesoleptus laetus Provancher, 1879. Nat. Canad. 11: 231. "\$" = δ. Preocc. by Gravenhorst, 1829.

Syndipnus erythrogaster Viereck, 1908. Amer. Ent. Soc., Trans. 33: 385. d.

fucata nigropleuralis (Davis), Nev.

Mesoleptus nigropleuralis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 317. d.

TRIBE PERILISSINI

Eighteen genera are currently recognized; eleven of them are represented by native Nearctic species and a twelfth genus is represented by an introduced species. The tribe is apparently not known from the Australian Region.

Genus SYNOECETES Foerster

Synagrypnus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 203.

Type-species: Synagrypnus blancoburgensis Schmiedeknecht. By subsequent

monotypy from inclusion by Schmiedeknecht, 1914.

Synoecetes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 203.

Type-species: Mesoleptus sedulus Cresson. Desig. by Viereck, 1914 from three species included by Davis, 1897.

Polyrhysia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 204.

Type-species: Tryphon tenuicornis Gravenhorst. Desig. by Viereck, 1914 from two species included by Thomson, 1894.

Polyrhysius Thomson, 1894, Opusc, Ent. 19: 1999, Emend.

This is a small Holarctic genus.

festivus (Cresson). N. H. w. to s. Alta., s. to Md., Ill., and Colo.

Tryphon festivus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 279. "d" = 9.

Mesoleptus sedulus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 97. "∂" = ♀.

Genus COELORHACHIS Townes

Coelorhachis Townes, 1966. In Townes and Townes, Amer. Ent. Inst., Mem. 8: 329.

Type-species: Mesoleptus decorosus Cresson. Monotypic and orig. desig.

According to Townes this is a moderately large genus which is Neotropic; at least one undescribed species occurs in Texas.

Genus ZAPLETHOCORNIA Schmiedeknecht

Zaplethocomia Schmeideknecht, 1912. Opusc. Ichn., v. 5, p. 2519.

Type-species: Ichneumon procurator Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1913.

Nictula Burks, 1952. Ent. Soc. Amer., Ann. 45: 88.

Type-species: Westwoodia fumipennis Provancher. Monotypic and orig. desig.

Parastadus Burks, 1952. Ent. Soc. Amer., Ann. 45: 92.

Type-species: Erigloea opulenta Davis. Monotypic and orig. desig.

This is a small Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 88 (syn.).

fumipennis (Provancher), Que., N. H., N. Y.

Westwoodia fumipennis Provancher, 1875. Nat. Canad. 7: 329. 9.

longipes (Davis). Tex.

Syndipnus longipes Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 288. 9.

opulenta (Davis), N. H., Mass., N. Y., N. J., Md.

Erigloea opulenta Davis, 1897. Amer. Ent. Soc., Trans. 24: 275. 9.

Genus NANIUM Townes

Nanium Townes, 1967. In Walkley, in Krombein et al., U. S. Dept. Agr., Agr. Monog, 2, sup. 2, p. 174.

Type-species: Tryphon capitatus Cresson. Monotypic and orig. desig.

This is a small Neotropic and Nearctic genus.

capitatum (Cresson). N. H. s. to n. Fla., w. to Tex.

Tryphon capitatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 281. d.

Genus TREMATOPYGODES Aubert

Trematopygodes Aubert, 1968. Soc. Ent. de Mulhouse, Bul. 24: 69.

Type-species: Trematopygus aprilinus Giraud. Monoypic.

This is a small Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 92-93 (redescription and additional spp. referred).

frontosus (Davis), n. comb. Wash. Dr. Henry K. Townes kindly informed me (personal commun., 1976) that his most recent notes on the lectotype indicate that this species belongs in Trematopygodes.

Labrossyta frontosa Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 275. ♀ (♂ misdet.?).

oculatus (Davis), Md., Tex.

Oetophorus oculatus Davis, 1897. Amer. Ent. Soc., Trans. 24: 252. 9.

osflavus (Davis), N. Y., Pa., Mich.

Oetophorus osflavus Davis, 1897. Amer. Ent. Soc., Trans. 24: 252. 9.

Genus AECHMETA Townes

Aechmeta Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 93. Type-species: Ctenopelma indotata Davis. Orig. desig.

This is a Nearctic genus; only two species are known.

indotata (Davis). N. Y., Va., Ind., Ill., Iowa, Mo., n.e. Kans., Tex.

Ctenopelma indotata Davis, 1897. Amer. Ent. Soc., Trans. 24: 250. 8, 9.

Taxonomy: Burks, 1952. Ent. Soc. Amer., Ann. 45: 82, 84, 90.

primosa (Davis). N. H., Tex.

Ctenopelma primosa Davis, 1897. Amer. Ent. Soc., Trans. 24: 250. d.

Taxonomy: Burks, 1952. Ent. Soc. Amer., Ann. 45: 82-83.

Genus OETOPHORUS Foerster

Oetophorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 196.

Type-species: Mesoleius stretchii Cresson. Desig. by Viereck, 1914 from four species included by Davis, 1897.

Symphobus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199.

Type-species: Tryphon pleuralis Cresson. By subsequent monotypy from inclusion by Davis, 1898.

This is a small holarctic genus.

Taxonomy: Burks, 1952. Ent. Soc. Amer., Ann. 45: 97-98.

nasoni (Davis). Mich., Ill.

Oetophorus nasoni Davis, 1897. Amer. Ent. Soc., Trans. 24: 251. 9.

Oetophorus nasonii Dalla Torre, 1901. Cat. Hym., v. 3, p. 329. Emend.

Taxonomy: Burks, 1952. Ent. Soc. Amer., Ann. 45: 97-98. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 94.

pleuralis (Cresson). Que.?, Mass., N. Y., N. J., Pa., Md., Va.?, B. C.?

Tryphon pleuralis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 275. 9.

stretchii (Cresson). Colo., s.w. B. C., n. Calif.

Mesoleius Stretchii Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 371. 9.

Genus PERILISSUS Holmgren

Perilissus Holmgren, 1856 (1855). Svenska Vetensk.-Akad. Handl. 75: 63. Type-species: Ichneumon filicornis Gravenhorst. Monotypic.

Spanotecnus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 197.

Type-species: Ichneumon filicornis Gravenhorst. Desig. by Viereck, 1914 from four species included by Thomson, 1883.

Ichnaeops Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 197.

Type-species: Perilissus lutescens Holmgren. Monotypically included and desig. by Perkins. 1962.

Polyoncus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 197.

Type-species: Tryphon erythrocephalus Gravenhorst. Desig. by Viereck, 1914 from three species included by Thomson, 1883.

Udenia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202.

Type-species: Perilissus (Udenia) herrichii Kriechbaumer. By subsequent monotypy from inclusion by Kriechbaumer, 1892.

Exacrodus Foerster, 1868, Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: Exacrodus populans Morley. By subsequent monotypy from inclusion by Morley, 1913. The type-species is regarded as a synonym of P. cingulator (Morley).

Daugna Seyrig, 1935. Paris, Mus. d'Hist. Nat., Mem. (n. s.) 4: 29.

Type-species: Daugna alluandi Seyrig, Monotypic and orig, desig. The type-species is regarded as a synonym of P, testaceoides (Morley).

Pseudochorus Rao, 1953. Indian Forest Rec., New Ser., Ent. 8: 95.

Type-species: Pseudochorus kuriani Rao. Monotypic and orig. desig.

This large genus is known from the Holarctic, Oriental, and Ethiopian Regions, but is represented by only a few species in the latter two regions.

Revision: Burks, 1952. Ent. Soc. Amer., Ann. 45: 94-103.

araius Burks. N. H., Conn., N. Y., N. J., e. S. C., Ont., Mich., Tenn., Colo. Perilissus araius Burks, 1952. Ent. Soc. Amer., Ann. 45: 101. δ, ♀.

bicolor (Cresson). Que. s. to S. C., w. to Mich. and Ala.

Mesoleptus bicolor Cresson, 1864. Ent. Soc. Phila., Proc. 3: 269. d. Erroneously suppressed as a synonym of Prionopoda raficornis Ashmead in the revision of Burks (1952); P. bicolor Cresson) is not preoce. in Perilissus by P. bicolor Brischke, 1878.

Prionopoda ruficornis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 198. d.

Prionopoda rujicornis Ashmead, 1896. Amer. Ent. Soc., 1rans. 25: 196. o

coloradensis (Ashmead). Ont., N. Dak., Sask., Colo., Utah, Ariz., Calif.

Prionopoda coloradensis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 198. 2.

concolor (Cresson). N. B. s. to Va., w. to Mich., Iowa, and Colo. Host: Dolerus sp. Townes (1970) placed concolor as a subspecies of P. filicornis (Gravenhorst); I have compared

specimens of concolor and P. filicornis decoloratus (which see) and believe that concolor is specifically distinct.

Mesoleptus concolor Cresson, 1864. Ent. Soc. Phila., Proc. 3: 270. 9.

Cteniscus concolor Provancher, 1875. Nat. Canad. 7: 139. Preocc. in Perilissus by Cresson, 1864.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 95.

discolor (Cresson). Que. w. to Sask. and Idaho, s. to D. C., Kans., and Colo. Host: Empria coruli (Dvar).

Mesoleptus unicolor Cresson, 1864. Ent. Soc. Phila., Proc. 3: 271. [female].

Mesoleptus discolor Cresson, 1864. Ent. Soc. Phila., Proc. 3: 271. d. In his revision, Burks (1952) incorrectly suppressed discolor as a synonym of unicolor, apparently having regarded page priority as grounds for disregarding Townes' (1945) first revisor decision. Townes (1970) placed discolor as a subspecies of P. Filicornis (Gravenhorst), but Townes (1976, personal commun.) has confirmed my supposition that this was an error; it had been his intention to place Mesoleptus decoloratus Cresson (which see) as a subspecies of P. filicornis.

Puracmon rufum Provancher, 1882. Nat. Canad. 13: 365. 9.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 498. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 95.

filicornis decoloratus (Cresson), n. status. N. S. w. to interior Alaska, s. to Pa., Ill., Colo., and B. C. P. filicornis filicornis (Gravenhorst) is European.

Mesoleptus decoloratus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 265. d.

Perilissus southwickii Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 196. d.

Genus ABSYRTUS Holmgren

Absyrtus Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers af ... Forh. 15: 323. Type-species: Absyrtus luteus Holmgren. Monotypic. The type-species is regarded as a synonym of A. vicinator (Thunberg).

Eczetesis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 196.

Type-species: Perilissus paniscoides Ashmead. By subsequent monotypy from inclusion by Davis, 1897.

This is a small Holarctic genus.

Revision: Cushman, 1924, U. S. Natl. Mus., Proc. 64 (20): 18-20.

arealis Cushman. N. H., N. Y., Pa., Md.

Absurtus arealis Cushman, 1924, U. S. Natl. Mus., Proc. 64 (20): 19. 6. 9.

paniscoides (Ashmead). Vt. w. to Minn., s. to n. Ala. and Tex.

Perilissus paniscoides Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 197. 9 (& misdet.). perilissoides Cushman, Conn., Ohio, Okla,

Absyrtus perilissoides Cushman, 1924, U. S. Natl. Mus., Proc. 64 (20): 19. 8. 9.

Genus LOPHYROPLECTUS Thomson

Lophyroplectus Thomson, 1883. Opusc. Ent. 9: 915.

Type-species: Paniscus oblogopunctatus Hartig. Monotypic.

Two species are known, one European and one Japanese.

oblongopunctatus (Hartig). Ont.; Europe. Introduced in N. S., N. B., Que., Maine and Ont. in 1935 through 1941 without becoming established; introduced again in Maine in 1958 and in Ont. in 1962 and 1964 and apparently established in Ont. Host: Neodipriou sertifer (Geoffroy). The host listed was the target species for the most recent introductions in Ont.

Ichneumon luteator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 259; 9; 308. ♀. Preocc. by Fabricius, 1798.

Paniscus oblongopunctatus Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 272. ♂, ♀.

Taxonomy: Roman, 1916. Zool. Bidr. Uppsala 1: 266, 291. - Oehlke, 1966 (1965). Beitr. z. Ent. 15: 855-856.

Biology: Pschorn-Walcher, 1967. Commonwealth Inst. Biol. Control, Tech. Bul. 8: 9-15, 44. -Griffiths, Rose, and Bird, 1971. Commonwealth Inst. Biol. Control (Trididad), Tech. Commun. 4: 107, 157, 158, 160-161. - Rose, 1977 (1976). Canad. Ent. 108: 1395-1398.

Genus OPHELTES Holmgren

Opheltes Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forh. 15: 323. Type-species: Ichneumon glaucopterus Linnaeus, Monotypic. Nephopheltes Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 16.

Type-species: Nephopheltes japonicus Cushman. Monotypic and orig. desig.

This is a Holarctic genus including only two species.

glaucopterus barberi Cushman. Newfoundland (insular) w. to Alaska, s. to S. C., n. Ga., s.e. Kans., Colo., and s.w. Oreg. Host: Cimbex americana Leach, O. glaucopterus glaucopterus (Linnaeus) is Eurasian, and O. glaucopterus apicalis (Matsumura) occurs in northeastern Asia.

Campoplex flavipennis Provancher, 1874 (May). Nat. Canad. 6 (5): 143. 9. Preocc. by Cresson, 1874 (January).

Opheltes glaucopterus var. barberi Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 16. 9. Opheltes glaucopterus galbipennis Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 54. N. name for C. flavipennis Provancher. N. syn.

Biology: Orcutt and Aldrich, 1892, S. Dak, Agr. Expt. Sta., Bul, 30: 5, -Fyles, 1894, Ent. Soc. Ontario, Ann. Rpt. 25: 54, 55. — Comeau, 1944. Ann. de L'Acfas (Montreal) 10: 103.

Morphology: Whitmarsh, 1910. Ent. Soc. Amer., Ann. 3: 197, 204-206, 208.

Genus LATHROLESTES Foerster

Lathrolestes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 196.

Type-species: Tryphon clypeatus Zetterstedt. Desig. by Viereck, 1914 from seven species included by Thomson, 1883

Laphuroscopus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 197.

Type-species: Tryphon gorskii Ratzeburg. Desig. by Viereck, 1914 from three species included by Thomson, 1883.

Homalomma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 198.

Type-species: Homalomma caliroae Rohwer, Included and desig, by Rohwer, 1915.

Ecclinous Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 201.

Type-species: Tryphon orbitalis Gravenhorst. Desig. by Viereck, 1914 from seven species included by Thomson, 1883.

Camporuchus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208.

Type-species: Lathrolestes marginatus Thomson. Monotypically included and desig. by Townes, 1970.

Luphyroscopus Thomson, 1883. Opusc. Ent. 9: 915. Emend.

Lathrolestus Thomson, 1883. Opusc. Ent. 9: 916. Emend.

Tryphonopsis Brauns, 1898. Ver. Freunde Naturgesch. Mecklenburg, Arch. 51: 62.

Type-species: Tryphonopsis ensator Brauns. Monotypic. Ritzemabosia Smits van Burgst. 1912. Tijdschr. v. Ent. 55: 269.

Type-species: Ritzemabosia meridionalis Smits van Burgst. Monotypic.

Culmina Benoit, 1955. Mus. Roy. Congo Belge, Tervuren, Ann. (ser. 8, Sci. Zool.) 38: 32.
Type-species: Culmina ruwenzorica Benoit, Monotypic and orig. desig.

This is a large genus of Neotropic, Holarctic, Oriental, and Ethiopian distribution. The majority of the species occur in the Holarctic Region. Most species presumably parasitize sawflies, but a European species identified as $L.\ clypeatus$ (Zetterstedt) has been reared from two species of the primitive microlepidopteran family Eriocraniidae and $L.\ mnemonicae$ (Rohwer) has also been reared from an eriocraniid.

caliroae (Rohwer). Northern Va., n. Ala. Host: Caliroa sp. on Nyssa sylvatica, Caliroa sp. on Quercus prinus.

Homalomma caliroae Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 218. 9.

Homalomma eriocompoides Rohwer, 1915. U. S. Natl. Mus., Proc. 29: 219. 9.

constrictus (Provancher). Que.

TRIBE SCOLOBATINI

This small Neotropic, Holarctic, and Oriental tribe includes three genera, two of which are represented in North America.

Genus PHYSOTARSUS Townes

Physotarsus Townes, 1966. In Townes and Townes, Amer. Ent. Inst., Mem. 8: 139, 330. Type-species: Tryphon maculipennis Cresson. Orig. desig.

This is apparently a moderate-sized genus with one or more undescribed species occurring in Texas.

Genus SCOLOBATES Gravenhorst

Scolobates Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 357.

Type-species: Scolobates crassitarsus Gravenhorst, Desig, by Westwood, 1840.

Aglyphus Giraud, 1872. Soc. Ent. de France, Ann. (ser. 5) 1: 411.

Type-species: Aglyphus nigripennis Giraud. Monotypic. Parabraconia Schmiedeknecht, 1914. Opusc. Ichn., v. 5, p. 2803.

Type-species: Parabraconia nigripennis Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1925. of S. nigripennis (Giraud); both names are preocc. by Scolobates nigripennis Sichel, 1860. The type-species is regarded

as a synonym of S. nigripennis (Giraud); both names are preocc. by Scolobates nigripennis Sichel, 1860.

This is a small Holarctic and Oriental genus.

auriculatus (Fabricius). N. H., Mass., N. Y., Pa., Md., Ont., Mich., Tex., n. B. C. Ecology: Three specimens in the U. S. Natl. Museum collection were collected in July from snow at an altitude of 7000 ft. at London Hill Mine, Bear Lake, B. C. Host: Arge clavicoruis (F.), A. pectoralis (Leach), A. scapularis (Klug).

Ichneumon auriculatus Fabricius, 1804. Systema Piezatorum, p. 69.

Ichneumon auriculator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 266; 9: 323. Emend.

Ichneumon elevator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 266; 9: 323. 3. Preocc. by Panzer, 1799.

Scolobates crassitarsus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 360. 3, 9.

Scolobates hylotomae Kriechbaumer, 1877. Ent. Nachr. 3: 135. 8, 9.

Prionopoda canadensis Harrington, 1892. Canad. Ent. 24: 98. 9.

Scolobates auriculatus var. niger Roman, 1917. Ent. Tidskr. 38: 273. 9. Syn.?

Scolobates auriculatus var. nigrifacies Teunissen, 1953. Tijdschr. v. Ent. 96: 16. 9. Syn.?

Taxonomy: Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers af ... Forh. 15: 330 (syn.). —Roman, 1912. Zool. Bidr. Uppsala 1: 235, 252 (syn.). —Bauer, 1961. Beitr. z. Ent. 11: 745 (syn.).

Biology: Pschorn-Walcher and Kriegl, 1965. Ztschr. f. Angew. Ent. 56: 268-269.

TRIBE MESOLEIINI

This is a large Holarctic tribe. Taxonomically, it is possibly the most difficult group of Ichneumonidae. This seems to be reflected in the fact that to use Townes' (1970) key to the genera it is particularly necessary to have a collection including reliably identified representatives of the various genera.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 104-127 (genera of world).

Genus OTLOPHORUS Foerster

Otlophorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202.

Type-species: Tryphon vepretorum Gravenhorst. Desig. by Viereck, 1914 from five species included by Thomson, 1895.

Negles Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 204.

Type-species: Tryphon vepretorum Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1897.

Dialges Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: Tryphon vepretorum Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1897.

Aeolometis Foerster, 1868, Naturh. Ver. Rheinlande, Verh. 25: 207.

Type-species: Scolobates italicus Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1892.

Tachyporthus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: Scolobates italicus Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1901.

Holmgrenia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 213.

Type-species: Holmgrenia lanceolata Davis. Desig. by Viereck, 1914 from six species included by Davis, 1898.

Aelometis Thomson, 1894. Opusc. Ent. 19: 2034. Emend.

Otlophorinus Hincks, 1944. Roy. Ent. Soc. London, Proc. (ser. B) 13: 35.

Type-species: Mesoleius pulverulentus Holmgren. Orig. desig.

This a moderate-sized genus of Holarctic distribution.

fissus (Provancher). Que., N. Y., R. I.

Mesoleius fissus Provancher, 1879. Nat. Canad. 11: 257. 3.

lanceolatus (Davis), N. Y., Ont., Colo., w. Wash.

Holmgrenia lanceolata Davis, 1898 (1897), Amer. Ent. Soc., Trans. 24: 294. 3. 9.

Genus ATITHASUS Foerster

Atithasus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: Atithasus stellarius Davis, By subsequent monotypy from inclusion by Davis, 1898.

A single species is known.

bimaculatus (Ashmead). N. H., Pa., Va., Ind., Ill., Iowa, e. Kans., Tex.

Grypocentrus bimaculatus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 199. 9. Atithasus stellarius Davis, 1898 (1897), Amer. Ent. Soc., Trans. 24: 291. 3. 9.

Genus BARYTARBES Foerster

Polytrera Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202.

Type-species: Mesoleius (Barytarbus) laeviusculus Thomson. Desig. by Viereck, 1914 from two species included by Thomson, 1892.

Isodiaeta Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 204.

Type-species: Tryphon segmentarius Gravenhorst. Monotypically included and desig. by Perkins, 1962. The type-species is Gravenhorst's identification of Ichneumon segmentarius Fabricius. Hubristes Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 210, Preocc. by Reichenbach,

Type-species: Tryphon adpropinguator Gravenhorst. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Barytarbes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.

Type-species: Tryphon colon Gravenhorst. Desig. by Viereck, 1914 from five species included by Thomson, 1883.

Barytarbus Thomson, 1883, Opusc. Ent. 9: 931. Emend.

Polytreres Thomson, 1892. Opusc. Ent. 17: 1873. Emend.

This is a Holarctic genus of moderate size.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 116 (Nearctic spp. assigned). antennatus (provancher). Que., N. Y.?

Mesoleius antennatus Provancher, 1877. Nat. Canad. 9: 15. 9. Barron's (1975) rejection of the lectotype selected by Gahan and Rohwer (1918) appears to be valid inasmuch as Provancher did not indicate that he had more than one specimen.

Mesoleius antennatus Provancher, 1879. Nat. Canad. 11: 260. 9. Preocc. by Provancher, 1877; Provancher's 1879 description is apparently an inadvertent second description as a new species of the same specimen he described in 1877.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 31. - Barron, 1975. Nat. Canad. 102: 426.

compos (Davis). "Canada," Mich.

Alexeter compos Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 321. S.

honestus (Cresson). Que., N. H., Conn., N. Y., N. J., Pa., Ill.

Mesoleptus honestus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 98. 8, 9. Mesoleptus albifrons Cresson, 1868. Amer. Ent. Soc., Trans. 2: 98. "?" = 8.

provancheri (Cushman). Que., N. Y., Pa., Mich.

Mesoleptus variabilis Provancher, 1883, Nat. Canad. 14: 7. 9. Preocc. by Provancher, 1875. Mesoleptus provancheri Cushman, 1917. Ent. Soc. Wash., Proc. 19: 165. N. name for M. variabilis Provancher, 1883.

Genus ALEXETER Foerster

Alexeter Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199.

Type-species: Mesoleptus ruficornis Gravenhorst. Desig. by Viereck, 1914 from three species included by Woldstedt, 1877. The type-species is regarded as a synonym of A. sectator (Thunberg).

Adranes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 205. Preoce. by LeConte, 1850. Type-species: Tryphon multicolor Gravenhorst. Monotypically included and desig. by Townes, 1967.

Zemiophron Foerster 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: Mesoleius laevissimus Strobl. Monotypically included and desig. by Perkins. 1962.

This is a large Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 116-117 (Nearctic spp. assigned). canaliculatus (Provancher). Que. w. to s.e. Alaska. s. to D. C. and n. Calif.

Paniscus canaliculatus Provancher, 1874. Nat. Canad. 6: 105. 3. Paniscus albotarsatus Provancher, 1874. Nat. Canad. 6: 106. 3.

difficilis (Davis). Colo., s.w. Alta., w. Wash.

Rhaestes difficilis Davis, 1898 (1897), Amer. Ent. Soc., Trans. 24: 312. d.

innoxius (Cresson). Nev., s. B. C., w. Wash.

Mesoleptus innoxius Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 371. d.

lucens (Provancher). Que., N. H., N. C., n. Ga., s. Mich.

Campoplex lucens Provancher, 1874. Nat. Canad. 6: 144. d. Barron (1975) regarded the holotype of C. lucens as being lost; therefore, application of the name should be based upon the synonymy of Townes (1945).

Mesoleptus riparius Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 315. ♂, ♀. Hadrodactylus affinis Ashmead, 1902 In Slosson, Ent. News 13: 6. Nomen nudum.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 514. —Barron, 1975. Nat. Canad. 102: 499-500.

luteifrons (Cresson), Southwestern N. W. T.

mellipes (Provancher). Northern Ont., s. Alta., B. C.

Coleocentrus mellipes Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 113. S. Contrary to Barron (1975) the lectotype was selected by Walley (1938).

Protarchoides pallipes Cushman, 1927. U. S. natl. Mus., Proc. 72 (13): 15. 9.

Taxonomy: Walley, 1938, Canad. Ent. 70: 231 (syn. and lectotype selection). - Barron, 1975. Nat. Canad. 102 508.

pallidicornis (Walley). Northern Ont.

Protarchoides pallidicornis Walley, 1938, Canad. Ent. 70: 231, 9.

Genus LAMACHUS Foerster

Zaphthora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: Tryphon eques Hartig, Monotypically included and desig, by Townes, Momoi, and Townes, 1965.

Adexioma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: Adexioma angularia Davis. By subsequent monotypy from inclusion by Davis, 1898.

Lamachus Foerster, 1868, Naturh, Ver. Rheinlande, Verh. 25: 206

Type-species: Tryphon lophyrum Hartig. Desig. by Viereck, 1914 from six species included by Thomson, 1892, Included by Thomson as T. lophyrorum "Hartig," lophyrorum being an emendation of Ratzeburg, 1844. The type-species is regarded as a synonym of L. frutetorum (Hartig).

Torocamptus Schmiedeknecht, 1913. Opusc. Ichn. v. 5, p. 2797.

Type-species: Tryphon eques Hartig. By subsequent monotypy from inclusion by Schmiedeknecht, 1914.

Bathyglyptus schmiedeknecht, 1913. Opusc. Ichn., v. 5, p. 2802. Preocc. by Case, 1911. Type-species: Bathyglyptus australis Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1914.

This is a Holarctic genus of moderate size. The species parasitize Diprionidae.

albopictus Cushman. Japan. Introduced in N. B. in 1939, but the small number of individuals (22) released would seem to have precluded establishment. The target species for the release in N. B. was Gilpinia hercyniae (Htg.).

Lamachus albopictus Cushman, 1937. Insecta Matsumurana 12: 37. 8, 9.

angularius (Davis), Southern Idaho, Wash., w. Oreg. Host: Neodiprion scutellatus Roh., N. tsugae Midd.

Adexioma angularia Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 284. 9.

Lamachus oregon Cushman, 1939. Wash. Acad. Sci., Jour. 29: 401. ∂, ♀.

coalitorius (Thunberg). Europe. Introduced in N. S., N. B., Que., N. H., Vt., Mass., and Ont. between 1936 and 1940, apparently without becoming established. The target species for releases in North America was Gilpinia hercuniae (Htg.).

Ichneumon coalitorius Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8:

278; 9; 358. [male].

Mesoleius opthalmicus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 162. d. In placing the names below in synonymy with ophthalmicus, Oehlke (1966) apparently overlooked the fact that Roman (1912) had suppressed ophthalmicus as a synonym of coalitorius.

Mesoleius marginatus Brischke, 1871. Phys.-Oekonom. Gesell. Koenigsberg. Schr. 11: 74. d. N. syn.

Mesoleius spectabilis Holmgren, 1876. Svenska Vetensk.-Akad. Handl. (n. f.) 13: 8. 9. N.

Taxonomy: Roman, 1912. Zool, Bidr. Uppsala 1: 244, 291. —Oehlke, 1966 (1965), Beitr, z. Ent. 15: 861-862.

Biology: Morris, Cameron, and Jepson, 1937. Bul. Ent. Res. 28: 369. - Finlayson and Finlayson, 1958. Canad. Ent. 90: 587-589.

contortionis Davis. Maine s. to n. Fla., w. to Wis. and Ark. Host: Gilpinia hercyniae (Htg.), Neodiprion abietis (Harris), N. lecontei (Fitch), N. nanulus nanulus Schedl, N. pratti banksianae Roh.

Lamachus! contortionis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 284. 9. Lagarotis diprioni Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 217. 3, 9.

eques (Hartig). Europe. Introduced in N. B., Que., Vt., N. J., and Ont. between 1936 and 1941, apprently without becoming established. Host: Neodiprion sertifer (Geoff.). The host cited was one of the target species for releases in North America; the other target species was Gilpinia hercyniae (Htg.).

Tryphon eques Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 272. [male,

female].

Mesoleius silvarum Holmgren, 1876. Svenska Vetensk.-Akad. Handl. (n. f.) 13: 10. ♂, ♀.

Taxonomy: Oehlke, 1966 (1965). Beitr. z. Ent. 15: 858-859.

Biology: Pschorn-Walcher, 1967. Commowealth Inst. Biol. Control, Tech. Bul. 8: 15-18, 45.

lophyri (Ashmead). N. B., Maine, N. H., Mass., Ont., Wis. Host: Neodiprion abietis (Harris), N. abbotii (Leach), N. nanulus nanulus Schedl, N. pinetum (Nort.), N. pinusrigidae (Nort.), N. pratti banksianae Roh.

Neoeryma lophyri Ashmead, 1898. In Dimmock and Ashmead, Ent. Soc. Wash., Proc. 4: 169. ら、?

ruficoxalis (Cushman). Maine, Ont., s. Man. Neodiprion abietis (Harris).

Labrossyta ruficoralis Cushman, 1919. Ent. Soc. Wash., Proc. 21: 118. 9.

Lamachus ruficornis(!) Cushman, 1939. Wash. Acad. Sci., Jour. 29: 400.
tsugae Cushman, Que., Ont., w. Oreg. Host: Neodiprion abbotii (Leach), N. nanulus nanulus

sugae Cushman. Que., Ont., w. Oreg. Host: Neodiprion abbotii (Leach), N. nanulus nanulus Schedl, N. pratti banksianae Roh., N. tsugae Midd.

Lamachus tsugae Cushman, 1939. Wash. Acad. Sci., Jour. 29: 401. 8, 9.

virginianus (Rohwer). Mass., Va., e. N. C., Ohio. Host: Neodiprion lecontei (Fitch). Probably not distinct from L. lophyri (Ashmead).

Lagarotis virginianus Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 218. d.

Genus NEOSTROBLIA Heinrich

Neostroblia Heinrich, 1953, Wien, Ent. Gesell., Ztschr. 38: 211.

Type-species: Mesoleius ruficollis var. pseudolituratus Strobl. Monotypic and orig. desig.

This Holarctic genus includes two described species. The type-species is European.

incessans (Davis). N. H., Colo.? The lectotype was collected on Mt. Washington, N. H. by A. T. Slosson, apparently in the "alpine region."

Rhaestes incessans Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 311. 9.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 119.

Genus SCOPESIS Foerster

Scopesis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

Type-species: Mesoleius guttiger Holmgren. Desig. by Viereck, 1914 from eleven species included by Thomson, 1894. Perkins (1962) regarded the type-species as being a synonym of S. bicolor (Gravenhorst).

Scoparches Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 211.
